12-PORT CROSS-CONNECT BLOCKS

5811089I

25811089I

Ideal for smaller cross-connect applications. Printed circuit board design provides high-quality transmission while the removable 89D brackets act as a workbench to facilitate punch down. 110 style combines printed circuit board wired jack fields with new generation, 110 wire termination 66 style block provides upgraded cross-connection between modular jacks and 66-block termination. Available in Categories 5e and 3, 110 style along with Category 3, 66 type termination. Capacity: 50 pair.

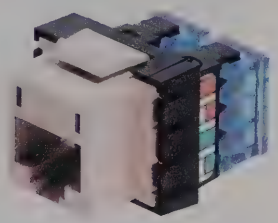
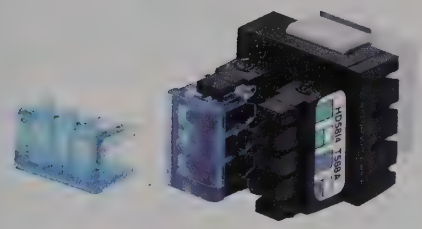
CATEGORY 5e ENHANCED HIGH-DENSITY MODULAR JACKS



HD5e-Front



HD5e-Back

- **Exceeds Upcoming TIA Category 5e Requirements**
- **Mount up to 6 Jacks in a Single Faceplate**

HD5 series 8-position modular jacks provide high-quality, reliable transmission performance which exceeds Category 5 requirements. Tested to 350MHz. Surpass pending standards for NEXT, Power Sum NEXT, FEXT, Return Loss, and Attenuation for a margin of safety over proposed Category 5e requirements. Specially designed for use with **PC5E series** patch cords and category 5e patch panels to maximize system performance. Compact size allows up to 6 jacks to fit in a multiport faceplate. **Contractor quantities sold in packs of 25 below.**

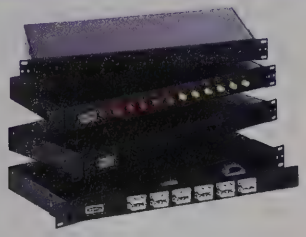
FRIENDLY, QUALITY SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

RACK MOUNT OPTICAL PATCH PANELS



Rack mounting is recommended for better cable management and closer positioning of the active equipment to the panel. **FPR series** rack mount optical patch panels are constructed of 16-gauge CRS steel, coated with electrostatically applied powder paint. Pre-loaded in ST or SC versions. The "technician's side" of the panels have facilities for securing the cable, storing fiber slack and arranging and identifying the terminated fibers. The "user's side" of the panels have similar features for the management of optical patch cords. Panels occupy one rack position and have a swing-out fiber management tray for full-front access. Dimensions: 11W x 17L x 1.75"H.

FPR SERIES RACK MOUNT PATCH PANELS

(8114) (ne08354)

WALL MOUNT OPTICAL CABINETS AND ADAPTER PANELS

NEW

Ideal where rack space or wiring closet space is limited. Base unit cabinets accept either 2 or 4 ST or SC adapter 6-packs for field design and custom installation to your specs. Single-door, extended front cover for full patch cord protection. Low-profile panel depth conserves wall space. High quality 16-ga. cold-rolled steel covered with black electrostatically-coated powder paint.

Stock No.	Type	Ports	W x H x D	Each

FJ SERIES OPTI-JACK™ FIBER-OPTIC CONNECTORS

Plug Jack

- **Comprised of a Plug and Jack**
- **Adapterless**
- **Mates with a Simple Push and Click**
- **50% Smaller than Existing Duplex SC Connectors**
- **Provides up to 40 lbs. of Coupling Strength**

FJ series Opti-Jack™ connectors are the first fiber connectors specifically designed for fiber-to-the-desk and backbone cabling applications. For use with 62.5/125µm multimode glass optical fiber cable. Modular design simplifies upgrades from copper to fiber. Opti-Jack™ connectors can be used in all Mini-Com™ outlets *(order separately on this page)*, modular patch panels, and Opticom™ enclosures *(order separately on this page)*. Meet or exceed optical and mechanical requirements of TIA/EIA-568-A. Designed for simple field termination. *(Order termination kit separately on this page)*. Do not require preterminated patch cords. Available in single-mode, duplex and multi-mode and pre-polished multimode styles. Each duplex jack includes housing, cover, two ferrule assemblies, two crimp sleeves, one dust cap, two 900 µm boots (for buffered fiber) and two 3.0mm boots (for jacketed fiber). Duplex plug includes plug housing, plug boot, two plug ferrule assemblies, two crimp sleeves and two dust caps. Plug-to-plug multi-mode adapter mates 2 Opti-Jack™ multi-mode plugs. Used for calibration of test cables and equipment and for plug-to-plug cross contacts. Includes 2 dust caps. Insertion loss: 0.3dB average. Durability: 500 cycles minimum. Temperature cycling: -25°C to +70°C.

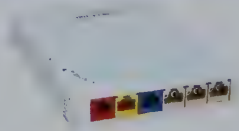
CB SERIES MINI-COM™ MULTIMEDIA/FIBER OUTLETS



CBXF6EI-A

- **Wall Mount Over Single- or Double-Gang**
- **Built-In Spool Stores Excess Fiber Per TIA-568A**

CB series outlets can be used with Opti-Jack™ fiber optic connectors *(order separately on this page)* or Pan-Way™ raceway for surface mount applications. Cable entry from side and rear knockouts and from opening in bottom of base. Accept Mini-Com™ modules for UTP (including Category 5), fiber-optic and coax cables. Unique fiber spool design secures cables in place. **Type CBXF6EI-A** and **type CBXF12EI-A** hold Mini-Com™ connector modules or Opti-Jack™ fiber-optic connectors. Include mounting screws and adhesive backing. Outlet kit **type CBFX6KITEI** upgrades **type CBXF6EI-A** to accept 12-connector modules. Includes bridge, deep cover and tamper-resistant screw. Type numbers listed in table below are for electrical ivory color. Also available in off-white, light gray, white, and black; *contact your local Newark sales office for details.*

(17739) (ne10795)

OPTICOM™ FIBER-OPTIC/MULTIMEDIA ENCLOSURES, DRAWERS AND PANELS

Wall Mount/Rack Mount

Type FWM wall mount enclosures keep optical fiber cabling neat and organized for easy maintenance. They can also be customized to meet multimedia requirements with Mini-Com™ snap-in connector modules for Category 5 UTP, ScTP, coax, and can be used with Opti-Jack™ fiber-optic connectors cables , *(order separately on this page)*. Ideal for building entrances, equipment rooms, main and immediate cross-connects and telecommunications closets. Available in up to 72-port configurations, with or without ST adapter panels. **Type FRM** rack mount enclosures are specially designed for copper-based installations which need to be expanded to accommodate optical fiber. Used with Opti-Jack™ fiber-optic connectors as well as single-mode and multimode SC or ST fiber terminations. Can be customized to meet exact multimedia requirements with Mini-Com™ snap-in connector modules. Support as many as 144 optical fiber or multimedia terminations. Designed to work with the complete Pan-Net™ cable management system. Also available in black and light gray. **FMD series** drawers slide out the front to provide access to fiber connections, splice tray, and cable storage. Accepts either 6-port fiber adapter panels or 6-port multimedia modular panels. Use for both single and multimode fiber terminations. Drawers include fiber optic cable routing accessory kit, rear cover. Adapter and multimedia panels snap into front of drawers. Fiber optic multimode/single-mode adapters have phosphor bronze sleeves.

MINI-COM® ALL METAL MODULAR PATCH PANELS

NEW

All metal modular patch panels are ideal for screened twisted pair (ScTP) applications. Accepts all snap-in Mini-Com® connector modules (UTP, ScTP, coax and fiber) including OPTI-JACK™ fiber connector modules. Modules snap directly into panel, faceplates not required. Mounts to standard EIA 19″ racks. Ideal for Catagory 5 UTP, multimedia applications. TIA/EIA-606 compliant white write-on areas help identify panels and ports. **Type CP72BL** ultra hgh density patch panel requires rear cable management to prevent twisting.

P110BW300-X

Pan-Punch™ bases feature an exclusive deep channel that provides more space for the cable jacket. Align UTP cable for termination on to Pan-Punch™ 110 connecting blocks, *order separately on this page*. Available with or without legs. Legs allow cables to be routed behind bases. Bases without legs are for frame mount or rack mount wiring behind bases. Help maintain pair twists to within ½″. UL94V-0 high-impact polycarbonate material. UL listed, CSA certified.

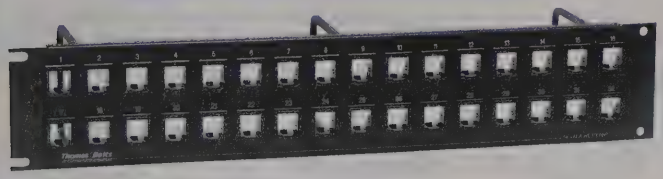
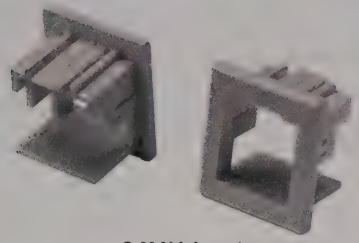
O.M.N.I. PATCH PANELS AND INSERTS



O.M.N.I. Panel



O.M.N.I. Insert

The O.M.N.I. system provides the user flexibility, ease of installation, and interchangeability. Any O.M.N.I. jack will fit in all O.M.N.I. information outlets and patch panels. Both information outlets and patch panels can be color coded with a choice of 9 colors using jacks or a combination of jacks and inserts in blank O.M.N.I. panels. Both voice and Category 5 data applications can be combined in information outlets and patch panels. Additional inserts for RJ-11, BNC, and fiber are available; *contact your local Newark sales office.*

O.M.N.I. panels are designed so each port accepts a variety of Nevada Western® connectors and couplers, including standard 6P or 8P jacks, looping jacks, jacks with shorting bars, coaxial BNC connectors, SMA/ST fiber-optic couplers and F connectors. 3 built-in vertical wire minders on the back of the panel provide strain relief and tie-down capabilities. Individually wired jacks allow convenient activation, deactivation, and troubleshooting. The panel can be field-wired to T568A or T568B standards or customized to specific wiring needs. These high-density panels allow 16, 24, 32 or 48 ports in a minimum of space. When the screened O.M.N.I. connector is inserted into the modified panel, the body of the connector makes contact with the grounding strip. This completes the ground circuit, which is necessary to make a screened system operate properly. *Order Catagory 5 O.M.N.I. jacks separately on page 1303.*

T-1 AND D-3 PATCH PANELS

023-248X-24-T1

Specifically designed to interface with T-1 and D-3 Digital Communications Channel Bank Systems. Separate 25-pair terminations of transmits and receives for quicker installation. Shorted and non-shorted 4-wire 8-position jacks wired RJ-48X or RJ-48C (pins 1, 2, 4 and 5) on the T-1 panel. 4-wire 8-position jacks wired RJ-48S (pins 1, 2, 7 and 8) on the D-3 panel. All 24 transmit pairs are terminated on a single RJ-21X (50-pin) connector and all 24 receive pairs are terminated on a separate RJ-21X (50-pin) connector. UL listed, CSA certified. All models offer 24 ports and mount in 1U rack space (1.75″). Dimensions: 1.75H x 19W x 2.6″D.

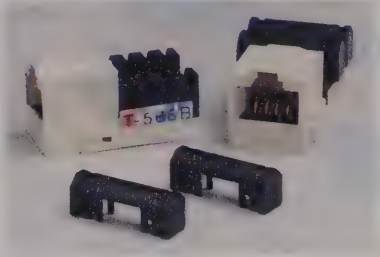
O.M.N.I. 110 CATEGORY 5 JACKS



- **Exceeds UL Category 5 Standards**
- **Sleek 4 Pair 110-Termination Field**
- **Provides Outstanding Mounting Flexibility**
- **Industry Standard 110 Termination Technique**

Connector easily terminates with any 110 punch down tool, or pair of channel locks or pliers. Cable cutout allows jack to be terminated at a 90° angle to the cable for mounting in tight places. Lead frame construction accomplishes Cat. 5 without requiring a PC card. Features the highest density face plates available using O.M.N.I. configurable single and dual gang outlets. Other colors than are listed are available; *contact your local Newark sales office.*

EMI/RFI SCREENED CATEGORY 5 JACKS

Screened O.M.N.I. jacks offer a new level of convenience for screened modular jacks. Screened jacks offer strain relief, color-coding strip for wiring either 568A or 568B, a short dressing block that allows maintaining pair twist integrity to less than ½″, and overall connector screening. Entire connector is wrapped with 0.01″ thick tin-plated brass. The dressing block fits entirely within the wall of the connector to completely screen out EMI/RFI from the connector when terminated. Fits all O.M.N.I. receptacles. UL listed, CSA certified.

UDC10 BASE 2 AND TOKEN RING BALUNS

The universal data connector balun is used to match the impedance of Type 1 cabling and unshielded twisted pair (UTP), which allows users to integrate UTP lobes into their shielded cabling scheme. Plug compatible to IBM® part numbers 6091000 and 8310574, and Nevada Western® part number 037-600-04-1. Available in Token Ring wiring (pins 3, 4, 5, and 6) and 10Base-T wiring (pins 1, 2, 3, and 6). Impedance matching for full-distance cable runs in LAN environments.

COAXIAL BALUNS

Convert RG62 coax cable to twisted pair and vice versa. Baluns match impedance of RG62 coax cable to the impedance of 24AWG data grade unshielded twisted pair (UTP) wire. Superbaluns help filter common mode noise and balance signal for maximum distances of up to 2000′. Standard baluns are rated for maximum distances of up to 1500′. **Sold in packages of 2.**

PATCH CORDS/BALUNS AND CABLE

PATCH CORDS/CABLE ASSEMBLIES

Patch cord has an enhanced data connector on each end and utilizes Type 6A cable. Can be used to make moves and changes at the distribution patch panel, or as an extension cable in work areas. The PC adapter cable consists of Type 6A cable with an enhanced data connector on one end and a 9-pin D-Sub connector on the other. Can be used in Token Ring applications to connect information outlets to workstations.

CATEGORY 5 UTP LINE/PATCH CORDS

Meet TIA/EIA 568A Category 5 requirements. Constructed of 24-gauge stranded cable and are terminated with clear 8-position plugs on either end. Color-coded boot versions allow quick identification and protection in heavily wired areas. Color-coded patch cords have blue boots. Other colors available; *contact your local Newark sales office.*

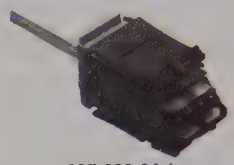
IBM®-TYPE DATA CONNECTORS



037-600-04-1

Type 037-600-04-1 genderless connector is used in IEEE 802.5 standard Token Rings and IBM® cabling LAN applications. Built-in locking tabs secure the data connector into place, with no tools needed. Wire range: 22-26 AWG stranded or solid copper, shielded twisted pair. Can be used in 4- & 16Mbps applications also. **Type 037-600-53** genderless connector can be used in IEEE 802.5 standard 4- and 16Mbps Token Ring networks and in IBM® cabling system applications. Electrical performance characteristics of the standard connector have been improved in the EDC connector to comply with IEEE 802.5 and EIA/TIA proposed TSB-53 (draft) connector specification for high-performance data rate applications utilizing 150-ohm STP cables and connectors.

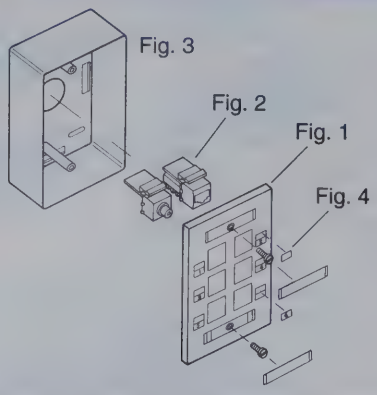
CATEGORY 5 MULTIPORT INFORMATION OUTLETS



6-Outlet Faceplate

Angled Faceplate

Blank Port Filler

Meet EIA/TIA TSB40-A Category 5 UTP standards for T568A and T568B wiring for data transmission up to 100MHz applications. Provides quick snap-in/out feature that enables quick addition of jacks without having to remove others. Keystone jacks are available in a variety of colors and contain a high-quality 110-type connector and jack with printed circuitry. Jacks are available in single RJ-12, RJ-45, USOC, BNC, F, phono, and ST® connector modules. Faceplates are also available in beige and white and support 1, 2, 4, or 6 keystone jacks in one faceplate. Faceplates come complete with clear station labels in top and bottom. Numbers are hot-stamped next to each port for documentation and maintenance. Each port on the faceplates contain two areas to insert icons; *order separately from table below.* Application icons include: workstation, phone, Ethernet, 100Base-T, 100VG-AnyLAN, ATM, and others. UL listed, CSA certified.

CATEGORY 5 EXPANDABLE SURFACE MOUNT MODULES

Expandable surface mount modules feature a slide latch design which allows any number of modules to be connected. The modules connect on either side, thus allowing the creation of desired mounting formation. Designed to hold a modular keystone jack. Applications include: high-speed data communication with an RJ-45 keystone jack or low-speed telephone systems with an RJ-12 keystone jack. *Order keystone jacks separately on this page.*

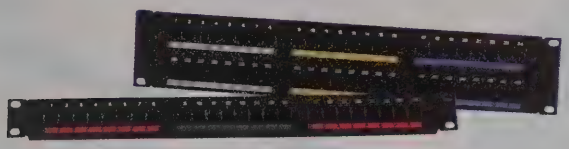
CATEGORY 5 AND ENHANCED CATEGORY 5 PATCH PANELS



Available in 24- and 48-port sizes that are rack mountable, with the 24-port version occupying only 1U (1.75″) rack space. Units feature an area to place gray vinyl, erasable label strips, included. Port and pin labeling is contained on the back of the panel to facilitate installation. Optional wire minder tray both organizes cable and meets cable bend radius requirements. Enhanced catagory 5 panels meet and exceeds EIA/TIA 568-A proposed standards. Provides a minimum 3dB headroom in NEXT. Tested to 350MHz. Units include PCB RJ-45 jack with captive pin and 110 type connector. Panel is 0.06″ steel with black polyurethane semi-gloss finish. Operates up to 100MHz. Meets EIA/TIA 568A UTP Category 5 standards. Other color label strips are available, *see below.*

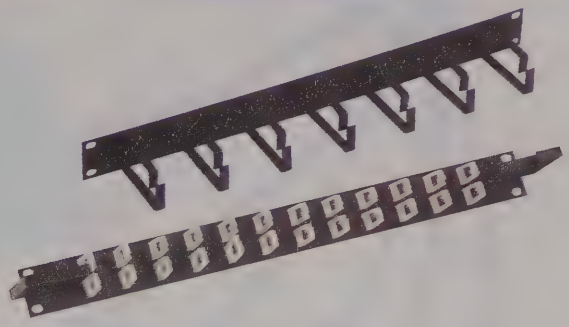
CATEGORY 5 WALL MOUNT KEYSTONE JACK PANEL

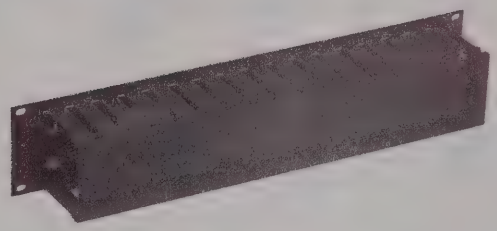
Support up to 12 keystone jacks. Units come complete with wall mount bracket. Cutout port design for ease in changing keystone jacks, *ordered separately*. Silk-screened for identification. Panel plate is 0.06″ steel with black polyurethane semi-gloss finish.

16N2593 Type 8461-0649. **Each** **29.99**
(8142) (ne09071)

WIRE MANAGERS



Horizontal D-Rings



1428

Designed to organize and manage cables and patch cords exactly where needed and according to EIA/TIA specifications. Units are 19″ rack mountable and occupy 1 rack space. Constructed of black zinc-plated 14-gauge steel. **Type 8461-0650** holds patch cords in a horizontal arrangement and features 1 steel D-ring on each side with 2 rows of 12 plastic wire saddles in between. **Type 8461-0651** features 7 D-rings mounted in a single row across the panel for the organization of horizontal patch cords. **Type 1428** features slotted fingers which both route and protect the cable. Double-scored so duct fingers can be easily bent and broken away. Includes duct covers and mounting screws. All these wire management items can be used in telecommunications closets and equipment rooms for cable management and networking installations.

Stock No.	Type	Description	Each

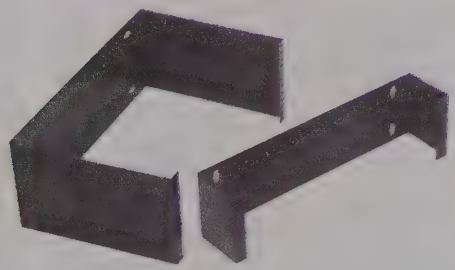
WALL MOUNT BRACKETS



Features universal ⅝″, ⅝″, ½″ alternating hole pattern with built-in #10-24 screw size pemnuts to allow maximum usage of mounting space. Fully compatible with EIA/TIA standard 1¼″-½″ hole patterns. Cable access holes are located on the back of the brackets for ease of installation of cable through the wall. Constructed of black zinc-plated 14-gauge steel. Side hinge feature facilitates adds and changes to the mounted panels.

PATCH CORDS

CATEGORY 5 PATCH CORDS

Category 5 patch cord assemblies are capable of carrying transmissions of up to 100 Mbps. Feature 8-position RJ45 plug on either end (male-to-male). Wired with EIA/TIA 568B pinning. 24 AWG stranded Category 5 wire for superior electrical performance. Unshielded PVC jacket. Available in a variety of colors and lengths.

BOOTED CATEGORY 5 PATCH CORDS

Category 5 fully booted patch cord assemblies are capable of carrying transmissions of up to 100 Mbps. Protective boot plus molded strain relief provide durability for the rigors of a desktop environment. Ideal for 10Base-T technology. Feature 8-position RJ-45 plug on either end (male-to-male). Wired with EIA/TIA 568B pinning. 24 AWG stranded Category 5 wire for superior electrical performance. Unshielded PVC jacket. Available in a variety of colors and lengths.

PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

PATCH CORDS

ENHANCED CATEGORY 5 SNAGLESS PATCH CORDS

Snagless

Meets EUA/TIA 568-B requirements. Use for speeds up to 100MHz. 24AWG. Enhanced Category 5 snagless patch cords feature a short body design that minimizes the distance of untwisting in a pair as a result of termination to contact pins. RJ-45 plugs on each end have snagless molded boot to help prevent snagging on other cables or hardware and reduces crosstalk normally produced by kinked connections. Tested to 350MHz. Molded Category 5 patch cords reduce crosstalk normally caused by kinked connections. UL listed. CSA certified. 5-year warranty.

SNAGLESS, MOLDED AND NONMOLDED UTP PATCH CORDS

Nonmolded

Snagless

All Category 5 patch cords are 4-pair stranded UTP wiring and RJ-45 plugs on each end. Meet EIA/TIA 568-B Category 5 requirements. Used for speeds up to 100 MHz. Conductor guage is 24 AWG. UL listed, CSA Certified, Lifetime warranty. Category 5 snagless parch cords have molded, snag-free boots to prevent cable kinks and bents pins when removing from patch panels, and they reduce crosstalk. Molded Category 5 patch cords reduce crosstalk normally caused by kinked connections. Available in up to seven colors. 5-year warranty.

ENHANCED CATEGORY 5

Provide a minimum of 3dB headroom to EIA/TIA 568A Category 5 enhanced standards. The least distance (0.25″) of untwisted pairs is maintained by the shortened body design for maximum performance. The innovative built-in strain relief secures termination. Compatible with SPC faceplates and keystone patch panels. Termination takes less than 30 seconds. Available in a variety of colors.

CATEGORY 5 IN-LINE COUPLER

- **Extends Category 5 Patch Cords without Losing Category 5 Performance**
- **Locking Mechanism Design for Easy Feed-Thru Panel Installation**
- **PCB Design for Maximum Reliability**

Maintain Category 5 performance with this in-line coupler. Allows joining of Category 5 patch cords while maintaining EIA/TIA Category 5 requirements. Ideal for unusual applications where longer patch cords are required. Accepts RJ-45 jacks with captive pins on either end of coupler. Dimensions: 1.18H x 0.69W x 1.93″D. Enclosure material rated UL94-V0. Meets EIA/TIA T568A or T568B Category 5 requirements. UL listed.

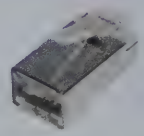
CATEGORY 5 MODULAR PLUGS

NEW



High-performance 8-position plugs meet TIA/EIA TSB40-A Category 5 NEXT requirements. Dual-point contact terminates 24-26 AWG stranded and solid conductors. Use to mate PC board mount 8-position modular jacks. Handle speeds up to 100MHz. Designed in shielded and unshielded versions to control EMI/RFI. Current rating: 1.5 amps. Voltage rating: 30VAC/42VDC. Dielectric withstanding: 100Vrms, 1 min. (60Hz). **Sold in packages of 10.**

COLOR-CODED STRAIN RELIEF BOOTS

NEW

Short and snap-on boots accept 4-pair Category 5UTP cable. Long accepts 2-, 3-, and 4-pair cable for voice and Category 3, 4, and 5 stranded or solid wire. Long boot allows strain relief to be cut to size. Short and long boot versions are used for pre-connector termination. Snap-on boot is used for post-connector termination. **Sold in packages of 10.**

MODULAR PLUG ACCESSORIES AND TOOLING

High performance 8-position modular plugs exceed EIA-TIA 568A and TSB-40A requirements for Category 5 four-pair (RJ45) UTP applications. Meet all dimensional, tolerance and metallic plating requirements of FCC Part 68. Clear polycarbonate housing with phosphor bronze terminal plated gold in localized area, gold flash over remainder, over nickel underplate. Available keyed or unkeyed, shielded or unshielded. Accepts 24 AWG round stranded conductor. Load bar design makes loading wires easy prior to termination while maintaining ½″ twist. Mate with Category 5 modular jacks, *ordered separately on this page.* Color-coded cable boots, **type 3-231652-0** termination hand tool and **type 1-853400-0** 8-position plug die set, *ordered separately below.* Other modular plug tools are available, *ordered separately on page 164.*

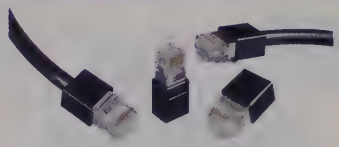
SHIELDED MODULAR PLUGS



8-position, 8-contact plugs for high-speed networking applications. Ideal for EMI environments. Electropolished 50µ" selective gold-plated contacts. Stranded or solid conductor. Tin-plated brass shield. Accepts 28 to 24 AWG wire range. UL recognized, CSA certified. *Order external strain relief boots separately; contact your local Newark sales office for details .*

PC-MOUNT MULTIPORT MODULAR STACKJACKS

NEW

Space-saving design provides up to 16 ports in a 2-row configuration. Standard and low-profile versions are available. The enhanced shield offers a closely spaced array of compliant panel contacts on all sides for maximum EMI protection. Contacts are constructed of phosphor bronze with selective gold plate in contact areas. Formed wire contacts provide low contact resistance.

(34799) (ne34799)

MODULAR SHIELDED AND UNSHIELDED FILTER JACKS

NEW

Offer filtering capabilities for high-speed network and telecom applications. Filter jacks are compatible with industry-standard contact footprint. Filter jacks are fast, drop-in replacements for standard jacks to reduce EMI emissions. Meet requirements of FCC 68.5. Made of UL94V-0 rated thermoplastic copper alloy contacts and selective gold plate in contact area.

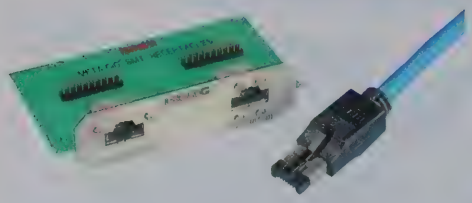
METAGIG™ CONNECTORS AND JACKS



METAGIG™ ETHERNET CONNECTORS

The MetaGig™ system is an 150-ohm impedance-controlled interconnect system designed for high-speed serial data communication. It is an 8-position connector designed to meet copper Fiber Channel specification FC-PH3 and Gigabit Ethernet specification IEEE 802.3z PMD paragraph 38 or other high-speed serial applications. Fully shielded connectors, with shielding effectiveness of -40 to -50dBm, handle data rates up to 2.5Gbps. Receptacle available in two versions: standard bulkhead mount and PCI card mount. Plug connector accepts 21 to 30 AWG cable. Audible latch. First-mate, last-break ground and power contacts are blade-on-beam design.

Stock No.	Type	Description	1-24

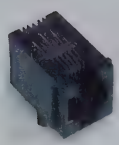
(29376) (ne29376)

PC BOARD JACKS



Horizontal

Vertical

Low-Profile

Come in 4-, 6- and 8-position receptacles in horizontal and vertical entry styles. Feature press-fit design to eliminate heat and cold staking. Any pin configuration available through selective loading. Generation II modular jacks feature jack-to-board footprint of 0.100″ x 0.100″ (2.54 x 2.54). Jacks housed in heat-resistant thermoplastic polyester resin, flammability rated at UL 94V-0. Color: black. Contact wire is phosphor bronze alloy UNS C51000, with GTX™ palladium-nickel alloy with gold flash finish. 0.018″ (0.457) diameter. Standard/low-profile modular jacks have 0.080″ x 0.100″ (2.04 x 2.54) jack-to-board footprint. Used to connect electronic phone sets and data processing systems. Insulation resistance: 10 megohms minimum. Dielectric withstanding voltage: 1000Vrms, 60Hz. Contact resistance: 20 milliohms maximum. Current rating: 1.5A for standard/low-profile jacks; 2.0A for jacks. UL listed.

Handset 616W Round

LEADED MODULAR JACKS

4-wire lead handset cord and line cord connectors meet most telephone interconnection requirements. Brass spade terminals on all except **type76361-014** which has stripped top coat leads. Gray ABS resin housing. Contact wire plating: 30μ″ (0.76μm) hard gold. Electrical performance: minimum insulation resistance 10 megohms; maximum, dielectric voltage 1000VRMS; contact resistance 20 milliohms maximum. Current rating: 2.0 amp, DC. UL recognized, CSA certified.

8-Port Gang Jack

GANG JACKS

Shielded right-angle jacks are used for networking 0.018″ contact wires. Low-profile, with snap-in pegs and 8-wire pen ports. Press fit design eliminates hot and cold staking. Will mate with modular plugs conforming toFCC part 68, subpart F. Meets industry standards for jack-to-board footprint. Electrical performance: 500 megohm minimum insulation resistance; 1000 VRMS dielectric standing volts, 60 Hz; 2-Amp current, DC. Made of nylon with glass-reinforced shielding of 0.25mm copper alloy. Contact spring plating is 0.76μm (30μ″) GTX™. GTX™ is a palladium-nickel alloy with gold flash (a BERG Electronics gold equivalent plating, to ensure a high cycle life and excellent solderability).

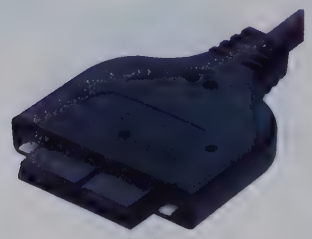
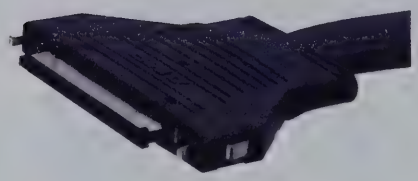
CABLE ASSEMBLIES

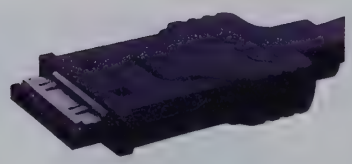
INFOPORT PCMCIA CABLE ASSEMBLIES



Series I



Series II



Series III

Series I, II and III cable assemblies are designed to meet the critical input/output requirements of Type II PC card applications. Each circuit line of the connector is soldered to a 30 AWG stranded conductor for maximum flex life. Cable assemblies have pigtails at the opposite end to allow easy custom termination to input/output device.

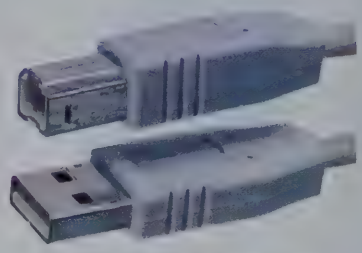
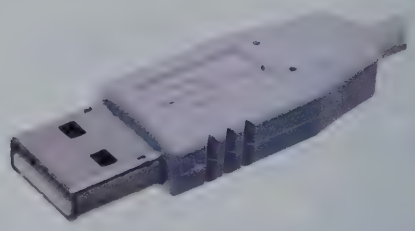
USB CABLE ASSEMBLIES



Bus Extender Cable Assemblies



Blunt End Cut Assemblies

Universal Serial Bus (USB) cable assemblies are designed for plug-and-play computer peripherals. Connect USB-equipped computers to keyboards, mice, printers, video cameras, etc. Application requires an "A" receptacle Universal Serial Port. Connectors have 4 positions (2 positions make contact before the others) and a common overall shield. Cable assembly type: A to B (bus extender) or A to Blunt (blunt end).

PC CABLE ASSEMBLIES

NULL MODEM CABLE ASSEMBLIES

Null modem serial cable assemblies allow 2 DTE or DCE devices to communicate with no conflict in data transmission. Transmit and receive signals are crossed to enable proper data transmission. Cable assemblies are designed with a rugged, overmolded construction that provides added strain relief and are foil shielded for protection from EMI/RFI interference. Allows connections to DB-9 (AT™) or DB-25 (PC) serial ports. Male-to-female configurations are typically used as serial printer cables, while female-to-female versions are typically used to connect 2 PC serial ports.

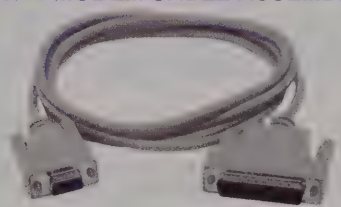
PC/AT™ MODEM CABLE ASSEMBLIES



PC/AT™ modem cable assemblies have a fully molded and foil-shielded design to provide long-lasting data integrity, regardless of modem baud rates. Industrial strength hoods feature office-quality appearance with long, easy-grip slotted thumbscrews for neat, easy connections. DB-25 male to DB-9 female.

HIGH-SPEED SERIAL DATA CABLE ASSEMBLIES

NEW

Cable assemblies for copper implementations of the serial data technologies known as Fiber Channel (NCITS T11) and Serial Storage Architecture (NCITS T10.1). Includes fully shielded, controlled impedance cable-to-board interconnect which can handle data transfer rates above 2.125Gbps using low skew, 150-ohm shielded quad cable.

Cable Assembly

BOARD MOUNT RECEPTACLES

Stock No.	Type	Positions	Description	1-9
83F8404	621735-1	6	Right-Angle Surface Mount	8.60
83F8405	636180-1	8	Right-Angle Surface Mount	8.60
83F8406	621754-1	6	Straddle Mount	8.60

8-position cable plugs mate to 6-position or 8-position board mount receptacles.

SCSI TERMINATORS

SCSI-1 LOW-DENSITY NARROW TERMINATORS

- **50-Position SCSI-1 Standard Profile**
- **Shielded or Unshielded Models**
- **Single-Ended Passive or Active**

Improve signal integrity with these high-quality SCSI-1 50-position terminators. For use with .050″ center-line ribbon cable. AMP-LATCH® IDC unshielded plugs feature black thermoplastic shell and housing, rated UL94V-0. Phosphor bronze contacts plated tin or tin-lead over nickel underplate. **Type 748339-1** AMPLIMITE® HD-20 shielded plug features tin-plated steel shell and shield with black thermoplastic housing and enclosure, rated UL94V-0. Phosphor bronze contacts plated gold on mating end over nickel underplate. Includes black, chromate-plated zinc alloy jackscrews. All terminators have thick film resistor composition on alumina substrate.

Stock No.	Type	Terminators	Width	1-2	3-4	5-9
95F819	869383-1	Unshielded Plug, Single-Ended, Passive	2.960″	**39.13**	**35.22**	**31.70**

869574-1

SCSI-1 TERMINATOR RECEPTACLES

- **50-Position SCSI-1 Standard Profile**
- **Single-Ended Passive and Active, or Differential**

AMPMODU® SCSI-1 50-position terminators feature brown nylon cover and housing. Phosphor bronze contacts plated gold on mating end, gold flash on remainder, with nickel underall. Thick film resistor composition on alumina substrate provides necessary resistance to match system characteristic impedance.

Stock No.	Type	Terminators	Width	1-2	3-4	5-9

SCSI-2 HIGH-DENSITY NARROW TERMINATORS

- **50-Position SCSI-2 Standard Profile**
- **Single-Ended Passive and Active, or Differential**
- **Diecast Cover or Plastic Cover with Inner Shield**

AMPLIMITE® .050 series SCSI-2 high-density, 50-position terminators with spring latches for use with "A" cable. Available with zinc-plated diecast cover or low profile plastic cover with inner shield. All terminators feature phosphor bronze contacts plated gold on mating end over nickel underplate, black thermoplastic housing, rated UL94V-0, and thick film resistor composition on alumina substrate.

Stock No.	Type	Terminators	1-2	3-4	5-9
95F825	749535-2	Shielded Plug, Single-Ended, Passive – Diecast Cover	**54.60**	**40.46**	**31.08**

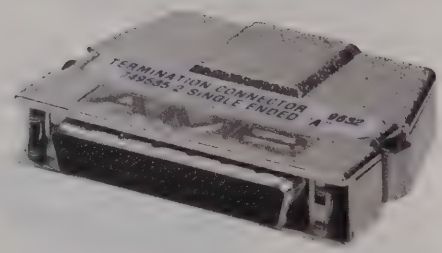
(9740) (de00821)



749535-2

SCSI-3 HIGH-DENSITY WIDE TERMINATORS

- **68-Position SCSI-3 Standard Profile**
- **Single-Ended Active or Differential**

AMPLIMITE® SCSI-3 high-density, 68-position terminators for high-end workstations with a mix of peripherals. Use with "P" and "Q" cable. Feature beige ABS cover and black thermoplastic housing, both rated UL94V-0. Copper inner shield. Steel shell tin or tin-lead plated over copper. Phosphor bronze contacts plated gold on mating end over nickel underplate. Black, chromate-plated steel alloy jackscrews. Thick film resistor composition on alumina substrate. SCSI-3 incorporates Fast (synchronous-transmission) and Wide (16- and 32-bit word-length) SCSI techniques to boost transfer rates to more than 10 Mbps.

Stock No.	Type	Terminators	Width	1-2	3-4	5-9
95F829	869516-1	Shielded Plug, Single-Ended, Active	2.608″	**42.00**	**31.08**	**23.88**

869516-1

SCSI FEED-THRU TERMINAL ADAPTERS

- **50-to-68-Position SCSI Standard Profile**
- **68-to-68-Position SCSI Standard Profile**
- **Feed-Thru Active or Differential**

AMPLIMITE® .050 series D-subminiature SCSI feed-thru adapters are ideal for computer and printer needs. Feature steel shell plated tin or tin-lead over copper with high-density internal copper shield. Phosphor bronze contacts plated gold on mating end over nickel underplate. Black thermoplastic housing and beige ABS cover, both rated UL94V-0. Thick film resistors and/or discreet components on plastic laminate. Include stainless steel, passivated jackscrews with PVC heads. **Types 869680-1** and **869678-1** also have clear, chromate finish screw latches.

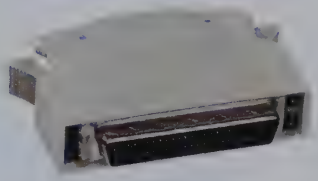
SCSI CABLES AND TERMINATORS

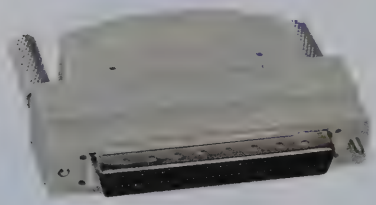
SCSI-2 TERMINATOR



50-position SCSI-2 half-pitch active terminator. Single-end, male, molded with spring latches. Gold-over-nickel contacts.

50N227 Type SPC5296. **Each** **19.99**
(40772) (ne40772)

SCSI-3 TERMINATORS

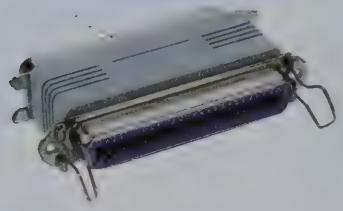


SCSI-3 half-pitch, 68-position male terminator. Gold-over-nickel contacts.

Stock No.	Type	Description	Each
50N228	SPC5297	Single End Active Terminator	**22.99**
50N229	SPC5298	Differential Type Terminator	**24.99**

(40771) (ne40771)

SCSI TERMINATORS

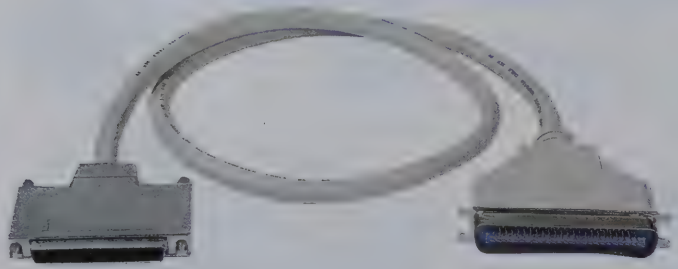


Enables accurate transmission of information to and from the computer and SCSI devices (external drives, scanners, printers). A terminator should be placed at each end to provide accurate data transmission. Active terminators will regulate the signal strength in more complex or longer distance SCSI applications. Active terminators have LEDs that indicate a signal is being regulated.

Stock No.	Type	Description	Each
52N9370	8587-0114	Double-Sided Centronics® 50-Pin Male-to-Female	**19.99**
52N9371	8587-0115	Active Centronics® 50-Pin Single-Sided Male	**39.99**

(7635) (ne08671)

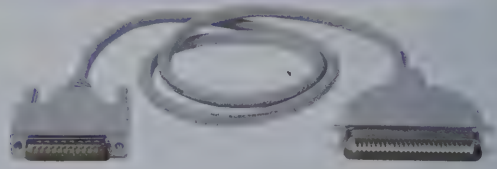
SCSI-2 TO SCSI-3 CABLE ASSEMBLIES



Half-pitch DB-50 male to Centronics® 50-pin male cable assembly is used in adapting SCSI-2 to SCSI-3. Features 25 twisted pair high-impedance cable and will allow proper data transfer between SCSI-2 and SCSI-3 external devices. **Type 8587-0116** length: 3′. **Type 8587-1304** length: 6′.

84N1992 Type SPC4447. **Each** **44.99**
84N1993 Type SPC4448. **Each** **55.99**
(7811) (ne08676)

SCSI SYSTEM CABLE ASSEMBLIES



Used to interface SCSI devices with a DB-25 female port directly to the SCSI port on the Macintosh computer. DB-25 female to 50-position Centronics® male.

Stock No.	Type	Description	Each
52N9363	8587-0107	3′ SCSI System Cable Assembly	**12.99**
52N9364	8587-0108	6′ SCSI System Cable Assembly	**12.99**

(7966) (ne08672)

SCSI EXTENSION CABLE ASSEMBLIES

SCSI cable can be used to extend SCSI system and SCSI peripheral cables. The total distance between SCSI devices should not exceed 18′. Centronics® 50-pin male-to-female, 25 lines wired.

Stock No.	Type	Description	Each
52N9365	8587-0109	SCSI Extension Cable Assembly, 3′	**16.99**
52N9366	8587-0110	SCSI Extension Cable Assembly, 6′	**16.99**

(7808) (ne08673)

SCSI-2 CABLE ASSEMBLIES

Cable complies with or exceeds SCSI-2 specifications. For SCSI-2 systems up to 10MB per second. Half-pitch DB-50, male-to-male.

Stock No.	Type	Length	Each
52N9367	8587-0111	3′	**64.59**
84N2006	SPC4472	6′	**66.99**

(7809) (ne08674)

SCSI-3 CABLES

68-pin half-pitched cables feature ultra-high impedance and double-shield.

Stock No.	Type	Description	Length	Each
52N9368	8587-0112	25 pair Half-Pitch DB-68-Pin Male to Centronics® 50 Male	3′	**67.99**

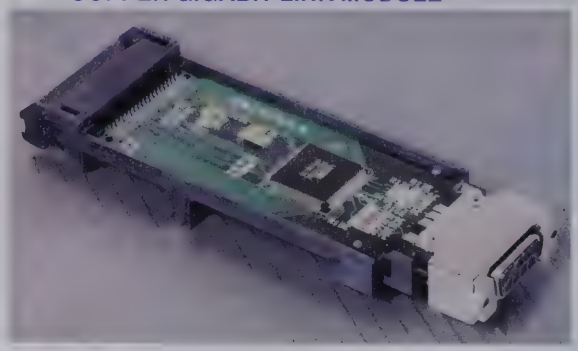
TERMINATORS, ADAPTERS AND CONVERTERS

COPPER GIGABIT LINK MODULE

NEW



This clever link module features a 20-bit wide bus that's designed to transfer data encoded with the 8B/10B encoding scheme specified by the Fibre Channel XB/T11 committee. The transmitter and receiver pair form a high-speed serial link with a data rate of 1.0625 GBd. The parallel data bits to be transferred are serialized by the card and transmitted through the copper cable. On the receiver, a PLL (phase locked loop) recovers the data clock and shifts the data into a deserializing circuit.

48F2176 Type DM 1063-CGLM9. **Each** **163.15**
(41973) (ne41973)

PENTIMATE™ USB HUB

NEW

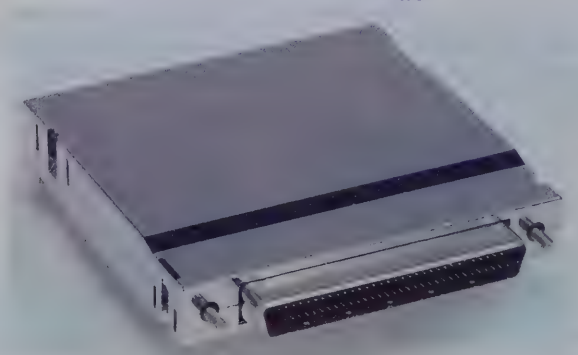
MADE IN USA

Unique 4-port, bus-powered USB hub with the 5-sided styling of Pentimate™. Power that the hub and the 4 USB devices connected to it require is provided by the host computer. This innovative feature completely eliminates the need for external power adapters. Provides solid-state "circuit breaker" protection to each attached USB device. Supports 1.5/12 Mbps operations. USB Standard Rev 1.0. FCC/EN Radiated EMI Class B. FCC/EN Conducted EMI. EN 50082-1 Radiated Immunity. EN 50082-1 ESD. CE compliant.

48F2175 Type DM 7006. **Each**..... **104.65**
(41976) (ne41976)

LVD-TO-SE SCSI CONVERTER

NEW

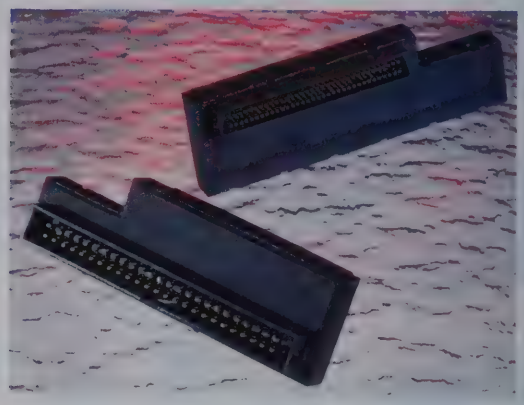


Acts as a bridge between LVD and single-ended devices and allows single-ended drives to be conveniently attached to LVD systems without degrading LVD bus performance. External power supply not required. Supports synchronous and asynchronous data transfer. Provides 80MB/sec. data transfer rate. 68-pin to 68-pin high-density connector. LVD and S.E. termination provided. May be used as a bus extender. Conforms to FCC Part 15, Class B.

48F4020 Type DM-7200-6868-02. **Each** **170.43**
(41971) (ne41971)

INTERNAL ADAPTERS

NEW



Pluggable feed-thru adapters used to connect a low-density device to a high density device; or a high- density to a low-density one. Low-density contact spacing is 0.100″ and high density contact spacing is 0.050″. 100% electrically tested. material: copper alloy. Insulator Material: glass-filled LCP, rated UL 94V-0. Housing material: glass-filled LCP rated UL 94V-0.

DM SERIES DATAMATE SCSI BUS TERMINATORS

DM550

DM800

DM2050

SCSI terminators create impedance to prevent reflection of transmitted data. Regulated devices stabilize voltages at signal pins to 2.85 volts and improve noise margin in longer cable runs. **DM550 series** internal style male/female devices install between I/O port and ribbon cable. 25 rows/50 positions on 0.100″ x 0.100″ (2.54 x 2.54) grid spacing. **DM800 series** low density external shielded style male devices terminate 0.085″ (2.16) center miniature ribbon I/O port. **DM2050 series** high density external shielded style male devices install into 0.050″ (1.27) center SCSI 2 high density female connectors. All external styles feature internal shielding for EMI and RFI. UL recognized, CSA certified, VDE approved.

GPIB SHIELDED AND UNSHIELDED MOLDED CABLE ASSEMBLIES

Programmable controllers, signal generators, bridges, scopes, counters, digital multimeters, plotters, power sources and test fixtures can all be interconnected to perform intricate testing simply and easily with high reliability GPIB molded cable assemblies. GPIB molded cable assemblies meet full electrical, mechanical and functional requirements of IEEE 488 standard for cable interface among up to 15 programmable instruments in a bus connected system. Fully-molded male and female connectors (on each end of the cable) are designed for easy stacking and come with molded-in metric jackscrews. Gray. UL recognized. Each cable consists of 6 prs. 26AWG (7x34) 10 singles 26AWG (7x34), and 1 single 24AWG (7x32).

CAT5 MODULAR IDC CONNECTORS

Catagory 5, 8-conductor T568B modular IDC connectors allow termination of twisted pair cable. Feature IDC contacts for 22 to 26 AWG wire, 50µ" gold plating on modular contacts. Comply with IEEE 802.3 (10Base-T) and 802.5 (Token Ring) standards. Designed to snap into patch panels and wall plates. A variety of colors allows flexibility in wiring schemes. TIA and AT&T wiring compatible.

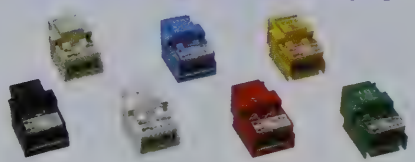
CAT5 KEYSTONE CONNECTORS



Category 5, 110 style IDC contacts, arranged in a 1, 2, 3, 4 orderly fashion for quick installations. Tested to a bandwidth of 1-155MHz. Supports these data transmissions: 10Mbps 10Base-T Ethernet (IEEE 802.3), 4/16Mbps Token Ring (IEEE 802.5), 100Mbps 100Base-T Ethernet (Fast Ethernet), 100Mbps TP-PMD (ANSI-X3T9.5), and 155Mbps ATM (ATM forum). Pass EIA 568A Category 5 specifications for return and loss attenuation up to 155MHz. Accept 22-24 AWG solid or stranded wire. UL listed, CSA certified.

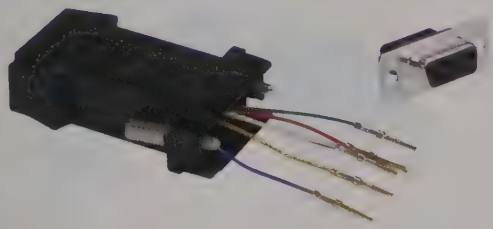
D-SUB TO RJ JACK ADAPTERS



Ultraslim, single-piece hood, 16mm wide adapters are designed for high-density applications where width between ports is critical. Used to join D-Sub 9-, 15-, and 25-pin male and female connectors with RJ-11, RJ-45, or MMJ (modified offset) modular jacks. Color: black. Kit form. Pre-pinned available; *contact your local Newark sales office.*

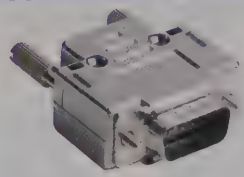
D-SUB CONNECTOR KITS



Enables user to perform custom wiring. Crimp kits include pins or sockets, D-Sub shell, shielded/metallized hood, and mounting hardware. Solder kits include pre-assembled shell with solder contacts, shielded/metallized hood, and mounting hardware. Pins and sockets plated with 30µ" gold. Hoods made of high-quality, UL approved nickel-plated plastic.

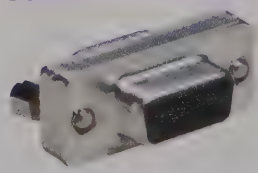
D-SUB AND TELCO GENDER CHANGERS AND D-SUB CONNECTOR SAVERS



Low-profile devices provide connection between units of the same gender. Available in male-to-male, female-to-female, and male-to-female versions. Male-to-female changers also function as connection savers to reduce contact wear in high-cycle mating applications. Telco 50-pin changer features plastic enclosure. D-Sub changer has ¼" thickness, is fully shielded from RFI and EMI, and meets FCC requirements.

USB (UNIVERSAL SERIAL BUS) CABLE ASSEMBLIES AND CONNECTORS

NEW

USB Type B and A

USB Type A PCB Mount Single Stack USB-4200A-S

USB Type B PCB Mount USB-4200B-S

USB Type A PCB Mount Double Stack USB-4200A-D

Provide flexibility to personal computers, notebook computers, and most peripheral devices, such as ones using serial, parallel, keyboard, mice, or game ports. Feature "Plug-and-Play" insant PC expansion, "Hot-Swapping" capabilities - (PC automatically detects the peripheral and configures the necessary software). Permit transfer rates up to 12MB/sec. and support up to 127 devices. Allow data flow both ways between the computer and the peripheral. Meet PC98/PC99 requirements.

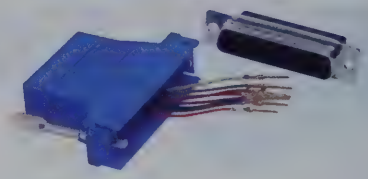
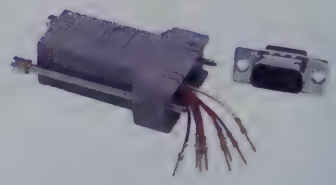
TELEPHONE ADAPTERS FOR DB-9, DB-15, OR DB-25 PORTS





Allow the use of low-cost telco (telephone) wire between computer and peripherals. Available in either DB-9, DB-15, or DB-25 connectors on one end and 4-, 6-, or 8-contact telco connectors on the other end. Provide both economy of installation and fast and simple changing of cables when moving equipment. Telco cables and connectors available separately; *contact your local Newark sales office.*

BIDIRECTIONAL PRINTER CABLE ASSEMBLIES

The IEEE 1284 cable has been adapted as the newest standard in parallel port data transfer. Support both the enhanced parallel port (EPP) and the extended capabilities port (ECP) at speeds up to 100 times faster than older parallel ports. For all bidirectional printers. 18 twisted pair cable provide compliance with IEEE standards. UL listed.

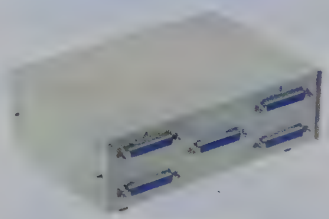
(ne08668)

DATA SWITCH BOXES



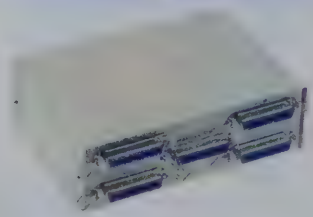
Data switches permit computer users to share printers, modems, monitors, computers, phone lines, etc. providing economy by decreasing the amount of equipment needed. All data switches are datatransparent and all lines are switched "straight through". This permits using an A/B switch, for instance, to share one printer between two computers; or using two printers with one computer. The data switches are constructed of steel, providing excellent shielding characteristics and durability. The switches are sealed and contacts are constructed of precious metal (low resistance).

RS-232 DB-25 SWITCH BOX

Two-way switch box (**type 8587-0158**) has 1 female, 25-pin input connection and 2 female, 25-pin output connections. Four-way switch box (**type 8587-0159**) has 1 female, 25-pin input connection and 4 female, 25-pin output connections.

52N9414 Type 8587-0158 2-Way. **Each** **13.99**
52N9415 Type 8587-0159 4-Way. **Each** **27.99**
(7603) (ne08579)

CENTRONICS® SWITCH BOX



Type 8587-0219 2-way switch box has 1 female, 36-pin Centronics® input connection and 2 female, 36-pin Centronics® connections. **Type CPS-910-4-A** 4-way switch box has 1 female, 36-pin Centronics® input connection and 4 female, 36-pin Centronics® connections.

52N9416 Type 8587-0219. **Each** **19.99**
92N6696 Type CPS-910-4-A 4-Way. **Each** **57.45**
(7604) (ne08580)

RS-232 BREAKOUT BOX

Monitors individual interface lines and detects presence or absence of activity. Rewires RS-232 interfaces. Unit is line powered and 10 dual-state LEDs monitor both positive and negative signal levels. Includes 1 male and 1 female RS-232 connector and rugged plastic case.

Stock No.	Type	Each

(18431) (ne10441)

RGB MONITOR CABLE

6′ HD to DD-15 male monitor cable for high resolution monitors requiring 4 or 5 BNCs.

50N223 Type SPC5292. **Each** **36.95**
(35473) (ne35473)

AT™ TO PS/2™ KEYBOARD ADAPTER

Permits use of an IBM® AT™ (or compatible) keyboard on a PS/2™ computer. 5-pin female DIN connector on a 6-pin mini-DIN male connector.

52N9396 Type 8587-0140. **Each** **3.29**
(7844) (ne08709)

COMPUTER LAPTOP-TO-PRINTER CABLE ASSEMBLY

Type 2773 3′ laptop printer cable is for convenient storage and transport. 25-line ribbon cable with a DB-25 male connector to Centronics® male. Compatible with most printers.

92N5315 Type 2773-SPC. **Each** **9.99**
(18429) (ne10308)

BNC/TELCO BALUNS

BNC coaxial baluns allow mating a coaxial cable to twisted pair telephone wire for both economy and ease of installation. Available with male BNC to 6-position telco jack and to screw terminals. For RG-62 (93-ohm).

52N9412 Type 8587-0156. **Each** **15.99**
(7605) (ne08581)

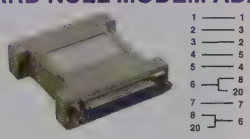
(18426) (ne10305)

STANDARD NULL MODEM ADAPTERS



Standard DB-25 male-to-female connectors at each end. Fits in line to connect like devices, either DTE or DCE. Most commonly used circuit for the null modem adapters; *see wiring schematic.*

52N9397 Type 8587-0141. **Each** **3.59**
(7841) (ne08706)

DB-25 PORT RECONFIGURATION KIT

Permits assembly of an in-line adapter for nonstandard ports. Male-to-female connectors mounted on a PC board with pads for soldering jumper wires (included). Soldering is required.

52N9411 Type 8587-0155. **Each** **8.99**
(7842) (ne08707)

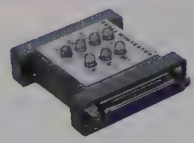
TRIPORT ADAPTERS

Adapts two RS-232 DB-25 interfaces to one DB-9. Adapts one RS-232 DB-25 and one DB-9 interface to RS-232 DB-25 interface. DB-9 to DB-25 pin out is the same as AT modem type.

Stock No.	Type	Description	Each
90N9988	RSTA-973-25	DB-25 Male/Female/DB-9 Male	6.99
90N9989	RSTA-974-25	DB-25 Male/Female/DB-9 Female	6.99

(40370) (ne40370)

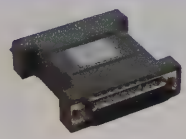
RS-232-C QUICK-CHECK PORT TESTER



Provides an easy method of checking computer and terminal equipment to be sure that signals are being generated. Standard RS-232 lines are monitored and LEDs indicate presence of data or control signals. Quickly determines whether a problem is in equipment or cable. Male-to-female.

52N9409 Type 8587-0153. **Each** **15.99**
(7847) (ne08712)

RS-232-C SURGE ARRESTER



Protects data lines from spikes and surges from other equipment or those picked up inductively. Eliminates surge-induced misread data and data loss. Fast MOVs on each end of the RS-232 lines: 2, 3, 4, 5, and 7. Male-to-female; insert at port or in line.

52N9408 Type 8587-0152. **Each** **10.99**
(7846) (ne08711)

IBM-AT SERIAL PORT ADAPTERS

NEW

2775

Adapters permit use of standard 25-line RS232 cables by reconfiguring DB-9 AT serial port to 25-pin male DB-25 connector. Eliminate the need for several different cables.

Stock No.	Type	Description	Each
92N5317	2775-SPC	AT Connection to Modem DB-9 Female to B-25 Male	2.99
92N5318	2776-SPC	AT Connection to Serial Printer DB-9 Female to DB-25 Male	2.99

(18427) (ne10306)

HIGH-DENSITY ADAPTER

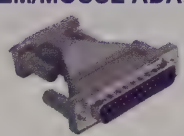
Male high-density DB-15 to DB-25 adapter.

Stock No.	Type	Each
10N128	8587-1309	6.99

(7815) (ne08680)

MODEM/MOUSE ADAPTER

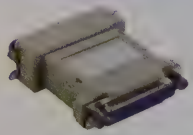
NEW



Type 2774 DB-25 female to DB-9 male assembly adapts DB-25 serial ports to Hayes and compatible modems. Also adapts to a mouse.

92N5316 Type 2774-SPC. **Each** **2.99**
(18428) (ne10307)

IBM®-COMPATIBLE PORT ADAPTER



Adapter eliminates need for special printer and plugs into Centronics®-type 36-pin connector on most parallel printers and converts the connector to a standard 25-pin "D". Allows use of standard 25-line cable of any length. Use with most parallel printers. DB-25 female to Centronics® 36-pin male.

52N9398 Type 8587-0142. **Each** **4.99**
(7843) (ne08708)

COMPUTER ACCESSORIES

FLOPPY DISK DRIVE POWER ADAPTER KIT

Contains 4″ power adapter cable for converting larger Molex®-type plugs to smaller plugs used by 3.5″ drives and a 34-pin IDC to 34-pin card edge adapter for data communication.

84N1048 Type 3368. **Each** **2.35**
(7858) (ne08967)

MOTHERBOARD EXTENSION CABLE ASSEMBLY

12-conductor power extension cable that is ideal for situations where existing power cables are too short or are stretched tight. Commonly used in full tower cases. Connectors are polarized Molex® type 1 main 12-pin header to 2 6-pin connectors. Length: 12″.

84N1052 Type 3372. **Each** **3.31**
(7623) (ne08609)

40-PIN IDE HARD DRIVE CABLE ASSEMBLY

Popular cable assembly for easy installation of IDE hard drives. Provides communication between hard drive and controller card. Has 2 IDC sockets and is 18″ long. Can be used with any dual IDE/FDD controller card or any IDE drive.

84N1061 Type 3381. **Each** **3.19**
(7882) (ne08991)

FLOPPY DISK DRIVE POWER SUPPLY CABLE ASSEMBLY

Power supply cable assembly for one 5.25″ and one 3.5″ floppy disk drive. Assembly complete with one 5.25″ power plug to 5.25″ and 3.5″ power sockets.

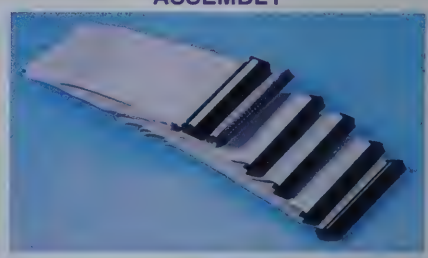
84N1050 Type 3370. **Each** **2.69**
(7622) (ne08608)

3.5″ FLOPPY DISK DRIVE RIBBON CABLE ASSEMBLY

Allows connection of 2 floppy disk drives to personal computer. Includes ribbon cable with 34-pin socket to 34-pin socket.

84N1062 Type 3382. **Each** **3.19**
(7883) (ne08992)

6-CONNECTOR SCSI CABLE ASSEMBLY



6 IDC 50-pin connectors in-line. Length: 52″.

84N1065 Type 3385. **Each** **6.49**
(7620) (ne08606)

FLOPPY DISK DRIVE POWER SUPPLY CABLE ASSEMBLY

Power supply cable assembly for two 3.5″ floppy disk drives. Assembly complete with one 5.25″ power plug to two 3.5″ power sockets.

84N1053 Type 3373. **Each** **2.65**
(7625) (ne08611)

TOWER-TYPE DUAL IDE DRIVE CABLE ASSEMBLY

Contains 3 40-pin IDC connectors in-line (no-twist). Length: 18″.

84N1069 Type 3389. **Each** **2.49**
(7886) (ne08995)

SCSI INTERNAL HARD DRIVE CABLE ASSEMBLY

50-pin Centronics® to 7 in-line 50-pin IDC to 50-pin Centronics® connectors. All in-line (no-twist). Length: 56″.

16F1477 Type 83-3470. **Each**..... **13.72**
(7860) (ne08969)

POWER SUPPLY "Y" CABLE ASSEMBLY

For use when adding additional disk drives. 4-pin Molex®-type male to 2 female connectors.

84N1058 Type 3378. **Each** **2.95**
(7624) (ne08610)

TOWER-TYPE COMPUTER DUAL FLOPPY DISK DRIVE CABLE ASSEMBLY

Designed for full tower installation of both 3.5″ and 5.25″ floppy disk drives. Length: 32″.

16F1485 Type 83-3350. **Each**..... **4.13**
(7885) (ne08994)

SCSI INTERFACE AND DRIVE CABLE ASSEMBLY

Allows connection of SCSI disk drives and peripherals on personal computers. Hard disk drive cable for 2 SCSI drives. Connectors have 50 pins.

16F1486 Type 83-1355. **Each**..... **4.55**
(7884) (ne08993)

REMOVABLE HARD DISK DRIVE FRAME

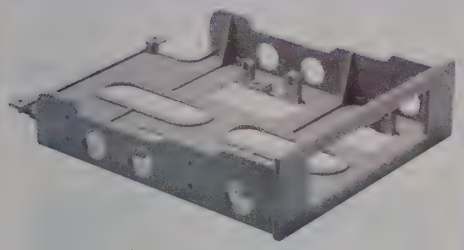
Install any IDE drive into a half-height bay. Constructed of durable hard plastic. AT™ bus compatible. Includes 2 security keys and carrying pouch.

84N1081 Type 3401. **Each** **41.95**

AT™ is a trademark of the International Business Machines Corporation.

(7611) (ne08597)

3.5″ FLOPPY DISK DRIVE ADAPTER KIT

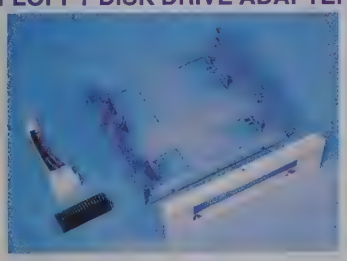


Mounts 3.5″ floppy disk drives in 5.25″ bays. Comes complete with aluminum mounting frame, front plate adapter, 34-pin gender adapter, power cord adapter, and mounting screws.

84N1084 Type 3404. **Each** **6.25**

(7609) (ne08594)

3.5″ FLOPPY DISK DRIVE ADAPTER KIT



Universal 5.25″ mounting frame for 3.5″ floppy disk drive. Comes complete with frame, screws, power adapter, and data connector adapter.

84N1082 Type 3402. **Each** **5.45**

(7607) (ne08591)

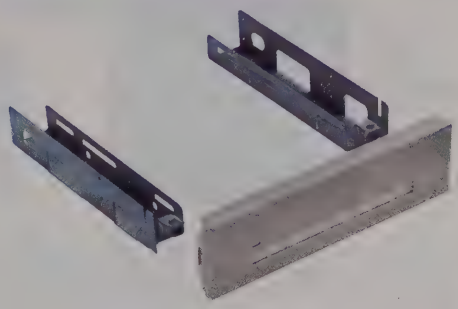
3.5″ DRIVE MOUNTING BRACKET

Mount 3.5″ drives in computer case. Comes complete with mounting screws.

84N1083 Type 3403. **Each** **4.95**

(7608) (ne08593)

FLOPPY/HARD DISK DRIVE ADAPTER KITS



Mount 3.5″ floppy and hard disk drives in a 5.25″ bay. Comes complete with frame, screws, power adapter, and data connector adapter.

Stock No.	Type	Description	Each
16F1545	83-2075	3.5″ HDD Mounting Kit	5.38
16F1548	83-2080	3.5″ FDD Mounting Kit	5.38

(7606) (ne08590)

BIDIRECTIONAL INTERFACE

Connect serial and parallel printers to opposite devices (serial-to-parallel or parallel-to-serial). Includes RS-232 interface, user-selectable DIP switches, DB-25 male/C-36 female connectors, X-ON/X-OFF, DTR handshaking protocol, and parallel signal-boosting functionality. Supports baud rates of 300 to 38,400bps, odd, even, or no parity. 7- or 8-bit character length and external AC power source. 500mA, DC adapter included. Nonbuffered.

16F1499 Type 83-6315. **Each**..... **71.94**

(7893) (ne09002)

MINI JUMPERS

Allows quick connection of circuits on circuit boards, shorting socket jumper for address or code strip line plugs. **Sold in packages of 25.**

CALL NEWARK FOR FAST, DEPENDABLE SERVICE.

1-800-4-NEWARK (1-800-463-9275)

PARALLEL PRINTER SWITCHES

Provide an electronic solution for multiple computers to share a single printer. Sense data coming from a computer and automatically switch it to the printer. Eliminates the need for a manual switch. Both units are power-free.

Stock No.	Type	Description	Each
16F1503	83-2875	2:1 Parallel	25.83
16F1506	83-2880	4:1 Parallel	41.39

(7891) (ne09000)

COMPACT PARALLEL PRINTER SWITCHES

Electronic alternative to using a manual switch box. Forward and reverse direction capabilities provide access to 1 printer from up to 4 computers, or in the reverse direction, support access to 2 or 4 printers from 1 computer.

Stock No.	Type	Description	Each
16F1505	83-2850	2:1 Parallel	51.74
16F1494	83-2855	4:1 Parallel	72.44

(7888) (ne08997)

PARALLEL PRINTER CABLE AND SIGNAL BOOSTER

PrinterLINK™ combined parallel printer cable and signal booster extends parallel printer cable distance capabilities. Can span distances of up to 1200′. Features DB-25 male to DB-25 male gender adapter and 50′ of cable.

16F1497 Type 83-2835. **Each**..... **87.97**

(7894) (ne09003)

PRINTER BUFFER

CompactBUFFER™ is an in-line device that captures print files sent to a single parallel printer. Buffer receives data at a faster rate than most printers and allows the sending computer to complete its printing transaction more quickly.

16F1492 Type 83-2845. **Each**..... **195.62**

CompactBUFFER™ is a trademark of Primax.

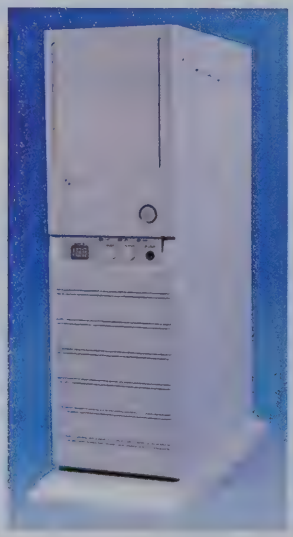
(7890) (ne08999)

MINITOWER CASE WITH 200W POWER SUPPLY

Baby AT™ and XT™ compatible. Slots for two 5.25″ and 3.5″ floppy drives and two 3.5″ hard drives. Features turbo switch, reset switch, and key lock. 200W power supply included. Dimensions: 16H x 12W x 20″D.

16F1553 Type 83-3985. **Each**..... **82.75**
(7914) (ne09024)

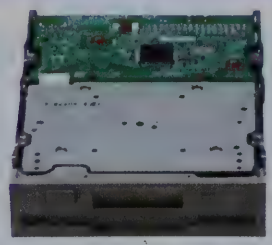
FULL TOWER CASE WITH 230W POWER SUPPLY



Provides space for expansion for computers or network servers. Unit can accommodate full, half, or baby motherboard. Features 6 5.25″ and 4 3.5″ slots for installing floppy drives, CD-ROM drives, or tape backups. 8 expansion slots in the back allow access to all input/output controllers such as video board, serial, parallel, or sound card. 2-digit display indicates computer operating speed. 230W PS/2™ power supply and base stand for stability are included. Dimensions: 25½H x 7½W x 16½″D.

16F1552 Type 83-8720. **Each**..... **98.28**
(7913) (ne09023)

3.5″ 1.44MB FLOPPY DISK DRIVE



83-2915

TEAC disk drive available to suit your system's requirements. Features high memory capacity, low energy circuitry, low power consumption, and reduced heat generation.

Stock No.	Type	Description	Each
16F1562	83-2915	3.5″, 1.44MB Drive	56.88

(7617) (ne08603)

COMPUTER POWER SUPPLIES

For use in many popular IBM®-compatible personal computers. Units include standard motherboard and disk drive power connectors, as well as extended switch cabling. Power requirements: 115VAC, 60Hz, 5A. Power output: +5V, 20A; –5V, 0.5A; +12V, 8A; –12V, 0.5A. Dimensions: 5¹⁵⁄₁₆W x 3⅜H x 5½″D. UL listed. Switch not included.

SOUND BLASTER® SOUND CARDS

CREATIVE WWW.SOUNDBLASTER.COM

NEW Call for current price

All Sound Blaster cards have a digital effects engine for reverb, chorus, flange and delay, 16 MIDI channels, 128 GM and GS compatible instruments, and 10 drum kits. Feature CD quality, 16-bit stereo digital audio, and full duplex support for simultaneous Internet record and playback. All have MIDI interface and joystick ports, IBM®-compatible 15-pin joystick port with analog and digital support, built-in 15-pin MIDI interface (requires adapter, not included; *contact your local Newark sales office*). **Type 50S3101002** includes 2MB, 4MB, and 8MB sample sets. Utilizes system RAM for wave-table synthesis; user-configurable for 2MB, 4MB, or 8MB. Compatible with Windows® 95, 98, NT 4.0, general MIDI, MPC-3, plug-and-play Microsoft DirectSound, DirectSound 3D, and derivatives. **Types 50455001001** and **20433601001** feature E-mu 3D Positional Audio, E-mu Systems® wave-table synthesis, and SoundFont® that lets you add new sounds and instruments to card. They accelerate Microsoft® DirectSound games and applications and include 1MB of build-in sound samples. Value card has 512K onboard RAM; Gold card has 4MB. Both are compatible with Windows® 95, NT, 3.1, DOS 5.0 and higher, general MIDI, MPC-3, plug-and-play, Sound Blaster, and Sound Blaster Pro 16, and AWE32.

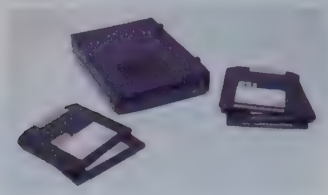
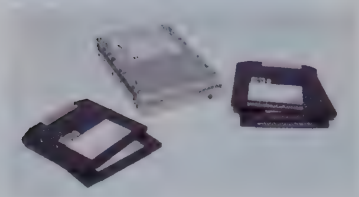
IOMEGA® DISK AND TAPE DRIVES

Call for current price





ZIP® 100MB DRIVES AND DISK

- **Zip Media is Ideal for Hard Drive Back-up, Multimedia Presentations, and Internet Downloads**
- **Up to 1.40MB/sec. Sustained Transfer Rate**
- **Easy Plug-and-Go Setup and Operation**
- **Average Seek Time: 29ms Read / 12ms Write**

Zip® 100MB drives provide the power, mobility, and performance to back-up valuable data and optimize hard drive operation. SCSI Zip drives are available in either external or internal versions. **Type 10714 SCSI** internal model installs easily in any 5¼" drive bay and connects to the included Zip zoom SCSI accelerator card. **Type 10012** parallel port drive connects directly to parallel port and includes a printer pass-through feature. **Type 10660** ZipPlus™ external drive provides speed up to 50 times faster than a floppy drive in Windows® 95. Fits all SCSI and parallel ports. Features a lightweight universal power supply and innovative multimedia software. Iomega 100MB Zip Media stores data quickly, easily and economically. Sustained transfer rate: 0.79 MB/sec. minimum, 1.40MB/sec. maximum. Typical throughput: up to 60MB/min. (SCSI), up to 20MB/min. (parallel).

2GB JAZ® DRIVES AND DISKS

- **Expand Hard Drive Without Limits**
- **High-Capacity Storage of Audio, Video, and Graphic Files**
- **Up to 8.70MB/sec. Sustained Transfer Rate**
- **1-Year Limited Warranty on Drive; Limited Lifetime Warranty on Media**
- **Average Seek Time: 10ms Read / 12ms Write**

Plug the Jaz drive into a SCSI port for an instant storage solution and unlimited expansion. Mac, DOS/Windows®, Windows 95, and Windows NT® compatible. The internal SCSI Jaz drives easily fit into any standard 3.5" or 5.25" drive bay on computer using a SCSI connection. 2GB Jaz drives provide enough space to back up a 4GB hard drive (with 2:1 compression). Up to an 8.7MB/sec. sustained transfer rate. 2GB Jaz drives are also backward compatible with 1GB Jaz disks.

DITTO™ TAPE DRIVES AND CARTRIDGES

- **One-Step Point-and-Click Backup**
- **Up to 10GB Storage Capacity (With Compression)**
- **Easy 5-Minute Installation**
- **Available in Parallel Port or Internal Version (Fits any 5.25" Bay)**

1-step Restore function identifies and retrieves files lost during backup. Ditto's Works software provides every detailed backup customization option. Plug-and-go connections make parallel drives extremely portable and simple to use. Internal tape drives are also easy to install in any half-height drive bay. 2GB Ditto™ drives feature average backup time of up to 19MB/min. maximum (internal); 9.5MB/min. maximum (external). Ditto Max™ and Ditto Max™ Pro drives offer professional strength backup with disaster recovery with FuliBack™ system recovery software. Backup maximum throughput: internal-36MB/min.; external-19MB/min.; using file compression of 2/1.

TELECOM TEST SETS AND TOOLS

TS22®AL, TS22®A TEST SETS

Built-in, amplified 2-way speakerphone for hands-free conversations; has 3 audio levels and is ideal for use with automated voice response (AVR) systems. High-impedance feature for DataSafe operation allows technician to clip onto a line in monitor mode without disrupting existing traffic. Features PBX pause button and mute switch. DropSafe passes 20' drop test; RainSafe enables performance in severe weather conditions. Stores nine 18-digit numbers in repertory dialer (speed dialing) for easy access to test boards and other frequently called numbers; has last-number redial and audible ringer for callbacks. Type 22804-009 has data lockout that protects against disturbing data flow on a variety of high-frequency digital lines including T1, ISDN, SW56, SRDL and HDSL. Angled clips included.

Stock No.	Type	Description	Each

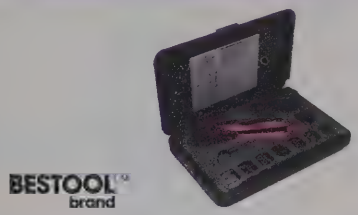
CRIMP TOOLS AND CABLE STRIPPERS

SUPER CRIMP SYSTEM



BESTOOL™ brand

Type LTK-100 crimp tool system includes everything needed to make coax and RJ crimp jobs fast and easy. Includes: a coax crimp tool and an RJ crimp tool with two mounting screws to allow easy die set change-over; die sets for RJ-11, RJ-45 and 10-pin modular plug applications; a D-subminiature die set; die sets for Plenum and PVC coaxial applications; Easy Strip® preps RG-58, -59, and -62 cable (removes the outer jacket on twisted pair). Features a ratchet-type crimp tool with adjustable tension, an offset head and a spring-release lever. Frame has an angled head for easy product loading and unloading. Molded grips maximize comfort and minimize user fatigue. Coax dies, used for hex crimping, are numbered by wire size; Plenum coax dies are labeled appropriately. Allen wrench included for setting spring tension.

97N8779 Type LTK-100. **Each** **400.29**

REPLACEMENT CRIMP FRAME & DIE SETS

CRIMP TOOL FRAMES

High carbon steel construction. Manufactured to exacting specifications. Life conservatively rated at 50,000 crimps. Interlocking die sets are easily interchanged with mounting screws.

66N9835 Type CTT-100L. **Each** **74.01**

2100-06 Crimps RJ-11 6-position plugs. Crimps 6, 4 and 2 conductors in RJ-11, 6-position plugs. Crimps conductor and strain relief in one crimp cycle.

66N9836 Type CTD-100-06. **Each** **37.68**

2100-06LB Crimps RJ-11 long-body 6-position plugs. Crimps 6, 4 and 2 conductors in RJ-11, 6-position plugs. Crimps conductor and strain relief in one crimp cycle.

66N9837 Type CTD-100-06LB. **Each** **37.68**

2100-08 Crimps RJ-45 8-position keyed or nonkeyed plugs, long-body 6-position plugs. Crimps 6, 4 and 2 conductors in RJ-11 6-position plugs. Crimps conductor and strain relief in one crimp cycle.

66N9838 Type CTD-100-08. **Each** **37.68**

2100-10 Crimps 10-position plugs. Crimps conductor and strain relief in one crimp cycle.

66N9839 Type CTD-100-10. **Each** **37.68**

MULTIPURPOSE CABLE STRIPPERS

1753

Multipurpose telestripper slits and strips twisted pair cable and strips flat telecommunications cable. Durable and user-friendly tool features long-life cutting blades for slitting and stripping. **Type 1754** features recessed cutting surface to slit long runs of twisted pair cable. Also features multiple nest cavities to allow the removal of a wide variety of jacket materials on twisted pair cable. Disengage tension loop for thin jacketed cables. Opposing cutting surfaces with penetration stops strip flat telecommunications cable.

Stock No.	Type	Description	Each

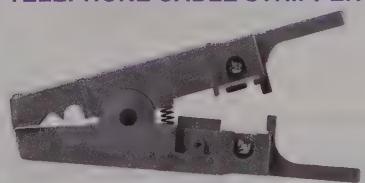
(7818) (ne08683)

MULTIFUNCTION TELEPHONE CRIMP TOOL

Type 2045 telephone tool crimps, cuts, and strips. Steel frame offers long-term durability and dependability. Crimps primary modular plug strain relief only.

92N3783 Type 2045. **Each** **49.99**
(17834) (ne10791)

TELEPHONE CABLE STRIPPER



Type 1421 strips round or flat, solid or stranded cable. 2-, 4-, 6-, 8-conductor.

10N285 Type 1421. **Each** **12.99**
(17833) (ne10790)

LS5 AND LS5E INDUSTRIAL PORTABLE LABELING SYSTEMS

LS5-KIT

- **High Quality 203 dpi Thermal Transfer Printing**
- **4.5H x 6.0W x 11.5″D (114 x 152 x 292mm)**
- **File Storage Memory**
- **Automatic Serialization and Legend Repeat Functions**
- **RS-232 Serial Communication Port**
- **2-Line x 16-Character Display**
- **32°F to 104°F (0°C to +40°C)**
- **6 C-Cell NiCad Batteries (Included)**

Hand-held, portable labeling systems designed to meet the rugged demands of industrial labeling applications. Produce self-laminating labels and wire markers, continuous laminated tape including bar codes, non-laminated commercial tapes, heat-shrink wire markers, tamper-evident labels, and die-cut labels. *Order AC power supply separately below.*

TYPE HSG HEAT SHRINK TOOLS

NEW

HSG Tools

Industrial-grade heat gun (**type HSG-115V-500**) features neoprene jacketed cord with molded strain relief with easy-change springs, brushes and 3-position switch (off, cold, hot) to help extend heat element life. Shrink tube reflectors (**type HSG-A1** and **type HSG-A2**) direct heat around tubing to reduce shrink time. Shrink tube concentrator (**type HSG-A3**) directs heat toward tubing and away from heat-sensitive items. UL listed, CSA certified (tools only). For use with Panduit heat shrink tubing sold *on page 1357.*

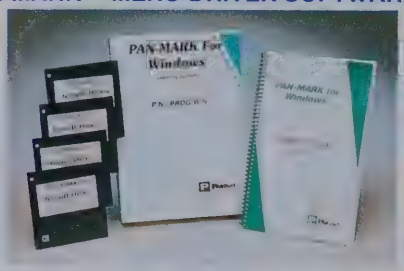
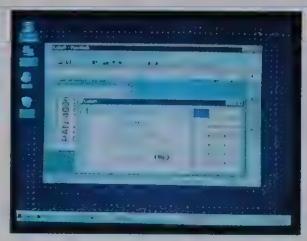
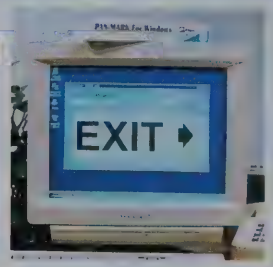
COMPUTER PRINTABLE ID PRODUCTS

PAN-MARK™ MENU-DRIVEN SOFTWARE FOR COMPUTER PRINTABLE LABELS/DATA PLATES







Type PDL-PROG-LT for DOS features quick labeling program for component and wire identification. Requires DOS 3.0 or higher, minimum 2MB RAM. Supports most dot matrix printers. Features serialization, alpha and numeric, and the ability to add special ASCII characters to legend. Supplied with 5.25″ and 3.5″ disks. **Type PROG-WIN2** features quick labeling program for component and wire identification. Requires Windows® 3.1 Windows 95, 98, or NT 3.5 operating system, any printer supported by Windows®, mouse or keyboard driven. Recommended for 486 processor and minimum 8MB RAM. Labeling system uses only 30 MB of hard drive space. Identifies wires and devices quickly and economically. Password protection for formats and label files.

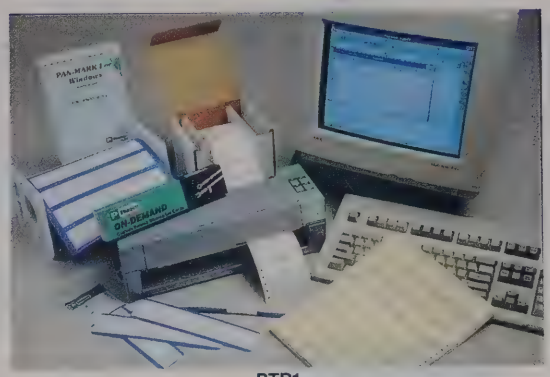
TYPE PTR1 DOT-MATRIX PRINTER KIT

CE



PTR1

Type PTR1 24-pin, dot-matrix printer creates legends on heat-shrink tubing, wire marker cards or any Panduit computer-printable dot-matrix label. Includes: printer, AC adapter, indelible ribbon and operator's manual. Compatible with existing Windows™ or DOS operating systems. Features adjustable print head and durable, rugged metal construction. Prints at 166 characters per second (draft) and 83 characters per second (near letter quality). Dimensions: 4.82H x 15.13W x 7.5″D. Weight: 10 lbs. CE compliant. Heat-shrink tubing for **type PTR1** printer *ordered separately on this page.*

COMPUTER-PRINTABLE HEAT-SHRINK TUBING

UL

Type LHS heat-shrink tubing is for use with dot-matrix printer kit **type PTR1**, *order separately on this page.* Precut tubing is roll-mounted on hole-punched plastic carrier. Available in white or yellow in 4 minimum expanded inside diameters. Material: flattened polyolefin. Shrink ratio: 3:1 @ 212°F (100°C). UL listed. Meets UL standard 224 for flammability. **Sold in rolls.**

PCM

WIRE MARKER CARDS

Vinyl cloth material with black legends on white background. Full-size markers: 1.5″ (38.10) long for up to 0.375″ (9.53) O.D. Legends available include individual solid letter repeated: (choose only ONE letter) A thru Z. Individual solid number repeated (choose only ONE number) 0 thru 100. 36 consecutive letters: A thru Z: Consecutive numbers: 1 thru 33; 34 thru 66; 67 thru 99; 100 thru 124; or 1975 thru 1999. To order, specify **type PCM** and add, as a suffix, the legend you want. For example, the legend "A" = **type PCM-A**; the legend "50" = **type PCM-50**; the legend "100 thru 124" = **type PCM-100-124** ; the legend "A thru Z" = **type PCM-A-Z**. Half-size markers 0.750″ (19.05) long for up to 0.188″ (4.78) O.D. are available; substitute **type PCMH-** for **type PCM-** when ordering. **Sold in packages of 25 cards (36 labels per card on two-digit markers, 25 labels per card on three-digit markers).**

WIRE AND CABLE TOOLS

MINITRACKER™ AND MINI COAX TESTER

NEW

62-202

62-204

Type 62-202 tester is designed for cable TV, security video, broadcast, and automation systems applications. Consists of a main unit and 4 remote color-coded F-type terminators. Each terminator has a unique resistor value. A main unit and remote terminator are required to perform coaxial cable testing. Tone mode sends a tone signal on coaxial cable for tracing. Provides testing for continuity, opens or shorts in multiple or single runs of coax. Identifies different termination points and cable runs within a structure. **Type 62-204** is designed for quick and easy operation. Tests opens and shorts on coax connected with BNC jacks. 2 modes of operation, standard and Hi-Z for long runs. LED low-battery indicator. Includes 500Ω BNC.

48F1311 Type 62-202. **Each**..... **95.58**
(33790)

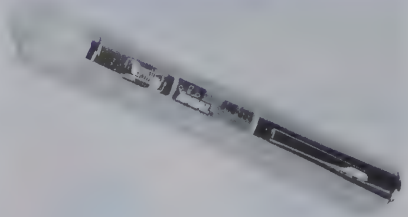
48F1312 Type 62-204. **Each**..... **51.18**
(33790) (ne33790)

WIRING VERIFIER - PATCH CORD CABLE TESTER

Type 62-050 verifies proper wiring sequence of modular plug cable assemblies. Identifies shorts, diagnoses open circuits and determines miswires. Tests continuity of paired cable and coaxial cable. Includes coaxial port, premium-grade RJ-45 jack ports and coaxial cable 50Ω terminator.

52F6556 Type 62-050. **Each**..... **110.38**
(18626) (ne11026)

POCKET-SIZE CONTINUITY TESTER



Checks continuity of dead circuits and grounds on conduit systems, identifies wires in multiwire cables. Light signal indicates completed circuit. Pocket clip reverses to serve as probe. Bulb in end works as flashlight. Includes 4′ (1.22m) removable cord with alligator clip. *Order 2 AA batteries separately; see product index.*

35F2236 Type 61-030. **Each**..... **18.39**

48F1315 Type 45-331. **Each**..... **41.37**
(5602) (de00839)

TEST-GLO™ INDUSTRIAL CIRCUIT TESTER

Dust-proof, moisture-resistant unit checks electrical circuits, spark plugs, motors, fuses and more. Long, thin handles with no-slip rings for deep probing. Neon lamp for easy spotting. 24″ (609.60) lead rated 10,000V permits wide-span use. Resistors between test prod and lead reduce voltage reaching leads. Use with 80 to 600V AC/DC.

35F2237 Type 61-040. **Each**..... **19.58**
(5604) (de00841)

VIDEOTRACKER™ COAX TESTER

NEW

Designed for cable TV, security video, broadcast, and automation system applications. Consists of a main unit and 8 remote color-coded F-type terminators. Main unit and one or more remote terminators perform coaxial cable testing. Tone mode sends a tone signal. Remote terminals are not required to send tone signal on coax in tone mode. Provides testing for continuity, opens or shorts. Identifies different termination points and cable runs within a structure. Single run mode tests and identifies individual cables within a group. Multi-run mode tests coax cables joined within a splitter. 9V battery included.

48F1313 Type 62-020. **Each**..... **119.95**
(33791) (ne33791)

CIRCUIT IDENTIFIERS

61-052

Locate and identify any circuit breaker or fuse protecting energized single-phase 120VAC electrical circuits without guesswork or service interruption. Multifunctional E-Z Check® Plus transmitter checks energized single-phase 120VAC outlets for proper wiring sequence and GFCI operation. Hand-held receiver with adjustable sensitivity level identifies specific circuit breakers or fuses with a flashing LED light and audible tone.

GFI & RECEPTACLE CIRCUIT TESTERS

Type 61-051 GFI circuit tester identifies faults in 3-wire, 125V receptacles, and tests integrity and operation of GFI protected circuits or outlets. Push-pull shape, easy-to-read indicators. Safety-yellow. **Type 61-035** receptacle tester is the same except no GFI outlet test capability. Both UL listed, CSA certified.

90F2394 Type 61-051. **Each**..... **33.87**

35F2254 Type 61-035. **Each**..... **16.61**
(5603) (de00840)

ABS™ AND LINKMASTER™ TESTER

NEW

62-180

62-200

Type 62-180 "Almost a Butt Set" tester permits identification of dial tone problems, polarity certification, presence of power, and tone tracing. A low-cost alternative to the traditional butt test. Features: speaker-verified, dual-tone quality, ring indicator tests lines for correct number, polarity indicator tests for correct wiring and power, tone trace feature finds tracing tone signal, volume control switch, RJ-11 jack for access to wall outlets, and 2 replacement line cords.

48F1308 Type 62-180. **Each**..... **94.44**

Type 62-200 for use with UTP/STP cables. Designed to test installed twisted pair wiring. Tests wiring configurations, checks for shorts, miswires, reversals, split pairs, unshielded and shielded modular plugs. Works great on Category 5 cabling. Debug, automatic shutoff feature and low-battery LED indication. Main unit and remote allow 1 person testing.

48F1310 Type 62-200. **Each**..... **108.10**
(33792) (ne33792)

VOLTAGE TESTERS

61-065

61-101

61-050

61-061

Type 61-065 has 2 separate volt indicators for double protection. Range: 80-600V AC/DC, 25-60Hz. Tests fuses, AC/DC identification, grounding, and leakage. UL listed, CSA certified.

35F2249 Type 61-065. **Each**..... **32.68**

Type 61-076 heavy-duty voltage/non-switching continuity tester. Range: 5-600V AC/DC, 24-60Hz. Tests circuit continuity, AC or DC identification, DC polarity, fuses, grounding, current leakage. UL listed, CSA certified. Uses **type 61-201** 1½V batteries, which are in packages of four; *order separately below.*

81F2816 Type 61-076. **Each**..... **56.87**

81F2819 Type 61-201. **Pkg. of 4**..... **7.09**

Type 61-070 replacement leadset for **types 61-065** and **61-076** voltage testers.

81F2820 Type 61-070. **Each**..... **17.80**

VOL-CON® LITE AUDIBLE VOLTAGE/CONTINUITY TESTER

Type 61-101 Lite Audible tester offers 6V to 460V AC and 120V to 240V DC. Offers features of **type 61-076** with smaller size and audible tones to distinguish AC/DC:

66F9137 Type 61-101. **Each**..... **81.81**

VOL-TEST™ AND POWR-GLO™ POCKET TESTERS

Vol-Test™ **type 61-050** tests continuity, polarity and voltage. Screwdriver tip removes/replaces faceplates quickly—no extra tools needed. 12-440V AC/DC. Includes 1.5V batteries.

50F3182 Type 61-050. **Each**..... **12.44**

Powr-Glo™ **type 61-060** electronic voltage detector checks voltage 12-440V AC/DC without contact. Detects breaks along live wires, energized AC circuits, underground leaks. **Type 61-061** is the same, but includes audible indicator. Both include 1.5V batteries.

50F3183 Type 61-060. **Each**..... **17.80**

93F8750 Type 61-061. **Each**..... **24.94**

WIRE AND CABLE TOOLS

COAX-CHECK™ AND COAX-CHECK™ REMOTE

PA-1560 PA-1565

A hand-held instrument designed to test continuity of coaxial cables. Tests continuity of 50 and 75 ohm coaxial cables including R658, R659, and RG62AU. Provides a pass/fail diagnosis with a clear LED display identifying an open conductor or braid/shield and shorted connection. Powered by a 9V battery (included). **Type PA-1560** identifies open and shorted connection. **Type PA-1565** includes a 75 ohm BNC adapter, F/F BNC adapter, and remote cables.

Stock No.	Type	Description	1-9	10-24
92F2623	PA-1560	Coax-Check™	48.54	47.13

(7558) (ne06078)

PATCH-CHECK™ AND PATCH-CHECK™ PLUS TELEPHONE AND DATA WIRING TESTERS

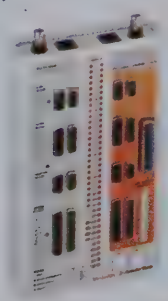
1529 1531

Both Patch-Check™ and Patch-Check™ Plus test local continuity for telephone (voice) and computer data cables (both RJ11 and RJ45) up to 1000 feet (Patch-Check™) and 1200 feet (Patch-Check™ Plus). Identifies open, shorted and cross-connected wires with a clear LED display. Identifies connector and cable pin-out using true mapping, not pairing. Includes 9V battery (2 in Patch-Check™ Plus). Patch-Check™ Plus is two units, a transmitter and a receiver to test remote cables installed through bulkheads or walls. Patch-Check™ Plus includes RJ11 and RJ45 patch cables (2 each).

Stock No.	Type	Description	1-9	10-24
50FX180	1529	Patch-Check™ Tester	65.10	63.21
50F6278	1531	Patch-Check™ Plus Tester	292.38	283.88

(7968) (ne53553)

PC CABLE-CHECK™ AND MAC CABLE-CHECK™ COMPUTER CABLE TESTERS



1570

Both PC and Mac Cable-Check tests continuity of male and female 9-pin, 15-pin, and 25-pin D-subminiature cables, RJ11, RJ12, and RJ45 phone cables, and 50 and 75 ohm coaxial cables. Additionally, the PC Cable-Check tests continuity of male and female 15-pin high density D-subminiature cables, and 36-pin Centronics printer cables. Also, the Mac Cable-Check tests continuity of male and female 50-pin Centronics printer cables, mini-Din, Din 5, and SCSI Powerbook cables. Both units powered by 9V battery (included).

Stock No.	Type	Description	1-9	10-24
92F2624	1570	PC Cable-Check™	174.68	169.60

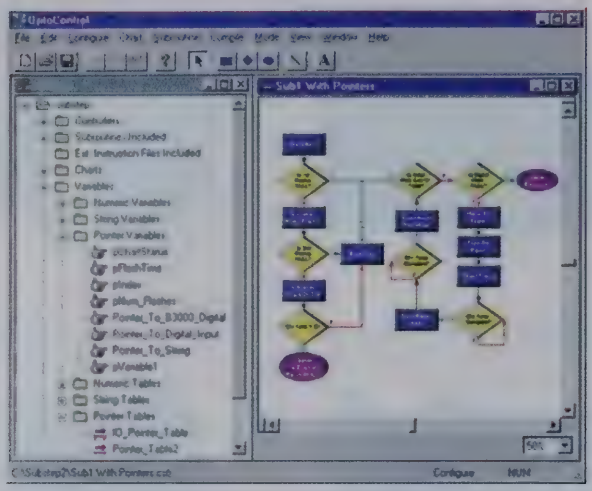
OPTO 22

SOFTWARE

FACTORYFLOOR SOFTWARE



FactoryFloor, Opto 22's new suite of Windows® 32-bit applications, is designed to deliver total control to industrial automation customers. It consists of four integrated components.

- **OptoControl - A graphical, flowchart-based, multitasking control language**
- **OptoDisplay - A graphical multimedia operator interface**
- **OptoServer - A 32-bit Windows-based client-server that connects the Opto 22 controller network with a PC-based FactoryFloor network**
- **OptoConnect - A drag-and-drop database utility that makes building SQL Server and Access databases a snap**

FACTORYFLOOR

Stock No.	Type	Description	1-9

OPTODRIVER

The OptoDriver Toolkit helps you build custom solutions for Opto 22 I/O Systems. Programmers using high-level languages such as Microsoft C++ or Microsoft Visual Basic can use the OptoDriver Toolkit to writer Microsoft Windows and DOS software applications that can access the brain board, rack and I/O combination that best fits their applications. Includes new 32-bit Windows-compatible drivers, Windows 16-bit drivers and Opto 22's classic DOS drivers.

PC INDUSTRIAL AUTOMATION LEARNING CENTER

Features:

- **PC based**
- **Fully functional industrial automation package with Opto 22 hardware/software**
- **Guides user through assembly and installation**
- **SNAP rack -SNAP-B8M**
- **8 digital points - SNAP-IDC5D and SNAP-ODC5SRC**
- **4 analog points - SNAP-AOV-27, SNAP-AICTD and SNAP-AIV**
- **B3000 brain board with a simulation panel and bar code reader**
- **Opto 22's Factoryfloor software suite/OptoControl, OptoDisplay, OptoServer and OptoConnect**
- **G4LC32ISA-LT communications/microprocessor card**
- **Steps to PC-based Industrial Automation tutorial**

Tutorial Activities Include:

- **Running a demonstration control strategy**
- **Investigation of powerful debugging tools**
- **Creation of flow charts**
- **Defining events/reactions**
- **Configuring PID loops**
- **Creating a man-machine interface**

SNAP I/O MODULES

- **Convenient pluggable connector for removable top mounted field wiring**
- **Ready access to standard fuses**
- **Modules "SNAP" securely on racks. No screws required**
- **Versatile DIN rail or panel mounting**
- **Single distributed I/O processor does it all**
- **Analog, digital or mixed I/O**
- **Highly visible LED status indicator for each channel**
- **Mix analog and digital modules on the same rack**
- **Handy snap on ID plates for channel labels**

SNAP I/O is Opto 22's newest and highest density I/O packaging. SNAP I/O includes 4-channel AC and DC digital modules and intelligent analog modules. SNAP's compact design delivers an overall space savings of 60 percent over traditional I/O, while innovative new packaging allows modules to simply "snap" in place.

SNAP DIGITAL AC INPUTS

MODULAR CONTROLLERS & ACCESSORIES

M4RTU

Modular controllers are designed to take advantage of the Opto 22 distributed, intelligent I/O architecture and provide a hardware foundation for Opto 22's new Windows® 32-bit FactoryFloor software suite. The **M4** bus supports a variety of communications interfaces with Ethernet, Arcnet, RS-485, RS-232, and fiber-optic cards. The modular controller line includes a general purpose controller, an I/O controller for data acquisition and control, and a powerful remote telemetry unit/distributed automation system. All modular controllers provide industrial packaging and include an **M4** processor, Opto 22's M4 expansion bus, and accommodate one of the various plug-in power supply options.

ISA CONTROLLERS

ISA controllers utilize the computer to deliver the same functionality as the Classic SX controller. Acting as a slave or bus master, the ISA controller can be used with either active or passive backplanes. Battery backed RAM starts at 256K and is expandable to 2MB. A hardware math coprocessor is available as an option.

CLASSIC CONTROLLERS

G4LC32

G4LC32 controllers include all the options required to solve the most sophisticated control problems. Classic controller performance is based on state-of-the-art 32-bit technology. The **G4LC32** controller includes: four high-speed serial ports, an Arcnet port, and a 4-line back-lit LCD display. 25-key membrane key pad. LED status indicators for diagnostics, and 512K battery backed RAM for program and data storage. The Classic **G4LC32SX** controller is an alternative to the Classic **G4LC32** for applications that do not require a keypad, display, or floating point math coprocessor. Floating point math is available on the SX but is performed with software rather than hardware and is for less intensive applications. The SX controller is equipped with 256K of battery-backed RAM that is expandable to 1MB. The SX is supplied with two RS-232/485 serial ports. Additional ports can be added using either of the two available interface adapters.

G4 ANALOG I/O MODULES

Offer high-density, single-channel packaging. Each module includes an LED status indicator. Factory-calibrated, offer 12-bit resolution, and require a single 24-volt power supply. All current loop modules include an isolated loop power supply for added flexibility and reduced instrumentation costs.

I/O MODULES FOR OPTOMUX/PAMUX

- **High density, single channel analog & digital modules**
- **Digital modules include LED status indicator. Also available with manual switching (MA) capability for field wiring and control logic testing.**
- **Digital output modules feature a top-mounted replaceable fuse (FUSEG4).**
- **Analog modules are factory-calibrated, offer 12-bit resolution and require a single 24-volt power supply.**
- **Analog input types include voltage, current, thermocouple, RTD, ICTD, frequency and velocity.**
- **Analog outputs include voltage, current and time-proportional output.**

Offer high-density, single-channel packaging. Each module includes an LED status indicator. Top mounted replaceable fuse. Input types include voltage, current, thermocouple, RTD, ICTD, frequency, and velocity. Outputs include voltage, current, and time-proportional output.

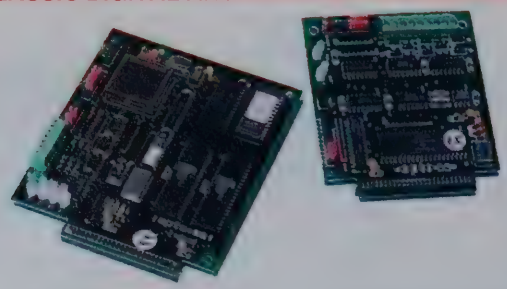
OPTO 22

DISTRIBUTED INTELLIGENT I/O SYSTEMS

CLASSIC DIGITAL AND ANALOG BRAIN BOARDS



Classic brain boards are distinguished by the protocol that they support. Mistic protocol brain boards include the B100 (digital) and B200 (analog). The Optomux protocol is supported by the B1 and B100 (digital) and B2 and B200 (analog) brain boards. Pamux brain boards include B4 (32 channel digital), B5 (16 channel digital) and B6 (16 channel) analog). The mistic protocol provides seamless integration with Opto 22's FactoryFloor software. The DeviceNet brain board allows DeviceNet customers to take advantage of Opto 22I/O. The DeviceNet brain board, operating as a Group 2 slave, can be integrated with Opto 22 Classic and SNAP digital mounting racks.

SINGLE BOARD CONTROLLERS

The Opto 22 LC4 family of controllers are powerful 8-bit single board computers intended for use with Optomux and Pamux I/O systems. The LC4 uses the EX1 interface for Pamux compatibility while the EX2 provides two additional serial ports and a 24-line parallel port for direct connection to Classic or SNAP mounting racks. The LC4 is not FactoryFloor compatible. Programming is accomplished with interpretive BASIC or FORTH.

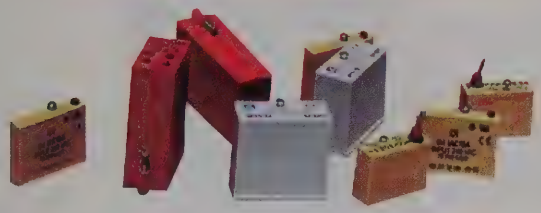
I/O MODULES FOR OPTOMUX/PAMUX



- **High density, single channel analog & digital modules**
- **Digital modules include LED status indicator. Also available with manual switching (MA) capability for field wiring and control logic testing.**
- **Digital output modules feature a top-mounted replaceable fuse (FUSEG4).**
- **Analog modules are factory-calibrated, offer 12-bit resolution and require a single 24-volt power supply.**
- **Analog input types include voltage, current, thermocouple, RTD, ICTD, frequency and velocity.**
- **Analog outputs include voltage, current and time-proportional output.**

Offer high-density, single-channel packaging. Each module includes an LED status indicator. Top mounted replaceable fuse. Input types include voltage, current, thermocouple, RTD, ICTD, frequency, and velocity. Outputs include voltage, current, and time-proportional output.

STANDARD I/O MODULES

Analog I/O modules provide a single channel of isolated A to D or D to A conversion for a wide variety of sensors and devices. The "T" module also includes 4000Vrms channel-to-channel isolation which eliminates any ground loop problems. Factory calibrated, no user adjustments.

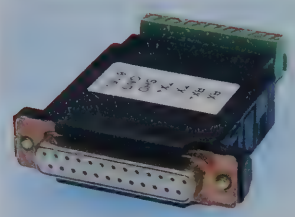
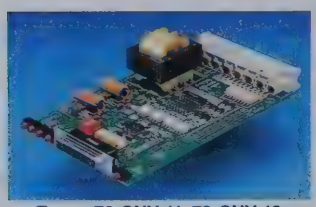
PC ACCESSORIES AND CONTROLLERS

72 SERIES COMMUNICATION CONVERTERS



Types 72-CNV-2, 72-CNV-4, 72-CNV-5



Types 72-CNV-11, 72-CNV-12

Types 72-CNV are RS-232 to RS-422/485 bi-directional converters which can be configured for DTE or DCE operation. **Types 72-CNV, -4,** and **-5** plug into any male RS-232 DB-25 connector and require external DC power supplies. **Type 72-CNV-11** is panel mounted and **type 72-CNV-12** is DIN rail mounted. Both have on-board 120/240VAC power supplies. **Types 72-CNV, -11,** and **-12** are optically isolated.

Stock No.	Type	Description	1-4

PAMUX® BUS ADAPTER CARDS

72-PMX-24D

Type 72-PC5 adapter boards control/monitor 24 digital I/O modules. Each group of 8 I/O modules are accessed through a separate I/O PAMUX® address using INP or OUTP function calls. Plugs into standard, mini, or G5 racks up to 24 positions. **Type 72-PMX-32D** and **72-PMX-32AD** plug into **70GRCP32**. The **D suffix** in the type number indicates control of digital I/O only; **AD suffix** indicates any combination of analog or digital I/O.

Stock No.	Type	Description	1-4

DEVICENET CONTROLLERS-DACNET

CE

72-DNT-32AD

DacNet controllers interface 32 analog and digital single-point I/O modules with DeviceNet an economical, open communications bus for industrial devices. The 5-conductor CAN bus connector provides power for the controller along with communications lines. Compatible with other DeviceNet devices. **Type 72-DNTE** is packaged in a DIN rail mountable metal enclosure. Controller size: 4.25 x 5.50″ (108 x 140). Operating temperature range is 0°C to +70°C. **Type 72-DNTE** is CE compliant.

MICRODAC AND PROMUX® CONTROLLERS

CE

72-MDC-32ADC

The host computer and MicroDAC or ProMux® controller(s) communicate serially using RS-422/485 in a multi-drop or repeat configuration and standard Optomux* messages. Messages permit simple ON/OFF functions, monitor voltages, current or temperature signals. Analog inputs can also be scanned for out-of-range alarming, averaging, or min/max capture. C programs can be downloaded to onboard MicroDAC memory for execution. 64K onboard RAM memory for data storage. All MicroDACs control a maximum of 32 analog or digital I/O's. MicroDAC LT does not have an auxiliary RS-232 port, SBX expansion port, or real time clock. PAMUX® boards control only digital I/O to a maximum of 24 points. **Types 72-MDC** and **72-MDLE** are packaged in DIN rail mountable metal enclosures and are CE compliant. MicroDACs measure 7.9 x 6.4″ (200.66 x 162.56). MicroDAC LTs 4.25 x 5.5″ (107.95 x 139.7) and ProMux® 4.0 x 4.5″ (101.60 x 114.30). Supply voltage is 4.75 to 5.25VDC. Supply current is 1.0A max. for MicroDAC; 0.5A max. for MicroDAC LT and ProMux®. Operating temperature range is 0°C to 60°C. Software utilities include setup and troubleshooting assistance; DLL and DDE packages. **Types 72-MDC** and **72-MDLE** are CE compliant.

LONWORKS™ CONTROLLER-MICROLON

CE

The Microlon controller combines the power of LonWorks™ technology with Grayhill Industrial I/O racks and modules. Microlon controllers control/monitor 8 analog and/or digital I/O modules using one of three different communications media-twisted pair transformers isolated at 78Kbps or 1.25Mbps or tree topology star at 78Kbps. 64 controllers per serial channel. 8K of external RAM is provided. Types with **C** suffix are packaged in a DIN rail mountable metal enclosure and are CE compliant. Controllers measure 4.5 x 4.9″ (114.3 x 124.46). Operating voltage is 4.75 to 5.25VDC. LonMark compliant. User manuals and software available; *contact your local Newark sales office.*

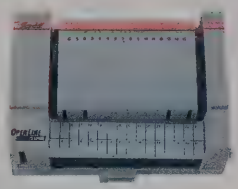
DUAL POINT AND BRICK I/O

Dual Point Input Module and Output Module



I/O Brick

70L and **73L series** dual-point I/O modules are available in a wide range of analog and digital input and output versions which can be mixed and matched on each base. They provide I/O flexibility and isolation (dual-point digital modules are two separate field isolated circuits). The modules are 2.7″ wide, 0.5″ thick and stand 2.5″ above the PCB (68.5 x 12.7 x 63.5). **77 series** analog and digital I/O bricks provide 16 channels of the same type of I/O. Bricks reduce the cost per channel in applications with a high concentration of the same I/O. Operating temperature range: –40°C to +85°C. Bricks measure 4.0 x 2.7 x 2.3″ (101.6 x 68.6 x 58.4). UL recognized, CSA certified, CE compliant.

Stock No.	Type	Description	1-9	10-24	25-49
91F4842	70L-OAC	Dual 120VAC Output	25.05	22.98	20.21

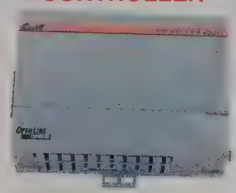
CONTROLLER



The open-line controllers are compact 386 or 586 based CPUs for local control and data acquisition programs. The controllers are intelligent slave devices on an RS485 Modbus or Ethernet TCP/IP network. Every controller is capable of interfacing with a combination of up to 8 I/O bases (128 channels of local I/O). IECI 1131-3 soft logic or C programs can be downloaded to on-board memory for execution. Real time clocks, auxiliary RS-232 port and PC104 expansion included on all versions. Operating temperature range is -40 to 70°C. Controllers measure 5.9 x 4.4 x 2.9″ (150.0 x 112.0 x 73.5).

Stock No.	Type	Description	1-4	5-9	10-24
91F4850	72-MOD-4200	Modbus Controller, 386 2MB DRAM, 1MB Flash	1297.89	1211.37	1162.41
91F4851	72-MOD-4300	Ethernet Controller, 386 2MB DRAM, 4MB Flash	1769.85	1651.86	1585.11

(13830) (ne10400)

POWER SUPPLY

Open-line DIN rail-mountable power supplies are available in 85-264VAC or 18-36VDC input types and provide ±5V and ±12V outputs. +5V output is rated at 7A and the rest at 0.75A. Operating temperature range is 0°C to 70°C. Derate above 40°C. Pluggable connectors for input and output voltages. The unit measures 5.9 x 4.4 x 2.9″ (150.0 x 112.0 x 73.5). UL recognized, CSA certified, CE compliant.

Stock No.	Type	Description	1-4	5-9	10-24
91F4870	74-PWR-AC1	85-26VAC to +5VDC	235.98	220.25	211.35

(13829) (ne10397)

DUAL-POINT AND BRICK I/O BASES

I/O bases provide field-wiring terminals for 16-channels of analog or digital I/O. For dual-point I/O bases, 8 dual-point modules (any mix of analog or digital module versions) snap into the base. For brick I/O bases, a single 16-channel brick snaps into the base. Intelligence in the base keeps track of the type and current status of each I/O. The values are stored in dual-port RAM memory. Operating temperature range is –40°C to +85°C. UL recognized, CSA certified, CE compliant.

Stock No.	Type	Description	1-4	5-9	10-24
91F4872	FSLI0B16	16-Position Dual Module I/O Base	206.49	192.72	184.93

INDUSTRIAL WIRELESS DATA COMMUNICATIONS

EZCOM™ RADIO

- Modubus ASCII, Modbus RTU or optomux protocols
- Provides Wireless Data Communications
- Long-Range Communication
- High Speed 211Kbs Data Rate
- Panel or DIN Rail Mount
- Industrial Temperature Range
- Forward Error Construction

The EZCom™ radio is a 900MHz direct sequence, spread spectrum (DSSS) industrial transceiver that can be used for point-to-point or point-to-multipoint data communications. Based on spread spectrum technology with direct sequence spreading for enhanced immunity to interference and jamming, reliability, and extended range. Power: +12VDC or +24VDC. No FCC user or site license required. Has store and forward repeater capability, and attached or remote antenna. Designed for industrial environments. 2-year warranty.

Stock No.	Type	Description	1-4	5-9	10-24

EZCOM™ DEVELOPMENT SYSTEM

The EZCom™ development system contains everything to develop and test an application including: 2 EZCom™ radios, 2 power supplies, 2 antennas, 2 data cables, 1 programming cable, user manuals, and EZsetup/EZdemo software, all packaged in a rugged case.

Stock No.	Type	Description	Each
83F7593	WL9D-DF1	EZCom™ Development System	1672.01
83F7594	WL9D-MOD-EVK	EZCom™ Development System	3448.50

(32791) (ne32791)

MINI POWER SUPPLY WITH POWER CORD

The power supply offers a reliable, compact unit for powering the EZCom™ radio with 120- or 240VAC. The power connector plugs directly into the EZCom™ transceiver.

Stock No.	Type	Description	Each
83F4205	WL-PWR-AC1	EZCom™ Power Supply	106.02

(32789) (ne32789)

PROGRAMMING CABLE

The programming cable allows the user to configure or monitor the EZCom™ radio network from a local computer. The programming cable is 8′ long and plugs directly into the EZCom™ monitor port.

Stock No.	Type	Description	Each
83F4204	WL-CPRG-8	EZCom™ Programming Cable	49.82

(32788) (ne32788)

DATA CABLE

The data cable connects the data port of the radio to the host computer or end device. Standard RS-232, female-to-female cable assembly. 6′ long.

Stock No.	Type	Description	Each
83F7585	503994-3	EZCom™ Data Cable	22.35

(32787) (ne32787)

WHIP ANTENNA

The whip antenna connects directly to the EZCom™ RF connector providing unity gain. Mechanical hinge to allow it to adjust from 0° to 90°.

Stock No.	Type	Description	Each
83F4203	WL-ANT-MNUA	EZCom™ Whip Antenna	30.75

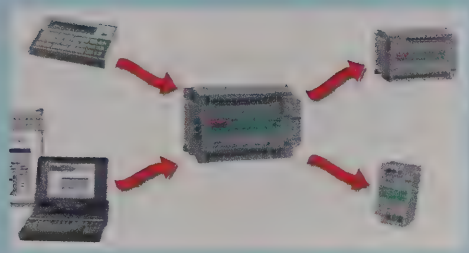
NEWARK ELECTRONICS® IS AN ISO 9002 COMPANY.

PROGRAMMABLE LOGIC CONTROLLERS AND PRESET LOADERS

IDEC'S MICRO-1 PLCs DO THE JOB OF NUMEROUS RELAYS AND TIMERS...



...AND NEWARK CAN SUPPLY THESE TO SUIT YOUR APPLICATION NEEDS!

(13938) (ne85146)

MICRO-1 PROGRAMMABLE LOGIC CONTROLLERS

- **Replaces Many Relays and Timers**
- **8 Inputs, 6 Outputs; Expandable to 16 Inputs and 12 Outputs**
- **80 Timers, 160 Internal Relays, and 47 Counters Built-in**
- **Micro Expansion for Incremental I/O**
- **WindLDR Software to Program the PLC**

GENERAL SPECIFICATIONS (STANDARD MODE ONLY)

Programming	Boolean or Ladder Logic
Program Capacity	600 Steps
Processor Speed	8µsec per Step
Internal Relays	160 Points
Counter/Timer (0-9999 Range)	127 Points (80 Timers/47 Counters)
Shift Register	128 Points
Computer Link Communication	32 Units
Expansion	1 Unit (Max.)
Communication Port	Loader 5V TTL
Memory	EEPROM, Built-In
I/O Points	28 Points (Max.) with Expansion
Total I/O Points	28 Points (Max.)
Special Internal Relays	89 Points
Power Failure Protection	Capacitor Backup: 3 Days Internal Relay, Shift Register, Counter, and Reversible Counter
Self Diagnostics	CPU Error (WDT), CRC Error, Check Sum Error, Communication Error
Catch Input	1 Point, 0.5msec Pulse
Voltage Range	100-240VAC/24VDC, 50/60Hz (Base Unit and Expansion Units) 100-240VAC/12VDC (Base Unit and 8 Input, 6 Output Expansion Only)
Temperature	0°C to +55°C (Operation), –20°C to +70°C (Storage)
Humidity	45-85% Relative Humidity (Operation, No Condensation)
Weight	450g Base Unit/410g Expansion
Mounting Style	35mm DIN Rail/Panel Mount

INPUT SPECIFICATIONS -- 8 INPUT POINTS

	12VDC at 8mA	24VDC at 8mA
On/Off Current	On: 3mA (Min.), Off: 1.5mA (Max.)	On: 4mA (Min.), Off: 1mA (Max.)
On/Off Time	On: 7 msec, Off: 11 msec (Max.)	On: 7 msec, Off: 11 msec (Max.)
Input Signal	For NPN Inputs, Use Source Input Micro-1; for PNP Inputs, Use Sink Input; for No-Voltage Dry Contact Input, Use Either Source or Sink Input Micro-1	

OUTPUT SPECIFICATIONS

Relay Output	**6 Points**
Configuration	3 Points with Common Return/3 Points with Independent Return
Switching Capacity	220VAC, 2A or 30VDC, 2A per Point (Not Exceeded by Total Across 3 Points Con. R/L)
Life Rating	Mechanical: 20,000,000/Electrical: 100,000 Operations (No Load/Rated Load) @ 1800 Op./h
Transistor Output	**6 Points**
Configuration	Sink: NPN Transistor, 6/Common; or Source: PNP Transistor, 6 Common
Rated Load	0.4A per Circuit (Max.), 12 to 24VDC ±10%
On Voltage	Sink: +1.5V (Max.); Source: Load Voltage –1.5V (Min.)
On/Off Time	On: 1 msec (Max.), Off: 1 msec (Max.)
External Current	40mA, 12 to 24VDC

Stock No.	Type	Description	Each
96F4007	FC1A-C1A4E	CPU, 24VDC Type, Source (NPN) Input, Relay Output	**245.82**

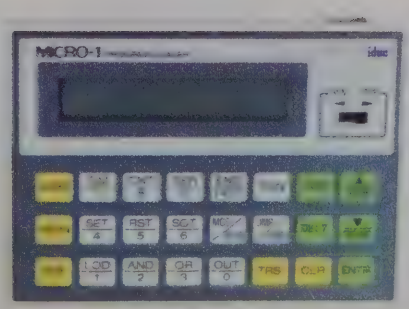
(13936) (ne10375)

PROGRAM AND DATA PRESET LOADERS

24-key, 16-character LCD hand-held program loader allows convenient direct entry of program commands. Data preset loader allows for changing only the timer and counter preset values without otherwise changing the user program, plus monitoring timer/counter operations with the new preset values in addition to I/O, internal relay and shift register operations. Cannot be used for entering or changing programs. Control key controls RUN/STOP switch. Power supplied from base unit. Units hook onto base units. CMOS-RAM backed up power failure protection.

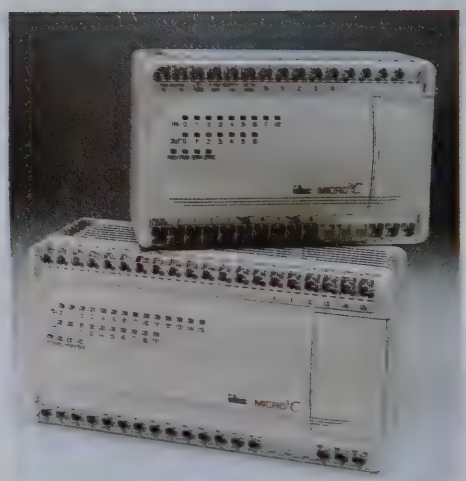
96F4022 Type FC1A-HL1E Program loader. **Each** **245.82**
96F4024 Type FC1A-PL1E Data present loader. **Each** **252.70**
(3425) (de02620)



Program Loader

MICRO³C PROGRAMMABLE LOGIC CONTROLLERS

Feature advanced remote communications with the capability to talk to any intelligent device with a protocol like bar code readers, scales, pagers, and modems. Two communications ports: ASCII or binary transmit/receive via RS-232 serial port; programming, networking, or expansion can be achieved via RS-485 port. UL listed, CSA certified, CE marked.



GENERAL SPECIFICATIONS

	Standard Processing	High Speed Processing
Data Register (16 Bit in Width)	500 Points	32 Points
Advanced Instructions	35 Instructions	
I/O Points	16 I/O (9/7), 24 I/O (14/10)	
Analog Potentiometer	1 Point	
Operating Humidity	45 to 85% Relative Humidity (No Condensation)	
Communications	Loader Port Standards: EIA RS232C; Data Link Terminal: EIA RS485, Expansion/Data Link communication: 19,200 bps (fixed); Loader Protocol Communication: 9600 bps (Fixed)	

I/O SPECIFICATIONS

Input Specifications

Input Voltage	24VDC at 7mA
On/Off Current	On: 2.5mA (Min.) at 11VDC, Off: 1.2mA (Max.)
On/Off Voltage	On: 11 VDC (Min.), Off 5VDC (Max.)
On/Off Time	Depends on Input Filter (Fun 7) Setting

Output Specifications

Relay Output	**7, 10 Points Output (Micro³C Relay)**
Configuration 16 I/O	7 Out, 4/Common + 2/Common Return and 1 Independent Return
Configuration 24 I/O	10 Out, 4/Common + 4/Common Return and 2 Independent Return
Switching Capacity	Independent Contact/Common Contact: (240VAC or 30VDC, 2A) Resistive Load
Life Ratings	Mechanical: 20,000,000/Electrical: 100,000 Operations (No Load/Rated Load) @ 1800op/h
Transistor Output	**7, 10 Points Output (Micro³C Transistor)**
Configuration 16 I/O	7 Out, 4/Common + 3/Common Return
Configuration 24 I/O	10 Out, 5/Common + 5/Common Return
Rated Load	0.5A, 24VDC (Max.): 0.625A/Circuit (30VDC)
On Voltage	Sink: 1.5VDC (Max.)
On/Off Time	On: 500µsec (Output Q0: 5µsec), Off: 500µsec (Output Q0: 5µsec)
External Current	24VDC, 100mA (Max.)

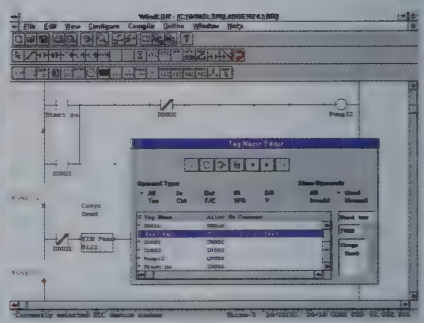
WINDLDR™ PLC SOFTWARE



- **One Software Package Programs All Micro Series PLCs**
- **Intuitive Programming**
- **Pre-Define Tags Using Tag Name Editor**
- **Customize View**
- **On-Line Monitoring**
- **Drag & Drop Feature**
- **On-Line Manuals**
- **Advantages of Clip and Cubiq Software, Plus Windows-Based Graphic Interface**
- **Icon Driven Toolbar**
- **Provides Ability to Customize Screen**

Combines the logic of ladder programming with the intuitive approach of a Windows environment. Supports the programming configuration of Micro series PLCs. Tag name editor: allows to pre-define labels for ladder logic before writing any code. Customize: ladder, toolbars, fonts, rung height, length, and width. On-line monitoring: debug mode, read and write, force outputs ON/OFF. Drag & drop: user friendly pulldown menus accessed through left and right mouse buttons. On-line: help, user manual, and example pages.

91F5723 Type WINDLDR. **Each** **195.67**
(13932) (ne10362)

FEATURES	BENEFITS
• TAG EDITOR	ACCESS AND EDIT COIL DATA IN ONE CONVENIENT OPTION
• CUSTOMIZATION	FOR TOOLBAR, LADDER FILE CHARACTERISTICS, AND MANY PROGRAM FEATURES
• RIGHT MOUSE BUTTON	CONTEXT-SENSITIVE FOR CONVENIENT ACCESS TO MOST COMMONLY USED COMMANDS
• ON-LINE MONITORING	DEBUG AND OBSERVE REAL-TIME PLC FUNCTIONALITY, RIGHT FROM YOUR PC
• MULTIPLE LADDER FILES	OPEN UNLIMITED LADDER FILES TO COMPARE AND REUSE INSTANTLY
• DRAG & DROP	USER-FRIENDLY TOOLBAR MAKES LADDER CREATION AND EDITING SIMPLE
• FIND STRING	SEARCHES FOR TEXT IN VARIOUS WAYS; LARGE LADDER FILES ARE EASY TO MANAGE
• MULTILEVEL UNDO	LIMITED ONLY BY AVAILABLE MEMORY
• CLIP AND CUBIQ	FULLY COMPATIBLE FOR UPGRADE
• ON-LINE HELP	CONTEXT-SENSITIVE; EXTENSIVE COVERAGE OF WINDLDR™ AND PLC FUNCTIONALITY
• MANUALS	THE WINDLDR TUTORIAL PROVIDES A QUICK, SIMPLE WAY TO GET UP AND RUNNING
• SUPPORT	CUSTOMER SERVICE AND SUPPORT SERVICES ARE AVAILABLE

(13934) (ne85145)

MICRO³ PROGRAMMABLE LOGIC CONTROLLERS

Units perform the work of over 200 relays and 32 timers/counters. Feature all of the benefits of large PLCs in a small size. Units feature built-in networking, user-programmable password protection, DC power supply for sensors, catch input, pulse output (PWM), high-speed mode 400µsec/100 steps, and 10kHz counter. Real-time clock and calendar available. Meet IEC-1131. UL listed. CSA certified, and CE compliant.

GENERAL SPECIFICATIONS

Micro3	Standard Mode	High Speed
Programming	Boolean or Ladder Logic	Boolean or Ladder Logic
Program Capacity	1012 Steps	100 Steps
Processor Speed	2.9 msec/1K Steps	400 µsec per 100 Steps

OMRON®

MICRO PLCs

CPM1A SERIES MICRO PLCs

Offer combination of compact size, high speed, high functionality, and high I/O counts for small-scale control systems. I/O density of 10, 20, 30, and 40, expandable up to 100. CPU, power supply, and I/O integrated into "micro" unit. Four configurable input interrupt response modes: immediate, high-speed counter, quick response, and scheduled interrupts to subroutines allow faster response to production situations. Communications options include RS-232C or RS-422 to a personal computer. Programs with low-cost, easy-to-use Windows-based software. Size: 3.5H x 3.35"D. UL listed, CSA certified.

Item	CPM1A-10CDR-A	CPM1A-20CDR-A	CPM1A-30CDR-A	CPM1A-40CDR-A
Supply Voltage	100 to 240VAC, 50/60Hz			
Programming Language	Ladder Logic			
Width	2.6"	3.39"	5.12"	5.91"
I/O Points	10 points (6 Input/4 Output)	20 Points (12 Input/8 output)	30 Points (18 Input/12 Output)	40 Points (24 Input/16 Output)
Timers/Counters	128 timers/Counters: TIM/CNT 000 to TIM/CNT 127 100ms Timers: TIM 000 to TIM 127 10ms Timers: TM000 to TIM 003 Decrementing and Reversible Counters			
Program Capacity	2048 Words			
Execution Time	Basic: 0.72 to 16.2 µsec. Special: MOV=16.3 µsec.			
Self-Diagnostic Functions	CPU Failure (Watchdog Timer), I/O Bus Error, Memory failure			

Stock No.	Type	Description	Each
83F6494	CPM1A-10CDR-A	10 I/O Controller	259.00
83F6495	CPM1A-20CDR-A	20 I/O Controller	375.55
83F6496	CPM1A-30CDR-A	30 I/O Controller	518.00
83F6496	CPM1A-30CDR-A	40 I/O Controller	518.00

CPM1A MICRO PROGRAMABLE CONTROLLER OFFERS GREATER SPACE SAVINGS, SYSTEM EXPANSION

- 51% SMALLER THAN THE 10 I/O CPM1. THIS REDUCTION AND COMPARABLE ONES FOR THE 20 I/O (48% SMALLER) AND 30 I/O (57% SMALLER) VERSIONS MAKE OMRON'S CPM1A TRULY A MICRO PLC.
- NEW 40 I/O UNITS PROVIDE ROOM FOR THE SYSTEM TO GROW
- FOUR CONFIGURABLE INPUT INTERUPT RESPONSE MODES: IMMEDIATE, HIGH-SPEED COUNTER, QUICK RESPONSE AND SCHEDULED INTERRUPTS TO SUBROUTINES ALLOW FASTER RESPONSE TO PRODUCTION SITUATIONS.
- BUILT-IN HIGH SPEED COUNTER SUPPORTS INCREMENTAL MODE (5kHZ) OR PHASE DIFFERENTIAL (2.5 kHZ) INPUTS
- USER-SET INPUT DELAY IMPROVES INPUT RELIABILITY BY FILTERING FOR CONTACT BOUNCE.
- TWO EXTERNAL ANALOG SETTING CONTROLS FINE-TUNE TIMER AND COUNTER VARIABLES
- PROGRAMS WITH LOW-COST, EASY-TO-USE WINDOWS-BASED PROGRAMING SOFTWARE
- COMMUNICATIONS OPTIONS INCLUDE RS-232C OR RS422 TO A PERSONAL COMPUTER

(16037) (ombiurb3)

FP0 SERIES SHIRT POCKET PROGRAMMABLE LOGIC CONTROLLERS

The **FP0 series** basic control module has a footprint of only 3 ½" square and is fully expandable. Up to 3 expansion modules can be snapped together with the base controller. Integral connectors eliminate external interface wiring. DIN rail mounting is built in. Control units are available in 10 and 14 relay I/O, 16 and 32 transistor I/O, and have a 2.7k step program capacity (the 32 I/O transistor unit has a program capacity of 5k steps). All offer a fast scan time of 1msec for a 500-step program, including overhead. Expansion units contain 8 or 16 relay I/O, and 16 or 32 transistor I/O. Maximum I/O configuration is 128 with transistor only outputs. All units include simultaneous 2 axis motion control function (pulse output up to 10kHz), 4 high-speed inputs (10kHz total) or 2 quadrature mode inputs (2kHz total), FP *soft*™ PLC programming software, an optional second RS-232C port, and networking capability. UL listed, CSA certified, CE compliant.

GENERAL AND PERFORMANCE SPECIFICATIONS

Operating Voltage	24VDC
I/O Points (CPU)	10, 14, 16, or 32
Program Capacity	2720 or 5000 Steps
Operation Speed	1msec/500 Steps
Labels/Step Ladders/Subroutines	64/128/16

INPUT SPECIFICATIONS

Input Voltage	24VDC
Electrical Isolation	Optical Coupler
Response Time	2msec or Less

OUTPUT SPECIFICATIONS

Relay	1 N.O., Form A, 2A @ 250VAC, Response Time 10msec or Less
Transistor	100mA @ 24VDC, Response Time 1msec or Less, Electrical Isolation: Optical Coupler

Stock No.	Type	Description	Each
91F7540	FP0-C10RS	24VDC Power, 6 Inputs (24VDC Sink/Source), 4 Outputs (Relay), Screw Terminals (CPU)	**176.07**
91F7541	FP0-C14RS	24VDC Power, 8 Inputs (24VDC Sink/Source), 6 Outputs (Relay), Screw Terminals (CPU)	**196.43**
91F7542	FP0-C16T	24VDC Power, 8 Inputs (24VDC Sink/Source), 8 Outputs (NPN), Includes I/O Connectors (CPU)	**208.64**

ATM SERIES INTELLIGENT OPERATOR PANELS AND ACCESSORIES

ATM-100

ATM-20

ATM-100 provides a compact, panel mount interface for any **FP series** programmable logic controller. The NEMA 4X front panel includes a 20 character by 2 line backlit LCD and a full numeric keypad with 24 programmable function keys. Up to 487 storage/display screens are available for the user to custom design an interface to command a variety of functions. The display can be set up to scroll or flash messages, which are triggered by the controller's internal relays, with up to 248 characters per screen. The panel can read and write PLC registers by address number or description. Comes with 3 built-in serial ports, EEPROM program memory, a real-time clock, user-definable function key stickers, 16 alarm messages, an audible beep function, and password security. Required operating voltage: 12-24VDC. Operating temperature range: 0°C to 50°C. UL listed, CSA certified. **ATM-20** is a powerful text display operator panel. Features a NEMA 4X front panel, 20 character x 2-line backlit LCD display, and tactile-feedback membrane keypad with 2 system keys and 6 function keys. Up to 248 user-configurable screens with up to 248 scrolling or flashing characters per screen. Includes 2 built-in serial ports, pass-thru capability to allow programming of the PLC, recipe entry, bar graph function, and alarm annunciation. Can be used with any **FP series** PLC and draws 5VDC operating voltage directly from the PLC program port.

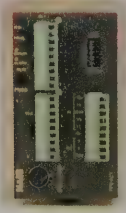
FP0 ANALOG MODULE



Provides two 12-bit analog inputs (±10V, 0-5V, or J, K, T thermocouple) and one 12-bit analog output (0-20mA, ±10V) in a compact plastic housing that snaps together with the FP0 CPU and expansion units. Automatic thermocouple linearization is standard. Combining the unit with the FP0 CPU provides full PID control with auto tuning. I/O: 2 analog inputs, 1 analog output. Resolution: 12 bits (1 part in 4000) for both inputs and output. Input signals: thermocouple (J, K, T type), ±10V, 0-5V. Output: 0-20mA, ±10V. Operating temperature: 0°C to 55°C.

48F3912 Type FPO-A21 **Each** **333.63**
(33994) (ne33994)

FP0 POWER SUPPLY

Space-saving 24VDC switch mode power supply for the FP0 PLC is DIN rail mountable for quick and easy installation. Input voltage: 100-240VAC. Output voltage: 24VDC at 600mA. 3.54(90)H x 1.18(30)W x 3.27"(83)D.

48F3913 Type FPO-PSA1 **Each** **79.17**

NT31 BACKLIT LCD TOUCH SCREEN

Choose a 5.7″ monochrome or 8-color LCD display. Bi-color allows allows the monochrome LCD to flash red for alarm conditions. The 8-color STN LCD provides bright, sharp color display. Connect to all Omron, Allen-Bradley SLC5/02, 02, 04, 05 (DFI protocol), and GE Fanuc 90-30 series (SNP-X protocol) PLCs. Connect directly to a barcode reader. Features log and view data points. Display bitmaps, touch switches, thumb wheels, lamps, alarms. **Type NT-MF261** memory module allows quick download/transfer of screen data to NT31 units. Field replaceable backlight. 2000 screen capacity. Front panel meets NEMA 4. Dim.: 5.59 x 7.68 x 2.19″ (H x W x D). Operating voltage: 24VDC, 10W max.

Stock No.	Type	Description	Each

CLEAR, DEPENDABLE DATA PRESENTATION AND CONTROL

- **Control and Access Critical Information from a Single Point**
- **Communication to PLC as Simple as the Touch of a Screen**
- **Significant Cost Savings from Replacing Hundreds of Pushbuttons, Thumbwheel Switches, Digital Readouts with One Compact Control Center**
- **Large, Easy-to-Read Screens and Flat Panel Construction**
- **Built-in Communications and Memory — No Complicated Configuration**

(34472) (ne34472)

DRN AND DRX SERIES DIN RAIL MOUNT SIGNAL CONDITIONERS

DRN/DRX Specifications:
- **10-32 VDC Input Power Supply**
- **DRN Output: 0-10V @ 10mA Max: 0-20mA or 4-20mA, 10V Compliance**
- **DRX Output: 2-Wire (Half Duplex) RS-485**
- **Isolation: 1800V Peak**
- **Typical Step Response to 99%: 1 Second**
- **Operating Temperature Range (Ambient): –5°C to +55°C (+23°F to +131°F)**
- **Storage Temperature Range: –40°C to +85°C (–40°F to +185°F)**
- **Mountable on to 32mm or 35mm DIN Rail**
- **Dimensions: 2.95H x 0.89W x 4.77″ (75 x 22.5 x 121)**

DRN/DRX Series DIN rail mount signal conditioners are ideal for all process and power monitoring applications. Models feature 3-way isolation, high-accuracy input, and programmable outputs. The signal conditioners can be used as front-end interfaces for programmable logic controllers or data acquisition systems. Models are available for most input signals including thermocouples, RTDs, AC voltage, AC current, process, voltage, strain, and frequency/pulse inputs. 2-wire (half-duplex) **DRN Series** feature analog scalable output, 0-10V, 4-20mA or 0-20mA.**DRX Series** feature RS-485 serial output and complete sensor-to-computer solution.

(2460) (ne08168)

DRN/DRX SERIES PROGRAMMABLE SIGNAL CONDITIONERS/TRANSMITTERS REPRESENT STATE-OF-THE-ART TECHNOLOGY

- **Computer Configurable Models**
- **Available for Thermocouple, RTD, Process, Strain, Frequency/Pulse, AC Voltage, and Current**
- **DRN Series Provides 0-10V, 4-20mA or 0-20mA Analog Output**
- **DRX Series Provides RS-485 Output**

The DRN/DRX Series DIN rail mount signal conditioners represent state-of-the-art signal conditioning technology, ideal for all process and power monitoring applications. The intelligent microprocessor-based modules provide a number of features including: high accuracy inputs, field programmable ranges, and 3-way electrical isolation. Models are available for most process signals, including thermocouples, RTDs, process, voltage, strain, frequency, pulse, AC voltage, and AC current measurement. Two base styles are available: the DRN Series, which provides an output in an analog voltage or current format; and the DRX Series, which provides a digital RS-485 output.

The DRN Series is designed to be the front-end for a PLC or data acquisition system. They feature an analog output signal which is directly proportional to the input signal. The output is scalable and may be set for 0-10V, 4-20mA or 0-20mA. Units are easily configured for different operating parameters by connecting to a standard PC serial port and using the DRN-CONFIG Windows-based software package. Once the unit is configured, the parameters are saved in non-volatile memory. Unit may be disconnected from the PC and needs to be reconnected again if an operating parameter is to be changed.

The DRX Series provides a complete sensor-to-computer solution. The units accept a variety of input signals and produce an RS-485 signal that may be sent to a computer or virtually any other instrument containing an RS-485 serial port. The DRX Series may be used to create a comprehensive distributed process monitoring network. Up to 32 modules may be interconnected over a distance of 4000′ (1200m) on a single pair of wires. Using the optional RS-485 repeaters, additional modules and distances are easily accommodated. With repeaters, up to 254 modules may be connected to a single RS-485 port. The modules feature a powerful, easy-to-use ASCII-based command set. Because communication is accomplished by simply reading and writing to and from the computer's serial port, a program may be developed using any language that provides serial port support. Software can be downloaded from Newport's website.

ADVANCED PID CONTROLLERS WITH FUZZY LOGIC-BASED ADAPTIVE TUNING

E5-J series auto-tuning controllers feature fuzzy logic adaptive tuning to optimize PID constants and improve process control even during changing conditions. Accurate to ± 0.5% set value for tight control. They offer an externally selectable second set point, field-selectable inputs, scaleable °F/°C ranges, event inputs, input shift function, two built-in alarms, and built-in heater burnout alarms. Selectable input types include: J, K, T, L, U, N, and platinum RTDs. Control modes include: Auto-tuning PID, PID, and ON/OFF. 1/4 and 1/8 DIN models offer digital inputs for run/stop operations and plug-in interchangeable outputs for easy, long-term maintenance. All models offer large LED displays, which present easy-to-read process and set values at a glance. All units require 100 to 240VAC supply voltage. Front panels are IEC IP54 rated (NEMA 4 with optional covers). Panel mounting adapters supplied. UL recognized, CSA certified.

E5EJ

1/4 AND 1/8 DIN CONTROLLERS

Control output boards are listed below.

Stock No.	Type	Size	Description	Each
52F4114	E5AJ-A2HB-F	1/4 DIN	Standard Model, 3.78H x 3.78W x 4.33"D (96 x 96 x 110)	369.93
52F4131	E5EJ-A2HB-F	1/8 DIN	Standard Model, 3.78H x 1.89W x 4.33"D (96 x 48 x 110)	369.93

1/16 DIN CONTROLLERS

1/16 DIN models have built-in outputs. Dimensions: 1.89H x 1.89W x 4.33"D (48 x 48 x 110).

Stock No.	Type	Description	Output Type	Each
52F4127	E5CJ-R2HB-F	Two Alarms, One Event Input, Heater Burnout Alarm (Except Current Output)	Relay, SPDT-NO, 3A, 250VAC	262.71
52F4126	E5CJ-R2-F	Two Alarms, One Event Input	Relay, SPDT-NO, 3A, 250VAC	246.62

E5CJ

CONTROL OUTPUT AND COMMUNICATIONS BOARDS FOR 1/4 AND 1/8 DIN CONTROLLERS

NOTE: If control period is less than five seconds, select solid state or voltage relay.

Stock No.	Type	Description	Each
52F4108	E53-R	SPDT, Relay, 5A, 250VAC	9.39
52F4109	E53-S	SSR, 1A, 250VAC	17.43
52F4105	E53-Q	Voltage, 12VDC, NPN, 40mA	20.11
52F4106	E53-Q3	Voltage, 24VDC, NPN, 20mA	17.43
52F4107	E53-Q4	Voltage, 24VDC, PNP, 20mA	17.43
52F4100	E53-C3	Linear Current, 4-20mA DC, 600Ω	71.04

ACCESSORIES FOR TEMPERATURE CONTROLLERS

52F4112	E54-CT1	Current Transformer for Heater Burnout Type Controllers, 0.23" (5.8) Dia. Hole	26.81
52F4113	E54-CT3	Current Transformer for Heater Burnout Type Controllers, 0.47" (12) Dia. Hole	40.21
52F4133	Y92A-48N	1/16 DIN Sized NEMA 4 Cover	30.83
52F4134	Y92A-49N	1/8 DIN Sized NEMA 4 Cover	36.19
52F4135	Y92A-96N	1/4 DIN Sized NEMA 4 Cover	45.58

(2445) (ne07248)

LOW-COST, 1/16 DIN PID CONTROLLER

Versatile, low-cost controller features selectable temperature ranges, control modes (PID, ON/OFF), and °F/°C scales. Accurate to ± 0.5% of full scale. Input voltage: 100 to 240VAC. Large, easy to read LED display. Eight-function alarm output (SPDT-NO relay, 1A, 250VAC). Rated IP50 (NEMA 4 with optional cover *on this page*). Dimensions: 1.89H x 1.89W x 4.17"D (48 x 48 x 106). Panel mounting adapter is supplied. UL recognized, CSA certified.

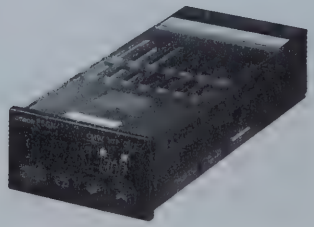
E5CS

Stock No.	Type	Description	Each
52F4129	E5CS-Q1KJX-F AC120	12VDC, 20mA with Short-Circuit Protection, Accepts J,K Thermocouples, Auto-Tuning of P Band	211.24

(2446) (ne07249)

SERIES E5GN DIGITAL TEMPERATURE CONTROL

1/32 DIN controller features selectable auto-tune or self-tune, on/off or PID. Accepts various temperature and analog inputs. NEMA4 front panel. UL listed, CSA certified, CE compliant.



STANDARD TEMPERATURE CONTROLLERS

Stock No.	Type	Description	Voltage	Each
48F4660	E5GN-R1TC AC100-2	Relay Output, 1 Alarm	100-200VAC	139.86

NEWARK HAS WHAT YOU NEED.
WITH SO MUCH IN STOCK, YOU HAVE THE COMPONENTS YOU NEED AT YOUR FINGERTIPS.

PROCESS AND TEMPERATURE CONTROLLERS WITH ADVANCED PID AND FUZZY LOGIC SELF-TUNING

Switch selectable for up to 22 input types with a wide selection of field-changeable output boards. Universal 100-240VAC or 24VDC power supply. Units feature heat/cool or standard operation. Control output units listed below must be used in conjunction with process controller. Current transformers for heater burnout alarm function and other accessories are available; *contact your local Newark sales office.* Meet IEC enclosure IP66 classification and NEMA enclosure type 4X. UL recognized, CSA certified, CE compliant.

Stock No.	Type	Description	Each
91F5956	E5AK-AA2-500	1/4 DIN, 100-240VAC Supply	428.91
91F5957	E5AK-AA2-500-AC/D	1/4 DIN, 24VDC Supply	434.27
91F5958	E5EK-AA2-500	1/8 DIN, 100-240VAC Supply	418.19
91F5959	E5EK-AA2-500-AC/D	1/8 DIN, 24VDC Supply	423.55
91F5960	E5CK-AA1-500	1/16 DIN, 100-240VAC Supply	235.90
91F5961	E5CK-AA1-500-AC/D	1/16 DIN, 24VDC Supply	257.35

CONTROL OUTPUT UNITS FOR TYPES E5AK AND E5EK CONTROLLERS

Up to 2 output units may be used with each controller. NOTE: If the control period is less than 5 seconds, use solid-state relay or pulse voltage output board.

52F4108	E53-R	Single SPDT, Relay, 5A, 250VAC	9.39
52F4109	E53-S	Single SSR, 1A, 250VAC	17.43
52F4105	E53-Q	Single Voltage, 12VDC, NPN, 40mA	20.11
52F4106	E53-Q3	Single Voltage, 24VDC, NPN, 20mA	17.43
52F4107	E53-Q4	Single Voltage, 24VDC, PNP, 20mA	17.43

CONTROL OUTPUT UNITS FOR TYPE E5CK CONTROLLERS

Only 1 output unit necessary. NOTE: If the control period is less than 5 seconds, use solid-state relay or pulse voltage output board.

91F5962	E53-R4R4	Dual SPST Relay, 3A, 250VAC	29.49
91F5963	E53-Q4R4	Single SPST Relay, 3A, 250VAC and Single 12VDC, NPN, 20mA Voltage	26.81
91F5965	E53-C4R4	Single SPST Relay, 3A, 250VAC and Single Linear Current 4-20mA, 500Ω	103.21
91F5968	E53-Q4Q4	Single 12VDC, NPN, 20mA Voltage and Single 12VDC, PNP, 20mA Voltage	76.40
91F5969	E53-Q4HQ4H	Single 12VDC, PNP, 20mA Voltage	76.40

SERIES E5K RAMP/SOAK PROCESS CONTROLLERS

NEW

Ramp/soak equipped process controllers have a time accuracy of ±0.2% (±500ms) of set value and can be programmed via time or ramp setting methods. All have multiple patterns, steps and broad set times (0-99 hrs, 59 min.; or 0-99 min. 59 sec.) to go with 16 steps for precise control, virtually eliminating overshoots. 6 customizable levels of security. Automatic PID tuning.100 ms sampling for analog input. RS-485, RS-232C, and RS-422 communications ports. NEMA 4, IP66 certified. UL listed, CSA certified, CE compliant.

Stock No.	Type	Description	Voltage	Each
48F1106	E5AK-TAA2-500 AC1	8 Patterns	100-240VAC	450.66
48F1107	E5AK-TAA2-500 AC/	8 Patterns	24VAC/VDC	492.10
48F1108	E5E5-TAA2-500 AC1	4 Patterns	100-240VAC	435.12
48F1109	E5EK-TAA2-500 ACD	4 Patterns	24VAC/VDC	440.30

(34078) (ne34078)

OMRON'S E5K SERIES CONTROLLERS PROVIDE VERSATILITY WITH ADVANCED PID AND FUZZY LOGIC SELF-TUNING

FEATURES:

- Switch Selectable for up to 22 Input Types
- Wide Selection of Field-Changeable Output Boards
- Multi-Functional with Front Panel Programming
- Universal 100-240VAC or 24VDC Power Supply
- Meets IEC Enclosure IP66 Classification and NEMA Enclosure Type 4X
- Built-In Advanced Process Control Functions
- Heat/Cool or Standard Operation

Omron's new E5K series controllers provide unmatched accuracy and application versatility. Choose from 1/4, 1/8, or 1/16 DIN sizes with universal AC or 24VDC power supply voltages.

These controllers feature a wide range of switch selectable input types, including: 15 thermocouples, 2 RTDs, and 2 linear current and 3 voltage types to meet virtually every controller application. Choose from a wide variety of output boards, *ordered separately*, including: relay, solid state, voltage, or current.

The E5K series meets IEC enclosure IP66 classification and NEMA enclosure type 4X, which makes them suitable for harsh environments such as food and beverage processing, packaging, semiconductor manufacturing, chemical, pulp and paper applications, and more.

The unique fuzzy logic self-tuning function constantly monitors controller performance and modifies the PID parameters as necessary to maximize controller performance during start-up, steady-state, and process disturbance operations. The result is faster ramp to set point during start-up without overshoot, faster recovery from process upsets, and better overall process management.

RAMP/SOAK PROCESS CONTROLLER FEATURES

- Time Accuracy of ±0.2% (±500ms) of Set Value
- Can be Programmed via Time or Ramp Setting Methods
- Multiple Patterns, Steps and Broad Set Times (0-99 hrs, 59 min.; or 0-99 min. 59 sec.)
- 16 Steps for Precise Control, Virtually Eliminating Overshoots
- 6 Customizable Levels of Security
- Automatic PID Tuning
- 100 ms Sampling for Analog Input
- RS-485, RS-232C, and RS-422 Communications Ports

ADVANCED DIGITAL PANEL AND ELAPSED TIME METERS

HAWK II AND HAWK H235 MICROPROCESSOR CONTROLLERS

HAWK II

HAWK

Types Hawk II H235 and **Hawk HK35** microprocessor controller/indicators. Easy front panel setup of display scaling, decimal point precision, alarm setpoints and relay settings. Up to two 5A relay outputs. 120VAC power. Both models have 3½ digit red LED displays and fit ⅛ DIN cutout. **Type Hawk II** has NEMA 4 front panel, is UL recognized, CE and CSA compliant. Options include 24VAC, 48VAC, or 12-48VDC power, excitation output, analog output. **Type HK35** options include 4½ digit display, 24/48VAC or 8-32VDC power, and analog or digital outputs. Additional inputs include DC Current, DC Process, ACTRMS voltage/current, resistance, frequency, temperature and tachometer. NEMA 4 cover available. *Contact your local Newark sales office.*

THERMOCOUPLES, CONTROLLERS AND ACCESSORIES

10 SERIES 1/4 AND 1/8 DIN TEMPERATURE CONTROLLERS

10 Series

10 Series 1/4 and 1/8 DIN temperature controllers have universal inputs that are field changeable for thermocouple and DC input. Display: dual 4-digit for setpoint and process value. Units are field selectable for On/Off or PID control. Self-tuning and adaptive tuning. Power requirements: 85 to 250VAC, 50/60 Hz. Faceplate meets IEC enclosure IP65 classification. Feature a 4-digit security code, second setpoint, ramp up and ramp down to new setpoints, and Auto Comp™ sensor break. Outputs: relay – 2A at 240VAC (resistive); SSR – 12VDC, 25mA max.; Triac – 1A, 24 to 240VAC (resistive minimum load), 50mA. UL listed, CE compliant.

1/16 DIN SINGLE DISPLAY TEMPERATURE CONTROLLERS

7SD

Types 7SD have universal input for thermocouple (J, K, L, N) or RTD Pt 100. Units feature single 3-digit display contained in a face plate that meets NEMA enclosure type 4X, 0.3% accuracy, On/Off or PID field selectable, AT auto and adaptive tuning, lock function, and LEDs to indicate deviation from setpoint. Power requirements: 100 to 240VAC, 50/60Hz. **Type 7SL** Limitrol® version is a Factory Mutual Approved high and low limit safety device. Output: Relay-3A at 250VAC (resistive); SSR-14VDC at 17mA max. UL listed, CSA certified, CE compliant. 24VAC/VDC units also available. *Contact your local Newark sales office.*

Stock No.	Type	Output	Each
16F4063	7SD-49103	Relay	**199.69**

(2462) (ne08174)

1/16 DIN DUAL DISPLAY TEMPERATURE CONTROLLERS

Series 7SF and **7SC** has universal inputs for thermocouple (J, K, L, N, R, S) or RTD Pt 100 and DC inputs. Units feature dual 4-digit display for setpoint and process value contained in a faceplate that meets NEMA enclosure type 4X, 0.2% accuracy, On/Off or PID field selectable, AT auto and adaptive tuning, 3-digit pass code security, and dual output (2nd is programmable as alarm or cooling output). Power requirements: 100 to 240VAC, 50/60Hz. Output: Relay-3A at 250VAC (resistive); SSR-14VDC at 17mA max; current: 4 to 20mA or 0 to 20 max. 500 ohms. UL listed, CSA certified. CE compliant. 24VAC/VDC units also available; *contact your local Newark sales office.*

(12965) (ne10019)

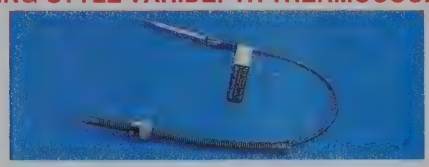
LOW-TEMPERATURE THERMOCOUPLE

Type SK5687 single-element Type J thermocouple with rigid sheath probe is designed for direct immersion in noncorrosive liquids or gases. Max. temperature: 600°F. Unit features grounded hot junction 3⁄16″ O.D. 304 stainless steel sheath, 72″ leads with stripped wire ends, fiberglass extension wire, and shrink sleeve strain relief.

91F3224 Type SK5687. **Each**..... **23.79**

(12963) (ne10018)

SPRING-STYLE VARIDEPTH THERMOCOUPLES



P111-31100 series spring-style type J varidepth thermocouples adjust to many immersion depths, eliminating the need to stock a variety of sizes. The locking cap rotates on the spring to create the desired holding force of thermocouple to the thermowell or object being monitored to ensure rapid heat transfer. This thermocouple has a spring, grounded single 3⁄16″ silver-soldered tip for fast response, stainless steel overbraid, and 20-gauge stranded wire with spade lug terminations. Maximum probe temperature: 750°F.

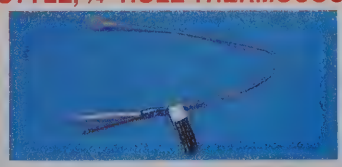
(3525) (ne07146)

LUG-STYLE, ¼″ HOLE THERMOCOUPLES



P111-00100 series lug-style type J thermocouples measure the surface temperature of an object such as a barrel or mold. The lug or ring is placed over a threaded stud and held in place with a nut. Lug type thermocouples are often connected in parallel with a second thermocouple to control at an average temperature. Wire is 20-gauge stranded and terminated with spade lugs.

QUICK DISCONNECT PLUGS AND JACKS

Plug Jack

Cable Clamp

Quick disconnect plugs and jacks are molded glass-filled plastic with the connecting parts made of the particular thermocouple calibration material. Frequent make-or-break will not impair the accuracy of the mating parts. Suitable for laboratory or industrial use where ambient temperature does not exceed 450°F.

1/16 DIN TEMPERATURE/PROCESS CONTROLLERS

ICN77000 MICRO-INFINITY™ SERIES 1/16 DIN AUTOTUNE TEMPERATURE PROCESS CONTROLLER

NEMA 12

NEMA 4

Feature a large dual display, front panel configuration, and selectable temperature/process inputs. Available in single and dual output configurations, the **ICN77000 series** is available with relay, SSR, DC pulse, analog voltage, or current outputs. A single alarm is standard. *See applications information on this page.* Round cutout models are available, *contact your local Newark sales office.*UL listed, CE compliant.

(2459) (ne08167)

MICROINFINITY™ ICN77300 AND ICN77500 SERIES OFFER FLEXIBLITY FOR PROCESS CONTROL

The MICROINFINITY™ series of controllers offers unparalleled flexibility in process control. Each unit allows the user to select the input type from 10 thermocouple types (J, K, T, E, R, S, B, C, N, and J DIN), Pt RTDs (100, 200, 500, or 1000Ω, with either 385 or 392 curve), or analog voltage or current input. The voltage/current inputs are fully scalable to engineering units, with selectable decimal point, perfect for use with pressure, flow, or other process input. The MICROINFINITY™ features a large, dual-LED display, front panel configuration, selectable temperature/process inputs, and universal 90 to 250 VAC/DC power supply, and more listed below.

Features:

- **Extremely High Accuracy, ±0.5°C, 0.03% Rdg. for Process Inputs**
- **Dual 4-Digit LED Display with Indicators for Output and Alarm Sounds**
- **Relay, SSR, DC Pulse, 0-10V and 0-20mA Output Types**
- **Ramp-to-Setpoint Feature Standard**
- **Universal Power Supply, VAC or VDC (Optional 10-34VAC or VDC)**
- **Thermocouple, RTD, or Process Voltage/Current Inputs**
- **Single- and Dual-Output Models with Dual-Alarm Capability**
- **Optional RS-232, RS-485, or Analog Output**
- **1/16 DIN Cutout with 2.1″ Square Bezel, NEMA 4 or 12 Protection**
- **Standard with One Alarm**

The ICN77300 Series controllers have many features of larger 1/4 DIN controllers in a compact size. They feature NEMA 12 rating and have dual-LED displays with different colors for the actual process and setpoint values. Individual indicators provide output and alarm status.

The ICN77500 Series controllers feature NEMA 4 rating, have selectable temperature/process inputs, and are available in either single- or dual-output configurations.

Type 215

Factory calibrated for DC input range indicated. Bright, 0.56″ (14.22) LED display. Decimal point programmable at connector. **201AN** and **2001 series** are 120VAC and fit standard ⅛ DIN panel cutout; screw-terminal barrier strip standard for signal and power. 215 series are 5VDC and fit half-height ⅛ DIN panel cutout; solder-tab board edge connector standard. Display range is 3½-digits (±1,999 counts) or 4½-digits (±19,999 counts).

Stock No.	Type	Signal Input Range, VDC	Display Range	Operating Voltage	Each

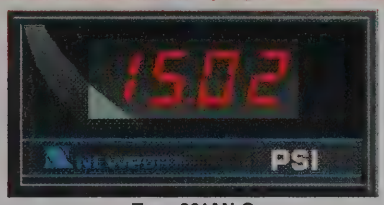
AC POWER-LINE MONITORS AND AMMETERS



Type 201AN-C

3½-digit units feature bright 0.56″ (14.22) LED displays, screw terminal barrier strip for power and signal connections, operate on 120VAC and fit standard ⅛ DIN panel cut-out. Decimal point programmable at barrier strip. **201AN-AC** series AC power-line monitors use factory-calibrated half-wave rectifier to read RMS values of sinusoidal signals. Provide AC voltmeter performance for AC ranges.

Stock No.	Type	Signal Input Range, VAC	Display Range	Each
89F1833	201AN-AC5	20-199.9	±1,999	**199.35**

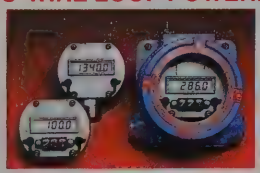
TWO-WIRE LOOP POWERED PROCESS INDICATORS



508B-2
508B-1 in Explosion Proof Housing

558B

LCD display indicators show such process variables as pressure, flow, temperature or level, depending on sensor and application. 3 1/2 active digit 0.35″ (8.89) display to ±1,999 and selectable dummy right hand zero for displays to ±19,990. Powered by 4-20mA input signal and jumper selectable for 1-5 and 10-50mA input signal applications. Standard electrical configuration for readout from 0 to 100.0 for 4-20mA. BASEEFA certified. EECS licensed. Cenelec Certified.

Stock No.	Type	Description	Each
89F1815	508B-1	Wall Mount w/Screw Terminal Barrier Strip	**341.42**

(2299) (de00215)

PROCESS INDICATORS AND CONTROLLERS

Type 202A-E

Type 2002A-P

Indicators/controllers, when integrated with sensors or transducer, reflect changes in voltage or current by displaying calibrated engineering units for pressure, loads or distance (depending on transducer) once indicator is scaled in the field. All units feature 0.56″ (14.22) LED displays, screw terminal barrier strip for power and signal connections. Units are standard ⅛ DIN panel cut-out (45 x 92mm). 120VAC. Models with relay output have dual setpoint controller board with 2 internal form C relays rated 10 amps at 20VDC or 24VDC resistive. 2 LED lamps indicate on/off status of either relay. Two pushbuttons on front-panel display high and low setpoints. Controller units can be wired for hysterisis, fail-safe control, latched or non-latched. Units with excitation output provide voltage supply to power transmitters, active transducers or passive networks. INFCP UL listed, CSA certified.

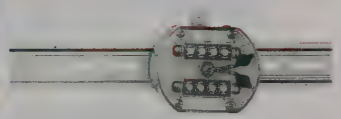
ISOLATED 2-WIRE 4-20mA TRANSMITTERS



Send low level signals over thousands of feet of copper wiring with noise immunity that voltage signals can't provide. Current loop power. Units input/output isolated to 1500Vrms. Zero suppression and span are course and fine field-adjustable. Housed in 2.9″ (73.66) diameter die-cast zinc alloy casing waterproof to 5psi. 55g shock resistant. Temperature range –40°C to +85°C with rated accuracy. Case surface mounts via four #6 rear-entry screws through-tapped holes, or push mounts into 2.5″ (63.50) relay track.

THERMOCOUPLE TRANSMITTERS

Stock No.	Type	Input Thermocouple Signal	Temperature Range	Output Current	Each

INF7 SERIES ⅛ DIN RATEMETER/TOTALIZERS

NEWPORT®

- **Reliable NEMA-4 Front Panel**
- **High Accuracy, Microprocessor Based**
- **Non-Volatile Memory-No Battery Backup Required**
- **Programmable Via Pushbuttons or RS-232/RS-485**
- **5 Open-Collector Outputs for Rate, Totalize, and Time**
- **Large Digital Offset for Scaling in Engineering Units**
- **6-Digit, 14-Segment LED Display**

Features an advanced microprocessor which permits the unit to be configured as a rate meter and counter with or without integral square root extraction, batch controller, or real-time clock. Standard features include a programmable decimal point and non-volatile memory. Calibration and scaling into engineering units is accomplished using front panel pushbuttons and/or optional RS-232 or RS-485 serial output boards.

INFINITY™ SERIES ⅛ DIN INDICATORS/CONTROLLERS

NEWPORT®

- **Process, Strain, T/C, RTD**
- **Smart Filtering**
- **4 Isolated Open Collector Outputs**
- **Accuracy: ± 0.005% of Reading**

6-digit meters can measure a broad spectrum of DC voltage and current ranges, thermocouple types, a variety of RTDs, inputs from pressure transducers, load cells, strain gages, as well as potentiometer inputs. On-board excitation is included to power virtually any sensor or transmitter. 4 standard set points can be configured as active above or below, latching or non-latching, as either high deviation, low deviation or band deviation, as well as numerous other possibilities. Front panel meets NEMA enclosure type 4 and has security lockout. Standard 1/8 DIN case panel cutout. User selectable 0-5V/1-5V/0-10V/0-20mA/4-20mA analog output. 115VAC standard, also available in 230VAC or 10-32VDC power.

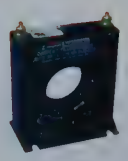
CURRENT TRANSFORMERS

Crompton INSTRUMENTS



802

802 series current transformers are for ammeter use. Terminals are No. 8-32 UNC brass studs with one flat washer, lockwasher, and regular nut. Frequency: 50-400Hz. UL recognized, CSA certified. Round donut-style current transformers with 18" leads and no fixing feet are also available. *Contact your local Newark salers office.*

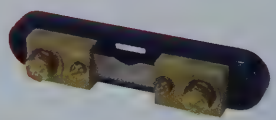
BASE-MOUNTED SHUNTS

Crompton INSTRUMENTS



Type FN base-mounted shunts are separately mounted units used for extending measurement of currents beyond the available limits of self-contained DC ammeters. Designed for use with standard 50- or 100-mV switchboard indicating or recording instrument calibrated in terms of the ampere rating of the shunts. The millivolt drop of the shunt is adjusted at the factory to within ¼% accuracy. For continuous operation, it is recommended that shunts are not run at more than ⅔ the rated current under normal conditions of use as per IEEE standards. Where possible, all shunts should be mounted on the grounded side of the circuit. Panel-mounted shunts with insulated bases must be mounted on the grounded side of circuits above 750 volts.

BASE-MOUNTED SHUNTS

Stock No.	Type	Current	mV	Each

PROCESS AND PANEL METERS

TYPE IDP PROCESS METER

4-digit LED process meter that has user-selectable inputs of 4-20 mA, 20-4 mA, 0-5V, 1-5V or 0-10V. Features are easy scaling to engineering units with or without an input signal to meter, front panel and remote tare, peak or valley recall and memory. 10V or 24VDC sensor excitation. ⅛ DIN case 4″ deep. Removable screw terminals for easy connections. *115VAC and red display standard. 230VAC, 10-32VDC and green displays are optional. CE compliant.

Stock No.	Type	Signal Input Range, VDC	Display Range	Relay Output	Excitation Output	Each

(2387) (de04304)

IDPH PH METER

NEW

Economical, user-friendly panel meter for pH measurement. Depth of 4.10″ (104) allows easy installation in areas with limited panel depth. Accommodates any pH elecrode with BNC connector. Temperature compensation is either manual or automatic with use of any 1000Ω platinum RTD. Input impedance: 10Ω. Display range: 0-14 pH. Accuracy: ± 0.02 pH.

88F1042 Type IDP-O/E **Each** **258.34**

(37371) (ne37371)

TYPE IDT THERMOCOUPLE METER

4-digit LED temperature meter has user selectable inputs of: J, J DIN, K, T, E, R/S and N. Selections are made via the front pushbuttons. Features are: C/F switchable, 1.0 and 0.1 resolution, min/max recall, external display HOLD input. ⅛ DIN case 4″ deep. Removable screw terminals for easy connections. *115VAC and red display standard. 230VAC, 10-32VDC and green displays are optional. CE compliant.

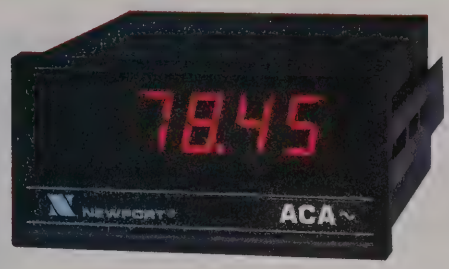
PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

PROCESS INDICATORS AND CONTROLLERS

NEW



Feature 0.56″ (14.22) LED displays, screw terminal barrier strip for power and signal connections. Units are standard ⅛ DIN panel cutout. Relay output. Dual setpoint controller board with 2 internal form C relays rated 10A at 20VDC or 240VAC resistive. 2 LED lamps indicate on/off status of either relay. Setpoints are screwdriver adjusable over entire display range or over narrower ranges selected by jumpers on screw terminal strip.

1/8 DIN DIGITAL PANEL METERS

INFINITY "C" SERIES INDICATORS/CONTROLLERS

9 Models for process, thermocouple, RTD,and strain inputs. Dual 7A relays and analog options available at time of order. Models feature 4-digit red LED display. Dual 6A relays and analog options available at time of order. Scalable 0-10VDC, 0-20mA, or 4-20mA analog output can be used for retransmission of the display value or as a proportional control output. Sleek 1/8 DIN design. All temperature models are C/F switchable. 115VAC standard. 230VAC, 10-32VDC or 25-56VDC power also available; *contact your local Newark sales office.*
(2473) (ne08438)

INFCTRA SERIES ⅛ DIN 6-DIGIT RATEMETER/TOTALIZER

- **Measures Rate from 0.5Hz to 30kHz**
- **Totalizes Up or Down from -99,999 to 999,999 or Acts as Accumulating Stopwatch**
- **Fast Low Frequency Measurements Every 50 Seconds**
- **Optional HI and LO Setpoints for Control or Alarm**
- **1/8 DIN Case with 5 Programming Keys**

INFCTRA Series ratemeter/totalizer offers user programming via 5 front panel keys. Programs are stored in non-volatile memory with 3 levels of program lockout for security. Selectable sensor excitation of 12.5VDC 50mA, 8.2VDC @ 40mA or 5.0VDC @ 30mA. Wide selection of signal inputs such as TTL compatible with protection to 25VDC, low level (25mVrms), high level signals protected to 115VAC, NAMUR or open collector PNP or NPN. 6-digit, 7-segment LED display. Accuracy: 0.01%. Power: 115VAC. Other configurations are available; *contact your local Newark sales office.*

INFCTP PROPORTIONAL THERMOCOUPLE TEMPERATURE PANEL METERS

Features time-proportional relay and open-collector outputs, 0.1° or 1.0° resolution, dual 6A relay and analog outputs. Rated 115VAC. Red LED display.

Stock No.	Type	Signal Input	Control Output	Analog Output	Each
93F9331	INFCTP-011	J,K,T,J-DIN	Yes	Yes	572.54

(2476) (ne08441)

INFCR RTD TEMPERATURE PANEL METERS

Standard features include a choice of 0.00385 or 0.00392 alpha curves; 2, 3 or 4 wire RTDs, 0.1° or 1.0° resolution, dual set points. Rated 115VAC. Red LED display.

Stock No.	Type	Signal Input	Control Output	Analog Output	Each
93F9325	INFCR-000	0.00385 or 0.00392	No	No	257.38
92F6552	INFCR-010		Yes	No	330.92
93F9334	INFCR-011		Yes	Yes	414.96

Optional Power: 25-56VDC and 10-32VDC are available on all models; *contact your local Newark sales office.*
(2477) (ne08442)

INFCT THERMOCOUPLE INPUT TEMPERATURE

Standard features include 0.1° or 1.0° resolution and dual setpoints. Rated 115 VAC. Red LED display.

Stock No.	Type	Signal Input	Control Output	Analog Output	Each
93F9323	INFCT-000	J,K,T,J-DIN	No	No	257.38
92F6545	INFCT-010	J,K,T,J-DIN	Yes	No	330.92
92F6546	INFCT-011	J,K,T,J-DIN	Yes	Yes	414.96

(2474) (ne08439)

INFCS STRAIN PANEL METERS

Wide selection of signal inputs, dual setpoints, peak reading, large offset capabilities for display in engineering units, front panel and remote tare, user selectable sensor excitation of 5, 10, 12, or 24VDC. Rated 115VAC. Signal Input: 0-100mV ±50mV, 0-5V, 1-5V, 0-10V ±5VDC, 0-20mA, 4-20mA. Red LED display.

Stock No.	Type	Control Output	Analog Output	Each
93F9329	INFCS-000	No	No	257.38
92F6568	INFCS-010	Yes	No	330.92
92F6569	INFCS-011	Yes	Yes	414.96

(2481) (ne08447)

INFCP PROCESS

Wide selection of signal inputs, dual setpoints, peak reading, large offset capabilities for display in engineering units, front panel and remote tare, user selectable sensor excitation of 5, 10, 12 or 24VDC. Rated 115VAC. Signal Input: 0-100mV ±50mV, 0-5V, 1-5V, 0-10V ±5VDC, 0-20mA, 4-20mA. Red LED display.

Stock No.	Type	Control Output	Analog Output	Each

(2480) (ne08445)

TEMPERATURE CONTROLLERS

INFCRP PROPORTIONAL RTD TEMPERATURE

Features time-proportional relay, open-collector outputs, 0.1° outputs, 0.00385 or 0.00392 alpha curve. Rated 115VAC. Red LED display.

Stock No.	Type	Signal Output	Control Output	Analog Output	Each
16F2829	INFCRP-011	0.00385 or 0.00392	Yes	Yes	572.54

INFCDR DIFFERENTIAL RTD TEMPERATURE

Accepts 2, 3, or 4 wire RTDs, 0.00385 or 0.00392 alpha curve, front panel selection of T1, T2, or T1-T2 indication, 0.1° or 1.0° resolution. Rated 115VAC.

92F6561	INFCDR-000	0.00385 or 0.00392	No	No	362.44
92F6552	INFCDR-010		Yes	No	330.92

(2478) (ne08443)

UNIVERSAL COUNTER/TIME/TOTALIZER

Universal 6-digit 0.56" (14.22) LED display is frequency meter, tachometer, rate meter, timer, totalizer with RS-232 interface. 7MHz maximum frequency. Fast low-frequency measurements, such as power-line monitoring to 5-digit accuracy every 150 microseconds. Selection of operating mode, scaling and setpoints via front-panel pushbuttons (with selectable hardware lockout). Units capable of handling TTL, NPN, PNP sensors, contact closures and passive magnetic pickups (not included). Fit 1/8 DIN panel cutout. Screw terminals for signal and power. 115VAC, 50/60Hz or non-isolated 5.5-12VDC. Relay output provides dual 10A relays for ON/OFF control or alarm applications, with latched or auto-reset modes.

Stock No.	Type	Signal Input	Relay Output	Analog Output	Each

PANEL METERS AND BAR GRAPHS

450 SERIES BAR GRAPH

- Various Shapes, Sizes, and Options
- Nonvolatile Memory
- Two-Year Warranty
- 88,000-Hour Life Expectancy

Models TB-101 are front panel programmable, single LED bar graph with optional digital display and relays. These 101-segment bar graphs are available as indicators only or with 2 or 4 front panel programmable relays. They are also available with a 4-digit display. The LED bars and digital display are red. **Models TB-101** (w/o digital display) can be mounted either vertically (std.) or horizontally. Power supply: 110VAC (std.), 220VAC, 5VDC, 24 VDC. Case dimensions: 1.42W x 5.85H x 6.25″D.
TB-202 series is a dual LED bargraph indicator with two 101 segment LED indicators in one unit. The versatile bargraph has two isolated inputs and comes with red LED bars. **TB-202** can be mounted either vertically (std.) or horizontally. Power supply: 110VAC (std.), 220VAC, 5VDC, 24VDC. Case dimensions: 1.42W x 5.85H x 6.25″D.
TB-52 is a compact LED bar graph indicator. This 52-segment bar graph is the perfect indicator when size is a factor. The bright LED is only available in red and may be mounted vertically (std.) or horizontally. Power supply: 5VDC (std), 24VDC. Case dimensions: 0.73W x 2.85H x 4.60″D. Other models with 220VAC, 5VDC, or 24VDC power supplies, input ranges, and display colors are available; *contact your local Newark sales office for details.*

ANALOG METER-RELAYS AND PANEL METERS

195 SERIES OPTICAL METER-RELAYS

NEW

Types 1952 (2½"), 1953 (3½"), 1954 (4½")

MADE IN USA

- Plug-in Control Module
- Long-Life Lamp Operation
- Plastic Front and Base
- Proven Optical Setpoints
- On/Off or Alarm Control

Type 195 series meter-relays contain an exclusive light-sensitive transistor switch that provides the ultimate in control simplicity and reliability. This switch controls the load relays. There are no pointer contacts or mechanical interferences in the meter mechanism. The controllers are supplied with a plug-in control module that mounts directly on the rear of the meter-relay or that may be remotely mounted with an accessory cable. **Type 1952** available in select ranges, *contact your local Newark sales office.*

G AND GL SERIES METERS

Fig.1

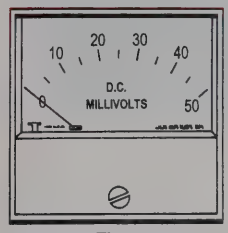

Fig.2

High quality meters have ±2% accuracy and high overload capacity. Feature spring-back bearings, white enameled metal dials, ceramic pointer stops, molded zero adjusters, and rugged construction. 0.73″ (18.54) terminal extension. **G series** meters have thermoplastic cases, and are 4-stud mount. Optional shallow barrel available. Half bezel illumination available as accessories. **GL series** have flat back thermoplastic cases and are 4-stud mount. Glass window contains contoured base with sealed meter movement, which allows use of lower front for mounting controls and switches. *Other case styles and meter types available; contact your local Newark sales office for details.*

DIGITAL PANEL METERS

⅛ DIN BIG-DIGIT PANEL METERS

NEW

- **3½ Digits with 0.8″ LED or 0.98″ LCD for Easy, Precise Viewing**
- **Requires Only 1.37″ (35) Depth Behind Panel**

Universal panel meters with large LCD or red or green LED displays for voltage or current. Standard ⅛ DIN industry panel cutout. Snap-in panel mount design for easy installation and secure mounting. Fit panels up to 0.08″ thick. Standard 4-20mA input is displayed as 0-100.0. Decimal point selectable by solder jumpers. Overrange and polarity indication. Surface mount design. DCV power: +5VDC. DCA power: loop (4-20mA DC).

Stock No.	Type	Display	Input	1-2	3-4

(32678) (ne32678)

2000 SERIES 1/8 DIN DC INPUT METERS

- **Meet NEMA 4, 12 and IPC 55 (Splash-Proof/Hose Down) Standards**
- **Shallow, 1″ (25.40) Depth**

Fit 1/8 DIN panel cutout. Ideal for dairy, pharmaceutical, food, petrochemical, and other demanding applications. Accuracy: ±0.1% + 1 count typical; ±0.2% + 1 count maximum. 0.5″ (12.70)H, 3.5-digit, 7-segment backlit, positive green LCD visible in sun or bright light. User-selectable decimal. Screw terminal connector. Polycarbonate case has gasket. Temperature range: –20° to +60°C. DPM and backlit power: 115VAC. 7th digit "**0**" denotes voltmeter.

Stock No.	Type	Input Range	Input Resistance	Each
51F3579	2033-3401-04-U	200mVDC	≥100mΩ	**126.07**

(3403) (de00779)

2000 SERIES 1/8 DIN LOOP-POWERED METER

Process meters similar to **2000 series** DC input models except self-powered from 4-20mA control loop. Accuracy: ±0.1% f.s. + 1 count. Conversion rate: 2.5 per second. Operating temperature range: –40° to +65°C. User-selectable decimal point.

Stock No.	Type	Input Range	Loop Drop Maximum	Each
51F3596	2013-3019-00-U	00.0 for 4mA Inputs	2.2V	**160.73**

(3407) (de00783)

2000 SERIES 1/8 DIN AC INPUT METERS

Rugged industrial meters have same features as **2000 series** DC models except AC input and negative red display. Accuracy: ±0.05% + 1 count; (*) denotes ±0.5% + 5 count.

Stock No.	Type	Input Range	Input Resistance	Each
51F3588	2053-3429-04-U	80-260VAC	1mΩ	**126.07**
51F3590	2053-3439-04-U	0-50AAC*	Current Transformer	**126.07**

(3404) (de00780)

SNAP BEZEL FOR 1000 SERIES DPMs

No mounting hardware required.

2000 SERIES UNIVERSAL SELECTABLE METERS

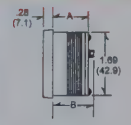

Figure A

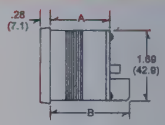

Figure B

- **High-Impact Polycarbonate Case**
- **NEMA 4, 12, and IPC 55 (Splash-Proof / Hose Down) Standards**
- **DIN Industry Standard Cutout**

Universal selectable true RMS AC voltage and current model or Process DC voltage/DC current meters allow you to select different inputs, scale in engineering units, select decimal point and calibrate from the rear of the instrument without opening the case. Surface mount and special design features result in unit that is only 1″ deep behind the panel (1½″ for **type 2153-3419-04**) and is splash- and hose-down proof. Screw terminals eliminate added cost of plug-on screw terminals or solder connectors. Operating temperature: –20° to +60°C. Over-range indication.

DIMENSIONS

Input Type	Figure	A	B
AC	A	0.99″ (25.1)	1.15″ (29.2)
DC	A	0.99″ (25.1)	1.15″ (29.2)
4-20mA Process	B	1.49″ (37.8)	2.00″ (50.8)

MINIATURE DIGITAL PANEL METERS

1000 Series

1000 SPM Series are 3½-digit, 7-segment backlit digital panel meters. Input: 200mVDC. Input resistance: ≥100MΩ. Conversion rate: 2.5 per second. Operating temperature: 0°C to +60°C. Accuracy: ±0.25% + 1 count maximum. 13-pin terminals. Window mount. **Types 1030-00-19** and **1060-00-19** are loop-powered from signal and input: 4-20mA DC. Accuracy: ±0.1% of F.S. + 1 count. Operating temperature: –30°C to +80°C. Window mount. *For bezel mounting, order snap bezel separately on this page.*

Stock No.	Type	Display Color	DPM Power	Each
51F3573	1030-01-01	Positive Green	9VDC	**57.89**
51F3575	1060-01-01	Positive Red	9VDC	**57.89**
51F3576	1060-02-01	Positive Red	+5V & –5VDC	**59.36**

51F3578	1060-00-19	Positive Red	Loop Powered	**96.44**

(6605) (nec9203)

2000 SERIES 1/8 DIN TEMPERATURE METER

Industrial temperature meter similar to **2000 series** DC input models except thermocouple input. User-selectable °C or °F. Input characteristic: 45µV maximum per 100Ω. Accuracy: ±0.1% + 1 count. Negative red display. DPM and backlit power: 115VAC. *Order thermocouples separately-see Product Index for selection.*

Stock No.	Type	Thermocouple Input Type	Each
51F3591	2053-3480-04-U	J: –30° to +650°C/–10° to +1200°F	**126.07**

(3405) (de00781)

2000 SERIES 1/8 DIN RTD TEMPERATURE METER

Temperature meter same as **2000 series** thermocouple models except RTD input. 100Ω platinum 0.00385 2- or 3-wire connection. Input characteristic 1mA RTD current. Accuracy: ±0.2% + 1 count maximum. °F or °C user selectable. DPM and backlit power: 115VAC. Negative red display. *Order RTD sensor separately; contact your local Newark sales office.*

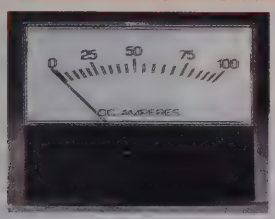
Stock No.	Type	Temperature Inputs	Each
51F3594	2053-3470-04-U	–300° to +500°C/–200° to +600°F	**126.07**

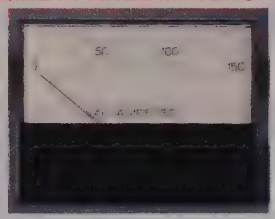
(3406) (de00782)

MODUTEC

MOVING MAGNET AND DIGITAL PANEL METERS

M SERIES MOVING-MAGNET PANEL METERS





- **5% Accuracy of Full Scale**
- **Flush or Surface Mount without Modification**

Quality meters feature high-torque, powerful ballistic movements that permit mounting in steel panels without special calibration and production-engineered mounting and electrical connections. **OMS** and **MSQ series** are square meters with operating zero adjusters and scales printed on translucent plastic. **ME series** edgewise meters are interchangeable with many d'Arsonval meters. Feature flush-to-panel covers, no disfiguring bulge. **3MAS series** rectangular 3½″ meters have operating zero adjusters and scales printed on translucent plastic, permitting diffused lighting. All **M series** meters operating temperature range: 0° to +50°C.

BL176201-U

- **High-Contrast LCD Readout**
- **User-Selectable Decimal Point**
- **Low Power Consumption**
- **Auto-Polarity (–) Displayed**

BL series digital panel meters feature 0.5″ (12.70) high digits on high-contrast LCD. 1999-count maximum. Accuracy: ±0.1% reading +2 count. Resolution: one art in 2000. User-selectable decimal point. Automatic polarity (–) displayed. **Type BL-100** is surface/window mount. **Type BL-130** is bezel mount. Both types have a 13-pin terminal. **Type BL-176** is flat pack DPM with solder pad connections. *Order* **type 176-BK** *bezel kit with mounting hardware separately below.* **Types BL-300** and **BL-500** are LCD digital panel meters with LED backlighting. Easily read in dark or bright sunlight. Digits are 0.5″ (12.70) high. 1999-count maximum. Decimal point user-selectable. Auto polarity. Red or green backlight. Backlight power: 5VDC. Voltage range: 4.7V to 5.25V maximum. Red current: 130mA to 200mADC, 165mA nominal. Green current: 75mA to 160ADC, 115mA nominal. 13-pin terminal. Operating temperature range: -20° to +60°C. **Type BL-300** positive image dark on green background; **type BL-500** negative image, red segments on dark background.

BIG-LITTLE™ DUAL-INPUT/DUAL-DISPLAY LCD BAR GRAPH METERS WITH LED BACKLIGHTING

BGE

BGE series elliptical LCD bar graphs utilize surface mount components and chip-on-board technology. Fast responding 100-segment bar graphs give trend information and follow rapidly changing input signal. Ideal for power supplies, UPS systems, or applications that monitor two parameters. Backlit LCD display reads easily in sunlight and dark areas. Bar graph is 3.5″ (88.90) long, with three 7-segment (±999) digits. Digit height: 0.34″ (8.64). Decimal point: 3 positions, external selection. Input: 200mV, backlight power 5VDC. Accuracy: bar graph ±1% typical, ±1.5% full scale maximum; digits, ±0.1% typical, ±0.25% full scale maximum. **Types BGE-30** positive green (dark segments, bright green background); **BGE-40** negative green (bright green segments, dark background); **BGE-50** negative red (bright red segments, dark background).

INTERCHANGEABLE KEYPADS FOR DIFFERENT ENVIRONMENTS

STORM® 1000 SERIES KEYPADS FOR PUBLIC AND OUTDOOR ENVIRONMENTS

VANDAL RESISTANT · Storm K Range · IP67 SEALED · OPERATIONS PER KEY · RESPONSIVE KEY ACTION · ESD PROTECTED

- Illustration shows telephone format
- Anti-vandal
- Metal casing and keytops (chromed)
- Fully sealed to meet IP67 standards for use in exposed outdoor applications
- Engraved keytop characters
- Gold on nickel plated FR4 contact PCB
- Available in 4-, 12-, and 16-key formats
- Operational life >4 million cycles per key
- –40°C (dry) to +100°C operational

Case color is silver; keytop color is silver. Connector is 0.1″ pitch, gold plated, square pin, male with locking ramp. CE compliant. Keypad height: 118.50mm for all types.

STORM® 2000 SERIES KEYPADS FOR USE IN HARSH INDUSTRIAL/WET ENVIRONMENTS

IMPACT RESISTANT · IP65 SEALED · OPERATIONS PER KEY · RESPONSIVE KEY ACTION · ESD PROTECTED

- Tough, impact-resistant construction
- Super high impact-resistant polymer casing and keytops
- Fully sealed to IP65, enabling low pressure hose wash down and use in exposed area
- Laser-engraved keytop characters
- Gold on nickel plated FR4 contact PCB
- Available in 4-, 12-, and 16-key formats
- Operational life >4 million cycles per key
- –25°C (dry) to +85°C operational

Case color is mid-gray; keytop color is light gray. Connector: 0.1″ pitch, gold plated, square pin, male with locking ramp. CE compliant.

STORM® 1000 PLX SERIES KEYPADS FOR PUBLIC/ OUTDOOR ENVIRONMENTS

CE · Storm® · VANDAL RESISTANT · OPERATIONS PER KEY · RESPONSIVE KEY ACTION · IP65 SEALED · IMPACT RESISTANT · ESD PROTECTED

- Compatible with Universal Encode
- Illustrations shows calculator form
- 4-, 12-, and 16-key formats
- Black case, silver chrome keys
- Telephone and calculator format keytop graphics
- IP65 rated against water and dust
- High level resistance to impact and operator abuse
- Long and reliable operational life (4 million plus operations per key)

Reducing cost and weight of vandal resistant keypads, the **PLX series** uses a revolutionary super high impact polymer case for resistance to abuse and attack. Ideal for applications that require toughness and resistance to water and dust. Keypad height: 118.50mm for all types. Chromed keys are retained to provide keytop graphics with unsurpassable toughness and wear resistance. Case color: black. Keytop color: silver. Connector: 0.1″ pitch, gold plated, square pin, male with locking ramp. CE compliant.

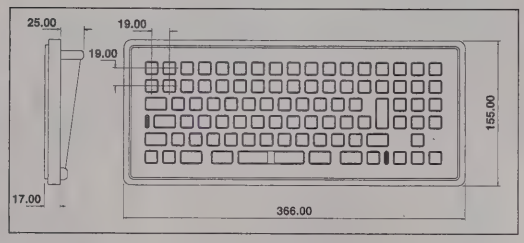
Under-panel mount configuration

Assembled with the optional 10″ rack mount kit



All dimensions are in millimeters (mm)

Constructed in super high-impact polymer with a hardened stainless-steel surface, these new keyboards are suitable for use in applications where the risk of vandalism or accidental damage prevents the use of conventional keyboards.

Many features of the proven Storm® **1000 series** vandal-resistant keypads have been incorporated to achieve a rugged, reliable, and responsive keyboard for use in most public or industrial applications.

- Resistant to impact, sharp objects, and operator abuse
- Resistant to most industrial solvents and cleaning agents
- Permanent, laser-engraved keytop graphics
- Small footprint (366 x 155 x 42mm) will fit into most 1U 19″ rack drawers
- Optional kits for under-panel mounting or conversion into a 4U high 19″ rack panel
- PC AT™ and PS/2™ compatible
- Excellent tactile characteristics for rapid and reliable data entry
- Operational life: >4 million cycles per key
- Operational temperature: –25°C (dry) to +85°C
- Shock and vibration protection exceeds MIL Standard 810D
- Environmental protection rating meets IEC enclosure IP65 classification
- Protected against RFI/EMI in accordance with US and European directives
- Sealed to IP65 / Industrial Keyboard sealed to IP54
- Keyboard cable fitted with 6-pin mini-DIN connector
- Case color: **11000203** is mid-gray; **11020203** is black
- Keytop color: **11000203** is mid-gray; **11020203** is black
- CE compliant

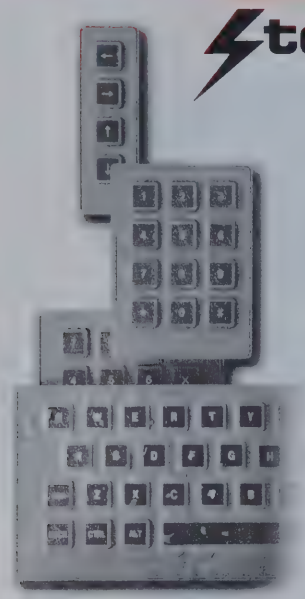
STORM® SEALED KEYPADS

STORM® 700 AND 900 SERIES KEYPADS FOR WET OR DIRTY ENVIRONMENTS



IP67 SEALED · RESPONSIVE KEY ACTION · ESD PROTECTED

- Illuminated (**900 Series**) or Non-Illuminated (**700 Series**)
- Interchangeable keytop legends
- Fast reliable data entry, even when keys are struck off center
- 4, 12, 16 or 36 key formats
- Positive tactile response
- Easy to clean and decontaminate
- Top-Surface or Under-Panel Mountable
- Compatible with the Universal Encoder (Type 40000003)
- Connector: 0.1″ pitch gold plated, square pin male with locking ramp
- Contact circuit: Gold on nickel plated FR4 PC board

A range of high-specification sealed keypads offering rapid and reliable data entry in extreme wet, dirty, or sterile environments. Storm® **700** and **900 series** keypads can be used individually or in combination to create more complex key panel layouts. Storm® **900 series** illuminated keypads incorporate twin diode dual-color LEDs. CE approved.

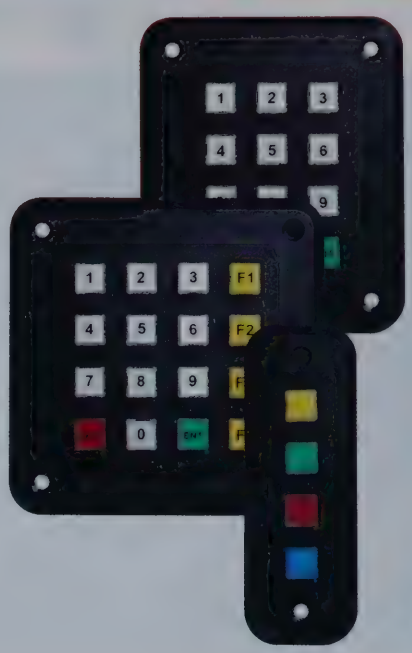
STORM® GRAPHIC SERIES KEYPADS WITH CUSTOM KEYTOP LEGENDS



Storm® **Graphic series** keypads feature keytop legends that can be configured or customized. The unique snap-on keytop cover encapsulates a polymer legend tile. The legend tiles can be selected from an extensive library of characters or symbols to suit many applications. Alternatively, customized keytop graphics can be created using laser-printed acetate film or screen-printed polymer film. Keytop colors can also be customized by backing the transparent polymer or acetate legend tile with a second colored tile. The impact- resistant keytop cover, once snapped into place, provides a permanent tamper-resistant lens, protecting the encapsulated legend from physical damage and water ingress. The introduction of the **Graphic series** means that Storm® keypads can now be tailored to meet specialized requirements even in low or medium quantities. These keypads are ideal for use in industrial, commercial, point of sale, or public applications.

- High impact polymer casing and keytops (with configurable keytop graphics)
- Rain, splash, and dust resistant to P54 rating
- Gold on nickel plated FR4 contact PC Board
- Operational life in excess of 2 million operations per key
- –10°C to +75°C operational
- Available in 4, 12, and 16 key formats

Keypad housing is black, keytops are transparent to show chosen encapsulated color. The **Graphic series** keytops are also available as individual items and can be used to replace keytops with permanent legends fitted to **STORM 1000, 2000, and 3000 series keypads**.

STORM® UNIVERSAL KEYPAD ENCODER

Enables individual keypads or combinations of keypad modules to interface directly with commonly used computer systems. Each unit is delivered ready for use and does not require additional assembly. The encoder's 8 DIP switches can be set by the user to enable configuration with PC XT, AT™, PS/2™, or ASCII RS-232 or 423 systems. Unit is capable of reading up to 90 individual key positions and includes an insulation displacement connector. Depending upon the combination of modules, each encoder can handle up to 4 keypads. Features a rugged ABS case designed to enclose electronics and provide mounting versatility.

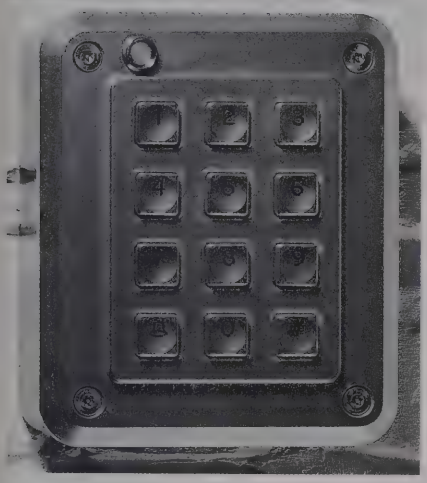
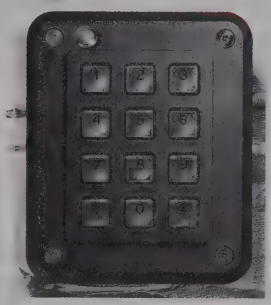
STORM® AXS STRIKEMASTER™ KEYPADS

STRIKEMASTER™ AND CODEMASTER™ KEYPADS FOR ACCESS CONTROL

CE Storm® AXS Secure Keypads for access control





Black version recommended for use with STORM® AXS-COM

VANDAL RESISTANT | IMPACT RESISTANT | IP64 SEALED | OPERATIONS PER KEY | RESPONSIVE KEY ACTION | ESD PROTECTED

Secure, self-contained keypad and controller for electrically operated door locks and strikes. Storm® AXS keypads provide rapid and reliable access control in "high-traffic" applications. Constructed to withstand hard use and abuse, the keypads can be fitted in exposed, unsupervised locations. Available in the "vandal resistant" specification, complying with mandatory standards, Storm® AXS keypads are ideal for use in all indoor and outdoor installations. Authorized personnel use their PIN code to open either one or two normally locked doors. Up to 50 different 4-, 5-, or 6-digit codes can be individually programmed. Each code can be set to trigger an electric lock or strike for a pre-set time (allowing just one person to access); or to "latch" the door in an unlocked condition (requiring the code to be re-entered to "unlatch" or re-lock the door). If the Strike Master™ keypad is used to control a single door, the "forced door alarm", "anti-tamper alarm", and "duress alarm" features can be enabled. The black version is recommended for use with **STORM® AXS-COM**. Code Master™ converts codes entered via the keypad into industry standard (26 & 32 bit Weigand) data. Suitable for use as a replacement for (or in conjunction with) most standard card readers. All types are 12 key (Tel.).

- Up to 50 user-programmable PIN codes
- 4-, 5-, or 6-digit PIN codes
- Indexing permits the secure allocation and re-allocation of PIN codes
- One- or two-door control
- Operational life >4 million cycles per key
- Anti-tamper alarm
- PIN code entered under duress alarm
- Forced door alarm
- Timed strike or latching door operation
- Fail (open) Fail (closed) option
- Timed lockout for repeated invalid code input
- Remote exit switch facility
- Disguised PIN code feature
- All-weather resistant
- LED and audible tone status indication
- Requires 11 to 28VDC or 9 to 20VAC power supply
- Quick and easy to install

AXS-COM INTERCOM FOR ACCESS CONTROL

CE Storm®

VANDAL RESISTANT | IMPACT RESISTANT | IP64 SEALED | OPERATIONS PER KEY | RESPONSIVE KEY ACTION | ESD PROTECTED

Storm® AXS-COM is a secure, self contained, two way voice communication system. A receptionist can converse with visitors awaiting access through a locked door. Then by pressing a release switch the receptionists can unlock the door remotely. **AXS-COM** is a stand alone system, or can be used in conjunction with **Storm® AXS-COM** Access Control Keypads. There are two versions of **AXS-COM**, one providing communication between a visitor and a single station within the building, and another providing communication between a visitor and up to four stations within the building (e.g. receptionist, goods in, trade desk, night security; etc.) Each **AXS-COM** is supplied complete with one receptionist's handset incorporating a remote release switch. Additional handsets can be ordered; *contact your local Newark sales office*. Can be used to control the Electric Door Strike or in conjunction with the Power Supply, *contact your local Newark sales office*. CE compliant.

- Tough, weather resistant and vandal resistant construction
- Clear, two way voice communication
- Anti-tamper alarm output
- Door bell / Call buttons
- Quick and easy installation
- 1-4 Station communication

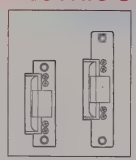
AXS ELECTRIC STRIKE



Faceplates for timber or aluminum/ steel frames included

Storm® AXS electric strikes operate in conjunction with deadlatches and offer remote traffic control. A jaw strength of 2000 lbs. (907kg) is achieved by a stainless-steel blocking mechanism. The strike is controlled by the STORM® AXS keypads and Storm® AXS COM intercoms.

Storm® AXS electric strikes have flat faceplates for mounting in the frame of single-action, single-leaf doors.

- Tested to 1 million cycles
- UL Listed for burglary resistance
- Current draw: 0.170A @ 24VDC
- Latch throw: 12.7mm (0.5")
- Faceplates for both timber frames and aluminum/steel frames included

GREYLINE OPERATOR INTERFACES

2000/2100/2200/2300 SERIES GREYLINE OPERATOR WORKSTATIONS

2- or 4-line (20 characters per line) operator interfaces are available in 4mm or 5mm backlit supertwist LCD or vacuum fluorescent display. Case: molded plastic. Feature 8 main tactile dome function keys, 8 separately legendable indicator LEDs, and a numeric keypad with 4 additional legendable function keys. Direct PLC interface with more than 20 downloadable protocols. Dimensions: 7.7H x 6.85W x 3.67"D. Operating voltage: 110VAC. Front panel meets NEMA enclosure type 4. **2000 series** is UL and cUL listed. Also available with serial communication ports with 19.2K baud rate using ASCII protocol via optically isolated RS-232 or RS-422 ports. Optional real-time clock/calendar is also available; *contact your local Newark sales office. Order Greyline universal software and cables separately on this page.*

Stock No.	Type	Description	Each

5400/5600 SERIES MICRO MESSAGE CENTERS

2- or 4-line displays are available in either LCD or vacuum fluorescent displays with 5mm characters. Connect directly to PLC ports. Feature 4 user-definable function keys with audible feedback. Dimensions: 4H x 7W x 4.5"D. Operating voltage: 10-30VDC. Also available with serial communications ports with 19.2K baud rate, ASCII protocol using PS-232 or RS-422 ports. Front panel sealed to meet NEMA enclosure type 4. *Order Greyline universal software for use with* **5400 series** *and cables separately on this page.*

(15442) (ne10582)

3400 SERIES OPERATOR WORKSTATIONS

2- or 4-line (20 characters per line) multifunction operator interface devices are capable of information display and data entry. Connect directly to PLC ports. Feature 16 independent indicator LEDs, 20 legendable tactile dome function keys, numeric keypad, legendable slide-in logo, and run, error, and power LEDs. Units available with or without real-time clock/calendar. Dimensions: **types 3414**, 5.875H x 13W x 2.619"D; **types 3415**, 7.125H x 13W x 2.68"D. Operating voltage: 110VAC. Front panel sealed to meet NEMA enclosure type 4. *Order Greyline universal software and cables separately on this page.*

NEW CE UL NEMA

MICRO GREYLINE OPERATOR INTERFACE

1000 series operator interface is a low-cost, 2-line, VF or LCD operator interface with 4 pushbuttons, 4 LEDs, arrow keys, inc/dec keys and a numeric keypad function. One RS-232/422 port connects the OI to the comm./prog. port of all the most popular micro PLCs, including AB, Idec, Omron, Mitsubishi, PLCDirect/Koyo, Modicon, GE, Siemens, and others. A WIN95 compatible editor is available to enter messages and download the appropriate driver. Also supports ASCII serial communications. 24VDC @ 2.5W. Meets NEMA enclosure type 4/12. UL listed, CE compliant.

(15432) (ne10587)

MESSAGE CENTERS AND DISPLAYS

Message centers display status or alarm messages that can be viewed up to 35′ away. **Types 5003, 5004,** and **5004D** are programmable controller-compatible and come complete with all interface options. 99 programmable messages comprised of 9mm, 11mm, or 15mm green alphanumeric dot matrix characters. BCD or binary parallel input for message call-up. 5208A and 5209A display 1 or 2 lines of 20 characters; multidrop up to 127 individual stations; communicate via RS-232 or RS-422 at up to 19.2K baud rate. Operating voltage: 110VAC. Dimensions: **type 5003,** 4.25H x 10.25W x 4.75″D; **types 5004** and **5004D,** 4.25H x 13.875W x 4.75″D; **types 5208A** and **5209A,** are 5.875H x 13.0W x 3.875″D. Panel sealed to NEMA enclosure type 4.

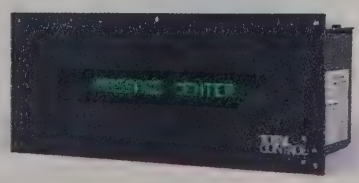
(15434) (ne10588)



QUICKMARQUEE DISPLAYS AND ACCESSORIES

Available in bright red or tri-color LED displays that are visible up to 275′. Uses ASCII protocol to display messages from any intelligent ASCII device. Can be used with optional protocol converter for direct PLC control. Can also be used with optional marquee controllers, allowing messages to be created, stored, and triggered by any PLC via discrete I/O (binary or BCD). Communication via RS-232, RS-422, or RS-485 port at up to 19.2K baud rate. Operating voltage: 110VAC. Mounting: front, wall, back-to-back, or tri-way bracketed options. Meet NEMA enclosure types 4 and 12. *Order* **Type GUS** *programming software for* **type 9450-SA** *PLC protocol converter separately on page 1406.*

FLUKE

PROCESS CALIBRATORS

744

DOCUMENTING PROCESS CALIBRATORS

Fluke's **740 series** documenting process calibrators help with troubleshooting problems or running routine maintenance. They do many different tasks quickly and well to help get the job done fast.

Type 741B offers simultaneous source and measure capabilities for all common process parameters. Create and execute automated procedures and automatically capture the results.
Type 743B offers all the capability of **type 741B**, plus adds a serial interface for 2-way communication with popular PC-based instrumentation management applications.
Type 744B offers all of the capabilities of the **type 743B**, plus the ability to maintain and calibrate selected HART transmitters without a second tool.
Each **740 series** process calibrator includes **type TL24** test leads (2 sets), **type AC20** test clips (2 sets), **TP20** test probes (1set), battery pack, battery charger, serial port cable (except **type 741B**), HART communications cable (**type 744B** only), DPC/TRACK sample with free PC communication utility software (except **type 741B**), instruction manual, and NIST traceable calibration report and data. 3-year warranty.

TYPE 787 PROCESSMETER™

- **Digital Multimeter and Loop Calibrator in One Tool**
- **Precision 1000V, 440mA Multimeter with Features Similar to Type 87**
- **20mA DC Current Source/Loop Calibrator with Simultaneous mA and % of Scale Readout**
- **Manual Step (25%, Coarse, Fine) Plus Auto Step and Auto Ramp**
- **Min/Max/Average Record, TouchHold®, and Relative Modes**
- **1000V Category III per IEC-1010 Safety Rating**
- **3-Year Warranty**

Type 787 ProcessMeter™ combines a digital multimeter and loop calibrator in one rugged hand-held tool. Measures true-RMS AC volts and current, DC volts and current, resistance, frequency, and continuity. 4000-count backlit display (30,000-count for DC current). Basic DCV accuracy: ±(0.1% + 1 digit). Includes C81Y protective holster with Flex-Strand™, TL-75 test leads, AC70A alligator clips, 9V battery, and operator's manual. **Type 787** with NIST certificate of calibration is also available; *contact your local Newark sales office.*

LOOP CALIBRATOR

NEW

- **Large Display and Simple, Push-Button Interface**
- **mA Accuracy of 0.02%**
- **Simultanious mA and %**
- **Push-button 25% Steps for Fast, Easy Linearity Checks**
- **Span-Check for Fast Confirmation of Zero and Span**
- **Selectable Slow Ramp, Fast Ramp, and Step to Provide Smooth Outputs for Value Slewing and Loop Functional Tests**
- **24V Internal Loop Supply, to Power and Read a Transmitter at the Same Time Without Carrying a DMM**
- **0 - 20mA or 4 - 20mA Default Start-Up Modes**

Type 705 includes: test leads, test clips, holster, and instruction manual. It is a feature-rich solution to loop calibration, maintenance and repair applications.

48F2058 Type FLUKE-705. **Each** **449.00**
(34070) (ne34070)

PRESSURE CALIBRATORS

NEW

- **Measure Pressure, 0.05% of Full Scale with Internal 30 psig Sensor (Type 717 Only)**
  –1/8 NPT Pressure Fitting
  –Compatible with Non-Corrosive Gasses and Liquids
- **Measure Pressure to 10,000 psi/69 mPa Using One of 27 Fluke 700Pxx Pressure Modules**
- **Measure mA with 0.025% Accuracy and 0.001mA Resolution, While Sourcing 24V Loop Power**
- **Calibrate P/I or I/P Transmitter with Simultaneous Pressure and Current Measurement**
- **Select from Eleven Different Engineering Units**

83F9128 Type FLUKE-716. **Each** **795.00**
83F9129 Type FLUKE-717 30G. **Each** **995.00**
(37972) (ne37972)

PRESSURE CALIBRATORS

NEW

Type 718 pressure calibrator presents a fresh alternative in pressure calibration. A complete, self-contained calibration solution offers:

- **Built-in Pressure/Vacuum Hand Pump, with Vernier and Bleed Valve**
- **Pressure Measurement to 0.05% of Full Span, Using an Internal Pressure Sensor**
- **Pressure Measurement to 10,000 psi/700 bar Using Any of Type 700Pxx Pressure Modules**
- **Wide Range of Selectable Measurement Units for Pressure**
- **Current Measurement with 0.025% Accuracy and 0.001 mA Resolution**
- **24 Volt Loop Power Supply**
- **Min-Max Hold Functions**
- **Type 718 30G Measures Up to 30 psig (207 kPa)**
- **Type 718 100G Measures Up to 100 psig (690 kPa)**

48F2059 Type FLUKE-718 30G. **Each** **1695.00**
48F2060 Type FLUKE-718 100G. **Each** **1695.00**
(34075) (ne34075)

RTD CALIBRATOR

NEW

- **Simulate and Measure Seven Types of RTDs with Range from 200°C to 800°C and an Accuracy of 0.1Ω and Resolution of 0.1°C**
- **Calibrate and Measure other RTDs Using the Ohms Source and Measure Functions**
- **Range is 10Ω to 3200Ω with Accuracy and Resolution of 0.1Ω**
- **Users Can Select °C or °F Temperature Units**

Type 712 simulates and measures seven types of resistance temperature detectors (RTDs).

83F4179 Type FLUKE 712. **Each**..... **795.00**
(34071) (ne34071)

THERMOCOUPLE CALIBRATOR

NEW

- **Measure and Simulate Temperatures from -200°C to +1800°C with a resolution of 0.1°C and an Accuracy of 0.3°C + 10mV**
- **Calibrate Millivolt Transmitters with a -10 to +75mV Source in 0.01mV Steps**

Type 714 calibrates nine types of thermocouples (J, K, T, E, R, S, B, L, U). **Types700TC1 & 700TC2** thermocouple mini-plug kits are sold separately, below.

83F4182 Type FLUKE 714. **Each**..... **795.00**
83F4188 Type FLUKE 700TC1. **Each**..... **59.00**
83F4189 Type FLUKE 700TC2. **Each**..... **49.00**
(34072) (ne34072)

VOLT/mA CALIBRATOR

NEW

Type 715 Measures and Sources Current to 24mA with 0.025% Accuracy and 1mA Resolution.

- **Displays as mA or as % of Span**
- **Measure and Source Voltage Output Process Signals from PLCs and Transmitters with 0.025% + 1 Count, and a Resolution of 0.01mV (100mV Scale) or 1mV (10V Scale)**
- **Provides 24V Loop Supply with Simultaneous Current Measurement**

83F4183 Type FLUKE 715. **Each**..... **795.00**
(34073) (ne34073)

PANEL METERS

EDM SERIES MODULAR DIGITAL PANEL METERS

- ⅛ DIN, 3½ Digit Digital Indicators and Controllers
- Modular Design Allows Simple Insertion of Output Cards, Making a Controller
- Rugged IP65 Splash-Proof Front Cover
- Shallow Behind Panel Depth of 3¼"
- Microprocessor-Based Design
- Optional Realy or Analog Output
- Optional Analog or Excitation Output

EDM series µP-based indicators/controllers are available as assembled indicators, allowing for the addition of optional output cards, *on this page*, or as easily assembled components *on this page*. Feature easy to read 0.56"H, 3½ digit display, min./max. recording, data hold, display/input range scaling, and password protection. Indicators become controllers by inserting one or more of the output cards. Controllers feature up to two set points, adjustable hysteresis, delay and various alarms. Front keypad programming via easy to use menu-driven format. 120VAC supply voltage. Other supply voltages are available; *contact your local Newark sales office.* UL recognized, CSA certified, and CE marked.

Stock No.	Type	Input Signal	Input Range	Each
52F214	EDM35-A3D50-XXX-05	DCmA	4 to 20mA	198.24
52F215	EDM35-V1D50-XXX-02	DCmV	0 to ±200mV	197.26
52F216	EDM35-V3D50-XXX-02	DC Volts	0 to 10 Volts	197.26
52F217	EDM35-A6A50-XXX-06	AC Amps	0 to 5 Amps	198.24
52F218	EDM35-V5A50-XXX-02	AC Volts	0 to 600 Volts	197.26

(2974) (ne06178)

OPTIONAL OUTPUT CARDS

- Slide Cards into an Indicator to Make it a Controller
- One or Two 5-Amp Relay Output(s)
- 0-20mA, 4-20mA or 0-10VDC Analog Output
- 12 or 24VDC Excitation Output

The following output cards are easily inserted into the back of any of the assembled **EDM** panel meters, or components. Simply slide the output card(s) into the back of **EDM series** indicators, and they become controllers. One or two relay output(s) possible (not both) and/or a proportional analog or excitation output (not both).

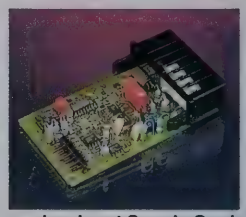
Stock No.	Type	Output	Description	Each
92F3103	5100561	One relay	One 5A SPDT	51.66
92F3104	5100562	Two relays	Two 5A SPDT	81.18
92F3101	5100560	Analog	0-20mA, 4-20mA or 0-10VDC	61.15

(3007) (ne06519)

EDM SERIES COMPONENTS (FOR ASSEMBLY)

Select a Display...

A Power Supply Card...



and an Input Supply Card

The **EDM Series** can also be purchased as components as shown below. When a power supply card and multi-range configurable input card are slid into a display, it becomes an indicator. Indicators become controllers by inserting one of the output cards, *listed separately on this page.*

Stock No.	Mfr. Part No.	Description	Range	Each

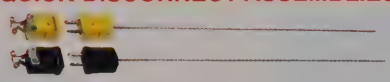
93F9274	KTSS-14G-12/N	K	¼″	22.03

(6612) (nec9232)

QUICK-DISCONNECT ASSEMBLIES



12″ stainless-steel sheath probe assemblies with standard size male connector molded directly onto the probe. Available in Types J (iron-constantan) and K (chromel-alumel). Types T and E available upon request. Standard size female mating connector included. Grounded junction is standard. Ungrounded and exposed junctions, as well as other lengths, are available; *contact your local Newark sales office.*

Stock No.	Type	T/C Type	Dia.	Each
93F9281	JQSS-116G-12/N	J	1⁄16″	25.51

(6613) (nec9233)

THERMOCOUPLE CONNECTORS

SMP

OST

Glass-filled nylon and alloy construction for accurate connections. Physical operating temperature is 425°F max. Available in Types J (iron-constantan) and K (chromel-alumel). Types T, E, R, S, G, C, D, and N are available upon request; *contact your local Newark sales office.* **Type SMP** connector is miniature flat-pronged. **Type OST** connector is standard size round prong.

Stock No.	Type	T/C Type	Connector	Each
93F9292	SMP-K-M/N	K	Male	2.03
93F9293	SMP-K-F/N	K	Female	2.61

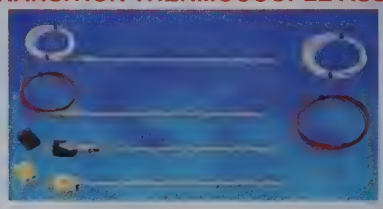
METAL TRANSITION THERMOCOUPLE ASSEMBLIES



Metal Transition type features 12″ probe of 316 stainless steel for excellent corrosion resistance and includes 48″ of FEP Teflon®-coated wire with stripped leads. Soft-wire thermocouples are available in 5- and 15-ft. lengths in either 20 or 24 AWG wire sizes with a choice of FEP Teflon® or glass braid insulation, *on this page.* Beaded butt-welded measurement junction and solid bare wire cold junction terminations. *Other lengths and thermocouple types available; contact your local Newark sales office.* For fast-responding, durable quick-disconnect type thermocouple assemblies with bendable 12″-long 316 stainless steel probe and standard ANSI color-coded plug and jack connectors, *on this page. Compression fittings also available; contact your local Newark sales office.*

NEW COUNTERS, ENCODERS AND ACCESSORIES

PRESET COUNTERS

The **S660** series of counters comes standard with 2 presets (including a new "boundary" setting) and are capable of handling count speeds of up to 20kHz. Simple menu-driven programming features word prompts, not difficult codes. The rugged NEMA 4 case fits standard ⅛ DIN cutouts, and is equipped with large tactile buttons that can be pressed easily even when the user has gloves on. The counters feature a 6-digit LED display and 120VAC power. Optional features include quadrature inputs, two 5-amp mechanical relays and 12VDC excitation output @ 100mA (220VAC power upon request). The modular design allows for easy field replacement of input and output cards. **Type S660** is an up/down, add/subtract totalizing counter, **type 661** is a rate counter, **type 662** is a totalizer/batch counter, and **type 663** is a rate/totalizer counter

FREQUENCY COUNTERS

Type S664 frequency counters provide a low cost ⅛ DIN frequency counter with ranges from 1Hz to 60kHz. The only programming required is range selection and input card setup. The rugged NEMA 4 case fits standard ¼ DIN cutouts. The S664 comes standard with a 4-digit LED display and 120VAC power. Optional features include quadrature inputs, 12 VDC excitation output @ 100 mA, and 220VAC power (upon request). The modular design allows for easy field replacement of input and output cards.

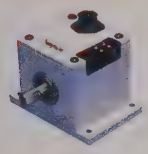
OPTICAL ENCODERS



Type SE encoders combine the most popular features into one economical, easy-to-order encoder package. The cube-style, quadrature encoder offers dual ⅜″ flat keyed shafts and 2 LEDs that flash as the shaft is turned, to aid in troubleshooting.

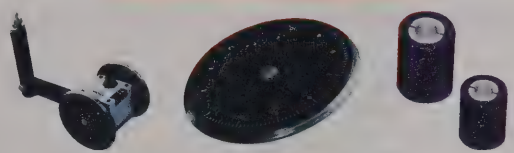
ENCODER ACCESSORIES



A counter and encoder; can be combined with a chariot and wheels to make a length measurement system. The chariot offers an anodized aluminum body with a flexible mounting neck. The wheels are made of anodized aluminum and are 12″ in circumference. Furnished with replaceable tires, which are available in 4 different durometers for use on a wide range of materials. This package is essential in many cut-to-length or length measurement applications. Simpon's flexible couplings have dual 3-beam construction to provide superior performance at high and low speeds with minimum windup and rotary oscillation.

PROXIMITY SENSORS

990 SERIES INDUCTIVE PROXIMITY SENSORS

990 series 8mm, 12mm, 18mm and 30mm nickel-brass cylindrical inductive proximity sensors for use in position-sensing applications. All sensors have LED operation indicators visible from 360°. 08, 12, 18 and 30 in type number indicates sensor size (mm). Sensors are sealed to meet IEC enclosure IP67 classification. Operating temperature: –25°C to 80°C. Preleaded versions include 2m of cable. Also available in 5m and 10m versions. Length of 8mm sensors is 36.6mm. Types listed are also available in normally-closed circuitry with 35mm short body style. PNP output types also available; *contact your local Newark sales office.*

980 SERIES INDUCTIVE PROXIMITY SENSORS

980 series 3-wire DC proximity sensors are sealed with epoxy resin in nickel-plated brass. 0.8mm sensing distance. Sense proximity of metals at high-speed operations. 100% solid-state circuitry simplifies interface with programmable controllers as well as other computer-based systems. Temperature range: –25° to +70°C. Sensors are sealed to meet IEC IP67 classification in industrial environments. Short circuit, overload, and reverse polarity protection. Output: **Types A3N**, N.O. N(NPN); **Types A3P**; P(PNP). Sensors are shielded and preleaded with 2m of jacketed cable.

FL7M SERIES UNIVERSAL VOLTAGE 2-WIRE AC/DC INDUCTIVE PROXIMITY SENSORS

Two-color LED set alignment indicator aids in positioning the sensor for optimum operate point. Supply voltage: 20-250VDC, 20-250VAC. DC voltage short circuit protected. Temperature range: –25°C to +70°C. Output: normally open. Sealed to IP67. **Type FL7M-3J** and **type FL7M-7J** have short housings. Connectorized versions of **Type FL7M-3J** and **type FL7M-7J** are UL listed and CSA approved. Versions with N.C. circuitry available, *contact your local Newark sales office.*

3-WIRE COMPACT SUB-MINIATURE DC PROXIMITY SENSORS

Ideal for applications where space is at a premium. These sensors offer both top and side sensing solutions that save space and provide mounting flexibility. LED indicator is visible from 3 directions to allow easy checking of operating state. Meet IEC enclosure IP67 classification for superior sealing in industrial environments. 2.5mm (0.10″) sensing distance. 12-24VDC supply voltage. Dimensions: 0.24H x 0.31W x 0.98″D. Normally closed versions are available, *contact your local Newark sales office.*

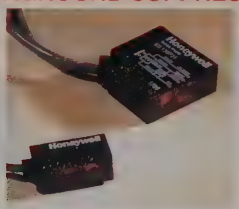
PHOTOELECTRIC AND PROXIMITY SENSORS

BS SERIES BACKGROUND SUPPRESSION SENSORS



Background suppression diffuse photoelectric sensors achieve background suppression via triangulation method. Simple object alignment is performed using red LED light. Supply current: 10-30VDC, ≤50mA. Max. switching current: 100mA. Units have cable connections and are available in either NPN (sinking) or PNP (sourcing) output versions. Targets are recognized independent of color and material surface properties. Backgrounds are suppressed independent of color and material surface properties. Sensing distances can be precisely adjusted. Better repeatability is achieved due to control's small active sensing distance. Typical applications include conveyor belt alignment, transfer line process control, detection against light color or other reflective backgrounds, and wafer detection. Available in miniature and subminiature versions. Subminiature versions include mounting bracket.

MINIATURE—SEALED TO IEC ENCLOSURE IP67 CLASSIFICATION

Stock No.	Type	Operation Mode	Output Type	Sensing Range	Each

(14830) (ne10035)

HPJ SERIES ULTRAMINIATURE AMPLIFIED PHOTOELECTRIC SENSORS

Suitable for electronic applications that require a high-speed, low-cost subminiature photoelectric control. Units are available in convergent diffuse or thru-scan with a typical response time of 1 ms. The visible red **type HPJ-D21** convergent beam is suitable for general PC board detection. The infrared **type HPJ-A21** convergent beam is suitable for dark or low reflection PC board detection. Supply voltage: 10.8 to 26.4VDC (ripple 10% max.). Scan distance: thru-scan versions = 1.5m; convergent diffuse = 30mm. Units are pre-leaded and have reverse connection protection circuit. Output: NPN.

THRU-SCAN—0.866 x 0.433 x 0.31″

PROXIMITY SENSORS

2-WIRE AC PROXIMITY SENSORS

Selectable output. LY Types: Input voltage: 93-132VAC. All units have a zinc die-cast body with LED indicator. **Type 923H26** has 20-250VAC input voltage, 5-position adjustable head and plug-in body, that uses the same receptable as used with limit switches. **923H26** is sealed to IP67 classification. FM approved for non-incendive Class 1, Division 2, Groups A, B, C, D and Class I, Division 2, Group G hazardous locations. Temperature range: –25°C to +85°C. 1.62Wx4.53Hx1.75"D. (41.15x115.06x44.45). Side sensing types are field adjustable for rotation in 4 directions. Meets NEMA enclosure types 3, 3R, 4, 12, 13. UL listed, CSA certified.

Stock No.	Type	Sensing Distance	Output Type	Sense Direction	Each
51F4009	LYS01C-2S	12.7mm	N.O.	Side	212.63
51F4010	LYS01E-2S	12.7mm	N.O./N.C.	Side	231.52
51F4011	LYT01C-2S	12.7mm	N.O.	Top	212.63
51F4012	LYT01E-2S	12.7mm	N.O./N.C.	Top	231.52
23F4746	LYT02E-2S	14.5mm	N.O./N.C.	Top	231.52
51F3984	923H26Q-A7T-L	15.0mm	N.O.	5-Position	129.54

(3484) (de51417)

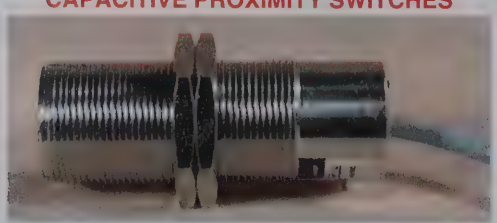
RECTANGULAR 3-WIRE DC SENSORS

Sensing range: 0.05" (1.27). Release point: 0.085" (2.16). Supply voltage: 6-16VDC. Frequency: 1kHz. Housing: glass filled thermoplastic. Temperature range: –40°C to +125°C. 0.88W x 1.30H x 0.52"D. (22.35 x 33.02 x 13.21).

Stock No.	Type	Termination	Each
23F2228	101XK11-1	22-Gauge Wires, PVC Insulation, 12" (305)	56.33
23F2227	101XK11-Q	Solder/Quick Connect Terminals	49.93

(3483) (de51416)

CAPACITIVE PROXIMITY SWITCHES



Senses any material such as glass, rubber, oil, metals, water, wood, and more. Sensing distance of 15mm except **type 972CP8TM** is 8mm. 20mm sensing distance versions are also available, *contact your local Newark sales office.* Sensor size 30mm, except **972CP8TM** is 18mm. Meets IEC enclosure IP67 classification.

SHIELDED METAL SENSORS

Stock No.	Type	Input	Output	Each
50F5209	972CP8TM-A13P-L	10-48VDC	PNP N.O.	121.91

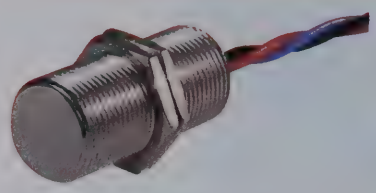
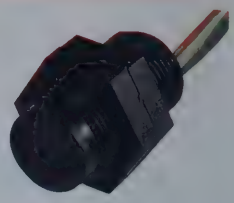
(3482) (de51415)

103SR AND SR4 SERIES HALL-EFFECT SENSORS



103SR



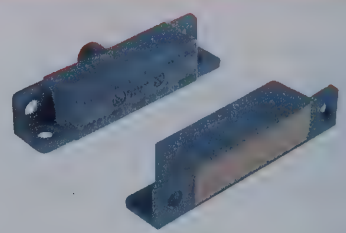
SR4P2-A1

Adjustable mounting, threaded aluminum housing contains Hall-Effect sensor operated by proximity to external magnet. Sealed housing meets NEMA enclosure types 3, 3R, 3S, 4, 4X, 12, and 13. 20-gauge, 6" stranded Teflon® insulated, color-coded lead wires at termination. Types with **2-suffix** are supplied with one meter PVC jacketed cable. Digital current sinking output, except **type 103SR3-F-5** which is analog output. **103SR11** and **103SR12 types** are current sourcing. **Types 103SR13** are current sinking. Magnetics type for **Types 103SR:** unipolar. Dimensions: 15/32-32NS x 1"L. Operating temperature range: –40°C to +100°C. **Type SR4P2-A1** is a magneto-resistive position sensor. Completely sealed in a threaded bushing. Operate point @ 25°C: 15 gauss typical. Can be operated with either the North or South magnetic pole.

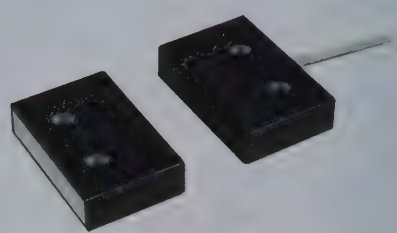
Stock No.	Type	Supply Voltage	Supply Current	Voltage Output	Each
23F2233	103SR11A-1	4.5-5.5VDC	4mA	Vs-1.5VDC	24.84
23F2234	103SR12A-1	6-24VDC	10.0mA	Vs-1.5VDC	23.12
50F5280	103SR12A-2	6-24VDC	10.0mA	Vs-1.5VDC	30.83
23F4974	103SR13A-1	4.5-24VDC	10.0mA	0.4VDC	23.12
50F5281	103SR13A-2	4.5-24VDC	10.0mA	0.4VDC	30.83
16F3164	103SR3F-5	4-10VDC	3.5mA	1.75-2.25VDC	27.39
92F3008	SR4P2-A1	6-24VDC	13.5mA	0.4VDC	25.40

(3486) (de51479)

TWO-PIECE REED PROXIMITY SWITCHES



40FR



50FR

Compact reed proximity switches are magnetically actuated. **Types 40FR** and **41FR** contact area hermetically glass-to-metal sealed. **50FR** and **52FR** magnets are enclosed in high-impact thermoplastic housing and are solid-state logic compatible. Power ratings for **40FR & 50FR:** 10W, 132VDC, 750mA for maximum DC; 10VA, 120VAC, 300mA for maximum AC. Electrical life: 30,000,000 operations. Temperature rating: –40°C to +125°C. Meet NEMA enclosure type 4. **40FR series** micro connector versions are also available; *contact your local Newark sales office.*

Stock No.	Type	Contact Arrangement	1-9
23F2199	40FR1-3	SPNO	91.61
23F2205	50FR2-3-1	SPNO	69.88
23F2201	41FR2	Magnetic Actuator	63.28
23F2217	52FR1	Magnetic Actuator	32.19

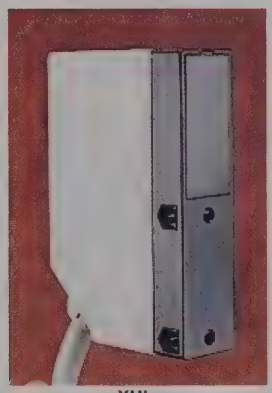
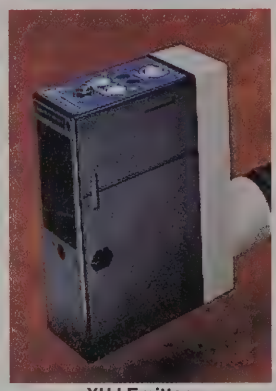
INDUSTRIAL-RATED PHOTOELECTRIC SENSORS



XUL



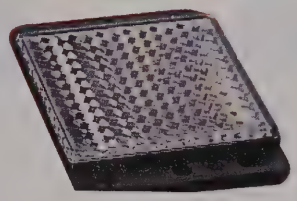
XUJ Emitter

XUL series subcompact medium range sensors feature small size, flat lenses, side or front mounting, and LED visible from front and top. Five-wire relay output. 6′ cable. NO/NC. AC/DC: 20-264VAC, 20-60VDC. **Type XUJT060319** compact rectangular long-range sensor features ½″ NPT conduit entrance, screw terminals, and ON and OFF delay timer. Operating frequency 20Hz. UL listed, CSA certified, CE compliant. Other versions also available. *Contact your nearest Newark sales office.*

Stock No.	Type	Description	Each
96F2227	XUL M0600	Emitter with 24′ Range	**77.42**
96F2229	XUL M040319	Polarized Retroflexive, Light, 16′ Range	**125.59**
96F2230	XUL M300318	Proximity Diffuse, Light, .8′ Range	**139.53**
96F2233	XUJ T060319	Polarized Retroflexive, Light/Dark, 24′ Range	**235.61**

(3495) (de52364)

REFLECTORS FOR PHOTOELECTRIC SENSORS



XUZC24

Provide highly-reliable reflection of light in same direction it came from. Eliminate blind spot and allow reflector to come as close as touching sensor lenses. Max. temperature: 65°C. Reflective surfaces are constructed of acrylic. NOTE: **types XUZC24** and **XUZC50** reflectors must always be mounted in the vertical plane with respect to the optical axis of the switch.

Stock No.	Type	Description	Each
96F2237	XUZC24	1.3 x 1.1″ Close Proximity	**6.24**
96F2238	XUZC50	2 x 2″ Close Proximity	**9.34**
97F8350	RF30	3″ Diameter, Acrylic	**6.24**
97F8351	RF13	3.25 x 1.5″ Acrylic	**6.24**

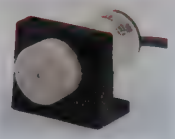
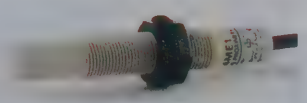
CAPACITIVE PROXIMITY SENSORS



E2K-C



E2K-X

Type E2K-X standard and **E2K-C** adjustable range capacitive proximity sensors detect metallic and non-metallic objects such as glass, wood, paper, water, oil, and plastic. Both versions come with a wide power supply range of 90-250VAC or 10-40VDC for adjustable range versions and 10-30VDC for standard versions, switching up to 200mA. Both versions feature operation indicators, come pre-wired with 6.5′ of cable, and operate in temperatures from –13°F to +158°F. **Type E2K-C** adjustable versions have plastic body construction, are 3.23″ (82) long, offer a sensing range of 0.12″ to 0.98″ (3-25), and include mounting brackets. **Type E2K-X** standard versions are unshielded and have threaded plastic body construction and are 3.15″ (80) long with mounting nuts. Diameters are listed in description column. Sensing ranges are given in inches and (mm). All sensors are CSA certified. **Types E2K-C** are UL listed. **Types E2K-X** are UL recognized. All meet IEC enclosure IP66 classification and NEMA enclosure types 1, 4, 12, and 13.

ADJUSTABLE RANGE VERSIONS

METAL BODY, CYLINDRICAL PROXIMITY SENSORS

E2E-X1R5Y1-N

E2E-X10MY1-53US

Type E2E proximity sensors detect metal objects at ranges up to 0.39″ (10). Packaged in threaded, cylindrical nickel-plated housing. All except **E2E-X10MY1-53-US** are shielded for reliable sensing even when mounted near metal housings. All feature operation indicators, mounting nuts, and come pre-wired with 6.5′ of cable. Mounting accessories and protective silicone covers are also available; *contact your local Newark sales office.*

2-WIRE AC SENSORS, NORMALLY OPEN

Input voltage: 20-264VAC, switching to 300mA. Types with **-53-US suffix** are short circuit protected and have a switching voltage range from 90-140VAC, 300mA. Rated NEMA 1, 4, 6, 12, 13, and IP67. UL recognized. Types with **-US suffix** are CSA certified. Dimensions and sensing ranges are given in inches and (mm).

Stock No.	Type	Description	Sensing Range	Each

(3534) (ne07212)

PLASTIC BODY, CYLINDRICAL PROXIMITY SENSORS

Type E2F detect metal objects and offer excellent resistance to chemical and water washdown environments. Shielded for mounting near metal. Feature operation indicators and are pre-wired with 6.5′ of cable and two mounting nuts. Output short circuit protection available. Rated NEMA 1, 3, 4, 6, 12, 13, and IP68. Mounting brackets are available; *contact your local Newark sales office.* Dimensions and sensing ranges are given in inches and (mm).

2-WIRE AC SENSORS

Input voltage: 20-264VAC, switch up to 100mA; except circuit protected types with **-53-US suffix**, which are 90-140VAC, 300mA. UL recognized, CSA certified (**53-US** versions only.)

Stock No.	Type	Description	Sensing Range	Each
52F4293	E2F-X1R5Y1	NO, 8mm Dia. x 1.57″ (40)L	0.05″ (1.5)	**77.50**
52F4292	E2F-X2Y1	NO, 12mm Dia. x 1.57″ (40)L	0.07″ (2)	**77.50**
52F4290	E2F-X5Y1-53-US	NO, 18mm Dia. x 1.89″ (48)L	0.20″ (5)	**87.19**

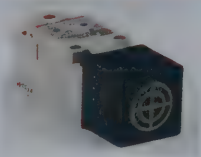
3-WIRE DC SENSORS

Input voltage: 10-30VDC, switch up to 200mA. NPN.

52F4294	E2F-X1R5E1	NO, 8mm Dia. x 1.18″ (30)L	0.05″ (1.5)	**61.36**
52F4297	E2F-X10E1	NO, 30mm Dia. x 1.97″ (50)L	0.39″ (10)	**65.66**

(3535) (ne07213)

LIMIT SWITCH STYLE AC PROXIMITY SENSORS



Type E2Q detect metal objects and allow easy form-fit-function replacement of standard limit switches with reliable non-contact switching. Shielded for mounting near metal. Dimensions: 4.53H x 1.65W x 1.57″D (115 x 42 x 40). Versatile five-position head for end or side sensing. Weld field immune version available. Specifications: switch up to 300mA, SCR-NO or NC output, and are switch selectable. ½″-14 NPT conduit ready. Rated NEMA 1, 2, 4, 6, 12, 13, and IP67. UL listed, CSA certified.

Stock No.	Type	Description	Sensing Range	Each
52F4278	E2Q-N15Y4	20-264VAC Input Voltage	0.59″ (15)	**157.16**
52F4279	E2Q-N15Y4-51	90-140VAC Input Voltage; Weld Field/RFI Immunity	0.59″ (15)	**172.23**

(3536) (ne07214)

ALL METAL DETECTING PROXIMITY SENSORS

Type E2EV detect both ferrous and non-ferrous metals at the same distance. Ideal for applications with work pieces of different metals. Metal body cylindrical sensor features short circuit and reverse polarity protection and operation indicators. 10-30VDC input voltage, switches 100mA. Available in NO or NC, PNP or NPN versions. Rated NEMA 1, 3, 4, 6, 12, 13, and IP67. Pre-wired with 6.5′ of cable. Includes two mounting nuts. All are 2.36″ (60) long.

Stock No.	Type	Description	Sensing Range	Each
52F4313	E2EV-X2C2	NPN, NC, 12mm Dia.	0.08″ (2)	**99.03**

52F4317	E2EV-X10C2	NPN, NC, 30mm Dia.	0.39″ (10)	**99.03**

(3537) (ne07215)

NON-FERROUS METAL DETECTING PROXIMITY SENSORS

Type E2EY sense only non-ferrous metals. Cylindrical metal body is shielded for reliable sensing when mounted near metal. Input voltage: 10-30VDC, switch up to 100mA. Feature short circuit and reverse polarity protection and operation indicators. Pre-wired with 6.5′ of cable. Two mounting nuts are included. Mounting brackets are available; *contact your local Newark sales office.* Rated NEMA 1, 3, 4, 6, 12, 13, and IP67. Dimensions and sensing ranges are given in inches and (mm).

Stock No.	Type	Description	Sensing Range	Each

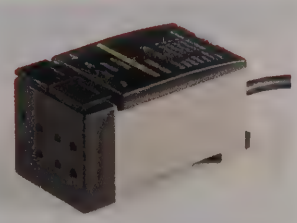
(3538) (ne07216)

OMRON®

PHOTOELECTRIC SENSORS

FIBER-OPTIC SENSORS

E3X-NT



E3X-NM

Type E3X fiber-optic sensors combine high functionality and speed with the versatility of fiber-optics. Sensing range up to 11.42″ (290); 82.68″ (2.100m) with lens attachment. **NT suffix** in type number indicates single-channel. Dimensions: 1.30H x 0.39W x 2.32″D (33 x 10 x 59). **NM suffix** in type number indicates four-channel amplifiers available with auto-sensitivity (Teach) setting, self-diagnostics, and operation indicators. Dimensions: 1.30H x 1.27W x 2.32″D (33 x 32.2 x 59). Fast 0.5ms response time with switch selectable Light-ON/Dark-ON mode. 12-24VDC supply voltage with 100mA output. Available in NPN or PNP output. Fibers available in thru-beam or diffuse configurations. Versions with built-in OFF display timers are also available; *contact your local Newark sales office.* Units come pre-wired with 6.5′ of cable. Units can be DIN rail or panel mounted. Sensing range is given in inches and (mm).

FIBER-OPTIC AMPLIFIERS

Stock No.	Type	Description	Sensing Range Thru-Beam/Diffuse	Each
52F4374	E3X-NT11	NPN, w/o Timer	11.42″ (290)/4.33″ (110)	145.32
52F4375	E3X-NT21	NPN, w/Timer	11.42″ (290)/4.33″ (110)	161.46
52F4376	E3X-NT41	PNP, w/o Timer	11.42″ (290)/4.33″ (110)	145.32
52F4377	E3X-NT51	PNP, w/Timer	11.42″ (290)/4.33″ (110)	161.46
52F4372	E3X-NM11	NPN, w/Timer	10.63″ (270)/3.94″ (100)	376.74
52F4373	E3X-NM41	PNP, w/Timer	10.63″ (270)/3.94″ (100)	376.74

FIBER-OPTIC CABLES AND ACCESSORIES

Plastic fibers are 6.5′ long. Cutter included with cable. Diameter is given in inches and (mm).

Stock No.	Type	Description	Each
52F4370	E32-TC200	Thru-Beam Fiber Cable, 0.16″ (4) Dia. Threaded Head	48.44
52F4379	E32-DC200	Diffuse Fiber Cable, 0.24″ (6) Dia. Threaded Head	48.44
52F4367	E39-F1	Long-Range Lens Attachment for Fibers	34.78

(3539) (ne07251)

HEAVY-DUTY, LONG-RANGE PHOTOELECTRIC SENSORS

E3K

Type E3K sensors offer long-range sensing up to 32.81′ (10m). Rugged plastic housing and replaceable output relays for added life. Wide AC/DC input voltage range (42-240VAC, 24-240VDC). DPDT output 10A, 240VAC. Adjustable sensitivity with operation and stability indicators. Light-ON/Dark-ON switch selectable. ¾″-14 NPT conduit entry. Rated NEMA 1, 4, 4x, 12, 13, and IP67. Dimensions: 7.32H x 3.50W x 2.48″D (186 x 89 x 63). Mounting bracket and reflector for retroreflective type are included. UL recognized, CSA certified. Sensing range is given in feet and meters (m).

Stock No.	Type	Description	Sensing Range	Each
52F4334	E3K-R10K4	Retroreflective	32.81′ (10)	198.06
52F4335	E3K-D2K4	Diffuse	6.56′ (2)	198.06

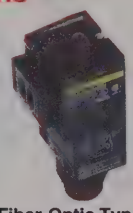
COMPACT LIMIT SWITCH STYLE PHOTOELECTRIC SENSORS

Pre-wired



Fiber-Optic Type

Type E3JU general purpose sensors offer built-in sensitivity adjustment and operation indicators. Universal supply voltage: 24-240VAC/VDC (pre-wired version), 24-240VAC/12-240VDC (fiber-optic version). 12ms response time. Compact size: 2.74H x 1.80W x 1.42″D (69.5 x 45.6 x 36). Available in polarized retroreflective (reflector included) or diffuse in standard or fiber-optic version. Pre-wired with 6.5′ of cable or mini-change type connectors: ON-delay, OFF-delay, ON/OFF-delay, one shot retrig, or non-retrig. Plastic housing is rated NEMA 1, 2, 3, 4x, 5, 12, and IP67 Fiber-optic types are IP68. Fiber-optic cables, listed in table below, are 3′ (0.95m) L, 5⁄16-29 thread. UL recognized, CSA certified. T.B. = through-beam, Diff. = diffuse. Fiber-optic cables are not included with fiber-optic sensors. *Order fiber-optic cables, listed separately, below.*

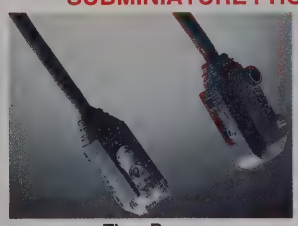
SUBMINIATURE PHOTOELECTRIC SENSORS



Thru-Beam

Retro-Reflective

Diffuse

Type E3T subminiature photoelectric sensors are ideal for detecting very small objects in confined areas. They feature built-in operation and stability indicators. Pre-wired with 6.6′ (2m) of cable. Input voltage: 12-24VDC. Output: 50mA NPN. Available in thru-beam, retro-reflective, and diffuse versions. Dimensions: thru-beam types - 0.6H x 0.3W x 0.4″D (15 x 7 x 10); retro-reflective and diffuse types - 0.8H x 0.3W x 0.4″D (21 x 7 x 11). *Order mounting brackets separately, contact your local Newark sales office.*

Stock No.	Type	Description	Sensing Range	Each

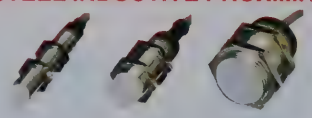
PROXIMITY SENSORS AND AMPLIFIER CONTROLS

STAINLESS STEEL INDUCTIVE PROXIMITY SENSORS



Used in part detection, counting/sorting, position and presence sensing, speed and motion sensing, alignment detection and other sensing applications. Rugged 304 stainless steel housing. 6' PVC connection cable. Easy-to-view "ring" LED indication. Switching speeds up to 2000Hz. Short circuit and overload protection. Meets NEMA enclosure type 4 and IEC IP67 classification. 10-year warranty. CE compliant.

DC 3-WIRE NPN OUTPUT INDUCTIVE PROXIMITY SENSORS

10-40VDC, 200mA N.O. transistor output, with switching speeds up to 2000 Hz. PNP and N.C. output types are available; *contact your local Newark sales office.* UL recognized, CSA certified, CE compliant.

INDUCTIVE PROXIMITY SENSORS IN PBT HOUSINGS

3-wire NPN output inductive proximity sensors in thermoplastic polyester. Provides a lower-cost option when a stainless-steel housed sensor is not required. Easy-to-view "ring" LED indication. 10-40VDC, N.O. transistor output, with switching speeds up to 2000Hz. Six-foot connection cable. Short circuit and overload protection. Meets NEMA enclosure type 4 and IEC enclosure IP67 classification. 10-year warranty. Other diameters, PNP and N.C. output types are also available; *contact your local Newark sales office.* CE compliant.

AMPLIFIER RELAYS FOR INDUCTIVE PROXIMITY SENSORS

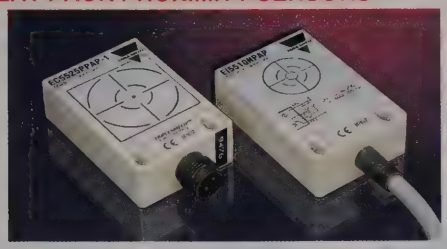
For contact input or NAMUR output inductive proximity sensors. Supply voltage: 115VAC. **Type SM155** tachometer relay with adjustable set point, SPDT 10A output and 0-1 mA analog output. **Type S114** zero-speed (jam) monitor with adjustable time-setting and DPDT 8A output. **Type S411** *11-pin socket is available on page 1445.* UL recognized, CSA certified, CE compliant, and SEV approved.

Stock No.	Type	Relay Type	Adjustable Setting	Relay Output	Each
96F1201	S114166115	Zero Speed Monitor	0.15 - 800 sec.	DPDT, 8 amp	172.84
96F1204	SM15511510K	Tachometer	1,000 - 10,000 rpm	SPDT, 10 amp	142.34
96F1202	SM1551152K	Tachometer	200 - 2,000 rpm	SPDT, 10 amp	142.34

(3490) (de52282)

PROXIMITY SENSORS AND ACCESSORIES

FLAT PACK PROXIMITY SENSORS



Ideal for use in conveying and material handling applications where mounting space is limited. Dimensions: 2.17H x 1.38W x 0.59" D (55 x 35 x 15). Housing is polycarbonate. Supply voltage: 10-40VDC. NPN N.O. and N.C. 200mA transistor output. Features mounting with 2 screws, easy-to-view LED indication, and reverse polarity and short circuit protection. Inductive types: PNP output versions are also available; *contact your local Newark sales office.* Capacitive types offer adjustable sensitivity and Tripleshield™ protection which protects against electrostatic discharge, RFI/GSM interference, and transients. All meet IEC enclosure IP67 classification and NEMA enclosure type 4. UL recognized, CSA certified, CE compliant.

CAPACITIVE PROXIMITY SENSORS

30mm Capacitive sensors, constructed in thermoplastic polyester housings, feature patented Tripleshield™ protection. Protects against the effects of electrostatic discharge, RFI/GSM interference, and transients. Used to detect various solid, liquid, or granulate materials such as oils, plastic pellets, grains, powders, etc. Commonly used for presence/level detection and other applications. Easy-to-view "ring" LED indication. Adjustable sensing ranges up to 25mm. Short circuit and overload protection. 6′ PVC connection cable provided. DC Types: 4 wire, 10-40VDC, 200mA, NO and NC transistor outputs. AC Types: 2 wire, 20-250VAC, 500mA, NO/NC (programmable) SCR output. IP67 and NEMA 4. UL recognized, CSA certified, CE compliant. Quick disconnect versions are also available; *contact your local Newark sales office.*

CAPACITIVE PROXIMITY SENSOR IN GROUNDED METAL HOUSING

30mm diameter PBT housings with nickel-plated brass threads. 20-250VAC, 500mA N.O. or N.C. SCR output. 6′ PVC connection with additional ground wire provided. IP67/NEMA4. CSA Certified, CE Compliant.

QUICK-DISCONNECT CABLES FOR SENSORS WITH M12 PLUGS

Replacement and wiring of sensors is simplified with use of sensors with M12 plugs and quick-disconnect cables. Available in straight plug or 90° angle versions. Construction: black, high-flex PVC with 22 AWG connection wires. Rated –13°F to +194°F. All N.O. (only) output sensors are compatible with 3-wire connector cables. All N.C. or complementary N.O./N.C. output sensors are compatible with 4-wire connector cables. PUR cables are also available; *contact your local Newark sales office.*

PHOTOELECTRIC AND PROXIMITY SENSORS

UZJ3 SLOT-TYPE MICRO PHOTOELECTRIC SENSORS

Micro-sized U-shaped photoelectric sensors offer 17 shape variations, connector or connector with cable configurations, and 2 independent ouputs (light-on and dark-on). Fixed 5mm sensing distance. Input voltage: 5-24VDC. Consume under 15mA max. peak draw. Output: 50mA, NPN control.

UZQ1 SERIES CYLINDRICAL PROXIMITY SENSORS

Offer 5 sizes, ranging from 3.8mm diameter to M8 threaded types. IP67 housing with LED operation indicator. Output: NPN 50 and 200 mA. Range: 0.8, 1.0, 2.0mm. All models operate from 12 to 24 VDC, 15 mA max. reset. Temperature range: -25°C to +70°C. **Type UZQ812** C insert installs over sensor to provide stronger surface for set screw (not included) to protect against overtightening.

UZJ SERIES PHOTOELECTRIC SENSORS

UZJ10

UZJ11

UZJ12

UZJ25

UZJ26

UZJ27

UZJ series micro-sized photoelectric sensors feature pulse modulated light source and background suppression capabilities in a compact package. Input voltage: 5-24VDC. Consume under 80mA max. peak draw. Output: 100mA NPN control. Thru-beam and fixed-focus types are available in several different mounting styles to fit any application with space or mounting restraints. Fixed-focus units are designed for applications where bright or reflective backgrounds can cause false readings. All units are available with either a connector or a connector with cable.

UZP SERIES TINY PROXIMITY SENSORS

UZP1

UZP1 tiny proximity sensors are 8mm x 8mm x 20mm and are available for top and front detection. Output: NPN. Range: 2.5mm. **UZP2** has a sensing range of 3mm and **UZP3** has a sensing range of 5mm. Both are front-detection sensors, with either NPN or PNP output. For accurate and stable attachment, the **UZP3** includes a two-part attachment arrangement. Each **UZP3** is equipped with an operation indicator for ease in checking performance from four different locations. All models operate from 12 to 24VDC, 15mA (max). Initial breakdown voltage: 1000VAC. Operating temperature: –10°C to +55°C with a storage temperature range from –30°C to +80°C.

PHOTOELECTRIC SENSORS

TRIPLE BEAM PHOTOELECTRIC SENSORS

- **Reliably Detects Clear, Black, Multi-Colored Objects**
- **Very Accurate Beam Light Detection**
- **Stable Position Detection**
- **Selectable Outputs**
- **Integrated Transmitter/Receiver**
- **Operation/Adjustment LEDs**
- **Distance Adjustment Dials**

Advanced sensors use optical triangulation to consistently detect clear, multi- and varying-colored, small (0.002″ diameter wire) and dark objects. They diffuse light off target, detect angle of returned light, and determine if target is within user-specified range. Integrated transmitter/receiver allows one-sided mounting. Operation and adjustment LEDs. Distance adjustment dials. Light-ON/Dark-ON switch selectable. Operating temperature: –25°C to +55°C. **Type MQW** sensors are pre-wired with two meter cable. Operating speed: 2ms (250 cps). Dimensions (**except MQ-W70**): 1.00L x 0.496W x 1.260″H(25.4 x 12.6 x 32); **MQ-W70**: 1.765L x 0.732W x 2.047″H(44.83 x 18.59 x 52). **Type MR3** sensors feature operating speed of 1ms - 500cps (DC); 20ms - 25cps (AC). Maximum range: 0.2 to 1m. Infrared LED. "**T**" in type no. indicates units with timing, include switch selectable On-delay, Off-delay, one-shot, or no timing modes. **Type MQ-FW** sensors are fiber optic, DIN rail mountable. Operating speed: 1ms (500cps). Combination amplifier units are 9.6 - 30VDC. 2.185L x 0.630W x 1.102″H (55.5 x 16 x 28). In the tables below, "Maximum Range" indicates maximum distances that can be set by user from lens to object. Types with (*) feature built-in timer.

TYPE MQ-W SENSORS

UZB SERIES PHOTOELECTRIC SENSORS

UZB Series micro-size photoelectric sensors are ⅛″ thick with a footprint of less than ¼″ square. Sensor housing is rated to IEC enclosure IP67 classification for installation in washdown areas. Available in thru-beam or fixed-focus reflective types with modulated, visible-red light source for easy alignment. Maximum sensing range: 500mm. Minimum target size: 0.1mm. Response time: 0.5msec. Two LED indicators show stable operation and output state. Control output NPN open-collector transistor switch rated 50mA at 30VDC. Units operate from 12 to 24VDC and have an ambient temperature range from –25°C to +55°C. Dimensions: 0.571H x 0.394W x 0.138″D (14.5 x 10 x 3.5).

Stock No.	Type	Description	Sensing Range	Each
16F1384	UZB1011	Thru-Front, Light-ON	150mm	87.70

UZF SERIES COMPACT FIBER-OPTIC PHOTOELECTRIC SENSORS

Up to 600mm thru-beam detection, the longest range in the industry. **UZF1 series** feature automatic sensitivity setting. Resolution 8x more sensitive than conventional photoelectric sensors. Units are suitable for color mask detection and overlap detection. Dimensions: 10mm W x 31.5mm H x 59mm D. Synchronous-input models are available with NPN output; timer models: either PNP or NPN. **UZF2 series** all-purpose sensors feature faster than 1ms response time. Both NPN and PNP output, and a continuously variable sensitivity adjustment in every **UZF2** model. Both the **UZF1** and **UZF2 series** operate from 12-24VDC, 30mA (max). Operating temperature: –10° to +50°C.

UZC SERIES PHOTOELECTRIC SENSORS

18mm cylindrical limited photoelectric sensors are suited for applications where space is limited. Designed for long-range detection applications, devices include thru-beam, retroreflective (with or without polarization filter) and diffuse reflective types. PNP and NPN output models are available for DC units. DC models: 56mm long, operate from 10 to 30V, 20mA (max) for projection and 25mA (max) for receiving. AC models: 71mm long, perform from 24 to 240V with 1.5A (max) for projection and 2.5A for receiving. Output is SCR non-contact. Both AC and DC models function over a –25° to +55°C span. **UZC 100 series** features 20msec response time. **UZC 200** and **UZC 2000 series** feature 2msec response time.

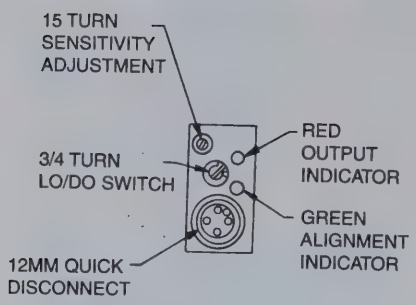
PHOTOELECTRIC SENSORS

MINIATURE HIGH-PERFORMANCE PHOTOELECTRIC SENSORS

Connector Type

Preleaded Type



Harsh duty design sensors withstand high-pressure washdown (1,200 psi) exceeding NEMA enclosure type 6P and IEC enclosure IP67. Applications include food processing, as well as packaging/bottling/labeling equipment. Welded lens, together with fully-potted housing and waterproof adjustments, provide well-sealed performance. Temperature range: –22°F to +158°F. Response times: NPN/PNP output types–1msec; SCR output types–8 msec. UL listed, CSA certified. Diffuse polorized versions are also available. *Order accessories separately. Order fiber-optic cables separately on page 1427, order connectors, cables separately on page 1427, order reflectors separately on page 1427. Order mounting brackets separately below.*

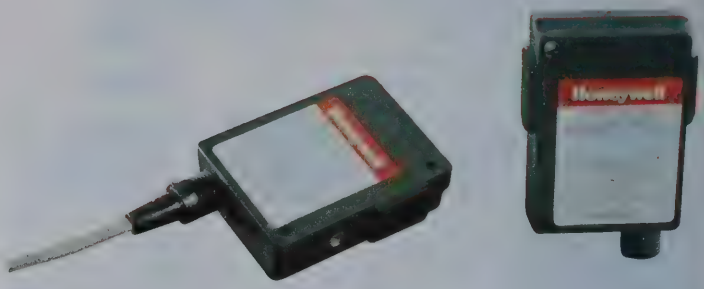
SMART VALUE COMPACT PHOTOELECTRIC SENSORS

NEW



- **Highly Visible LEDs Indicate Power On and Output States.**
- **Compact Housing Fits in Limited Space.**
- **Right-Angle Mounting With Thru-Hole Design**
- **Shock and Vibration Resistant.**
- **Standard DC Voltage Range.**

Economical sensors are ideal for monitoring package counts, part positions, and general material conveyor applications. Compact design and thru-hole or front end mounting options enable scanning between rollers or across conveyor lines. Sensing range for retroreflective types: 20′; for diffuse types 16″. Highly visable green power and red output LEDs aid sensor installation, alignment and troubleshooting. Available with 4-pin micro-connector or pre-leaded leads. Polorized retroreflective and sourcing versions are also available. Supply voltage: 10 to 30VDC; sinking output. Dimensions: 2.36H x 0.65W x 1.93″D. Sealed to IP67. CSA certified, CE compliant.

GP5 GLOBAL PHOTOELECTRIC SENSORS

Universal voltage, 12 to 240 VDC or 24 to 240 VAC. Noise immunity per IEC 801-2/-3/-4. IP66/NEMA 4 sealing. High performance scanning ranges from a complete family of sensors: Retroreflective, Polarized Retro, Diffuse and Thru scan. SPDT relay output and Modulated LED provides ambient light immunity. Set up quick and easy. Relay: 3A. CSA certified. UL listed. Dimensions: 3.16L x 1.02W x 2.68″H.

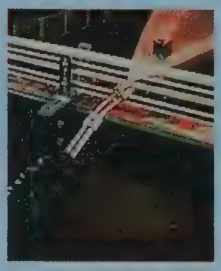
HARSH-DUTY PHOTOELECTRIC SENSORS

MICRO SWITCH HARSH-DUTY PHOTOELECTRIC SENSORS MEET ENVIRONMENTAL CHALLENGES FOUND IN A VARIETY OF APPLICATIONS...



FOOD & BEVERAGE:
- WASH AND SPRAY PRESSURES UP TO 1,200 psi
- WATER OR CLEANING SOLUTION TEMPERATURES UP TO 140°F
- CAUSTIC BASE AND ACID CLEANERS
- THERMAL SHOCK

AUTOMOTIVE MACHINING AND ASSEMBLY LINES:
- CUTTING FLUIDS
- VIBRATION
- THERMAL SHOCK
- ABRASIVE METAL CHIPS
- ELECTRICAL NOISE

... AND NEWARK CARRIES THE FULL LINE TO MEET YOUR APPLICATION NEEDS!

PHOTOELECTRIC SENSORS

FE7 SERIES SUBMINIATURE PHOTOELECTRIC SENSORS

- Adjustable Sensitivity
- NEMA 12 and IP64 Sealing
- Short Circuit Protection (DC Models)
- Vertical or Horizontal Mounting Options for All Sensors
- –4°F to +140°F Operating Temperature
- 15,000 Operations per Minute (DC Models)

FE7 series feature small package size for usage in restricted space areas. Mounting bracket (included) makes mounting and alignment easy. Each sensor has its own infrared light source, photodiode, amplifier circuitry, output transistor and signal strength/alignment indicator. **Type FE7A** size: 1.20(L) x 0.39(W) x .79″(D). **type E7B** size: 1.49(L) x 0.51(W) x .90″(D). **type FE7C** size: 1.96(L) x 0.71(W) x 1.18″(D). **Types FE7A** and **FE7B** feature 1 ms on/off response time. **Type FE7C** response time: 2ms on/off. **Type FE7C** available in AC supply sensor (30ms on/off response) versions. *Contact your local Newark sales office.* L.O. = light operate; D.O. = dark operate.

CP18 SERIES CYLINDRICAL PHOTOELECTRIC SENSORS

- 18mm Fully-Threaded Housing
- 1-Piece Polycarbonate Lens/Housing or Metal Housing
- Sealing Rated to NEMA 4 (IP67)
- Short Housing Options: DC–55mm; AC–81mm
- Operating Temperature: –30°C to +70°C (DC); –30°C to +60°C (AC)

CP18 series 18mm photoelectric sensors for simple industrial and commercial applications not requiring heavy-duty controls or sensitivity adjustments. Small package size fits in limited space areas. Alignment indicator facilitates installation. Modulated infrared LED for ambient light rejection. Preleaded with 2 meters of cable. All sensor types are available in light operate, dark operate, PNP output or 4-pin DIN connector versions. *Order connector cables separately on page 1427.* Applications include conveyor control, bin or hopper level control, packaging machinery, and web break detection.

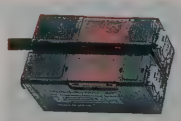
PHOTOELECTRIC SENSORS



- **Strobe Light Emission Permits Easy Confirmation of the Sensing Range (High Performance Thru-Scan And Polarized Retroflective)**
- **High Margin Resolution Function Adjusts Sensing Range at a Margin 3x Greater Than Usual (High-Performance Thru-Scan And Polarized Retroflective)**
- **Front Incoming Light Display Facilitates Sensing Range Adjustment (Thru-Scan)**
- **Sealed to IP67**
- **Available in Horizontal or Vertical Mounting**

Strobe light display, high margin regulation, front incoming light display, and output inhibit functions allow sensing range to be reliably adjusted at high speed. –25° to 60°C operating temperature. Pre-leaded with 2mm of cable. NPN Open collector. Supply Voltage: 10-30VDC. 30mm pigtail with connector termination available. PNP open collector version also available; *contact your local Newark sales office.*

HPX MINIATURE FIBER-OPTIC PHOTOELECTRIC SENSOR

Features:

- **Provides Low Hysterisis, High Sensitivity, Mark Detection and Ultra-Fast Reponse Sensors**
- **Units can be Snap-In DIN Rail Mounted or Bracket Mounted**
- **Fiber Optic Cables Attach Quickly, without Tools**
- **Mutual Interference Protection Enhances Detection Stability and Performance Reliability**
- **Self-Diagnostic Output Gives Advance Warning of Marginal Operating Conditions**
- **Selectable Light Operate or Dark Operate**

HPX Series provides high-performance scanning in a slim-profile package. Optional 40-msec Off-delay on all models listed. Gang mountable without unit-to-unit interference. Provides diffuse/retro or thru scan depending on fiber optic cables used (*fiber optic cables available separately on this page*). NPN output. Operating Temperature: –20° to 60°C. Dimensions: 2.36 x .39 x 1.12″. 10-30VDC. **HPX-T series** offers quick and simple auto tuning capabilities. A microprocessor provides sensitivity adjustment. Sensor features a digital display of light and margin levels, as well as diagnostic error indication. Also available with 6″ pigtail with 12mm connector or PNP output; *contact your local Newark sales office.*

Stock No.	Type	Description	Response Time	Each
92F3066	HPX-H1-H	High Sensitivity	0.5mS	137.51
92F3068	HPX-A1-H	Low Hysterisis	0.5mS	137.51

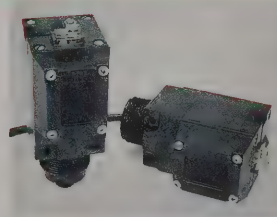
(3616) (ne08846)

RETROREFLECTIVE CLEAR CONTAINER SENSORS



CCS1001, Pre-Leaded Version
CCS1002, Connector Version

Features:

- **Reliably Senses Clear Glass and Plastic Containers**
- **Tri-Color Led Indicator Simplifies Sensor Adjustment**
- **Choice of Three Termination Styles**
- **Electrical Protection For Reverse Polarity Line Transients, Radiated Noise, and Short Circuits**
- **IP67 Sealed**
- **Detects Over 2,000 Containers per Minute**

New CCS series retroreflective clear container sensors readily adapt to changing factory floor conditions. Computer-based adaptive compensation automatically adjusts the sensors to allow for lighting changes by the accumulation of dirt, dust and moisture, virtually eliminating the need for periodic manual readjustments. NPN-PNP outputs. FE-RR11 reflector included with each sensor. Operating Temperature: 0° to 50°C. Supply Voltage: 13.5 to 30VDC. Dimensions: 1.57 x 2.32 x 3.58″. *Connector cable sets available separately on this page.* Mounting brackets available; *contact your local Newark sales office.*

PHOTOELECTRIC SENSORS

GENERAL-PURPOSE PHOTOELECTRIC SENSORS

E3A2

E3B2

Type E3A2/E3B2 sensors feature universal AC/DC supply voltage range (24-240-VAC, 12-240VDC), long sensing ranges, and switch selectable Light-ON/Dark-ON operation. Available in thru-beam, retroreflective, and diffuse versions. Polarized retroreflective types reliably detect shiny objects. Adjustable sensitivity and mutual interface protection is included. Timer option offers ON-delay, OFF-delay, one-shot, and ON-OFF delay modes. SPDT output at 3A, 250VAC. Sensors come with operation indicators, mounting brackets, ½"-14 NPT conduit entry, and reflectors for retroreflective types. Sensing range is given in feet and meters (m). Rated NEMA 1, 4, 4x, 12, and IP66. UL recognized.

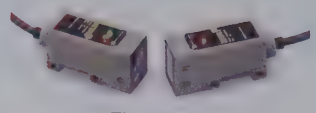
METAL BODY PHOTOELECTRIC SENSORS



Thru-Beam

Retro-Reflective

Diffuse

Designed for use in harsh environments and applications that require long sensing distances. Available in thru-beam, retro-reflective, and diffuse versions. Meet IEC enclosure IP67 classification and NEMA enclosure types 4X and 6P for wet and washdown applications. Rugged, fully potted electronics stand up to severe vibration. Input voltage: 10-30VDC. Output: 30VDC, 100mA. Switch selectable NPN or PNP output and light-ON/dark-ON modes. Feature operation and stability indicators, sensitivity adjustment, and fuzzy logic internal processing to prevent mutual interference by closely mounted sensors. Dimensions: horizontal mounting versions, 2L x 0.8W x 0.9H" (50 x 20 x 23); vertical mounting versions, 2.24L x 0.8W x 0.9H" (57 x 20 x 23). UL recognized, CSA certified, and CE compliant.

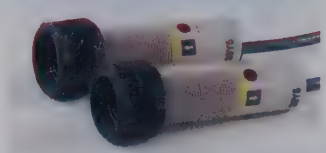
PLASTIC-BODY CYLINDRICAL PHOTOELECTRIC SENSORS



Type E3F2 sensors offer threaded-cylindrical bodies. Size: 0.73 dia. x 2.55"L (18.5 x 65). Operation indicator and circuit protection are standard. AC models: 24-240VAC input voltage, solid state (SCR) 200mA output. DC models 10-30VDC output voltage, 100mA 30VDC output. Light-ON/Dark-ON wire selectable. Pre-wired with 6.5' of cable. Two mounting nuts included. DC models rated NEMA 1, 2, 4x, 12, and IP67. AC models rated NEMA 1, 2, and 4. UL recognized, CSA certified.

MINIATURE PLASTIC BODY PHOTOELECTRIC SENSORS

Thru-Beam

Diffuse

Compact design allows use in confined areas. Able to detect objects as far as 23' away. Feature operation and stability indicators, built-in sensitivity adjustment, and fully potted electronics that stand up to severe vibration. Water resistant. Available in thru-beam, retro-reflective (includes reflector), and diffuse versions. All units are wire selectable for light-ON/dark-ON operation. Input voltage: 12-24VDC. Output: 30VDC, 100mA. Dimensions: 1.48H x 0.41W x 0.71"D (35.5 x 10.4 x 18). All units are pre-wired with 6.6' (2m) of cable. UL recognized, CSA certified, and CE compliant. Mounting brackets are sold separately; *contact your local Newark sales office.*

PHOTOELECTRIC AND LEVEL SENSORS

COMPACT FLAT PACK PHOTOELECTRIC SENSORS

For use in conveying and material handling applications where mounting space is limited. Dimensions: 2.16H x 1.38W x 0.59"D (55 x 35 x 15). Housing material: polycarbonate. Diffuse-reflective sensing method transmits a beam off of the target, when the target reflects the beam back to the sensor, the outputs change state. Supply voltage: 10-40VDC. Output: NPN or PNP, complementary N.O. and N.C. 200mA transistor. Feature screw mounting, easy-to-view LED indication, and reverse polarity and short circuit protection. Sensing range is adjustable. Thru-beam and retro-reflective versions are also available; *contact your local Newark sales office.* Meet IEC enclosure IP67 classification and NEMA enclosure type 4. CSA certified, CE compliant.

(13832) (ne10372)

18mm BARREL-STYLE PHOTOELECTRIC SENSORS

Housed in 18mm threaded nickel-plated brass. Provided with 6.6' PVC cable and side viewable red LED indication. The **EO series** diffuse-reflective sensor's transmitter emits a beam off of the target, when the target reflects the beam back to the sensor, the outputs change state. The **EP series** polarized retroreflective sensors operate on the same principle, only the beam is reflected back off of a reflector, and when an object interrupts the beam, presence or absence is detected. DC types: 10-40VDC supply voltage, NPN or PNP, complementary N.O./N.C. 200mA transistor output, ≤120Hz switching, reverse polarity, short circuit and transient protected. AC types: 20-250VAC supply voltage, N.O. or N.C. 500mA SCR output. ≤25Hz switching, transient protected. All feature adjustable sensing ranges. Meet IEC enclosure IP67 classification and NEMA enclosure type 4. Other versions are available; *contact your local Newark sales office.* CSA certified, CE compliant.

Stock No.	Type	Supply	Output	Sensing Range	Length	Each

MULTIVOLTAGE AC/DC PHOTOELECTRIC SENSORS

Housed in a 2.66H x 0.98W x 3.19"D (67.5 x 25 x 81) rugged polycarbonate with self-feed entries for connecting wires. Features easy-to-view hub LED indication. Supply voltage: 12-240VDC/24-240VAC. Output: 3A SPDT Form C contact. Cable gland entry: ½" NPT. **Type PMD** diffuse-reflective sensor emits a beam off of the target, when the target reflects the beam back to the sensor, the outputs change state. **Type PMP** polarized retroreflective sensors operate on the same principle, only the beam is reflected back off of the reflector, and when an object interrupts the beam, presence or absence is detected. **Type PMR** operates on the same principle as **type PMP**, only it is not suited for detecting shiny or clear objects. Meet IEC enclosure IP67 classification and NEMA enclosure type 4. Thru-beam and adjustable time-delay versions are available; *contact your local Newark sales office.* CSA certified, CE compliant.

(3499) (de52745)

OPTICAL LEVEL SENSORS FOR LIQUIDS

Infrared probe for liquid level detection based on refraction principle. Polysulphone types are resistant to most acids and bases, Polyamid 12 types are resistant to most solvents. LED indication for sensor on. May be used on a variety of liquids including: oil, wine, waste water, hydraulic fluid. Not recommended for use in environments with high concentrations of ambient flourescent light or sunlight. Also not recommended for use with materials which may coat or adhere to the tip of the sensor. Input voltage: **Types E** or **EP** are 10-40 VDC, 200mA, transistor output; **types 110TB** are 115 VAC, 100mA, SCR output. Thread: 3/8" ISO 288. 6' cable. Operating temperature: Max. +176°F. CE compliant.

Stock No.	Type	Housing Material	Output Type	Each

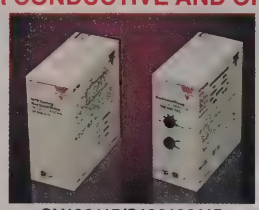
AMPLIFIERS FOR CONDUCTIVE AND OPTICAL SENSORS



SV190115/S196166115

For conductive or any NPN output optical proximity sensors. Amplifiers provide power to sensors and can be used for high/low level alarm or emptying/filling applications. **Type S197** also features an aditional high or low alarm output. Conductive probe amplifiers have the following resistance settings: **type S195** fixed at 25KΩ, **type S196** adjustable from 3.5 to 30KΩ, **type S197** adjustable from 3.5 to 30KΩ, **type S1961** adjustable from 200 to 220KΩ, split into 3 subranges. 115VAC supply voltage, others available; *contact your local Newark sales office.* **Type S411** 11 pin socket required, *listed separately on page 1445.* LED indication for supply and relay on. UL listed, CSA certified, CE compliant, SEV approved.

HALL-EFFECT CURRENT SENSORS

CSD SERIES HALL-EFFECT DIGITAL OUTPUT CURRENT SENSORS

CSD series solid-state sensors detect absence/presence of current with digital current sink output. Response time: 100µsec. Output voltage: 0.4VDC. Changes from Vs to 0.4V at operating current. Output current: 20mA, except **type CSDB1CC**: 100mA. NOTE: Thru-hole design does not require electrical connection to sensed current. Max. Sensed current is only limited by the conductor size.

CSLA SERIES HALL-EFFECT LINEAR OUTPUT CURRENT SENSORS

CSLA series solid-state sensors provide output voltage directly proportional to current flow. AC or DC sensing. 8-16VDC supply for **series CSLA1**. 6-12VDC supply for **series CSLA2. Series CSLA2** feature temperature compensation circuitry. Offset voltage: Vs/2. Output voltage swings from 25% of Vs to 75% of Vs. NOTE: Thru-hole design does not require electrical connection to sensed current. Max. sensed current is only limited by the conductor size. Sensors with 57A to 950A capabilities also available. *Contact your local Newark sales office.*

CSN SERIES HALL-EFFECT NULL-BALANCE CURRENT SENSORS

CSN series solid-state sensors measure AC, DC, and impulse currents. Operation based on the Hall-effect principle and the null-balance or zero magnetic flux method (feedback system). The magnetic field on the sensor is constantly controlled at zero. The amount of current required to balance zero flux is the measure of primary current flowing through conductor multiplied by the ratio of the primary to secondary windings. ±0.5% accuracy. Response time: 1µsec. NOTE: Thru-hole design does not require electrical connection to the sensed current. Max. sensed current is only limited by the conductor size. Sensors with up to 1200A of sensed current also available. *Contact your local Newark sales office.*

HALL-EFFECT SENSORS

GT1 HALL-EFFECT GEAR-TOOTH SENSOR

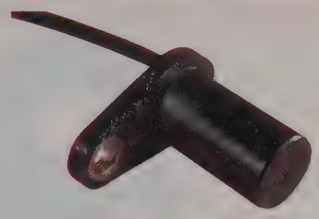
Must Consider in Combination For Optimal Performance:

- **Target Material, Geometry and Speed**
- **Sensor/Target Gap**
- **Ambient Temperature**
- **Magnetic Material in Close Proximity**

Type 1GT101DC gear-tooth sensor uses a magnetically-biased, Hall-effect integrated circuit to accurately sense movement of ferrous metal targets. Units will function from a 4.5 to 24VDC power supply and have reverse polarity protection. Dimensions: 0.70W x 1.43″D.

Stock No.	Type	1-5	6-10	11-15	16-20
92F3009	1GT101DC	23.60	22.03	20.65	19.44

(3457) (de03896)



Type GT1

TYPE 2AV54 HALL-EFFECT POSITION SENSOR

Specifically designed to translate the relative position of a ferrous metal actuator into a digital electronic signal. Current sinking output, operating temperature range: –40°C to +150°C. Dimensions: 0.68H x 0.68W x 1.29″D.

Stock No.	Type	Supply Voltage	Supply Current	Current per Output	1-5	6-10	11-15	16-20
96F1986	2AV54	4.5-24VDC	22mA	40mA	13.20	12.32	11.55	10.87

(3481) (de51371)

Type 2AV54

4AV SERIES HALL-EFFECT POSITION SENSORS

Vane-operated sensors feature dual digital current sinking outputs and closely controlled differential to predict pulse width. Sensors also offer transient protection. **Type 4AV20** has 4-pin in-line PCB terminals; **type 4AV12**and **type 4AV16** have lead wires. Operating temperature range: –40°C to +125°C. Dimensions: 0.43H x 0.52W x 0.75″D.

Stock No.	Type	Supply Voltage	Supply Current	Output Voltage	1-5	6-10	11-15

CSLE/F SERIES HALL-EFFECT LINEAR CURRENT SENSORS

Enclosed internally-regulated sensors require 10.5 to 24VDC supply voltage. **Types CSLE5** and **CSLF5** providean output while sensing AC current with 150msec response time; **types CSLE4,** and **CSLF4** sense DC current with 1 msec response time. Operating temperature range: –25°C to +85°C. Offset supply current: 30mA. NOTE: Thru-hole design does not require electrical connection to sensed current. Max sensed current is only limited by the conductor size. Sensors with up to 1500A of sensed current are available. *Contact your local Newark sales office*

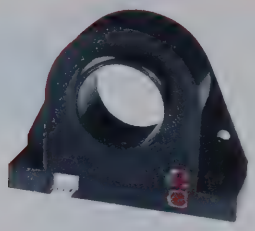
AC AND DC CURRENT SENSORS

RUGGED OPEN-LOOP CURRENT SENSORS



Packaged in a rugged potted case that can be panel-mounted either vertically or horizontally. **Type RS** current sensors accurately measure DC and AC currents. Large 1.25″ aperture hole allows easy installation. Output via a Molex 5045-04 conector. **Type RS** features an operating voltage of ±15VDC with a bipolar output range of ±4VDC full scale. **Type RSS** features single operating voltage of 12-15VDC with a unipolar output of 2-10V full scale, with 6V at zero current.

Stock No.	Type	Full-Scale AC or DC Peak	Op. Volts	1-5	6-9
48F4359	RS-100	100	±15VDC	42.77	39.46
48F4360	RS-200	200	±15VDC	43.96	40.56

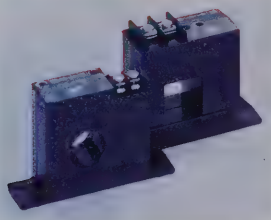
(3515) (ne06122)

AC AND DC CURRENT SENSORS AND SWITCHES

UL



Type **PC/PCS** sensors provide 4-20mA output proportionate to AC current. **Type SCC** provide either a 4-20mA or a 0-20mA unipolar output proportional to AC or DC current. **SCV series** provides either a 0-5V or 0-10V unipolar output proportional to AC or DC current. **Type CS/CSS** detects AC current from 1A to 150A and provides a switched output when the current exceeds the adjustable switch point. Adjustment is made via multi-turn trim pot. **Types PCS, CSS, SCC,** and **SCV** clamp around existing wiring for easy installation. **Types PC/PCS** and **CS/CSS** feature simple 2-wire connection and interface to PLCs. **Types SCC** and **SCV** require 24VAC/VDC operating voltage. All models are panel-mounted, feature jumper range selection. UL listed. Higher current units are available. *Contact your local Newark sales office.*

Stock No.	Type	AC (A)	Output	Aperture	1-5	6-9

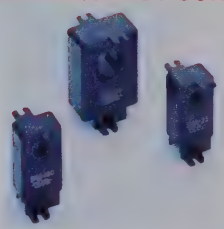
(3460) (de04009)

IHA SERIES HIGH FREQUENCY CURRENT SENSORS



Response <1µs. Frequency range DC to 50kHz. Linearity ±1%. Operating voltage ±12Vdc to ±15Vdc. Temperature range 0°C to +75°C. Case design allows for either panel or PCB mounting by use of appropriate connector; *contact your local Newark sales office.* Mounting tabs accept No.6 screws for placement on PCB or panel. Ideal for use in solid-state circuits.

Stock No.	Type	Current Range	Full Scale Output	Aperture	1-5	6-9
92F4411	IHA-25	±25A	±1V	0.38″	55.95	51.62

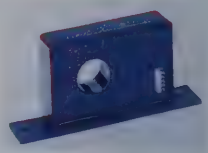
(3459) (de04008)

BB SERIES HALL-EFFECT CURRENT SENSORS

BB-25/100

BB-150/300/600



BBP-150H/300H/600H

Accurately measure DC and AC currents. Provide fast response and electrical isolation from the circuit being measured. The voltage output is proportional to the current being measured. **Types BB-25/100** mount directly on PCB via thru hole pins. **Types BB-150/300/600** have four 0.12″ holes for mounting on panel. **Type BBP** sensors are potted in plastic case with flange mount. Electrical connections for 150/300/600 A models via PANDUIT Model No. CE100F26-5 mating connector. Operating voltage: ±15VDC. Operating temperature range: –25°C to +85°C.

Stock No.	Type	Full Scale DC or AC Peak	Full Scale Output	Bandwidth	Aperture	1-5	6-9
92F4399	BB-25	±25A	±1V	DC to 60kHz	0.40″	29.51	27.23
92F4400	BB-100	±100A	±5V	DC to 60kHz	0.40″	29.51	27.23
92F4401	BB-150	±150A	±6V	DC to 60kHz	0.80″	36.89	34.03

(3514) (ne04011)

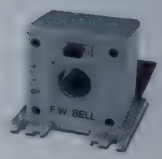
CLOSED LOOP CURRENT SENSORS

CLN-25

CLN-50

CLN-100

CLN-200



CLN-1000

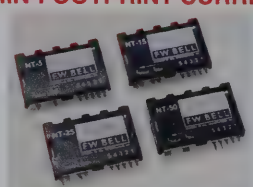
Closed loop sensors null out the flux produced by the current through the aperture. Output is a current that is proportionate to the aperture current divided by the number of turns on the coil. **Type CLN-25/50/100** mount directly on PCB. **Type CLN-200/1000** mounts on the panel. Response time <1µ. Linearity >0.2%. Frequency range: DC to 100kHz min.

Stock No.	Type	Nom. Current (Arms)	Output mA/A	Operating Voltage (±Vdc)	Aperture	1-5	6-9
83F2354	CLN-25	25*	1	12 to 15	PCB	27.05	24.96
83F2355	CLN-50	50	1	12 to 15	0.39x0.53″	34.43	31.77
83F2357	CLN-100	100	1	12 to 15	0.39x0.53″	55.34	51.05
48F4363	CLN-200	200	0.5	12 to 15	0.90″	122.87	117.26
48F4364	CLN-1000	1000	0.2	12 to 15	1.73″	329.52	314.47

***CL-25** offers choice of ranges via connection to pins on sensor: 5, 6, 8, 12 or 25 Arms.

(3458) (de04007)

NT SERIES THIN-FOOTPRINT CURRENT SENSORS



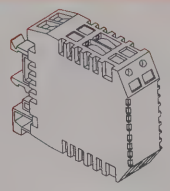
NT Series mount directly to PC Board. All electrical connections are via thru-hole pins. Small size (less than 0.25″ wide) allows placement in applications with limited board space. Measure AC and DC currents. Frequency Response DC to 50kHz. Linearity ±1%. Response time <2µs. Sensors operate from +0°C to +70°C. Ideal replacement for shunts where electrical isolation is required.

Stock No.	Type	Nom. Current (Arms)	Full Scale Output	Voltage	1-5	6-9
16F6749	NT-5	5	2.5V	±15	25.83	23.83
16F6750	NT-15	15	2.5V	±15	27.05	24.96
16F6751	NT-25	25	2.5V	±15	29.51	27.23
16F6752	NT-50	50	2.5V	±15	33.20	30.63

(3586) (ne08158)

PHOTOELECTRIC SENSORS

T60 LED MODULATING AMPLIFIER



Ambient light immunity in a DIN rail mountable DC powered unit. Controls modulate LED or IRED source of a reflective scanner or thru-beam pair and respond only to detector signals with the same modulation frequency. User configurable light or dark energize. 25-turn sensitivity adjustment. **Type T60002** uses 8-28VDC supply.

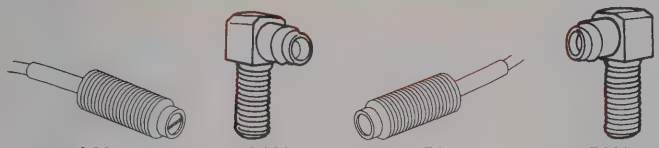
95F9347 Type T60002. **Each** **104.76**
(3444) (de02819)

TYPE L34/P34 SUBMINIATURE THRUBEAM PAIR

Designed for precise detection in restricted and abusive areas. Rated separation: 6″ up to 36″ with **Type T60** modulating amplifier, *sold elesewhere on this page.*. Smallest detectable object: 0.02″. Light source input: 60mA max. Photodetector has filter to block ambient light. Operating voltage: 30VDC max. Stainless steel bodies.

95F9362 Type L34024 Emitter. **Each** **62.19**
95F9363 Type P34024 Sensor. **Each** **60.99**
95F9348 Type L34040. **Each** **74.36**
(3448) (de02824)

MINIATURE LED THRU-BEAM PAIRS

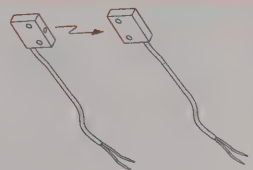


L33 **L331** **P33** **P331**

Rugged thru-beam combination in miniature size for use in conditions of severe shock and vibration. Infrared LED light sources use 100 mA max. input, have 940nm peak spectral emission. Rated separation: 36″. Beam diameter: 0.16″. Smallest detectable object 0.05″. Photo detectors have filters to block visible ambient light, have 910nm peak spectral response. Operating voltage: 20VDC max. Anodized aluminum body.

95F9353 Type L33007 Straight source. **Each** **61.21**
95F9354 Type L33107 Right angle source. **Each** **88.76**
95F9355 Type P33001 Straight sensor. **Each** **61.21**
95F9356 Type P33101 Right angle sensor. **Each** **88.78**
(3445) (de02821)

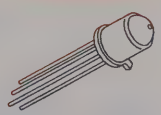
TYPE L60/P60 THRUBEAM PAIR



Small units feature infrared-pass filter for ambient light immunity, rated separation from 6″ up to 36″ with **Type T60** modulating amplifier, *sold elesewhere on this page.* Smallest detectable object: 0.02″. Infrared emitter input current: 60mA max. Sensor operating voltage: 30VDC max. Glass-filled polycarbonate housings suitable for screw or rivet mounting.

95F9364 Type L60001 Emitter. **Each** **33.16**
95F9365 Type P60001 Sensor. **Each** **33.16**
(3449) (de02825)

TYPE S27 SKANNER® SUBMINIATURE REFLECTIVE SCANNERS

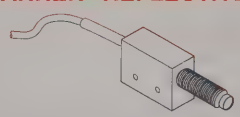


Type S27301

Complete scanner in subminiature package. LED directs infrared energy through formed epoxy lens. Reflected energy is received by fiber optic rod at lens center. Light source has 60mA max. input, spectral emission of 880nm. Photo detector has 30VDC max. Operating voltage. **Type S27301** has 4 gold-plated copper leads, mounts in socket or soldered to PC board.

95F9357 Type S27301. **Each** **44.51**
(3446) (de02822)

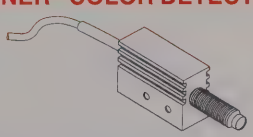
TYPE S30 SKANNER® REFLECTIVE SCANNERS



Unit has lamp located in backbody where heat is dissipated by aluminum housing. Smallest detectable object: 0.04″. Optimum distance to target: 0.10″. Maximum usable distance: 0.6 to 1.0″. Lamp emitter has 5VDC, 115mA input. Photodetector has 30VDC max. operating voltage.

95F9366 Type S32201 Lamp emitter. **Each** **152.08**
(3450) (de02826)

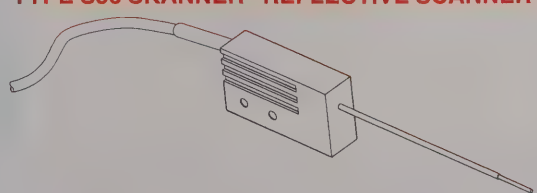
TYPE S35 SKANNER® COLOR DETECTION SCANNERS



Detects a wide range of colored marks, including blue, green, yellow, orange and red. Units include incandescent lamp, photo detector and optical filters. Red scanner detects red, orange, yellow or black marks on white and some other colored backgrounds. Blue scanner detects blue, green or black. Visible color scanner detects variety of colors. Smallest detectable object: 0.03″. Optimum distance to target: 0.10″. Anodized aluminum body with 5/16-24 UNF threaded shaft.

95F9359 Type S35201 Red scanner. **Each** **268.36**
95F9360 Type S35202 Blue scanner. **Each** **268.36**
(3447) (de02823)

TYPE S56 SKANNER® REFLECTIVE SCANNER



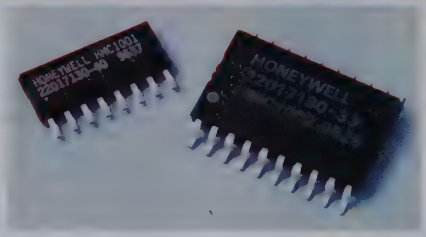
Feature coaxial cable bundle in semi-rigid snout that can be easily bent by hand to position the tip at the target. High temperature tip operable to 200°C. Smallest detectable object: 0.007″. Optimum distance to target: 0.010″. Maximum usable distance: 0.070″. Lamp emitter uses 5.0VDC, 115mA input. Detector has 20VDC max. operating voltage.

95F9368 Type S56101 Lamp emitter. **Each** **229.69**
(3451) (de02827)

Honeywell

MAGNETIC AND DISPLACEMENT SENSORS

HMC1001 AND HMC1002 SINGLE- AND DUAL-AXIS MAGNETIC SENSORS

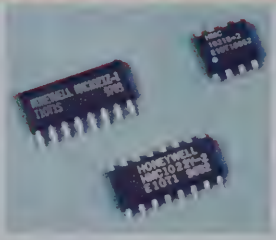


Single- and dual-axis magnetoresistive microcircuits for use in highest precision applications, such as currency detection, virtual reality headsets and compass heading electronics where precise understanding of direction or position is required. Sensors convert magnetic fields within the earth's field of 0.6 gaus to differentiate output voltage. Voltage output indicates both field magnitude and direction. Two solid-state sensors in single plastic package provide 0-5 MHz frequency response, operation over –55°C to +125°C and patented set/reset function for nulling out the effects of unwanted ambient magnetic fields. Unamplified voltage output.

Stock No.	Type	Description	Field Range	Resolution	Full-Scale Output	Each
16F5415	HMC1002	Dual-Axis	±2 Gauss	70 µGauss	50mV	**31.05**
91F4713	HMC1001	Single-Axis	±2 Gauss	70 µGauss	50mV	**18.63**

(4417) (ne08103)

TYPE HMC1021 AND HMC1022 SINGLE- AND DUAL-AXIS MAGNETIC SENSORS

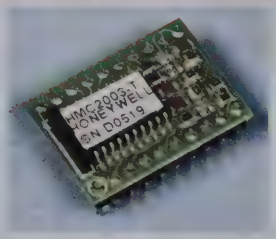


Single- and dual-axis magnetic sensors are designed for use in applications including currency detection, virtual reality headsets, and compass heading electronicsand sense magnetic fields as low as 85 microgauss. Sensors are packaged in plastic and provide 0-10MHz frequency response. They can be used together to provide 3-axis capability or alone for one- and two-axis sensing. Power supply: 3-10V. Operating temperature range: –55°C to +125°C. Patented set/reset function. **Types HMC1021S** and **HMC1022** are surface mount. **Type HMC1021Z** is thru-hole mounting. Unamplified voltage output.

Stock No.	Type	Description	Field Range	Resolution	Full-Scale Output	Each
91F4714	HMC1021	Single-Axis	±6 Gauss	85 µGauss	±60mV	**18.63**
48F2837	HMC1022	Single-Axis	±6 Gauss	85µGauss	±60mV	**16.50**
91F4715	HMC1022	Dual-Axis	±6 Gauss	85 µGauss	±60mV	**31.05**

(15230) (ne10574)

TYPE HMC2003 MAGNETIC SENSOR HYBRID

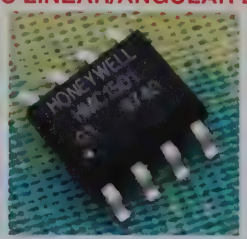


For use in high-precision applications such as vehicle control, compass heading detection or medical instruments where accurate position detection is required. Special packaging techniques provide high-resolution, temperature-compensated, amplified voltage outputs operating from single 6-15V supply. Single 20-pin DIP package. Integrated offset coils allow closed loop operation.

Stock No.	Type	Field Range	Resolution	Full-Scale Output	Each
16F5425	HMC2003	±2 Gauss	70 µGauss	4.5V	**258.75**

(4418) (ne08104)

TYPE HMC1501 MAGNETIC LINEAR/ANGULAR DISPLACEMENT SENSOR



High resolution, low power magnetoresistive sensor features absolute position sensing when used in conjuction with a magnet mounted on a shaft assembly. Method withstands large variations in gap between sensor and magnet, has less sensitivity to shock and vibration, very low hysteresis, high repeatability and immunity to stray fields when compared to Hall Effect sensors. Angular range: ±45° with less than 7° resolution. Accuracy: 0.1mm, depending on the magnet used. Repeatability: 0.05mm. Full-scale output range: 120mV with 5V power supply.

Stock No.	Type	Field Range	Average Sensitivity @ 5VDC	Full-Scale Output	Each
48F2838	HMC1501	60-150 Gauss	1.8mV/Degree	±60mV/Degree	**12.00**

(34295) (ne34295)

CONTACTORS, BLOCKS, CONTROL AND THERMAL RELAYS

DIL M SERIES CONTACTORS

Type DIL M contactors feature 600V 3 NO main poles. Coils have 3 terminals suitable for single-sided or diagonal wiring. Screw or DIN rail mounting. Order auxiliary contacts and type Z overload relays separately on this page. UL listed, CSA certified, CE compliant.

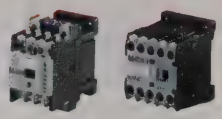
CONTROL RELAYS



Feature interlocked opposing contacts that prevent them from both being closed at the same time, even after a default. For use in all types of control circuits, logic and interlock circuits, safety circuits (for emergency stop and safety guard operation), or as interposing relays for operating larger contactors. UL listed, CSA certified, CE certified.

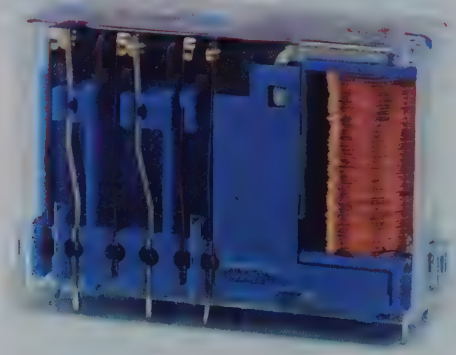
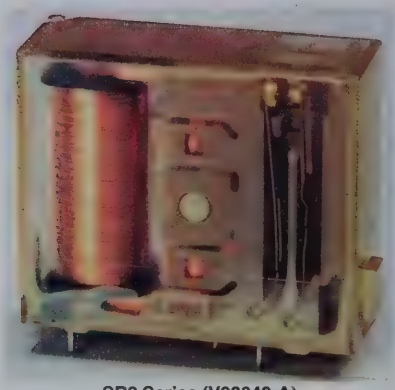
SAFETY RELAYS

ZW, SR2, AND SR4 SERIES SAFETY RELAYS



ZW Series (V23048)



SR2 Series (V23049-A)

SR4 Series (V23049-B)

SR2 and **SR4 series** meet the requirements of the "Employer's Liability Insurance Associations" for the forcible actuation of contact pile-up. **SR2 series** are designed with 1 make and 1 break contact. **SR4 series** are designed with 3 make and 1 break contact. Maximum switching current: 8A. Features include: Compliance with the "Safety Rules for Controls for Power-Operated presses in Metal Working (ZH1/457)", sepearate contact chambers insuring that the actuating system is reliably isolated from the contact spring set even if the wire or spring breaks, clearance and creepage distances according to VDE 0110 insulation group C 250, and compact dimensions. Typical applications for **SR2, SR4**, and **ZW series** safety relays: emergeny stop switches, automatic door controls, two-hand controls, elevator control systems, escalator control systems, press control systems, photoelectric barriers/light-beam curatains, and system controls.

ZW SERIES SAFETY RELAYS

ZW series relays are 4-pole safetey relays designed with 2 make and 2 break or 3 make and 1 break contact configurations. All contacts are forcibly guided. Features separate contact chamber insuring that the actuating system is reliably isolated from the contact spring set even if the wire or spring breaks. Rated load voltage: 250VAC maximum. Continuous current: 6A.

Stock No.	Type	Coil Voltage (VDC)	Coil Resistant ±10% (Ω) @ 20°C	1-24	25-49	50-99

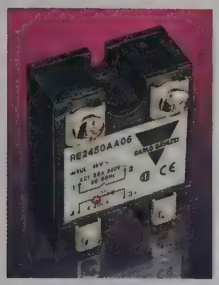
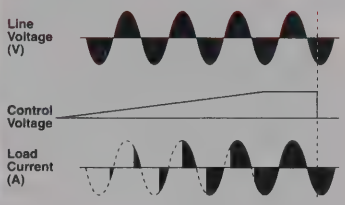
NEWARK: YOUR ONE-STOP SHOP.

SOLID-STATE RELAYS AND HEAT SINKS

PHASE ANGLE FIRED ANALOG SWITCHING RELAYS





Ideally suited for "phase angle" control of resistive loads, such as heater bands or incandescent lamps. The relay switches off every time the current crosses zero and switches the load voltage proportionally with the applied analog control current. Back-to-back SCR output, rated up to 660VAC, controlled by 4-20mA DC. LED illumination is proportional to the input signal. UL recognized, CSA certified, CE compliant.

4-20 mA CONTROL CURRENT

3-PHASE ZERO SWITCHING RELAYS

- Built-in MOVs and protective cover
- Bright LED indication
- Unique raised back plate
- Optimum heat dissipation
- AC and/or DC control voltage
- Up to 55A, 530VAC switching
- Up to 1200 Vp non-repetitive voltage

Three-phase zero switching solid-state relays for resistive loads (heater bands) and inductive loads. Optional pilot duty switch. Optional temperature limit switch monitors back plate temperature. UL recognized, CSA certified, CE compliant.

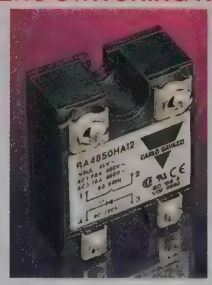
SCR ZERO SWITCHING RELAYS



- Direct copper bonding technology
- Unique raised back plate
- Optimum heat dissipation
- AC and/or DC control voltage
- Up to 110 amp switching capability
- Up to 690 VAC switching
- Up to 1600 Vp non-repetitive voltage

Zero switching solid-state relays are commonly used for resistive and small inductive loads. They provide high current carrying capabilities for operational voltages up to 690 VACrms. Normally open, back-to-back SCR outputs are utilized in the output circuitry to reduce leakage current. UL recognized, CSA certified, CE compliant. **Type RA** SCR zero-switching relays are also available. *Contact your local Newark sales office*

CURRENT, VOLTAGE AND PHASE MONITORING CONTROLS

DIN RAIL MOUNT MONITORING RELAYS FOR VOLTAGE, PHASE AND FREQUENCY

DIN rail mount housings are 3.6H x 1.8W x 4″D (except **types EUI** which are 0.9″W), feature touch-safe front cover and compression clamp wiring terminals. Three LED indicators display: output on, time delay active, and supply voltage applied. Each relay monitors its supply voltage. **Types EUA** and **EUF** have 5A SPDT output(s). **Types EUB**, **EUC**, **EUY**, and **EFA** have 5A DPDT output(s). All monitoring relays feature adjustable delay(s), except **types EUAC**. All relays are three-phase, except **types EFA** and **EUI**, which are one phase. UL recognized, CSA certified, SEV certified and CE compliant.

*Supplied by 115VAC. Voltage to be monitored is wired to two separate terminals.

(2450) (ne08084)

DIN RAIL MOUNT CURRENT MONITORS

DIN rail mount housings are 3.6H x 0.9W x 4.0″D. These current monitors feature 5A SPDT output, LED status indicators, one setpoint, and adjustable delay time. **Type EII** accepts AC or DC current inputs from 0.4mA to 5A, split into three sub-ranges. **Type EIL** accepts inputs of 1A or 5A AC (i.e. secondary of current transformer), or can be interfaced directly to **type MI** (1-phase). **Type EIL**'s maximum current rating is typically equal to the primary side of the current transformer. Supply voltage: 115VAC. Other voltages are available; *contact your local Newark sales office.* UL recognized, CSA and SEV certified, CE compliant.

PLUG-IN CURRENT AND VOLTAGE MONITORS

Plug-in monitors feature housings 3.2H x 1.4W x 3.2″D. Relays are activated when setpoint is reached. Output: 10A SPDT. Features adjustable setpoint, hysteresis, and latch function. Requires use with **type S411** 11-pin circular socket; *ordered separately on page 1445.* UL recognized, CSA and SEV certified, CE compliant.

1-PHASE AC/DC VOLTAGE SET POINT RELAYS

115VAC supply. Other voltages are available; *contact your local Newark sales office.*

Stock No.	Type	Monitoring Range (AC/DC Voltage)	Voltage (VAC/DC Max.)	Each

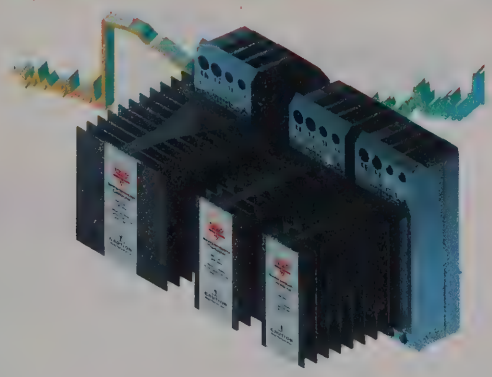
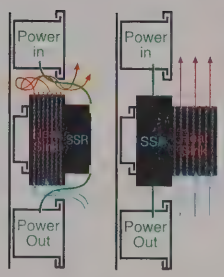
SOLID-STATE CONTACTORS AND RELAYS

SOLITRON SOLID-STATE CONTACTOR WITH INTEGRATED HEAT-SINK





- **User Friendly— Just Snap onto DIN Rail**
- **Ideal Alternative to Mercury Relays**
- **Front-Mounted Heat Sink for Optimium Cooling**
- **One- or Two-Pole Switching**
- **Zero Switching for Resistive Motor Loads**
- **Built-in MOV Protection**
- **LED Indication**
- **AC and/or DC Control Voltage**
- **Up to 63A Switching at 86°F**
- **24-530VAC Switching**
- **Up to 1200 Vp Non-Repetitive Voltage**

DIN rail-mounted solid-state relays feature integral front-mounted heat-sinks which provide cooling by natural air convection within the panel. Provide alternative to environmentally hazardous mercury relays. Available in single- or double-pole output versions. Double-pole versions, "Max. Total Current" rating indicates the maximum amount of current that can be switched through both output semiconductors. (For example, if a 50A relay is being used, unit allows 10A switching through one output and 40A through the other —not 50A through both). Switching 2 of 3 voltage lines to the load is acceptable in most resistive heating element applications. Dimensions: 4.74H x 4.06"D (for width, *see table below*). Higher surge current relays are available; *contact your local Newark sales office.* UL recognized, CSA certified, CE compliant.

SOLITRON SOLID STATE RELAY WITH SYSTEM MONITORING

- **Monitors Line, Load, and Solid State Switching**
- **Provides Alarm in Fault Conditions**
- **User Friendly — Just Snap Onto DIN Rail**
- **Front-Mounted Heat Sink for Optimum Cooling**
- **Zero Switching for Resistive/Motor Loads**
- **Built-in MOV Protection**
- **Diagnostic LED Indication**
- **DC Control Voltage**
- **Up to 50A Switching at 86°F**
- **120-530VAC Switching**
- **Up to 1200Vp Non-repetitive Voltage**

System-monitoring solid state relay provides normally-closed NPN alarm output. Internal circuit monitors line voltage, line current, correct function of relay, and input status. Red LED (half intensity) indicates DC control voltage applied, with full-intensity indicating that relay is switched on. Back-to-back SCR output. 20-32VDC control. Dimensions: 4.74 x 4.06" (H x D). Width appears in table below. CE compliant. Normally open and PNP outputs are also available. *Contact your local Newark sales office.*

Stock No.	Type	Line VAC	Max. Total Current	Current (≤10ms)	Width	Each

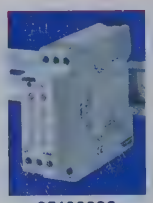
SAFETY AND CONTROL RELAYS

KNA SERIES SAFETY RELAYS



85100026

8510003X

- **Emergency Stop and Moving Guard Monitoring Functions**
- **Self-Checking Redundancy Concepts**
- **Return Loop for Connection of External Contactors**

KNA series safety relays interface between emergency pushbuttons, limit switches, pressure mats, sensors, and contactors. Redundancy and self checking make **KNA series** achieve Level 4 safety in accordance with EC European Standard EN 954-1 and the European Machinery Directive 89/392/EC. UL and cUL recognized. CE compliant.

FAIL-SAFE, ZERO SPEED STANDSTILL MONITOR RELAYS

KSW series safety relays are used for safety gate interlocking to prevent access to hazardous areas when motors are running. For monitoring the voltage regenerated by DC or AC motors (1- or 3-phase, up to 600VAC) during rundown. No additional sensors are required. Achieve Level 3 safety in accordance with EC European Standard EN 1088 for interlocking devices. Number of safety contacts: 2. Width: 1.75″. UL and cUL recognized. CE compliant.

Stock No.	Type	Operating Voltage	Each
91F5525	85100316	24VAC/DC	319.76

AC SOLID-STATE RELAYS

COOLPAK™ CMRA SERIES AC OUTPUT RELAYS

Series CMRA relays feature status-indicating LED, DIN rail, or panel mounting, and fingerproof easy to use input and output cage type terminals. All types offer integral factory- installed heat sinks and are available in zero voltage switching. All types are AC control and have 90-140Vrms control range.

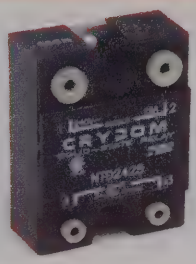
NTD AND NTA SERIES AC OUTPUT RELAYS



NTD and **NTA series** feature a wider operating range (24-280VAC), when compared to the **TD** and **TA series**, permitting optimum performance at both 120VAC and 240VAC line voltages. All types are available with zero voltage or random switching (**suffix 10**) or with the FASTON® terminal option (**suffix F**). DC types have 3-32VDC control and AC types have 90-140VAC control. ISO 9002 certified.

AKT/AKB SERIES ANALOG ISOLATING/COUPLING MODULES

- **ISO9001 Certified**

AKT/AKB series modules with or without electrical isolation for signal and supply. Used to convert an analog measurement from one signal standard to another. Supply voltage: 24V ±20%. Cut-off frequency: 20 kHz ±10V, 10kHz. Width is 22.5mm. Maximum load is 500 ohms. Operating temperature range: 0-70°C. Additional signal ranges available; *contact your local Newark sales office.*

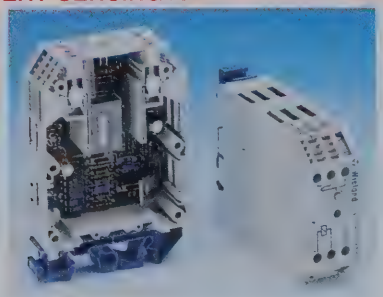
CURRENT-SENSING ALARM RELAY MODULE



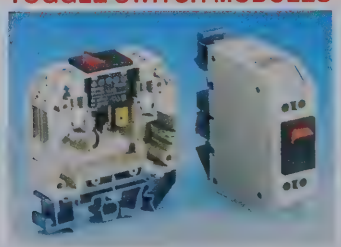
- **ISO9001 Certified**

CSR module accepts power supply feed from 9½VDC to 40VDC. Detects a current level between 4mA and 20mA DC. Dry contact closure or disconnect (SPDT). The control electronics and dry contact relay are built-in. Breaking voltage: 380VAC/125VDC. Current: 7A maximum. Maximum ambient temperature: +60°C.

Stock No.	Type	Description	1-24
50F7113	57.802.3053	CSR Module	77.58

(2308) (de01469)

TOGGLE SWITCH MODULES



Switch modules function to turn on or off a branch circuit under load. Available in DPST circuit variation. Unit is rated 8A at 125V and 4A at 250V, and designed with a universal mounting base for DIN rail assembly. Ideal for enclosures with restricted space and/or a hard-to-reach disconnect. Housing: polyamide 6.6. Pressure connector: zinc-plated and chromated steel. Current bar: tin-plated copper alloy. Color: gray. For complete technical specifications, as well as other technical configurations, *contact your local Newark sales office.*

SURGE PROTECTION MODULES

120VAC Lightning Arrester

Dual-Channel RS-485 Module

Type WT/WEG-HSP-001ATC 120VAC lightning arrester provides both common and differential mode protection. Capable of withstanding a 10kV surge. Provides primary side protection of remote electronic equipment. 2 protection stages. DIN rail mounting.

Stock No.	Type	Input	Common	Differential	1-9
16F4733	WT/WEG-HSP-001ATC	120VAC, 1 A	80 Joules	150 Joules	105.96

Type WT/WEG-LSP/RS-485 dual-channel RS-485 module is for use with lines in close proximity to industrial transients. 4-stage hybrid protection. DIN rail mounting.

Stock No.	Type	Common Energy	Common Current	1-9
16F4734	WT/WEG-LSP/RS485	3.4 Joules	1000 Amps	72.46

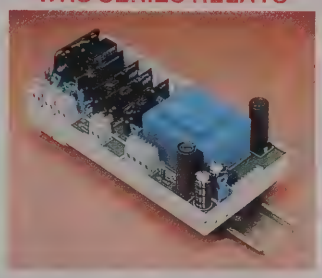
INDUSTRIAL DIN RAIL RELAYS AND ACCESSORIES

WRS SERIES RELAYS



- **ISO 9001 Certified**

DIN rail mount high-performance relays feature small, narrow housing to minimize space required in cabinet. Mount on TS32 or TS35 DIN rails. Accept 12 AWG wire. Include LED for status indication. 4kV I/O insolation voltage. In addition to pure resistive loads, single-and three-phase solid-state relays also switch inductive loads, such as motors, on and off, at a zero voltage crossing. Additional features include the prevention of unintentional starting and an adjustable minimum CCW/CW reversal time. All 24V input **WRS series** relays have gold plated jumpering pins that when jumpered to an adjacent **WRS series** relay, provides a common connection between the two (or more) relays -Vcc coil connection. For this purpose *order* **type Z8.000.0103.4** *insulated jumper separately; contact your local Newark sales office.*

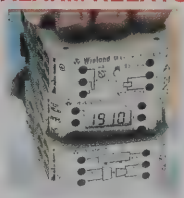
ALARM RELAYS



- **ISO 9001 Certified**

DIN rail mount alarm relays with 2 set points (high and low limits). The low limit output becomes active when the analog value falls below the "low" set valve. The high limit is active when a signal occurs above the "high" set value. The LCD is 4 digits with resolutions of 10mV or 10µA. The display is switchable between high set point /low set point and present signal value. Units without LCD may be configured and monitored by use of a multimeter. Isolation provided is 2-way (input/output) or 3-way (input/output/power supply). Required 24-volt power supply.

Stock No.	Type	Input Range	Output	Isolation	LCD	1-9

ARTISAN

PRECISION TIMING DEVICES

438 SERIES UNIVERSAL IN-LINE TIMERS

Fig. 1

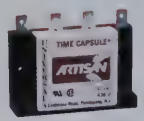

Fig. 2

Fig. 3

Fig. 4

438 series"Universal Voltage" in-line solid-state timers for delay-on-make and interval control of load devices operating from 19 – 288VAC/DC, except **type 438USA-INT** which provides interval timing for AC loads from 24 – 240 volts. Load devices can be relays, solenoids, or lamps with a 1 ampere load rating. Operating temperature range: –20°C to +85°C. **Type 438U** is adjusted by putting a resistor across middle two terminals – 10K/second. **Types 438USA** and **438USA–INT** are DIP switch adjustable. **Type 438UP** has an adjustable potentiometer. UL recognized, CSA certified.

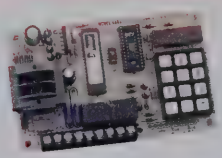
TYPE 4950 7-DAY PROGRAMMABLE CONTROLLERS



Type 4950120VAC

Type 4950H120VAC

Type 4950PM120VAC

Type 4950 programmable 7-day controllers turn on and off two separate power relays on a seven day, 24-hour basis for up to 56 times per week, with a maximum of eight events per day. EEPROM program memory maintains the programmed schedule for up to ten years without battery backup. **Type 4950** is an open printed circuit board with two SPDT sets of 5 amp contact. **Type 4950H** is housed in a metal enclosure with two knockout holes for wiring. Two SPDT sets of contacts rated for 20 amperes with keypad for programming and a red LED to display time of day. **Type 4950B** is a bell controller for factories and schools which features "on" time settable in seconds. **Type 4950PM** can be front panel-mounted. Features a tactile keypad. Time of day maintained in a smart timepiece circuit that keeps time running for up to 5 days during a power failure without the use of external batteries. Other voltages available. *Contact your local Newark sales office.*

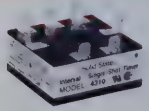
INTERVAL/SINGLE-SHOT TIMERS



4310-A8-B2

4300-A-2

Type 4310-A8-B2 performs as either an interval or single-shot timer by applying a jumper across terminals 6 and 7. Load remains ON for the full set time period , even if the initiate switch closure is momentary. Controls DC loads to 1 ampere and AC load circuits up to 10 amperes with zero voltage switching. 120VAC. 1-300 second time delay range. 5A output. UL listed, CSA certified. **Type 4300-A-2** is an interval timer that permits operating voltage to be applied to a 1 ampere load circuit for a present time period, operating only one for each application of power. Load turns off after time delay. Operating voltage must be present for more than the preset time period. Operates at 115VAC with adjustable time range from 1 to 300 seconds. UL and cUL recognized, CSA certified. Available in DC voltage also. *Contact your local Newark sales office.*

Stock No.	Type	Description	Each
94F8583	4310A-8-B-2	Interval Single-Shot	40.36
94F8579	4300A-8-2	Interval	23.56

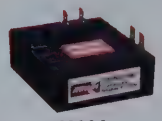
SOLID-STATE REPEAT CYCLE TIMERS

Type 4600A-4610A



4608A

Type 4980

4600 and **4610A** series repeat cycle timer has energized time that adjusts from 50% of minimum repeat cycle time to 50% of selected repeat cycle time. **Type 4600** controls 1 ampere and **4610A** controls 10A , 115VAC loads and are available in both AC and DC voltages. **Type 4608** operates a set of 20A high power contacts. Adjustable "ON" and "OFF" times can be independently set from 1–1024 seconds by two, 10-position, binary-coded dip switches. Available in either 115 or 230VAC. **Type 4980** programmable ON-OFF repeat cycle timer is microcontroller-based with digital display of four internal time periods – tenths-of-seconds, seconds, minutes & seconds and hours & minutes. Cycle time programming is kept in memory should power fail during a timing cycle. Timer completes cycle once power has been restored. Available in 12VDC, 120VAC or 230VAC. *Contact your local Newark sales office.*

(2893) (de50186)

INTERVAL COUNTDOWN TIMERS

Series 4970/4972 are microcontroller-based countdown interval timers with digital display of time, controlling SPDT power contacts rated for 20A. Feature four internal time basis: tenths-of-seconds, seconds, minutes and seconds and hours and minutes. UP/DOWN buttons adjust time displayed on red LED. Preset time kept in non-volatile memory. **Type 4972** features remote switch control of the start/stop and reset functions. Voltage selector switches between 115VAC or 230VAC.

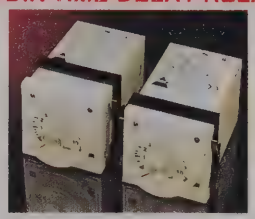
1/16 DIN TIME-DELAY RELAYS



Housed in 1/16 DIN enclosure: 1.89H x 1.89W x 3.81″D (48 x 48 x 97). Units are delay-on-operate timers, offering 6 selectable timing subranges. Time range: 0.1 second to 10 hours. Output: 8A SPDT. Supply voltage: 24VAC/DC and 115VAC. Repeat accuracy: ≤ 0.2%. Require 8- or 11-pin circular sockets, *available separately on this page.* **Types AMB** and **BMB** timers offer 4 different timing functions. UL recognized, CSA certified, and CE compliant.

Stock No.	Type	Timing Function	Each
91F4599	AAMCD11	11-Pin Delay-On-Operate	**78.44**
91F4601	BAMCD11	8-Pin Delay-On-Operate	**78.44**
91F4600	AMBCD11	11-Pin Delay-On-Operate, Delay-On-Release, and Interval Delay (Triggered by Supply Voltage or External Trigger)	**83.53**

(12228) (ne10040)

UNIVERSAL PLUG-IN TIME-DELAY RELAY

Housed in a 3.2H x 1.4W x 3″D S-System housing. Multi-range, multi-function timers feature LED indication for supply voltage applied and relay on. **Type S411** 11-pin circular socket required; *listed separately on this page.* **Type S411** repeat accuracy: ≤2.0%. **Type S117** repeat accuracy: ≤1.0%.CE compliant.

Stock No.	Mfr. Part No.	Supply Voltage	Timing Function and Range	Each
48F2021	S101156924	115-230VAC & 24VAC/VDC	5A SPDT, delay on operate, 0.1 sec. to 10 hr.	**49.92**
48F2022	S102166924	115-230VAC & 24VAC/VDC	5A SPDT, delay on operate and instantaneous output or 5A DPDT delay on operate, 0.1 sec. to 10 hr.	**51.95**
48F2023	S103156924	115-230VAC & 24VAC/VDC	5A SPDT, delay on operate, interval, delay on release, recycler, 0.1 sec. to 10 hr.	**51.95**
48F2024	S103166924	115-230VAC & 24VAC/VDC	Same as above, but DPDT	**63.16**
48F2025	S105166924	115-230VAC & 24VAC/VDC	5A DPDT, true delay on release, 0.1 sec. to 10 min.	**66.21**
16F2852	S117166920	20-265VAC/DC	8A DPDT, delay on operate, interval delay, symmetrical flasher (on or off time first), 0.8 sec. to 60 min.	**139.71**

(3047) (ne08161)

8- AND 11-PIN CIRCULAR SOCKETS

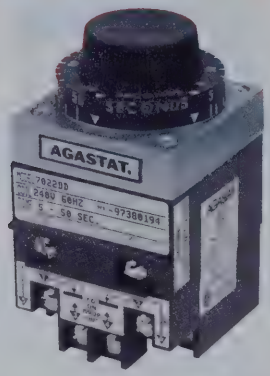
DIN rail or screw mount plug-in sockets. 8-pin socket is for **types BAM** and **BMB** timers. 11-pin socket is for **types S117, AAM,** and **AMB** timers. Socket material: Noryl. Contacts: Plated brass. UL recognized, CSA certified, and SEV approved.

Stock No.	Type	Description	Each
99F4244	S408	8-Pin Socket	**6.03**
96F1207	S411	11-Pin Socket	**6.60**

(2954) (de52749)

TIMING RELAYS

INDUSTRIAL ELECTROPNEUMATIC TIMING RELAYS



Initiate, delay, sequence and program equipment actions over wide range of applications. **7000 series** dielectric withstands 1500Vrms 60Hz between terminals and ground. Normal mounting in vertical position, from back of panel. A front mounting bracket is also supplied with each basic unit. Standard screw terminals (8-32 truss head screws supplied) located on front of unit, with permanent schematic markings. Barrier isolation accommodates spade or ring tongue terminals. UL listed, CSA certified, CE marked. QPL listed, meeting MIL-C-2212F(SHIPS).

MULTI-MODE MULTI-RANGE TIMERS

Type SSF universal, heavy-duty timers offer 4 user-selectable timing modes: on-delay, off-delay, interval, latching interval. Power consumption: 2W. Output: DPDT relay, 10A resistive, 28VDC/120VAC ⅓HP, 120/240 VAC, 345VA. **Type SSFR90X** has no relay; user chooses relay that operates on standard nominal voltages. **Type SSF** units feature front screw terminals precisely set by **TC-1** calibrator. *See Product Index for Battery listings.* **Type SCF** plug-in timers have same user-selectable modes as **SSF**. UL recognized, CSA certified, CE marked.

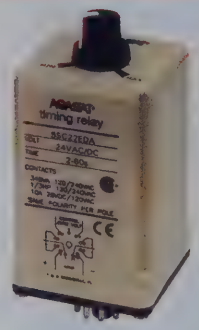
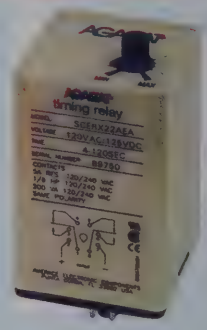
INDUSTRIAL DISCRETE SOLID-STATE TIMING RELAYS



SSC Series



SCE Series

SSC and **SCE series** are knob adjustable and feature excellent transient immunity. Repeat accuracy is better than ±1%. **SSC series** power consumption: 3W. Output: DPDT relay, 10A resistive, 28VDC/120VAC; ⅓HP, 120/240VAC. Operating voltage: 120V 50/60Hz or 120VDC. Electrical life: 100,000 operations minimum at rated resistance load. CSA certified, FM approved. **SCE series** power consumption: 0.75W. Output: DPDT relay, 5A, 120/240VAC; ⅙HP, 120/240VAC; 200VA, 120/240VAC. Electrical life: 200,000 operations at rated voltage and current. UR recognized, CSA certified, CE marked.

PMA SERIES 3-PHASE POWER MONITOR RELAYS

Provide three-phase protection for motors and critical electrical equipment. **PMA** units continuously monitor three-phase Wye or Delta power lines, preventing the application or removal of power from motors and other valuable equipment. Operating temperature range: 0°C to +60°C. Power consumption: 1W. Electrical life: 100,000 operations. UL listed, CSA certified, CE marked.

Stock No.	Type	Operating Voltage	Status Indicators	Each
46F8516	PMALBS	208 to 240V 50/60Hz	Contacts Transferred	346.80

TIME-DELAY RELAYS

3RP SERIES TIME-DELAY RELAYS

3RP Series relays have multiple time ranges. Tolerance is ±5% of full scale value. Reset time is 160ms. Contacts are silver cadmium oxide and are rated 3A @ 250VAC. Rated breaking cpacity is 2000VA. Contact expected mechanical life: 200,000 operations at 3A, 250VAC, AC-15. Rated DC power supply is 2W. Rated AC power: 6VA. Temperature range: -25° to +60°C for operating and -40° to +80°C for storage. Mechanical life: 30×10^6 operations. Maximum switching rate at a rated load is 2500 ops/h. Mounts directly on 35mm DIN track with screw terminal termination. 15 time ranges, switch adjustable also available; *contact your local Newark sales office.*

CNM5 SERIES TIME-DELAY RELAY

DPDT multifunction time-delay relay for plug-in or panel mounting. Five timing functions selectable via rotary switch. 0.1 sec. to 9,990 hr. timing range. Fixed input type (120VAC ±15%). Rated 10A @ 30VDC/277VAC resistive. 1⁄16 DIN style enclosure with 11-pin plug-in base. Thumbwheel switches for programming delay time. UL recognized LR15734, CSA certified E22575. *Order DIN mount socket* **type 27E892** *or flush mount socket* **27E123** *separately on this page.*

CNS SERIES PROGRAMMABLE RELAYS

CNS

CNS Series are economical, multi-functional, programmable, time-delay relays housed in 1⁄16 DIN style enclosures. Type nos. ending with **"2"** are 8-pins; **"6"** are 11-pins. Timing function and range selected by DIP switch, and actual delay time is set with adjustment knob and calibrated dial. Delay selectable from 0.1 sec. to 100 min. DPDT contacts rated 10A @ 240VAC/30VDC. Temperature range: –10°C to +55°C. **Types CNS-35-72** and **CNS-35-92** use **type 27E122** or **27E891** sockets, *on this page.* **Types CNS-35-76** and **CNS-35-96** use **type 27E123** or **27E892** sockets, *on this page.*

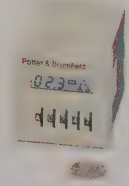
CNT SERIES PROGRAMMABLE RELAYS



CNT

CNT Series are multi-functional, digitally programmable, time-delay relays/counters housed in 1⁄16 DIN style enclosures with an octal-style 11-pin plug-in base. Thumbwheel switches for digital programming. LCD digital readout. Delay is selectable from 0.1 sec. to 9990 hours. DPDT contacts rated 10A @ 240VAC/30VDC. Temperature range: –10°C to +55°C. *Order flush mount socket* **type 27E123** *or DIN mount socket* **type 27E892** *separately on this page.*

MULTIFUNCTION DIN MOUNT TIME-DELAY RELAY

CND

Type CND has timing ranges from 0.5 seconds to 100 minutes. Contact arrangements: 1 Form C (SPDT). Contacts are silver-cadmium oxide alloy and are rated 10 A @ 28VDC or 240VAC, resistive; ½ HP @ 480VAC; ⅓ HP @ 240VAC; ¼ HP @ 120VAC. Contact expected mechanical life: 10 million operations; electrical life: 100,000 operations min. at rated load. Initial dielectric strength between open contacts: 1000V rms, 60 Hz., between all other conductors: 4,000V rms, 60 Hz. Voltage: Universal input type = 24-240V ± 15%, 50/60 Hz. AC or DC with power requirements: 10VA @ 240VAC, 5VA @ 120VAC, 1VA @ 24VAC; 10W @ 240 VDC, 5W @ 120 VDC, 1W @ 24VDC at 25°C. Dimensions: **A**= 2.95″ (75.0), **B**=.885″ (22.5), **C**=3.15″ (80.0). Mounts directly on 35mm DIN track. VDE approved. No socket required.

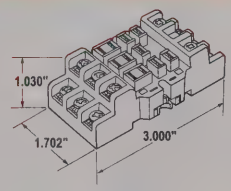
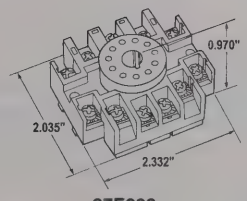
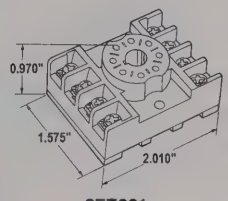
ACCESSORIES FOR TIME-DELAY RELAYS



27E893



27E892



27E891

DIN rail mount, polyamide screw terminal sockets designed to snap onto track mount system without tools. Meet UL94V-0, 10 ampere rating. Two **type 20C317** anchor clips, needed for hold-down-spring when surface mounting, are included with each socket. **Types 27E891** and **27E892** fit **type KAP, KCP, KRP, KRPA, R10T, CB, CD-38, CG, CH, CK** and **KBP** relays. Additionally, **type 27E893** socket fits relay **types CL, CU, KUMP, KUL** and **KUR.** SSA-24C667 is a panel mounting clip for **CNT** and **CNS** relays. Sockets are UL recognized, CSA certified.

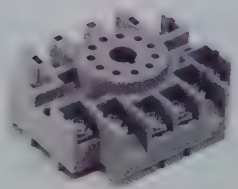
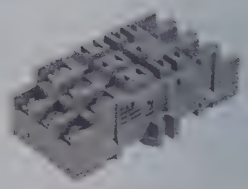
ACCESSORIES FOR TIME-DELAY RELAYS

27E891



27E892



27E893

DIN rail mount, polyamide screw terminal sockets designed to snap onto track mount system without tools. Meet UL94V-0, 10 ampere rating. Two **type 20C317** anchor clips, needed for hold-down-spring when surface mounting, are included with each socket. **Types 27E891** and **27E892** fit **type KAP, KCP, KRP, KRPA, R10T, CB, CD-38, CG, CH, CK** and **KBP** relays. Additionally, **type 27E893** socket fits relay **types CL, CU, KUMP, KUL** and **KUR**. SSA-24C667 is a panel mounting clip for **CNT** and **CNS** relays. Sockets are UL recognized, CSA certified.

TIME-DELAY RELAYS

CB, CD, CG, AND CK SERIES DELAY-ON-OPERATE, DELAY-ON-RELEASE, INTERVAL ON RELAYS

11-Pin

8-Pin

CB series relays are economy, octal-type plug-in models with CMOS integrated circuits. Available in delay-on-operate, delay-on-release or interval on timing modes, all units are knob-adjustable. Molded enclosure houses the timing circuit and an internal relay. All models are DPDT, except type **CB-1022B78** which is SPDT. Contacts rated 10 amps at 240VAC, 60Hz. Power requirements typically less than 3VA for AC types; 3 watts for DC types. Operating temperature range: –10°C to +55°C. Polarity protection. Dimensions: 1.781L x 2.406W x 2.937"H. UL recognized, CSA certified. *Order sockets separately; contact your local Newark sales office.*

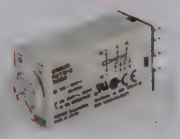
MINIATURE SOLID-STATE TIME-DELAY RELAYS



H3YN series miniature solid-state time-delay relays combine 4 switch-selectable operation modes and time ranges into a single compact unit. Selectable operation modes include ON-delay, interval, or repeat cycle (ON-start or OFF-start). Choose long-range (0.1 minute to 10 hours) or short-range (0.1 second to 10 minutes) versions, each with 4 switch-selectable sub-ranges to meet your application requirements and improve accuracy (1% FS max.). Analog set dial lets users fine-tune timing for their specific applications. Available in a choice of DPDT (5A @ 250VAC) or 4PDT (3A @ 250VAC) output configurations. Required supply voltage: 120VAC. Dimensions: 1.10H x 0.85W x 2.50″D (28 x 21.5x 63). Requires mounting socket, *ordered separately on this page.* UL recognized, CSA certified and CE compliant. Other supply voltages are available; *contact your local Newark sales office.*

1/16 DIN ANALOG SET ON-DELAY TIMERS

Type H3CR 1/16 DIN timers provide easy analog set dial and field-selectable timing ranges from 0.05 seconds to 300 hours. Choose ON-delay or interval timing functions. **Type H3CR-A8-AC100-240** has a wide supply voltage range (100-240VAC) fits most applications. DPDT relay output: 5A, 250VAC. Compact size: 1.89H x 1.89W x 3.19″D (48 x 48 x 81). Requires eight-pin socket for mounting, *ordered separately on this page.* UL recognized, CSA certified and CE compliant.

PROGRAMMABLE 24-HOUR TIMER

Type H5L programmable 24-hour weekly timer features easy front-panel set-up, 24-hour (military time), 7-day programming, and large, easy-to-read LCD display. Unit offers 2 independent SPST 15-amp circuits (with manual override switches) and wide operating voltage: 100-240VAC. Ideal for HVAC, lighting, and other system operations in commercial or industrial environments. Programs may be tailored to daily routines within single 24-hour periods. Built-in 10-year battery protects programming. Unit may be panel, surface or DIN rail mounted. Dimensions: 3.8H x 3.8W x 2.25″D (96 x 96 x 57). UL recognized, CSA certified.

PROGRAMMABLE AM/PM WEEKLY TIMER

Type H5S programmable weekly timer features easy front-panel set-up, flexible daily, and overnight programming. AM/PM readout and large, easy-to-read LCD display. Unit offers 2 independent SPST-NO 15-amp circuits (with manual override switches) and wide operating voltage: 100-240VAC. Ideal for HVAC, lighting, and other system operations in commercial or industrial environments. Built-in 10-year battery protects programming. Unit may be panel, surface or DIN rail mounted. Dimensions: 2.8H x 2.8W x 2.3″D (72 x 72 x 59). UL recognized, CSA certified.

1/16 DIN DIGITAL SET TIMER WITH BAR GRAPH DISPLAY

Type H3CA timer offers accurate digital thumbwheel setting and easy-to-read LCD bar graph display for time remaining and LCD indicator of output status. Eight field-selectable operation modes include ON-delay, signal interval/OFF-delay I, repeat cycle, signal OFF-delay (I and II), interval, cycle, and signal ON-delay/OFF-delay. Seven selectable timing ranges from 0.1 second to 9990 hours. Wide supply input range (24-240VAC) and SPST 3A, 250VAC control output. Includes three no-voltage inputs for start, reset, and gate. Dimensions: 1.89H × 1.89W × 3.50″D (48 × 48 × 89). Requires 11-pin socket, *ordered separately; contact your local Newark sales office.* UL recognized, CSA certified.

(3015) (ne07303)

1/16 DIN NEMA 4 ON-DELAY TIMER WITH LED DISPLAY

Type H5CL digital timer provides NEMA 4 protection for use in water washdown and dusty environments. Large, easy-to-read four-digit LED display. ON-delay and cumulative operation functions with eight timing ranges from 0.001 second to 999.9 hours. Wide supply voltage range (100-240VDC) with SPDT 3A, 250VDC control output. Four no-voltage inputs include: gate, reset, start, and key protection. Rated NEMA 4 and IEC IP66 when using supplied rubber gasket. Dimensions: 1.89H × 1.89W × 2.87″D (48 × 48 × 73). Panel mounting adapter included. Requires 11-pin socket, *ordered separately; contact your local Newark sales office.* UL recognized, CSA certified.

DIN-SIZED MULTIFUNCTION DIGITAL COUNTERS

H7CR H7BR

H7CR/BR series are six-digit single-phase, dual preset value/set value display counters with LCD display. Wide supply voltage range (100-240VAC) with SPST 3A, 250VAC output. Maximum counting speed: 30cps, 1kcps or 5kcps selectable. Features include a wide variety of front programmable input and output modes, external and manual reset, and rear screw terminals. **Types H7CR/H7BR-B-** and **-C-** 12VDC sensor supply input included. UL recognized, CSA certified.

Stock No.	Type	Description	Each	2-5

1/16 DIN PROGRAMMABLE MULTIMODE DIGITAL TIMER WITH LCD DISPLAY

Type H5CR digital, programmable timer offers nine field-selectable output modes and timing ranges from 0.001 second to 9999 hours. Precise control to 0.001 second. Easy-to-read backlit LCD display and easy programming via front panel menus. Wide supply voltage range (100-240VAC) with SPDT 5A, 250VAC output. Four input types include: reset, gate, start signal, and key protect. Built-in ten-year memory. Dimensions: 1.89H × 1.89W × 3.94″D (48 × 48 × 100). Panel mounting bracket included. UL recognized, CSA certified.

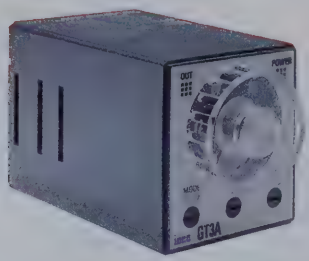
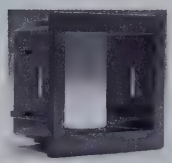
GT3 SERIES MULTI-MODE TIMERS



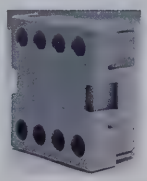
Analog Type

Digital Type



Panel Mount Adapter

DIN Rail Snap Mount



Wiring Socket Adapter

Available analog and digital versions. Both offer delayed SPDT, delayed SPDT plus instantaneous SPDT contact configurations. 60msec maximum reset time, 8- or 11-pin termination. **Type GT3A** is analog setting type, has contacts rated 250VAC/5A, 30VDC/5A max. POWER indicator flashes during time-delay operation, OUT indicator remains on while output on. Life expectancy: 20,000,000 operations mechanical, 100,000 electrical. **Type GT3D** is digital set type with contacts rated 240VAC/5A, 24VDC/5A max. Back-lit LCD display shows elapsed time or time remaining, LED OUT indicator remains lit while output on. Life expectancy: 10,000,000 operations mechanical, 100,000 electrical. 1.57″(40)H×1.42″(36)W×2.53″(64.2)D. UL recognized, CSA certified.

ANALOG MODELS

ON-delay, interval, cycle-on. Time-range: 0.05 sec.-180 hrs. 8-pin.

Stock No.	Type	Description	Each	2-5

TIMERS

PM4H SERIES MULTI-FUNCTION TIMERS

PM4H series DIN 48-sized analog multi-range timers feature multiple operating modes and time ranges. Large, easily set dial allows precise time setting. Indicator LEDs. 5A, 250VAC relay output. 8- or 11-pin base. ±0.3% operation accuracy, ±2% maximum temperature error. Pilot duty C300. 50/60Hz. **Type PM4HS** is power ON-delay timer/time delay relays with 16 selectable ranges from 0.01s to 500hrs. **Type PM4HA** multi-function timer/time delay relays have pulse ON-delay, pulse flicker, pulse ON-flicker, differential ON/OFF-delay (1) (2), signal OFF-delay, pulse one shot, and pulse one cycle operation modes. 16 selectable ranges from 0.01s to 500hrs. **Type PM4HW** dual preset cyclic multi-range timer/time delay relays have 16 selectable ranges from 0.01s to 500hrs. Power OFF-start cyclic mode. **Type PM4HSD** multi-range Star-Delta timer/time delay relays provide switching time optimization for Star-Delta motor start-up. Relay control output: Star side, timed out, 1 Form A; Delta side, timed out, 1 Form A. Four selectable ranges from 0.01s to 100s Star-Delta switching time: 0.04, 0.1, 0.3, 0.5, 0.7 seconds. **Type PM4HF** multi-range true power-OFF delay timer/time delay relays run up to ten minutes after operating power has been lost. Operating voltage: **suffix -24V** in type number indicates 24V AC/DC, **suffix -AC240V** indicates 100-240VAC, and **suffix -DC12V** indicates 12VDC.

PMH SERIES MULTIRANGE COMPACT TIMERS

Feature four different time ranges in a single compact package. Subsecond timing available from 0.05 seconds. Large, easy-to-set dial. Operation LED. 1.417″W x 1.969″H 2.232″D (36 x 50 x 56.7). ±0.5% to +10ms operation accuracy, ±2% maximum temperature error. 7A, 250VAC relay output, plug-in base. Operating power (7th and 8th digits in type number indicate AC or DC): AC types, 3VA; DC types, 2W. Pilot duty C300, 7A⅛HP 125, 250VAC, 3A 30VDC. 50/60 Hz. Operating voltage: **suffix -AC120V** in type number denotes 110 to 120VAC, **suffix -DC24V** in type number denotes 24VDC.UL recognized, CSA certified.

PATTERN SELECTOR TIMER LOGIC CONTROLLER

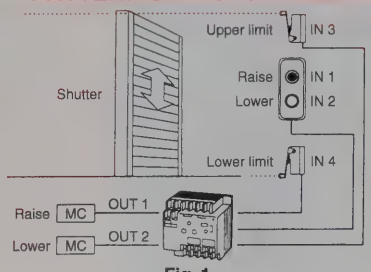

Fig. 1

APPLICATIONS:
Limit Control (See Fig. 1)
- **Opening and Closing of Shutters or Windows**
- **Raising and Lowering Freight Elevators, Sliding Tables, or Incremental Motion Mechanisms**

The pattern selector is a compact, economical pre-programmed logic controller. Incorporates 15 preset control patterns that are switch selectable (no programming). Combined with 4 multirange timers, 4 inputs, and 2 relay outputs, the unit performs functions for which a PLC is too much, and individual timers and relays present overly complex wiring or often simply won't fit. Operating voltage range: 100-240VAC. Includes built-in sensor power supply (24VDC @ 200mA).

GENERAL AND PERFORMANCE SPECIFICATIONS

Operating Voltage	100 to 240VAC
I/O Points	6
Sensor Power Supply	24VDC ± 10%, 200mA
Timer Ranges	1 sec, 10 sec, 1 min, 10 min
Timer Repeat Accuracy	± 1% Max.

INPUT SPECIFICATIONS

Input Points	4
Input Type	No-Voltage Contact or NPN or PNP Open Collector
Input Pulse Length	5.5 msec Min.
Electrical Isolation	Optical Coupler

OUTPUT SPECIFICATIONS

Output Type	2 N.O., Form A Relay
Rated Capacity	5A, 250VAC/5A, 30VDC
Response Time	15 msec or Less
Operation Indication	LED

LT4H SERIES DIGITAL QUARTZ TIMERS

DIN 48-size, 4-digit multifunction, multirange timers use new bright 2-color backlight LCD display for easy readability in direct light or total darkness. Simple operation is provided by side panel mounted mode and time range selection DIP switches and front panel mounted time setting pushbuttons. Short, compact body is available with either pin-type or screw-type terminals. Water-proof front panel meets IEC enclosure IP66 classifications. UL listed, CSA certified, CE compliant.

COUNTERS AND TIMERS

EAGLE SIGNAL BRAND SERIES B846 TIMER

Combine simplicity of dial entered time presetting with advanced multimode functionality. Housed in a compact 1/16 DIN package, dial-controlled. Selectable time ranges from 0.06 seconds to 10 hours. Field configurable to operate in On-Delay, Off-Delay, Interval or repeat cycle timing modes, set by a pair of DIP switches. Rotary switch on the bottom of unit allows selection of time ranges. A unique On-Delay/Interval model performs two timing functions in one unit. In addition to working as an On-Delay timer, an independent output interval time is provided. Industry standard 8 or 11 pin socket connection. DIN rail mounted or panel mounted with optional hardware. NEMA 4 front panel and IEC 801 level 4 noise immunity. Universal power supply for 90-240VAC or 24VDC operation. Time ranges: field selectable 1, 10 seconds; 1, 10 minutes; 1,10 hours. Operating modes: **types B846-500/511** are On-Delay, Off-Delay, and interval repeat; **type B846-100** is delay interval. Setting accuracy: ±5%. Repeat accuracy: ±0.5%.

VEEDER-ROOT BRAND SQUIRE™ PREDETERMINING COUNTERS

Offer single or dual preset count capability, or single preset count capability with a presettable batch counter. Backlit LCD display provides simultaneous count and preset indication. Nonvolatile memory retains memory during power loss. Models with calibration feature input signal to appropriate engineering unit. Annunciators and simple key sequences make operation quick and easy. A variety of count sources are accommodated, including switch or relay contacts, photoelectrics, proximity switches, and unidirectional or bidirectional encoders. Solid-state outputs interface to light-duty devices, while relay contacts offer heavy-duty load switching. Maximum count speed: 2.4kHz. 115VAC, 50/60Hz. Fit panel cut-out: 1.772″x1.772″ (45.01x45.01).

Stock No.	Type	Presets	Speed	Features*	Each
95F5069	SQC11000	1	20Hz	a/s	157.55
95F5070	SQC12000	1	2.4kHz	a/s;qu;cal;dp	188.60
95F5071	SQC22000	2	2.4kHz	a/s;qu;cal;dp	220.80
95F5072	SQB22000	1	2.4kHz	a/s;qu;cal;dp;bat	220.80

* **Features:** a/s= add/subtract input; qu = quadrature input; cal = calibrator; dp = selectable decimal point; bat = batch preset

VEEDER-ROOT BRAND HOURMETERS

Series 7795 rugged and reliable electric hourmeters fit 2″ diameter round or 0.95 x 1.45″ rectangular panel cutouts. 1/10 hour increments with capacity to 99,99 hours (DC models: 9,999) and 1% accuracy. Models for 120VAC or 10 to 32 VDC operation. Compact, easy to install. Sealed against dirt and moisture and non-resettable. Ideal for use on any equipment to determine usage, maintenance and warranty periods. Temperature range: AC models: –65° to +154°F (–18° to +68°C); DC models: –40° to +185°F (–40° to +85°C).

Stock No.	Type	Description	Each
87F1090	779555-216	Round, DC, Spade Terminals	59.72

VEEDER-ROOT BRAND V4545 SERIES PRESET COUNTERS

V45450-1 Counter, Single Preset

V4545 series counters are suited for applications such as cut-to-length and filling. Dual input channels accept input from a variety of sources, including encoders, dry contact, and PNP and NPN sensors. Prescale function translates signals into useful units of measure. Can be used for reversible or quadrature counting. Models available with single or dual preset, and the ability to direct batching operations. Each preset value features a transistor and a relay output. Outputs can be programmed for latching or timed operation. Large dual line LED. Scale function allows display of engineering units. High speed counting up to 10kHz. 48 W x 48mm H. Panel mount (bracket supplied), fits 45 x 45mm cutout. 7 ounces (198 g).

Stock No.	Type	Description	Each
52F1253	V45450-1	Single Preset	184.00
52F1254	V45450-2	Dual Preset	208.15
52F1255	V45450-3	Single Preset, w/Batch	208.15

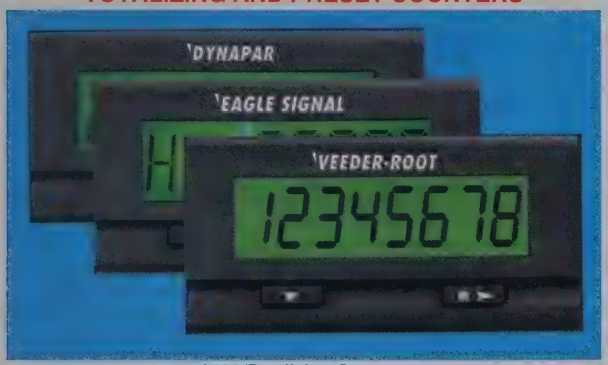
COUNT/TIME/RATE INSTRUMENTS

VEEDER-ROOT BRAND TOTALIZING AND PRESET COUNTERS



A103 Totalizing Counter

Type A103 totalizing and preset counters are compact and cost-efficient. Features include a supertwist LCD with .47″ (12mm) high digits and green illumination display backlight capability. 3-volt lithium battery eliminates need for external power. Accepts input signals from dry contact, PNP, or NPN sensors and encoders. High and low speed count inputs. Reset on front panel or remotely. Fits 68 x 33 mm cut-out. Front panel rated NEMA 4/IP65. *Order quick-attach option modules separately on this page.*

TACHOMETERS AND RATE INDICATORS

Type A103 tachometers provide readout of motor, machine shaft or other RPM. Rate indicators provide a readout of virtually any rate: gallons/minute, parts/hour, feet/minute, etc. LCD with backlighting capability. All units use an internal 3-volt single or dual battery. Magnetic input is capacitative coupled; 10 kHz (50% duty cycle); 0.2V peak (28 VDC max.). Fits 68 x 38 mm cutout. Ranges and resolution: seconds, minutes to 1/10, hours to 1/10, and hours: minutes: seconds. Weight: 2.25 oz. (64 g). Front panel is rated NEMA 4/IP65 for use in washdown environments. *Order matching totalizing and preset counters and elapsed time indicators, and quick-action option modules separately on this page.*

Stock No.	Type	Description	Each
52F1235	A103-003	Tachometer	**89.27**
52F1236	A103-004	Programmable Rate Meter	**102.21**
52F1237	A103-005*	Rate Meter & Totalizer	**108.37**
52F1241	A103-009	Rate Meter & Totalizer w/Pulse Output	**120.55**

*Provides total count as well as rate.
(2846) (de06320)

ELAPSED AND PRESET TIMERS

Type A103 elapsed time indicators and preset timers can be programmed to meet your needs. They display in seconds, minutes, hours, or hours: minutes: seconds. All units use an internal 3-volt single or dual battery. Features include a 7-digit supertwist LCD with .47″ (12mm) high digits and green illumination display backlight capability. Accepts input signals from dry contact, PNP, or NPN sensors. Timing start/stop can be initiated by solid-state signals or mechanical switches. Reset on front panel or remotely. Ranges and resolution: seconds, minutes to 1/10, hours to 1/10, hours: minutes: seconds. Connections made at screw terminals. Weight: 2.25 oz. (64 g). Front panel rated NEMA 4/IP65 for use in washdown environments. *Order matching counters, rate indicators, and quick-attach option modules separately on this page.*

Stock No.	Type	Description	Each
52F1238	A103-006	Elapsed Time Indicator	**76.34**
52F1240	A103-008	Preset Timer	**108.37**

(2848) (de06321)

A103 SERIES OPTION MODULES

These quick-attach option modules provide a power supply for sensors, display backlighting, timing signals, and mechanical relay output. They accept high or low voltage AC or DC input signals. Low voltage input accepts 15 to 30 VAC or VDC for count input. High voltage input accepts 100 to 260 volt AC/DC for count input. Mechanical relay output is SPDT (Form C); 120/240 VAC, 30 VDC contacts.

Stock No.	Type	Description	Each
52F1242	A103-A10	HV Input Module	**19.81**
52F1243	A103-A11	Relay Output Module	**19.81**

VEEDER-ROOT BRAND MITE SERIES ELECTRONIC TOTALIZING COUNTERS, RATE INDICATORS, AND TIME METERS

MITE series 0.315″ (8.00) high (8-digit) LCD displays feature compact overall size. Fit 1.96″ x 0.98″ (45 x 22) panel cut-out. Totalizers are powered by an internal lithium cell, and available in **type 799988D-110** unidirectional and **type 799988D-410** bidirectional models that are capable of count speeds to 10kHz. **Type 799988D-410** bidirectional totalizer provides count/direction operation—one input receives count pulses, while a second input controls counting direction. Self-powered timer **type 799988D-510** has timing ranges for seconds or minutes and seconds; **type 799988D-610** has timing ranges for hours or hours and 1/100ths **Type 799988-801** tachometer with totalizer function. Has selectable frequency or period modes allows application with a variety of sensors including one-pulse-per-revolution pickups. All units rated NEMA-4/IP65. *Order input adaptors separately below.*

(2918) (de50664)

Electronic Terms and Measurements

Resistance
Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm – kΩ	1,000 or $1x10^3$ ohms
1 Megohm – MΩ	1,000,000 or $1x10^6$ ohms

Voltage
Electromotive force. Basic unit is the volt (V).

1 millivolt – mV	1/1,000 or $1x10^{-3}$ volt
1 microvolt – µV	1/1,000,000 or $1x10^{-6}$ volts

Current
Movement of electricity. Basic unit is the ampere (A).

1 milliampere – mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere – µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency
Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz – kHz	1,000 or $1x10^3$ hertz
1 Megahertz – MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz – GHz	1,000,000,000 or $1x10^9$ hertz

Time
Basic unit is the second (s).

1 millisecond – ms	1/1,000 or $1x10^{-3}$ second
1 microsecond – µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond – ns	1/1,000,000,000 or $1x10^{-9}$ second

TACHOMETERS, TOTALIZERS AND TIMERS

DYNAPAR BRAND MAX JR TACH 1 & 2 PROGRAMMABLE RATE CONTROLLERS

Choose from two compact, economical models, both offering high-accuracy measurement techniques and simple programming. **Type MTJR1S00** MAXjr Tach 1 rate indicator/controller is ideal for basic rate or speed measurement functions. **Type MTJR2S00** MAXjr Tach 2 rate/ratio/time interval controller provides a choice of operating modes: rate of input A, as in the MAXjr Tach 1 model; ratio of two independent inputs A and B; and time interval, which can be the period of A or the elapsed time between inputs A and B; and time interval, which can be the period of A or the elapsed time between inputs A (start) and (stop). Both MAXjr Tach 1 and 2 models feature programmable 0.0001 to 99999 calibration high/low setpoint alarm capability with outputs and built-in diagnostics. Large 5-digit 0.56″ (14.22) red LED display, 0.01% accurate time interval measurement and programmable decimal point position. Sealed NEMA-4 rated front panel with panel mounting in 1/8 D 1.78x3.56″ (45.21x90.42) cutout; 5.68″ (144.27) depth. 115/230 VAC, 50/60 Hz.

Stock No.	Type	Description	Each
84F765	MTJR1S00	MAXjr Tach Rate Controller	**285.20**
04F804	MTJR2S00	MAXjr Tach Rate/Ratio/Time/Controller	**368.00**

(2920) (de50669)

DYNAPAR BRAND MAX® JR. ELECTRONIC TOTALIZING AND PRESET COUNTERS

Type MCJR1S00 8-digit totalizing counter features bidirectional operation, with ± polarity indicator and reference preset function. **Type MCJR2S00** is 5-digit redetermining counter for cut-to-length, filling, batching, locating, and similar applications. Features two presets with programmable output action. **Type MCJR3S00** similar to **MCJR2S00** but includes additional function that serves either as totalizer preset-batch counter. **Type MCJR4S00** similar to **MCJR1S00** but can instantly switch display between counted totals and rate at touch of a button. Programmable features include independent calibration and decimal point location for count and rate, allowing totals and speed to be displayed in different units, such as: totals in feet; speed in RPM. All models have bright, high-contrast red LED displays, NEMA-4 front panel rating with panel mounting in 1/8 DIN cut-out. Calibrator scales input signal for display in engineering units. Selectable decimal point positioning. Non-volatile memory retains count and program during power loss. 115/230VAC; 50/60Hz.

Stock No.	Type	Description	Each
50F2679	MCJR1S00	Count 1 Totalizing Counter	**266.80**
87F1084	MCJR2S00	Count 2 Predetermining Counter	**302.45**
97F1081	MCJR3S00	Count 3 Predetermining Counter/Totalizer	**362.25**

(10625) (de50651)

DYNAPAR BRAND HT50 HAND TACHOMETER SYSTEM

Type HT5001 hand tachometer provides a convenient, accurate means of measuring rotary or surface speeds on all types of machinery. For non-contacting measurement the tachometer optically detects a reflective target on the rotating object. Where in-contact measurement is desired, an accessory adapter is used with the appropriate device–a wheel for surface speed or rubber tip for shaft rotation. System includes: hand tachometer; in-contact adapter, rubber tips (3 pcs.), surface speed wheels (1/10 m/min. and 1/10 yd/min.), carrying case, dry batteries (4-AAA size, 1.5V), and instruction manual.

52F8418 Type HT5001. **Each** **287.50**
(3048) (ne08162)

VEEDER-ROOT BRAND 7990 SERIES FLEX™ ELECTRONIC TIME AND RATE INDICATORS

Type 799008-100 operates as a totalizer, hour meter and timer and **799008-200** adds the ability to operate as tachometer. Both feature 0.35″ (8.89) high 8-digit LCD readout, moveable decimal point, pre-scaling capability, and front-panel or remote reset. Programmable, multi-function design provides choice of totalizer mode with count capacity to 99,999,999 and input scaling; timer mode to register hours, minutes, seconds with choice of time increment; hourmeter mode for cumulative running time in hours (whole units, tenths or hundredths); and tachometer mode (**799008-200** only) operates as 5-digit rate indicator with gate time from 0.0001 to 9.9999 seconds plus has programmable sample time and input scaling. Sealed metal case meets NEMA-4 standards and fits 2.6x1.3″ (66.04x33.02) panel cutout. Internal lithium battery operation.

Stock No.	Type	Description	Each
90F8425	799008-100	Totalizer/Timer/Hourmeter	**82.80**
90F8426	799008-200	Totalizer/Timer/Hourmeter/ Tachometer	**104.80**
		ACCESSORIES FOR 7990 SERIES FLEX™	
90F8427	328992-010	Screw terminal adaptor	**21.14**
90F8428	328992-020	Input module, 20-270 VAC or VDC frequency response 1-10 Hz*	**27.74**
90F8429	328992-030	Triac input module. Optically isolated. 10Hz frequency response*	**27.74**
90F8430	328992-120	Panel mount adaptor. Fits 3.78″x1.75″ (96.01x44.45) cut-out	**7.92**
90F8431	328992-110	Panel mount adaptor with key/switch. Fits 5.0″x1.75″ (127.00x44.45) cut-out	**14.54**

*Input adaptors have screw-terminal connections.
(2912) (de50650)

DYNAPAR BRAND HT100 HAND-TACHOMETER SYSTEM WITH LED DISPLAY

Large, red LED display is easy to see from any angle and provides instant switching between speed, time interval or count measurements. **Type HT100** hand-held rate & time indicator's display provides a highly visible reading, even in dim light or at indirect viewing angles. When used as a non-contact indicator, a marker (reflective tape supplied) is placed on the shaft, or other target that is to be measured. It is then simply pointed at the marker to read rate-per-minute, seconds-per-event, or counts. An in-contact adaptor is provided that allows display of linear feet, meters per minute, or RPM. Measurement ranges for RPM: 3 to 99,999; M/min: 0.3 to 19,999; Ft/min: 0.3 to 19,999; time interval: 0.01 to 99,999 sec.; Counts: 1 to 99.999. The 5 digit red LED, 0.4″ (10.5mm) display operates either in fixed decimal mode or floating decimal point autorange mode. Accurate to ±0.5% of reading, ±1 digit. Auto power-off after reading is displayed for 10 seconds. Last reading may be recalled for up to 1 minute after automatic power-off. Visible light source with optical range of 1″-3 feet (25mm-1000mm). **Type HT100** system is packaged in a rugged carrying case. In-contact adaptor, linear-speed measuring wheel, rubber tips, batteries and reflective tape are included.

92F2801 Type HT100 System. **Each** **276.00**

DISPLAY COUNTERS, TIMERS AND RATEMETERS

VEEDER-ROOT BRAND C346 PRESET COUNTERS

Simple button per digit setting and choice of single-line 6-digit LED or LCD display allow optimum operator interface. Very flexible input circuit with scaling feature accepts signals from encoders, NPN (sinking), PNP (sourcing), and contact-closure inputs. Suitable for most preset counting applications. Size: 1/8 DIN (48W x 48mmH) Display: 6 digit. LED or LCD. Power: 120VAC standard; optional 240VAC, 24VDC. Preset levels: 1 or 2.5 amp relay and NPN transistor per output. Input scaling: x0.001 to 9.999. Input: sinking, sourcing, contact closure, add/subtract, add/add, quadrature. Maximum count speed: 5 kHz.

S628 SERIES "AWESOME" DIGITAL DISPLAY PANEL METERS

NEW

1/8 DIN panel meters feature the ability to change display color when the monitored data exceed a preset limit, providing operators with instant visual alert to changes in application status. Large, super-bright 5-digit 0.71" LED display can also be set to a constant red or green color. Fully programmable feature set includes minimum and maximum value capture and programmable alarms. RS-485 communications port allows integration with system devices. Power source: 90 to 264VAC, 50/60Hz.

DC PROCESS METERS

Input for popular current and voltage standards. 2 alarm presets, each with SPDT relay and transistor output. ±0.1% of span accuracy.

Stock No.	Type	Description	Each
48F2137	S628-21000	SPDT Relay and Transistor Output	293.36
48F2138	S628-21050	With RS-485 Communications Port	365.59
48F2140	S628-11000	With Linear Voltage/Current Output	293.36

DC VOLTS/AMPS METERS

Fully scalable, wide-range current and voltage input. 2 alarm presets, each with SPDT relay and transistor output. ±0.1% of span accuracy.

48F2143	S628-51000	SPDT Relay and Transistor Output	293.36
48F2144	S628-51050	With RS-485 Communications Port	365.59

TOTALIZERS AND DIGITAL DISPLAY

COMPACT COUNT/TIME/RPM TOTALIZERS

H7 series digital compact totalizers offer up, up/down, cumulative count, time, and RPM functions in self-powered (seven-year battery) or 100-240VDC supply voltage modes. Feature easy-to-read displays and wide internal/external resets and count speeds. Most feature DIN-sized 0.94H x 1.89″W (24 x 48) front panels. All feature screw terminals and external resets unless otherwise noted in description column. NEMA 4 versions available; *see table below.* UL recognized, CSA certified, CE compliant.

Stock No.	Type	Description
52F4167	H7EC-BL	7-Digit Self-Powered, Totalizer, No-Voltage Input, 30cps Max., DIN Sized
52F4168	H7EC-BLM	6-Digit Self-Powered, Totalizer, No-Voltage Input, 30cps Max., DIN Sized 1.93″D (49), Ext/Manual Reset
52F4169	H7EC-BVM	6-Digit Self-Powered, Totalizer, DC Input, 1kcps Max., DIN Sized 3.11″D (79) Ext/Manual Reset

5300 SERIES COUNTERS, HOURMETERS AND TACHOMETERS

Redington's "Eagle" family of digital electronic counters, hourmeters and tachometers use innovative technology to provide unparalled accuracy and reliability over a wide range of applications. Positive locking mounting clip and compact size make it ideally suited for control panels, instrumentation assemblies, business machines or wherever space is a concern. Panel cutout 1.79″ x 0.89″. 7 figures, 0.32″ high LCD display. Typical 20-yr. life with lithium battery. Termination: terminal block. UL recognized, CSA certified and CE compliant.

DIGITAL CONTROL AND INTERFACE PRODUCTS

MULTIFUNCTION TIMERS

E42DP55

E42DP50

Type E42DP55 DIN rail- or base-mounted multifunction timer has a 3-digit LCD display that provides 2 lines of data and function annunciators: upper row, 0.275″, indicates elapsed or time remaining; the lower row, 0.157″, the setpoint. User selectable operation functions include: On Delay, Off Delay, Cycle One Shot, Single Shot, Repeat Cycle, Repeat Cycle Delay =, and Repeat Cycle =. Time setting ranges can be programmed in seconds, minutes, or hours. The inputs range from 12-260VAC/VDC and work with contact closure or NPN or PNP devices. The SPST output is programmable as a NO or NC, 10A 380VAC or 220VDC relay. Size: 3.07H x 0.88W x 3.94″D. **Type E42DP50** is a door-mounted timer with similar characteristics as **type E42DP55** plus a full 6-digit LCD and 6 keys. Size: 1.88H x 1.88W x 2.36″D.

TEMPERATURE CONTROLLERS

The **E4524 series** is 1/32 DIN (24 x 48mm), 0.4″ 4-digit LED display. Features fuzzy logic PID control with Autotuning and On/Off control as well as a NEMA 4/IP 65 front panel. Universal inputs: °F or °C indication. Universal power supply: 90-264VAC. Heat/cool outputs with fail-safe, sensor break protection, ramp with dwell or soak timer for soft start, and programmble user security. Meets NEMA enclosure type 4 and IEC IP65 enclosure classification. Features 1 control output as relay, SSR, 4-20mA, or 0-10VDC with optional alarm output. Size: 1.89W x 0.94H x 3.78″D.

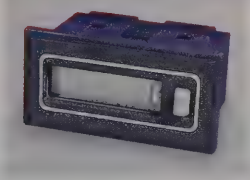
TOTALIZERS & COUNT/TIME CONTROLS



Totalizer

Elapsed Timer

Preset Counter

Type E4148791 is a 48 x 48mm single-level preset counter/timer with a 2-line LCD and a NEMA 4/IP65 front panel. Input power: 85-260VAC provides sensor excitation of 12VDC @ 100mA. Count speeds to 10kHz with scaling. The SPDT relay output is rated at 8A @ 230V resistive load. Size: 1.88H x 1.88W x 3.26″D. **Type E4148792,** is a 48 x 48mm dual-level preset counter that can be configured as a single preset counter with batch control output. **Types E402400** and **E402410** totalizers and **types E42DI2475S** and **E42DI2475H** elapsed-time indicators are companion products in compact 0.94H x 1.88″W NEMA 4 DIN package and feature 8-digit LCD with 0.275″ character height. The **E40 series** is capable of count speeds of up to 10kHz. The **E42DI series** displays time in increments of seconds or 1/100ths of an hour. Features include: 10-year nonreplaceable lithium battery, remote and selectable front-panel reset button, and snap-in mounting. Voltage conversion and quadrature adapters are available; *order separately below.*

TOTALIZERS & COUNT/TIME CONTROLS

45610-400

Self-powered **type 44660-400** elapsed time indicator features compact 25x50mm DIN package and 8-digit LCD display with leading zero blanking 0.291″ (7) character height. Displays in increments of 1/100th of an hour. Capable of count speeds up to 5kHz. Front panel meets NEMA 4 specifications. Remote and selectable front panel reset. Convenient snap mounting; 0.88″H x 1.77″W (22.2 x 45) panel cut-out. Units are supplied with two replaceable size N alkaline batteries. Controls are furnished in compact 48x48mm DIN packages and feature 6-digit LCD display with leading zero blanking. AC line powered. DC output for sensors. Simple DIP switch programming, transistor ouput, Form C relay contacts and NEMA 12 capability. Space-saving 1.9″ x 1.9″ (49 x 49) panel cut-out.

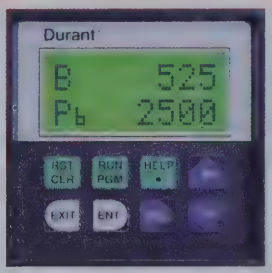
TACHOMETERS, TOTALIZERS AND TIMERS

AMBASSADOR™ SERIES COUNT CONTROLS



57601-404

Compact controls feature 8 decade totalizing counter, 6 decade 1/TAU rate indicator, 9 programmable count input modes, 4 control inputs, programmable count and rate scalers, programmable decimal point for count and rate display, 2 programmable open collector transistor outputs, and programmable RS-485 half-duplex serial interface. NEMA 4 rated sealed front panel has full alpha-numeric, 16 character, 0.3″ (7) high dot matrix LCD backlit display with 8-position tactile feel keyboard. 74x74mm DIN package. Input power: 115VAC. Units have 12VDC (±25%) 100mA maximum DC power output for input device. Space-saving 2.677″ x 2.677″ (68 x 68) panel cut-out; 0.500″ (12.7) maximum panel thickness. **Types 57601-401** thru **57601-404** and **Types 57601-451** thru **57601-454** have 6 decade main counter with 1 or 2 preset levels. **Types 57601-402**, **57601-404**, **57601-452**, and **57601-454** also have 6 decade batch counter with 1 preset level. **Types 5701-405** and **5701-455** have 6 decade batch counter with 4 preset levels.

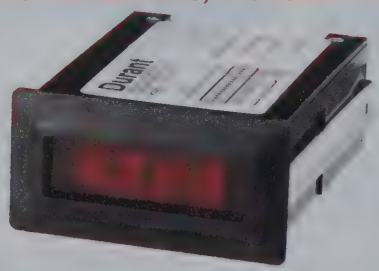
ELECTRONIC RATEMETERS, TACHOMETERS, TIMERS



47000-420

47000 series ratemeters measure in feet, inches, and yards on production rates of paper, wire, and textiles. **Type 47000-400** ratemeter is 1 second fixed timebase. **47000-420** ratemeter is 1 millisecond to 4 second variable timebase. Both models have screw-type termination. **47100-400** microprocessor-based tachometer measures time between input signals and computes repetition rate or velocity of the measured item. All models feature 4-digit LED display, 120VAC. 2.06″H x 3.96″W x 6.02″D (52 x 100 x 152). Panel cut-out: 1.75″H x 3.63″W (44 x 92).

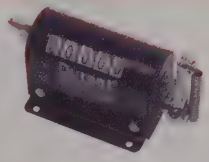
MECHANICAL AND ELECTRIC COUNTERS

TYPE 5H11R HEAVY-DUTY MECHANICAL STROKE COUNTER

High-speed, heavy-duty unit delivers 800 counts per minute. Features 5-digit readout, right-hand lever drive, wing nut reset, stainless steel shaft, and oil-less bearings. Steel plate adjusts for bottom or back mounting.

87F6146 Type 40205-400. **Each** **128.31**
(2699) (de00751)

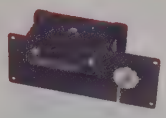
TYPE 5X11R MECHANICAL STROKE COUNTER



For light- to medium-duty work. 1000 counts per minute. 5-digit readout. Features right-hand lever drive, knob reset, and base mounting. Dust- and rust-proof.

87F6144 Type40272-402. **Each** **65.94**
(2698) (de00750)

MINIATURE ELECTRIC COUNTERS



41346-406-6

Compact panel-mount 120VAC counters feature 0.188″H (4.78) 6-digit readout and tamper-proof sealed window. Stainless steel self-lubricating shaft, nylatron pinions and synchronous electromagnetic drive assures accuracy and long-life. Speed: up to 1000 cpm. Power: count coil 3 watts. Available non-reset or pushbutton reset. Includes 10″ (254) wire leads and pin terminals. **6** suffix in type number indicates a 6-figure counter. **4** suffix in type number indicates a 4-figure counter.

Stock No.	Type	Reset	Cut-Out	Each

(2694) (de00745)

PD-Q AND PD-ER PREDETERMINED ELECTRIC COUNTERS

True subtracting devices with easy pushbutton operation for both predetermined count settings and reset. Units subtract one count for each contact closure or impulse and actuates a 4A, S.P.D.T. 250VAC switch when zero is reached. Returns to predetermined number when reset and are immediately ready to control next lot or branch. 0.188″H (4.78) 5-digit readout. Count speed: 1000 cpm. Operates on 120VAC, 9 watts. Stainless steel shaft. **Type 41625-406** has electric reset for control flexibility and remote operation. Both models fit 2.718W x 1.593″H (69.04 x 40.46) panel cut-out.

94F3864 Type 41433-406. **Each** **226.50**

PUSHBUTTON DESK TALLY

Ruggedly constructed counters feature feather-touch pushbutton operation and maximum readability. 4 figures. 2⁴⁵⁄₆₄H x 1⅞W x 1½″D.

Stock No.	Type	Description	Each
83F7293	21619-400	Push Bar	**58.73**
94F3839	41314-402	Pushbutton	**38.19**

(31689) (ne31689)

Y-RMF AND YMF ELECTRIC COUNTERS

Types 32651-400 and **32654-400** are shaded pole electric counters with straight AC operation. They feature a non-rectified, shaded pole coil designed to withstand transient and high voltage spikes. This, combined with a simplified, hinged escapement drive, also eliminates the possibility of miscounts and greatly adds to the life of the counter. Tallies at speeds up to 750 cpm. **Types 31155-402, 31066-416** and **31083-403** provide accurate counts through a wide range of speeds up to 1000 cpm. Feature fast, silent DC electromagnetic drive with built-in, higher capacity rectifier for dependable AC operation. Moving parts never need lubrication under normal operating conditions. 0.188″H (4.78) 6-digit readout. 115 VAC operating voltage with 7 watt count coil. Available with knob reset in base, panel mounting, or panel mount key reset. Panel models fit 3.703W x 1.250H x 2.469″D (94.06 x 31.75 x 62.71) opening. UL recognized.

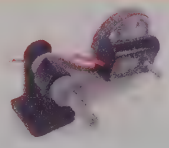
(2695) (de00746)

ROTARY CONTACTOR MEASURING SYSTEM



Electronic rotary contactor measures shaft revolutions at speeds to 2400 RPM at 1:1 ratio; 2400 counts per minute maximum. Use for lineal paper, veneer, textile, steel, and jute lineal measurement applications. **Type 41100** has reed switch rated .5 amps for output to electronic circuits. **Type 40891** has leaf switch rated 5 amps, 120-240V for putput into electromechanical circuits. Measuring system comprises rotary contactor, mounting bracket, and wheel; *each ordered separately.*

Stock No.	Type	Description	Each
87F6106	41100-400	Rotary Contactor	**151.74**
83F7294	40891-400	Rotary Contactor	**158.47**

ELECTRONIC ENCODER MEASURING SYSTEMS

Type 38150-100 single channel encoder measures rate of rotation or position when radial load doesn't exceed 20 lbs., and axial load doesn't exceed 10 lbs. Delivers 100 pulses per revolution. Shaft: 0.375″ (9.53). Sealed against dust and oil. **Type 38151-600** medium-duty quadrature encoder delivers 600 pulses per revolution and measures in ⅓₀″ increments. Both systems operate on 9 to 16VDC. Measuring systems comprise encoder, wheel, connector with cable, and mounting bracket; *each ordered separately.*

Stock No.	Type	Description	Each
87F6118	38150-100	Single Channel Encoder, 100PPR	**205.30**

(2693) (de00744)

TIME-DELAY RELAYS

CHRONOS PROGRAMMABLE TIMERS

Chronos Series are multi-time range, single or multi-function timers enclosed in a plug-in or Din-rail compact size enclosure. The time delay is knob-adjustable from 0.1 sec to 10 hours in one unit. Both SPDT and DPDT relay output versions are available and rated 10 amps @ 250VAC. Power On and Relay Output LED indicators are standard. 1.77L x 0.90W x 2.95"H (45 x 24 x 75).

TR SERIES TIMERS

TR series timers are slim-line (22.5mm) DIN rail mount enclosures. Multi-function units have 3 different operation modes, 2 time ranges and a 24 to 240VAC/DC power supply range. **Type 88893135/88893335** have 0.1 sec. to 10 hr. time range. **Type 88893003** has .06 sec. to 10 hrs. time range. All versions offer DPDT relays. UL recognized, CSA certified, CE approved.

Stock No.	Type	Power Supply	Operation Mode	Each
52F1213	88893003	24 to 240VAC/DC	Multi-function	97.31
52F1214	88893135	110/240VAC*	Delay on make	59.78
52F1215	88893335	110/240VAC*	Delay on break	68.11

*Lower voltages are also available.
(2985) (ne06294)

816 & 814 SERIES 48 x 48mm PROGRAMMABLE TIMERS

816 series has a red LED backlit LCD display. **814 series** has a standard LCD display. Both series actual and preset times, relay, power, and initiate switch status. Units are multi-function featuring 11 selectable time ranges from 0.01 seconds to 9999 hours. Enclosed in a 1/16 DIN (48 x 48mm) style enclosure. Easy front panel programming provides up or down timing and delay-on-make, delay-on-break, single-shot, interval, or repeat cycle operating modes. Output contacts: 10A SPDT. Dimensions: 1.9H x 1.9W x 3.7"D (48 x 48 x 85). Operating temperature range: –10°C to +60°C. UL recognized, CSA certified, and CE compliant.

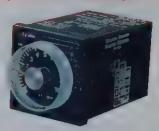
(2718) (de02284)

M/G SERIES 48 x 48mm PROGRAMMABLE TIMERS



M/G Series are multi-time range timers housed in a 1/16 Din (38 x 48mm) enclosure. A large dial allows easy setting and direct reading. Time delay is adjustable from 0.1 seconds to 10 hours. Two LEDs monitor relay output and Power On. All models are DPDT output relays rated at 10 amp, 250 VAC. Dimensions: 1.9"H x 1.9"W x 3.7"L (48.3 x 48.3 x 94mm). Operating Temperature: +14°C to +122°C. UL recognized, CSA certified, and CE compliant.

TOP 948 SERIES 48 x 48mm PROGRAMMABLE TIMERS

Top 948 Series is a multi-function timer with multi-time ranges (0.01 seconds to 9999 hours) housed in a NEMA 4 1/16 Din (48 x 48mm) style enclosure. Easy programming from the front panel push buttons allows selections of up or down timing, timing functions (On Delay, Off Delay, Repeat Cycle, Single Shot and Interval) and a 10-year EEPROM memory for each function. All models have SPDT output contacts rated at 10 amps, 250 VAC. Dimensions: 1.9"H x 1.9"W x 3.7"L (48.3 x 48.3 x 94mm). Operating Temperature: +14°C to +122°C. UL recognized, CSA certified, and CE compliant.

HDI CURRENT AND HDU VOLTAGE MONITORS WITH LCD DISPLAY

NEW

The HDI series monitors over or under AC/DC current conditions (switch selectable) from 2mA to 10A. The HDU series monitors over or under AC/DC voltage conditions (switch selectable) from 0.2 to 600V. Both series have an LCD display that shows the actual measurements and setpoints. Units have a SPDT (5A resistive) output relay. Relay output can be selected to latch (memory function). 120V power supply. UL and cUL listed, CE compliant.

Stock No.	Type	Description	Each
83F7500	84871304	Current: 2 to 500mA	**161.42**

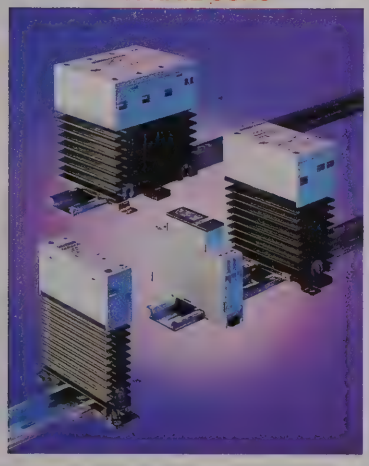
CP4 SERIES COUNTERS

The **CP4 series** of 1/16 DIN-sized digital counters offers the choice of a large green backlit LCD display or a large red illuminated display. Features 2 presets, scaling, EEPROM memory, sealed front panel and a wide range of count input nodes. Power supply: 80 to 260VAC.

Stock No.	Type	Description	Each
83F7504	87618038	2 Presets, Green Blacklit Display	**181.98**
83F7505	87618138	2 Presets, Red Backlit Display	**203.31**

(31877) (ne31877)

DIN RAIL SSRs



DIN Rail SSR series is a family of single- and three-phase SSRs with DIN rail or back panel mountable heat sinks, eliminating the need for heat sink calculation and installation. Compact size and a rugged back-to-back SCR and triac output make the new DIN rail SSR a replacement for mercury displacement relays and electromechanical contactors. DIN rail SSRs features include current regulated input, input LED, touch safe (IP20) enclosure. UL recognized, CE compliant. All have zero-crossing output type, except (*) which is random. Other versions available; *contact your nearest Newark sales office.*

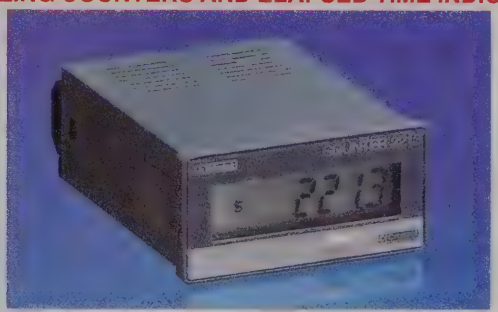
TOTALIZING COUNTERS AND ELAPSED TIME INDICATORS



Crouzet offers totalizing counters and elapsed time indicators in DIN sized (24 x 48mm) enclosures. The CP2 Series accepts inputs by contact closure, NPN transistor, and 4 to 30 VDC voltage pulses. The **87610 Series** accepts line voltage inputs. Units have remote or front panel reset (can be disabled). Units are powered by a lithium battery. The front panel has a watertight seal (IP64).

CM SERIES SINGLE CAM AND MC SERIES MULTI-CAM PROGRAMMABLE TIMERS

CM series and **MC series** recycling timers repeat a continuous adjustable on/off time cycle. A heavy duty synchronous motor, which offers 13 different speeds, is linked with a choice of gear racks *ordered separately on this page*, to allow for a variety of time cycles to be selected. SPDT switches on the cams are rated 10 amps non-inductive at 120VAC. Cams are adjustable 2-98% of total cycle time. *Order cam timers and gear racks separately from "how to order" table on this page.* Other versions available, up to 20 switches; *contact your local Newark sales office.* UL recognized. CSA certified.

(3079) (ne08584)

HOW TO ORDER CAM TIMERS AND GEAR RACKS

1. Locate in table below time cycle for one revolution of camshaft.
2. Note the model of cam timer designated at top of column.
3. Note across the column from time cycle the gear rack model number.
4. Specify for MC multiple cam timers the required number of load switches.

Example: should you require a single cam 30 second time cycle, you would look in table for 30S (see abbreviation code below table). 30S appears across from gear rack **type A12** and under cam timer **type CM2.** So you order gear rack **type A12, stock no. 24F315,** with cam timer **Type CM2.**

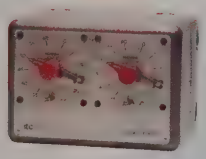
TM SERIES "DUAL TROL" RECYCLING TIMERS



2 Timing Elements
1 Cabinet

Compact timer continuously closes and opens SPDT load switch with repeat accuracy of ±1.5% full-scale and 0.5 second reset time at maximum setting. Timer consists of two **TM series** timing elements - one to set ON interval, second to set OFF interval - and a **type DTH-120** control cabinet. *First, select two timing elements from the five elements listed below to achieve desired combination of time cycles. Then, order* **type DTH-120** *cabinet to hold two elements.* Isolated SPDT load switch rated 10A non-inductive, 120 VAC/60Hz, connects to terminal strip in cabinet. Dimensions: 5⅛H x 5¾6W x 7½"D.

SF AND CSF SERIES TIME DELAY TIMERS

CSF-1M

For remote surface mounting where infrequent adjustment of time delay setting is anticipated. **SF series** offers clutch motor, repeat accuracy of ±1% full scale, and reset time of 5% dial setting. **CSF series** offers external clutch, repeat accuracy of ±1.5% full scale, and reset time of 0.5 seconds at max. setting. All feature auto-reset upon power removal, operate with isolated SPDT load switch rated 10A non-inductive. 120V/60Hz. UL recognized, CSA certified.

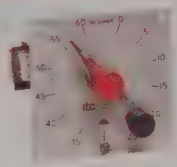
H/CH SERIES TIME DELAY TIMERS



CH-1M

External wiring is connected to terminal strip. Isolated SPDT load switch rated 10A non-inductive, 120VAC. **H series** have clutch motor, repeat accuracy ±1 full scale, and reset time 5% of dial setting. **CH series** have external clutch, repeat accuracy ±1½% full scale, and reset time 0.5 second at max. setting. Both provide automatic reset upon removal of power and are panel-mounted. UL recognized, CSA certified.

Stock No.	Type	Time Cycle	Dial Div.	Each
24F1855	H-6S-120/60	6 sec.	0.01 sec.	144.48
24F296	H-15S	15 sec.	0.25 sec.	144.48

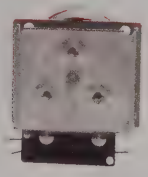
(2901) (de50366)

90 SERIES DELAY TIMERS



For applications requiring infrequent adjustment. Isolated SPDT load switch, rated 10A, non-inductive, 120V/60Hz. Repeat accuracy: +1% full scale. Reset time: 5% of set time delay. Auto-reset upon power removal. UL recognized, CSA certified. 6 and 60 second time cycles versions are available. *Contact your local Newark sales office.*

Stock No.	Type	Setting		Each
		Max.	Min.	
24F1844	90-15S	15 sec.	1.5 sec.	124.74
24F1845	90-30-S	30 sec.	3 sec.	124.74

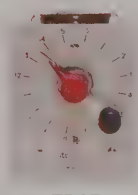
(2903) (de50367)

TDAB AND TDAF SERIES HIGH-PRECISION TIMERS

TDAB



TDAF

For applications requiring high repetitive accuracy, fast reset, and anticipate heavy usage. Accuracy: ±0.25% full scale. Reset time: 0.5 seconds max. at full setting. Feature automatic reset and infinite-resolution clutch. Isolated SPDT switch rated 15A, 120V/60Hz. UL recognized, CSA certified. 6,15,60 second, 60 minutes, and 3 hour time cycles are available. *Contact your local Newark sales office.*

LPB panel-mount units also available, *contact your local Newark sales office.*
(2907) (de50370)

SAR SERIES SIGNALING INTERVAL TIMER

Audible signal at end of preset cycle. Load operates during or after cycle. SPDT switch rated 10A. ±0.5% repeat accuracy. Timer 120V/60Hz. Reset time 0.5 sec. max. at full setting. 5 minute and 1 hour time cycles available. *Contact your local Newark sales office.*

Stock No.	Type	Time Cycle	Dial Div.	Each
24F345	SAR-15M115/60	15 min.	15 sec.	279.76

(2908) (de50371)

C-2 AND C-5 SERIES ELAPSED TIME INDICATORS

Types C-2, C2A

Type C-5

C-2 series is non-reset running time indicator enclosed in panel-mount housing with 2.81" mounting hole. **C-5 series** is a reset time totalizer mounted in steel housing with 2.875" mounting hole. 120V/60Hz. CSA certified.

Stock No.	Type	Max. Hours	Reading	Each

635, 636 SERIES ELAPSED TIME INDICATORS

635 series non-resettable indicators with induction motors for faster starts and stops. Large, six-digit readout. **636 series** resettable, with five-digit readout. Both models 115VAC, 60Hz. Case styles: **"E"** is 3.50" (88.90) round bezel; **"S"** 3.50" (88.90) square bezel; **"X"** 2.50" (63.50) round bezel; **"Y"** 2.50" (63.50) square bezel; **"G"** 2.50" (63.50) utility type round bezel; **"K"** 2.50" (63.50) utility type square bezel. UL recognized, CSA certified. All are 2.6" (66.0) deep.

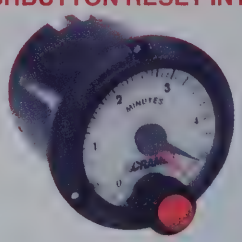
TYPE 105-1RPM SYNCHRONOUS MOTOR

Type 105-1RPM AC synchronous motor features unidirectional operation assured by ball and tooth no-back that permits rotation in desired direction only. For light and standard duty gear trains. 600 rpm rotor speed. 2.7W power input. Operating temperature: –20°C to +55°C. Speed: 1RPM. 1.31 x 2.13 x 2.40"(HxWxD).

97F9737 Type 105-1RPM(30546). **Each** **63.43**

(2755) (de03577)

241 SERIES PUSHBUTTON RESET INTERVAL TIMERS



- **High Visibility 300° Dial**
- **Silver-Cadmium Load Contacts**
- **Repeat Accuracy: ±0.25%**

Integral start button turns on load and starts timer. Silver-cadmium oxide snap-action load SPDT contacts rated 15A @ 115VAC, 60Hz; 10A @ 250V, non-inductive, 60Hz. Repeat accuracy: ±0.25% except 15 second time range ±0.5%. 3-hole mount 1.687" (42.84) radius. UL recognized, CSA certified.

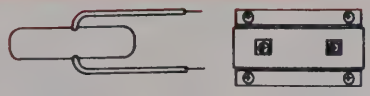
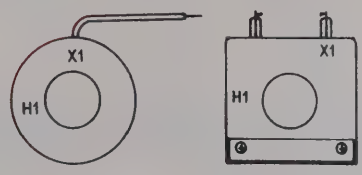
PERSONALIZED SERVICE FROM YOUR LOCAL NEWARK SALES OFFICE.

NEW

TRANSFORMERS

AC CURRENT TRANSFORMERS





MADE IN USA

Designed to use with AC panel meters where external transformers are required. Secondary output signal: 0-5A for all units. Fully encapsulated rubber molded for indoor and outdoor applications. Insulation class: 0.6kV, 10kV BIL full wave. 50 to 400Hz. Linearity: ±1.5%. Thermal rating: 1.33VA at 30°C, 1.0VA at55°C. Square style have brass or aluminum. #8-32 UNC terminals. Round style have 24″-long 16 AWG flexible leads. UL recognized. Made in USA.

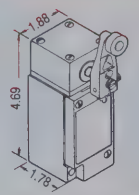
LIMIT AND INTERLOCK SWITCHES

HEAVY-DUTY LIMIT SWITCHES



Limit Switch with Standard Side Rotary Actuator

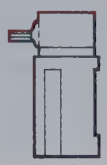


Fig. 1

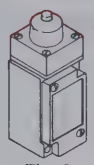

Fig. 2

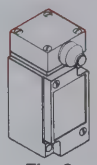

Fig. 3

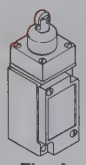

Fig. 4

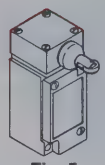

Fig. 5

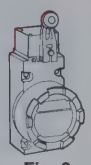

Fig. 6

Designed to withstand seismic shock. Side rotary limit switch heads can be field-adjusted in four positions and actuators can be field-adjusted for CW, CCW or both operations. Corrosion-resistant zinc head and body are epoxy-finished. Stainless steel side rotary shaft . Pilot duty (DC): 240VDC, 30 watts. 120 VDC, 0.25 inductive, 0.8 resistive; 240VDC, 0.015 inductive, 0.4 resistive. Pilot duty (AC): 600VAC, 720VA. 120VAC, 6A make, 60A break. 10A continuous carry. NEMA 1,3,4,4X, 6,6P,13. UL listed, CSA certified. *Order levers for rotary actuated switches separately on this page.* Manifold-mount, low temperature, fully-potted, preleaded, gravity-return stainless steel, quick connect, viton steel, wobble, and other limit switch versions available; *contact your local Newark sales office.*

GKM SERIES MINIATURE SAFETY KEY INTERLOCK SWITCH

- **Miniature Size to Fit in Spaces With Limited Access.**
- **Choice of Termination, Bottom or Side Exit.**
- **Available in 2 Key Styles.**
- **Reduced Wiring Allows Connection of Multiple Switches in Series (Daisy Chaining).**

Safety interlocks meet IEC947-5-1 and EN60947-5-1 and allow dual key interlocking for different access points around a machine with a daisy chain wiring scheme rather than wiring back to the control system. Dual direct-acting contacts provide a positive break for 10 amp ciruits. Normally closed circuit opens and turns off machine when a door is opened and key is removed. Mechanical life: 1 million operations. No detent. 2.76H x 0.63W x 1.34"D. UL listed, CSA certified, CE marked. Meets NEMA enclosure types 1,3,4,12 and 13. Meets IEC IP66 and IP67. 90° key provided. For straight key, replace **W2** suffix with **W1**. Key friction retained versions available, *contact your local Newark sales office.*

GL SERIES GLOBAL LIMIT SWITCHES

GL Series

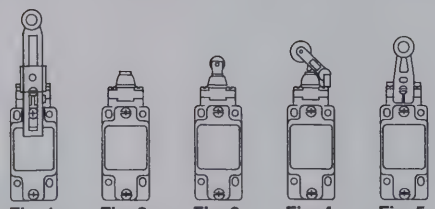

Fig. 1 Fig. 2 Fig. 3 Fig. 4 Fig. 5

Specially designed limit switches meet IEC standard for global application. Meets IEC IP67 enclosure classification and NEMA enclosure Type 4. 10A rated carry load, approximate mechanical life of 15,000,000 operations. Snap-action positive opening contacts. Contact configurations: 1 N.O., 1 N.C. ½″ NPT conduit opening in solid die-cast housing. 4.05(102.9)H x 1.65(41.9)W x 1.64″(41.7)D. Dimensions are inches and (mm). **Type GLB** plug-in body DIN style and **Types GLC, GLD, GLE** miniature DIN versions are also available. *Contact your local Newark sales office.* UL listed, CSA certified, and CE compliant.

CLS SERIES CABLE PULL LIMIT SWITCHES

CLS series cable pull limit switches provide a means to manually force disconnection of a normally closed control circuit by pulling on an attached cable. Feature choice of momentary or maintained (manual reset) designs, direct acting contacts for enhanced reliability, and tension indicator. Momentary versions are ideal for signaling (non-safety) applications. Maintained versions are ideal for emergency stop applications and have broken/slackened cable detection for added safety. Single-head versions feature compact size to fit into tight locations and cover up to 200 foot spans. Duplex versions can cover up to 400 foot spans (200′ each direction). All are sealed to NEMA 1, 3, 4, and 13. UL listed, CSA certified, and CE compliant. Available with indicators and high visibility pilot lights.

(3547) (ne07281)

GKL SERIES SOLENOID KEY-OPERATED SAFETY SWITCH

Designed to lock protective guards that prevent access so dangerous machine operations can only take place if the protective shield is closed and locked. Guard cannot be opened if hazardous motion is present. Separate switches monitor both the key position and whether the key is locked or unlocked. 2 NO and 2 NO monitor key and lock status. 90° key. Sealed to IP68, NEMA 1, 4, 6, 6P, 12, 13. UL listed, CSA certified, CE compliant.

EX AND OP ENCLOSED ROLLER LEVER SWITCHES

EX series explosion-proof switches have smallest UL listed housings for hazardous locations. Meet NEMA 1, 7 and 9. Housing mounts from 4 sides. Switches with **3 suffix** in type number have 0.91M (3-foot) lead wire. **OP series** snap action switches dimensionally interchangeable with **EX series** but sealed in a cast aluminum housing. **OP series** are sealed to NEMA 1, 3, 4 and 13. **Type EX** switches are UL listed, CSA certified. **Type OP** switches are UL recognized, CSA certified. O.F. = operating force. O.T. = over travel.

LIMIT SWITCHES

AZ4 SERIES QL SUBMINIATURE LIMIT SWITCHES

Compact, zinc die-cast limit switches feature exposed terminal design with L-socket or quick-disconnect option. Available with a wide variety of actuators (included). NO/NC (1 Form C). Contact ratings: 5A, 30VDC; and 0.4A, 115VDC. Operating temperature: –20°C to +60°C (no ice formation). Operating point precision: ±0.2mm. Mechanical life: more than 10 million operations. Electrical life: 300,000 operations. Meets IEC enclosure IP64 water spray classification and NEMA enclosure types 1, 3, 4, 6, 12 and 13. UL listed, CSA certified. **Note:** When adding cord and socket units are not CSA certified. *Order L-socket and cord and socket accessories on page 1477.* For actuator styles, *see limit switch selector chart on page 1477.*

AZ5 SERIES LIMIT SWITCHES

Aluminum die-cast, vertical two-circuit limit switches for industrial and general-purpose uses available with a choice of seven actuators. Double break/double make (1 Form Z). Oil-tight. Contact ratings: 10A, ½ hp at 125VAC; 6A, ½ hp at 250VAC; 0.8A, 125VDC. Operating temperature: –5°C to +80°C (no ice formation). Mechanical life: more than 10 million operations. Electrical life: more than 500,000 operations. Maximum operating speed: 120 cpm. Meets IEC enclosure IP67 temporary water immersion classification. For actuator styles, *see limit switch selector chart on page 1477.*

AZ66 SERIES LIMIT SWITCHES

Aluminum die-cast limit switches with popular 1″ mounting centers, feature split housing for easy wiring and maintenance. Available with either push plunger or roller lever actuator in mounting styles: diagonal, side, and bottom mount. NO/NC (1 Form C). Contact ratings: 15A, ½ hp at 125VAC; 10A , ½ hp at 250VAC; and 0.4A at 125VDC. Operating temperature: –5°C to +80°C (no ice formation). Mechanical life: more than 1.5 million operations. Electrical life: more than 150,000 operations. Maximum operating speed: 120 cpm. Meets IEC enclosure IP64 water spray classification. UL listed, CSA certified.

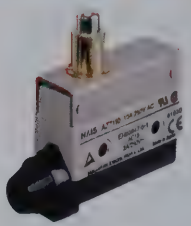
ML SERIES LIMIT SWITCHES



Compact, screw terminal limit switches feature mounting compatibility with many heavy die-cast limit switches. Reversible base. NO/NC (1 Form C). Contact ratings: 10A, ½ hp at 125/250VAC; and 0.4A at 115VDC. Operating temperature: –20°C to +60°C. Mechanical life: 10 million operations. Electrical life: 200,000 operations. Maximum operating speed: 120 cpm. Meets IEC enclosure IP6 dust-tight classification. UL listed, CSA certified, CE compliant. For actuator styles, *see limit switch selector chart on page 1477.*

D4DS SERIES MINIATURE SAFETY DOOR SWITCHES

Compact and economical safety-door switches feature head that can be mounted in 4 directions for flexibility to fit special applications, positive opening mechanism and double-insulated structure that requires no grounding terminals. Dual entry points for operation key. Meets NEMA enclosure type 4 and IEC enclosure IP65(EN60529) classifications. Slow-acting contacts, rated load: 10A, 125/250VAC. For ½-14NPT conduit. UL listed and CSA certified.

Stock No.	Type	Description	Each

(34080) (ne34080)

SAFETY-DOOR SWITCHES

Type D4BS safety switches automatically shut down machinery when switches are opened. Positive action switching assures contact opening even if contact welding occurs. Rugged die-cast housing is environmentally rated to IP67 and offers 1 or 3 ½"-14 NPT conduit openings. Four-way adjustable head allows versatile mounting. Rated: 10 amps at 600VAC. Switch box conforms to CENELEC EN50041. Standard type dimensions: 4.4H × 1.57W × 1.6"D (112H × 63W × 41mmD). 3-conduit entrance type dimensions: 4.4H × 2.5W × 1.6"D (112H × 63W × 41mmD). UL recognized, CSA certified and CE compliant. Meets IEC IP67 Classification.

Stock No.	Type	Fig.	Description	½"-14 NPT Conduit Entry	Each
52F4230	D4BS-35FS	1	DPDB-1NC/1NO	Standard	**55.98**

(3031) (ne07345)

SAFETY-DOOR LOCK SWITCHES

Type D4BL lock access doors until machinery completely stops. Automatically lock when latch is engaged. Rugged die-cast housing with ½"-14 NPT horizontal or vertical conduit opening. Rated: 10 amps at 250VAC. Type with **-3CRA** suffix has a solenoid voltage of 24VDC. Type with **-3CRB** has a solenoid voltage of 110VAC. Side mounting body is 4.8H × 4.6W × 1.8"D (122H × 117W × 46mmD). Locking latches sold separately. **Suffix "-A" in type** = operation indicator versions. Meets IEC IP67 Classification. UL recognized, CSA certified, and CE compliant.

Stock No.	Type	Fig.	Description	Each

(3029) (ne07344)

D4DH SERIES HINGED SAFETY DOOR SWITCH

Switches feature head that can be mounted in 4 directions for flexibility to fit special applications. Contacts are slow-action with approved positive opening mechanism on NC contacts only. Available in shaft actuator type or arm lever type. Double-insulated structure requires no grounding terminals. Rated load: 10A, 125/250VAC. For ½-14NPT conduit. Operating temperature: +70°C to -30°C. UL listed. CE compliant.

Stock No.	Type	Description	Contacts	Each
48F1119	D4DH-3AAS	Shaft Actuator	2 N.C.	**56.16**

(34079) (ne34079)

ENCLOSED LIMIT SWITCHES

Type ZE enclosed limit switches feature large switching capacity and long service life, with a mechanical life of 10 million operations minimum. Rated: 15 amps at 125 and 250VAC, and 10 amps at 480VAC. Sealed die-cast housing with side mounting design. Operating temperature range: –14°F to +176°F. Dimensions 3.4W × 1.0"D (86W × 25.4mmD); for height, *see table below.* Meets IEC IP65 Classification and NEMA enclosure types 1, 2, 3, 4, and 5. UL recognized, CSA certified.

Stock No.	Type	Fig.	Height	Actuator Type	O.F.*	Each
52F4216	ZE-N-2S	1	2.8" (71)	Pin Plunger	800g	**33.37**

* O.F. = Operating Force

(3033) (ne07346)

COMPACT PRE-WIRED ENCLOSED SWITCHES

Type D4C limit switches feature rugged die-cast housing and triple-sealed construction for harsh environments. Accept loads of up to 5 amps at 250VAC. Units come pre-wired with 9.8' (3M) of SJTO cable. Slim profile body: 1.96H × 1.57W × 0.62"D (50H × 40W × 16mmD) for easy gang-mounting. Mechanical life: 10 million cycles minimum. Meets IEC IP67 Classification and NEMA enclosure types 3, 4, and 13. UL recognized, CSA certified.

Stock No.	Type	Fig.	Actuator Type	Operating Force	Each
52F4220	D4C-1601	1	Pin Plunger	1.2kg	**55.98**
52F4221	D4C-1602	2	Roller Plunger	1.2kg	**55.98**
52F4222	D4C-1620	3	Roller Lever	580g	**67.82**

(3025) (ne07342)

DIRECT-OPENING SNAP ACTION LIMIT SWITCHES

Type D4B limit switches feature direct-opening mechanism. Positive action switching assures contact opening even if contact welding occurs. SPDT (1 NC, 1 NO) contact configuration rated 10 amps at 480VAC. Die-cast housing with 4-position head. Mechanical life: 30 million cycles minimum. ½" NPT conduit opening. Selectable operation: CW, CCW, and CW+CCW. Meet IEC IP67 and NEMA enclosure types 3, 4, 4x, 6P, and 13. UL recognized, CSA certified, VDE approved, and meets IEC standards.

D4D SERIES GENERAL-PURPOSE LIMIT SWITCH

Compact, economical, plastic-body switch features direct-opening action mechanism that forcibly opens contacts to assure accurate switching. 2 sets of DPDT contacts: NC for safety circuit and NO for control circuit. Meets NEMA enclosure types 3,4,6P and IEC enclosure IP65(EN60529) classifications. 4-position turret head for flexibility to fit special applications. Rated load: 10A, 125/250VAC. For ½-14NPT conduit. Operating temperature: +70°C to-30°C. UL listed. CSA certified, CSA compliant.

LIMIT SWITCHES

XCK-J LIMIT SWITCHES

Lever Operated XCK-J10511

Heavy duty switch features a four position indexing head and exceptional repeatability. Programmable CW and/or CCW lever. Captive saddle clamp terminals delivered in ready-to-use position feature Finger-Guard protection. Temperature range –25° to +70°C. Insulation voltage 300VAC. 10A thermal current. UL listed, CSA certified. Additional contact configurations and operators available. *Contact your local Newark sales office.*

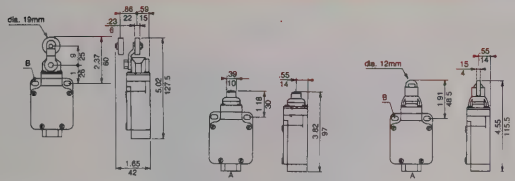
XCK-L COMPACT LIMIT SWITCHES



L115 **L110** **L102**

- **Captive Saddle Clamp Terminals**
- **Finger Guard Protection**
- **Omnidirectional**

General duty limit switches offer greater versatility in machine tool and machine handling applications. Programmable CW, CCW or CW and CCW lever operated rotary head. Captive screws and gaskets. Positive opening contact snap action SPDT (NO + NC). Temperature range -25° to +70°C. Contact resistance 25mΩ.

XY2-CE CABLE PULL SWITCHES

XY2-CE1

Utilized in conveyor systems or large machinery, cable is stretched between the switch and anchor, providing a means of stopping a motor along any point of the cable. Temperature range -25° to +70°C. Mechanical life of 10,000 operations. Operates in all positions. Rated 10A, 300VAC. 2NO+2NC booted, left cable mount version available. *Contact your local Newark sales office.*

Stock No.	Type	Description	Each
96F1945	XY2-CE1A250	NO + NC, Booted, Right Cable Mount	**243.61**

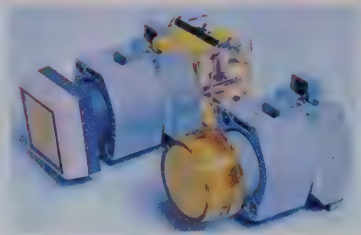
SWITCHES AND ACCESSORIES

04 SERIES PUSHBUTTON ACTUATORS AND INDICATORS



Square Lighted Pushbutton Round Indicator

Feature modular construction for easy assembly and screw-type terminations. Come with gray plastic bezel and are available in lighted, unlighted, and round or square bezels. Front panel replaceable lens or lamp. Mount in 22.5mm (0.875″) round hole. Use T-3¼ bayonet lamp, neon, or LED illuminating devices *(ordered separately; see lamp index)*. Meet NEMA 4 and 13 and IP 65 oil and watertight specifications. UL# 10A/600V, CSA 10A/300V, VDE 10A/500V, and SEV 10A/500V approved. Last digit in type number reflects lens color code: 2 = red, 4 = yellow, 5 = green, 7 = white. *Order contact blocks separately on this page.* ISO 9001 certified.

NON-ILLUMINATED NEMA TYPE 30mm PUSHBUTTON SWITCHES

Modular components allow the assembly of customized configurations for a wide range of applications. Operators mount in 1 13/64″ (30mm) diameter hole from the back and tighten assembly with octagonal ring. The locking ring in combination with spacers can adjust for panel thickness from 0.040″ to 0.250″. All pushbuttons comply with NEMA 1, 3, 3R, 4, 4X, 12, and 13 (watertight and oiltight applications). UL listed, CSA certified.

Complete assembly consists of operator, color cap or lens, and contact blocks: *order each component separately.*

EMERGENCY STOP PUSHBUTTON SWITCHES

Units are fail-safe pushbuttons. Designed in accordance with EN 418 (standard for emergency stop equipment) and IEC 947-3. Units are E-stop, push-pull buttons and have positive mechanical action and positive opening contacts. Mushroom head is Ø 1.57" (40). **Type 79697002** is enclosed in an enclosure that meets IEC enclosure IP657 classification. UL listed, CE compliant.

EUROPEAN MACHINERY DIRECTIVE... DO YOUR MACHINES CONFORM?

The European Directive is a law aimed at guaranteeing the free movement of machines within the European Union (EU) and to define the essential health and safety requirements associated with their use.

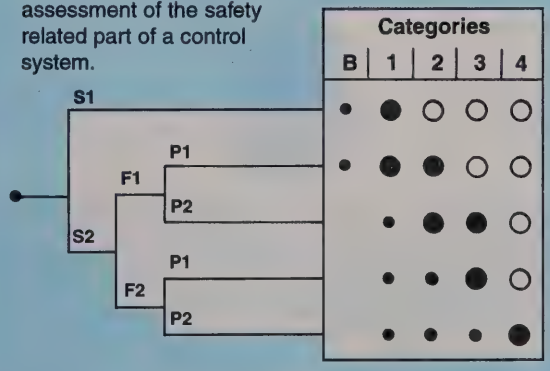
What is a machine? For the purposes of the European Machinery Directive, machinery is an assembly of linked parts or components, at least one of which moves, with the appropriate actuators, control and power circuits joined together for a specific application. A machine will be in conformity with the European Machinery Directive if the manufacturer is able to prove that its machine conforms to the related harmonized European safety standards (referenced EN...).

MAJOR HARMONIZED EUROPEAN STANDARDS FOR CONFORMITY:

- **EN60204-1 (Equivalent to IEC204-1): Electrical requirement for machines' general requirements**
- **EN418: Emergency stop equipment, functional aspects-principles for design**
- **EN1088: Interlocking devices associated with guards-principles for design and selection**
- **EN574: Two-hand control devices, functional aspects, principles for design**
- **PREN1050: Principles for risk assessment**
- **PREN954-1: Safety related parts for control system-general principles for design**

ASSESSING THE RISK IN THE EVENT OF FAULT AND SELECTING AN APPROPRIATE CATEGORY:

Starting point for the risk assessment of the safety related part of a control system.



S — **Severity of the injury**
S1 Minor injury
S2 Serious permanent injuries to one or more people or death of a person

F — **Frequency and duration of exposure**
F1 Seldom to fairly frequent
F2 Frequent to continuous

P — **Possibility of avoiding the dangerous situation**
P1 Possible under certain conditions
P2 Seldom possible

B. 1-4 : Categories for the safety related parts of a control system

● Normal category for the level of risk

○ Higher category than level of risk suggests

● Lower category may be considered by using other safeguard measures

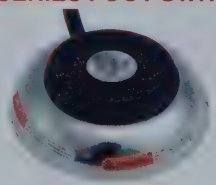
LINEMASTER

FOOT SWITCHES

GEM SERIES FOOT SWITCHES



Black actuating cap operates switch when pressure is applied in any direction. Momentary SPST wired normally open. **GEM-V3** is rated 10 amps, 125VAC. Supplied with a 6 ft. 18/3 cord and three-prong series plug. Green lead grounded. **GEM-V36** is rated 15 amps, 125-250VAC. Supplied with a 6 ft. 18/3 cord without plug. Green lead grounded. 3.81″ Dia. x 1.21″ D. UL listed and CSA certified.

Stock No.	Type	1-4	5-9
10F7449	GEM-V3	42.54	36.55
10F7450	GEM-V36	37.30	32.04

(3390) (de00520)

AQUILINE FOOT SWITCHES

Composed of engineered polymetric material to protect against rust and corrosion. 4 x 3 7/16 x 1 9/32″ accommodates cord sizes from 0.250 to 0.400 diameter. **Type 971-S** is momentary SPDT and **type 974-S** is momentary DPDT.

Stock No.	Type	1-4	5-9
92F834	CE971-S	11.49	9.90
92F835	974-S	20.88	18.00

(16735) (ne10542)

CLIPPER FOOT SWITCHES

4.500L x 3.500W x 1.500″H. All types are momentary except **type 632-D** which is maintained. features push-on/push-off action. **TWIN 632-S** is 4.500L x 8.375W x 1.500″H with strain relief connector in right side switch. **Types 632-S, 632-D,** and **TWIN 632-S** UL listed, CSA certified. **Type 632-SC3** pre-wired. Includes # 14/3 SJT cable with molded-on, three-prong series plug. Wired normally open with green lead grounded. UL listed, CSA certified. All types have SPDT circuits except **type 635-S** which is DPDT. UL recognized. *Order full foot switch guards separately on this page.*

Stock No.	Type	Ratings	1-4	5-9

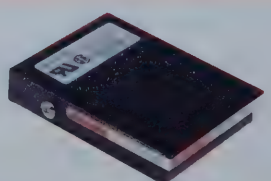
(3454) (de03670)

TREADLITE FOOT SWITCHES



Utilizes V3 snap switch with .187″ quick disconnect tab terminals. Foot switch with light-press treadle alleviates operator fatigue. Formed steel case has skid-proof base pad. **T-91-S** is a momentary SPDT unit. 15A, 125-250VAC. UL recognized. No cordset. **T-91-SC3** is a momentary SPST wired normally open unit. 10A, 125VAC. 6 ft. 18/3 cord and three-prong series plug. Green lead grounded. UL listed, CSA certified. **T-91-SC36** identical to **T-91-SC3** but rated 10A, 125-250VAC and supplied with 6 ft. 18/3 cord without plug. Green lead grounded. UL listed, CSA certified.

Stock No.	Type	1-4	5-9

(3385) (de00514)

LEKTRO-LOK FOOT SWITCHES

Pressure on one side of **type L-2-S** Lektro-Lok momentary switch opens or closes line. Interlock prevents two circuits working at once. Metal housing has a black finish and a skid-proof base pad. Each side circuit: SPDT (**L-2-S**) and DPDT (**L-4-S**). 10 amp, 125VAC. 5.00L x 2.50W x 1.25″D. UL recognized.

Stock No.	Type	1-4	5-9
24F168	L-2-S Lektro-Lok	36.30	31.19
97F9099	L-4-S Lektro-Lok	66.29	56.95

(3389) (de00519)

491 SERIES COMPACT FOOT SWITCHES

Steel housing with skid-proof base pad. 2.87L x 2.50W x 1.12″D. **491-S** is a momentary SPDT unit. 10 amps, 125-250VAC. UL recognized. **491-SC3** is a momentary SPST wired normally open unit. 10 amps, 125VAC. Includes 8 ft. 16/3 cord and three-prong series plug. Green lead grounded. UL listed and CSA certified. **491-SC36** is identical to **491-SC3** but 125-250VAC and has a 6 ft. 16/3 cord without a plug. Green lead grounded. UL listed and CSA certified. **491-D** is a maintained SPST unit. 10 amps, 125VAC. UL recognized. *Order full foot switch guards separately on this page.*

(3592) (ne08332)

AIR-SEAL FOOT SWITCHES & FULL FOOT SWITCH GUARDS

Combines a foot operated air bulb mounted in a strong steel compact housing and a remotely located air operated electric snap switch. **Type 41SH12** is momentary SPDT and **Type 41DH12** is maintained SPDT. A 10 foot 1/8″ ID PVC tubing connects the foot pedal to the remote air switch, which is equipped with a 9/16″ UNF bulkhead mount. Pre-drilled switch guards come complete with hardware and instructions. Alert orange color. **Type 522-B14** is a full single guard which accepts Clipper, Compact, Treadlite and Executive foot switches. 6.00L x 6.00W x 4.50″D. **Type 522-B12** is a full twin guard which accepts Clipper Twin. 6.00L x 11.00W x 4.50″H.

TYPE PKZM0 MOTOR PROTECTORS

Type PKZ0 is a 3-phase thermal magnetic motor protective device that incorporates adjustable bimetallic trips to de-energize the motor circuit in case of a short circuit. **Type PKZM0-.../SE00** is a combination of **type PKZM0** manual motor protector and **type SE00-...-PKZ0** magnetic contactor. **type PKZM0** and **type PKZM0-.../SE00** are UL listed and CSA certified Hp-rated motor controllers that provide overload protection and UL listed and CSA certified for group applications per NEC 430-53(c) and CEC part 1, rule 28-206. They can be combined under a single circuit short circuit and ground fault detection device for the maximum rating marked on each **type SE00-...-PKZ0** motor protector. Phase failure sensitive. Adjustable thermal trips to set motor FLC. Ambient compensated. Fixed magnetic trip set at 14 times rated current. 35mm or DIN rail mounting. UL listed, CSA certified, VDE approved.

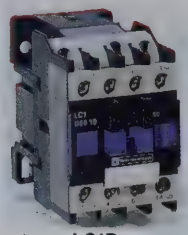
IEC CONTACTORS AND OVERLOADS

D-LINE IEC CONTACTORS

Contactor + Overload Relay = Motor Starter



LC1D

60Hz contactors are 3-pole, AC coil, non-reversing. Designed to start and stop motors to 32 amps. Side- and top-mount auxiliary contact modules give more design flexibility. Snap-mount standard 35mm DIN rail. Mechanical life of up to 30 million operations. All coils have three leads to accommodate global wiring practices. Coil wire insulation is rated at 180°C. To create a motor starter, choose a contactor and an overload relay. UL listed, CSA certified, and CE compliant.

GV2 SERIES MANUAL MOTOR STARTERS

GV2 series manual motor starters comprise a manual isolation switch, an overload relay, and an instantaneous magnetic trip mechanism in one compact device. Can be used alone for manual control of a single motor or wired in front of a contactor to provide remote operation. Snap onto 35mm DIN rails. Rated thermal current 25A. Rated voltage: 60 . Conform to IEC standards. Class 10 overload protection. Dimensions: 1.77H x 1.73W x 3.42"D. UL listed, CSA certified, and CE compliant. Order auxiliary contact blocks and enclosures separately. 1.00-1.60 and 9.00-14.00 current (A) models also available. *Contact your local Newark sales office.*

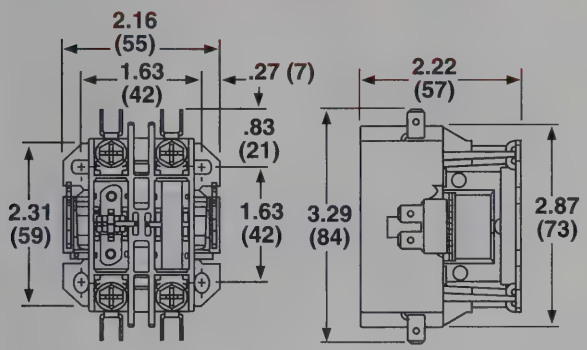
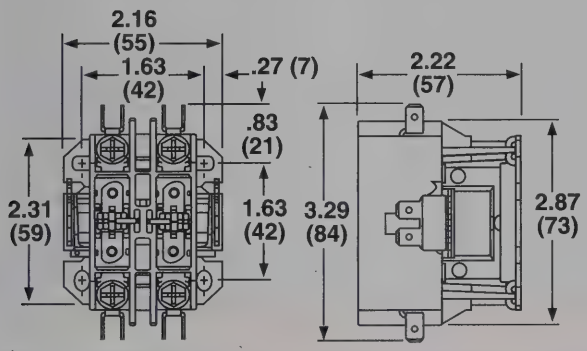
DEFINITE PURPOSE CONTACTORS

DP SERIES DEFINITE PURPOSE CONTACTORS





Definite purpose contactors are ideal for heating, air conditioning, refrigeration, data processing and food service equipment. Compact 1- and 2-pole contactors and standard size 2-, 3- and 4-pole devices are available. Double-break contact, N-O. All have quick-connect terminals and binder head screws for easy wiring. **8910DPA series** includes box lugs on 40A contactors and larger. Coils may also be changed on the **8910DPA** quickly without a tool. **Type 9999D** snap-on auxiliary contact modules for **8910DPA series** fasten on to either side of contactors; *ordered separately on this page.* Other versions available. *Contact your local Newark sales office.*

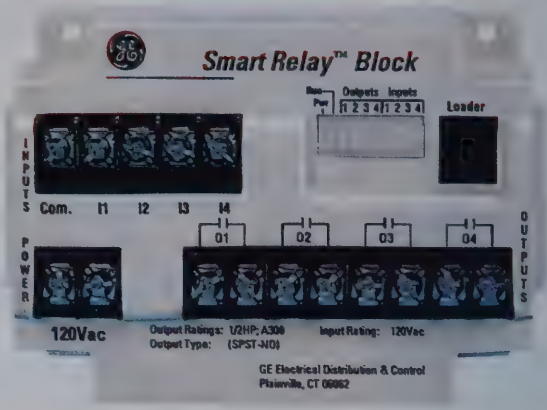
ONE-STOP SHOPPING . . . WITH ONE CALL AND ONE PURCHASE ORDER.

PROGRAMMABLE SMART RELAY



Each Smart Relay Block performs the function of up to 100 relays, counters, and timers. By replacing these conventional control devices, it reduces expensive panel space and wiring time, and eliminates the cost of multiple control products. The 10 amp pilot duty outputs allow each Smart Relay Block to directly control output loads, including pilot lights, large contactor coils, lighting loads, solenoids and even fractional horsepower single-phase motors. The Smart Relay Blocks are programmed by the Smart Relay Loader *(sold separately)* and have 4 input and 4 output terminals. The Smart Relay Loader can be used to monitor a circuit that is running or it can be disconnected to remotely build and store circuits (in the non-volatile memory) for additional Smart Relay Blocks. The Loader's memory will store up to 8 complete configurations, each containing up to 100 elements. Relay blocks are 4.92W x 3.63H x 3.54"D. Loaders are 7.50W x 4.00H x 1.12"D.

RELAY BLOCKS

MINIATURE IEC OPEN TYPE CONTROL DEVICES

Miniature contactors are for light to medium duty applications where motor jogging is not required. These full voltage, non-reversing contactors are open-type for DIN rail or surface mounting. They feature back-of-hand safe screw terminal with NEMA and international designations. An overload relay can be added to create a motor starter. Contactor dimensions: 1.89H x 1.77W x 2.2"D. Overload relay dimensions: 2H x 1.77W x 2.08"D. Starters = contactor + overload relay.

MOTOR CONTROLLERS

SOFT-START/SOFT-STOP MOTOR CONTROLLERS

TYPICAL APPLICATIONS:
- Compressors and Pumps
- Conveyor Belts
- Lifting Devices
- Blowers and Fans
- Mixers
- Palleting Devices
- Lift Doors
- Garage Doors

IN USE:
Protection of Motors and Driven Machines, Lower Maintenance Costs, Protects Against Pressure Surges in Pump and Compressor Applications, and Relieves the Power Supply Network by Reducing Starter In-Rush Current.

IN MOTOR AND INSTALLATION CONSTRUCTION:
Mechanical Dimensioning Can be Optimized, Simplifying Automation.

IN CONSTRUCTION AND INSTALLATION OF SWITCHING CABINETS:
Provides Flexibility in the Use of Equipment, Compact Design, Simple to Install and Connect, and Can Minimize Need to Stock Spare Parts.

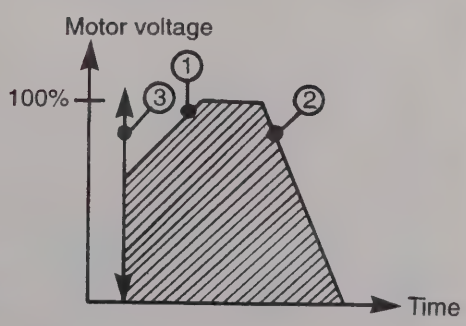
SOLID-STATE SOFT-START MOTOR CONTROLLERS

Independently Adjustable Settings Include (See "Motor Voltage" Diagram):
Ramp-Up Time: Time from Zero Load Voltage to Full Load Voltage
②Ramp-Down Time: Time from Full Load Voltage to Zero Load Current
③Initial Starting Torque: Voltage at Start of Ramp-Up Function

- Soft-Start and/or Soft-Stop of Induction Motors (up to 20 Hp)
- Compact DIN Rail Mount Housing Saves Valuable Space
- No Heat-Sink, Cooling or Bypass Contactor Required
- Competitively Priced
- Touch Safe Front Cover
- Diagnostic LEDs
- Built-In MOVs
- Optional Output for Overheating Alarm and End of Ramping
- Competitively Priced



DIN rail mount motor controllers for soft-starting and/or soft-stopping 3-phase motors with nominal load currents up to 3 or 12 amps. Ramp up and down times: 0.5 to 6.5 seconds. Torque: 0 to 85%. 3.62(92)H x1.77(45)W x 4.25"(108)D. UL recognized, CSA certified, CE compliant.

DIRECT ON-LINE OR 24-110VDC/24-480VAC CONTROL VOLTAGE

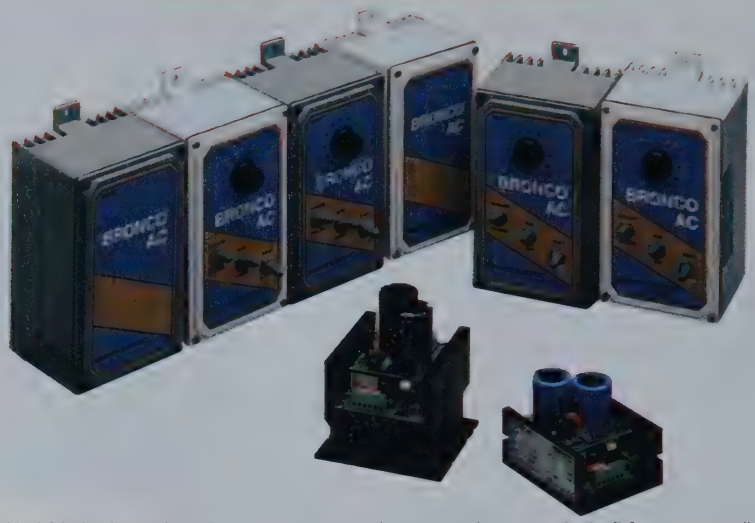
MOTOR CONTROLLERS

BRONCO AC MOTOR CONTROLLERS



Motor controllers designed for 1/8 through 1Hp AC induction and synchronous motors or as low-cost replacements for for DC motor controllers. Industrially-hardened units are rugged volts-per-hertz drives ideally suited for conveyers, mixers, pumps, fans, and general machinery. Simple potentiometer controls make it easy to set user-defined adjustments, such as maximum/minimum speed, jog speed, acceleration and deceleration. Have 100% continuous duty output current rating and 150% rating for 60 sec. Immune to most EMI/RFI noise sources found on industrial AC incoming power lines. Dual voltage input is jumper selectable for either 115 or 230VAC, single-phase input to operate 230VAC, 3-phase AC motors. Smaller-than-average footprint, reversing capabilities and optimization for use with 3-phase motors make controllers ideal for new applications or retrofits. Special "boost" adjustment feature increases the drive torque capability to start heavy loads. "Slip compensation" feature helps maintain a constant speed by increasing the output frequency proportionately as the load increases. **Type BAC1695** and **Type BAC1695WD** have isolated signal followers.

CSJ AND CSL SERIES SOLID STATE VOLTAGE SENSORS

Adjustable Pick-up and Drop-out

Sound alarms, turn off equipment, or trigger auxiliary power source with voltage sensors which energize and de-energize internal relay at predetermined voltages. Solid-state sensors available with voltage levels fixed or knob-adjustable. Can be used as over-voltage or under-voltage sensor. Contacts are 2 form C (DPDT), rated 10A at 28VDC resistive or 120VAC resistive. Temperature range: –10°C to +55°C. Enclosed in molded nylon dust cover. Dimensions: 2.406L x 1.781W x 2.937″H (61.11 x 42.24 x 76.60). Maximum voltage for **type CSJ38-70010** is 150VAC; for **type CSL38-30010** is 40VDC; for **type CSL38-60010** is 150VDC; for **type CSJ38-71010** is 140VAC; for **type CSL38-31010** is 40VDC. CSA certified. *Order socket separately; contact your local Newark sales office.*

SDAS-01 SERIES AC CURRENT SENSORS

1.5 to 15 amp AC current sensor. Zero insertion loss. Inductive coupling to power line. Choice of modes-adjustable overcurrent sensor or adjustable undercurrent sensor. Solid state sensing circuit. 1 Form C (SPDT) or 2 Form C (DPDT) internal relay. Undercurrent sensor (indicated by **Type SDAS-01-7Y series**) detects a current in excess of determined value by potentiometer setting. Built-in time delay, 200ms, minimum, allows for normal starting and surge currents. Overcurrent sensor (indicated by **Type SDAS-01-8Y series**) reacts to complete loss of sense current, or any current of less than the potentiometer setting. Control voltage: 24VAC 50/60 Hz./DC±10%. Operating temperature range: –25°C to +70°C. Dimensions: 1.406L x 1.531W x 2.718″H (35.71 x 38.89 x 70.64). Both sensors are arranged DPDT, 2A DC/1A-AC.

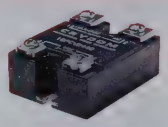
PROPORTIONAL CONTROLLERS

PCV SERIES PROPORTIONAL CONTROLLERS



PCV

PCV series proportional controllers are self-contained power control modules integrating a complete phase fired logic control system and solid state relays in the same standards package. Control voltage range is 2-10VDC (4-7 mA typ). Output voltage range is 100-240VAC.

Stock No.	Type	Load Current (Arms)	1-Cycle Surge (Apk)	1-9	10-24

HPF SERIES 20-30-AMP DIN RAIL MOUNT RELAYS

HPF series solid-state relays utilize proprietary thermal management technology to provide a compact, efficient design with built-in DIN rail attachment, integral heat sink, and easy to use cage type terminals. All types have a 5-32VDC (5mA@5VDC) control and are available with zero-cross or random turn-on switching (suffix R).

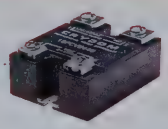
RPC SERIES PROPORTIONAL CONTROLLERS



RPC

RPC series proportional controllers provide a stable yet economical method of controlling power. An inexpensive potentiometer connected to the input provides the proportional control. The **type RPC12** require potentiometer resistance of 150kΩ and potentiometer wattage 1W. **Types RPC24** and **RPC48** require a 1MΩ, ½W potentiometer.

Stock No.	Type	Load Current (Arms)	1-Cycle Surge (Apk)	1-9	10-24

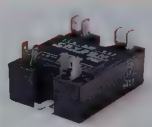
SOFT START MODULE



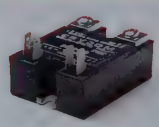
SST

Series SST soft start modules when used with a Series 1 random turn-on (-10) solid state relay will gradually (180 msec) apply power to the load when energized by the control voltage. Control voltage is 3.5-10Vdc (1.6mA@5Vdc) 4000 Volt isolation. UL certified.

Stock No.	Type	Description	1-9	10-24
70B015	SST120	Driver only, 120V	26.78	24.64
98F2714	SST-240	Driver only, 240V	27.29	25.10

(3697) (de52296)

1 SERIES 10-15 AMP TIME DELAY RELAYS



DSD

Series DSD 240 volt time delay relays feature a built-in time delay controlled by external resistor (0 to 1 Meg Ohm). Timing range: 0.1 to 8.3 seconds. Models available **(DLD)** with longer (1.6 to 133 seconds) delay times. UL certified.

Stock No.	Type	Load Current (Arms)	1-Cycle Surge (Apk)	1-9	10-24

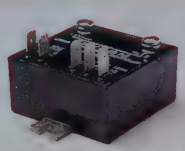
(3695) (de52294)

LPCV SERIES PROPORTIONAL CONTROLLERS



LPCV Series linear proportional controllers control loads up to 110 amps. Changes in the input signal linearly vary the firing angle of the thyristor load control device. Control circuitry and power switch are in the same package. The **PS-120** and **PS-240** power supplies are designed to provide the 20Vac required in addition to the control voltage. Types **5LPCV** have a 0-5 Vdc control. Types **10LPCV** have a 0-10Vdc control.

Stock No.	Type	Load Current (Arms)	1-Cycle Surge (Apk)	1-9	10-24

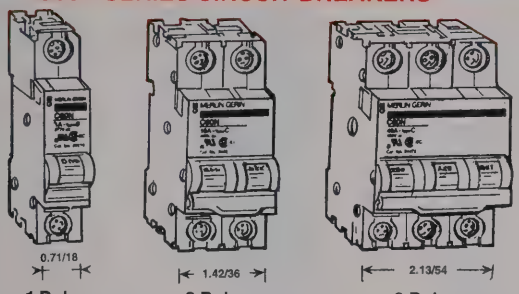
C60N SERIES CIRCUIT BREAKERS



1 Pole 2 Pole 3 Pole

These thermal magnetic circuit breakers provide supplemental overcurrent protection in a control panel in accordance with NEC specifications. Reduce effects of short circuit currents in an installation. Front panel or DIN rail mount. Withstand 6000V impulse. 1, 2 and 3 poles rated 240VAC, 1 pole rated 277VAC, 2 and 3 pole rated 480/277VAC. 1 pole rated 65VDC, 2 pole rated 125VDC. UL recognized, CSA certified, IEC947.2. 3-pole types are also available in 3A and 8A versions. *Contact your nearest Newark sales office.*

PROGRAMMABLE RELAYS

Replace counters, timers and analog comparators. Construct ladder circuit diagrams using a 4-line screen and buttons and a cursor control located on the unit – no special software required . 8 inputs, 4 relay outputs. Optional software allows programing from a PC (requires optional cable and Windows 95). DIN rail mounting or 3 screws. AC model has 6 inputs rated 0.25mA@120VAC, 2 rated 2.0mA@120VAC. DC model has 6 inputs rated m.2mA@ 24VDC and 2 inputs rated 2.2mA@24VDC. Program memory: 120 contacts (41 lines). 3.67x2.92x2.17" (HxWxD). UL listed, CSA certified, CE compliant.

INDICATING BANKS AND ACCESSORIES

XVAL SERIES SINGLE STAGE INDICATING BANKS

- **Perfect for Status Indication on Factory Floors Using JIT Methods**

XVAL series indicating banks are individual signaling units of an illuminated stackable modular system of signaling lights **(XVAC series)** that can be used for indicating the status of a machine and verifying that status from a distance and in all directions (360°). The modular system of lenses allows the unit to be constructed from any combination of 1 to 5 lenses. Constant, flashing and strobe units are available. *See* **XVAC series** *indicating banks on this page to order indicating banks of multiple stages.* Bank material: polycarbonate lenses and cover, polyamide base. Rated insulation voltage: 250V. Lamps: 7W maximum, length 1.66″. Wiring: captive terminal with screw saddle clamp; maximum capacity: 2 size, 12 wires. Available with green, red, orange, blue, or clear lens except strobe light (red only). Operating temperature: –13°F to +158°F. UL listed, CSA certified, CE approved. Meet NEMA 1 and 12 protection (indoor use only). Bulbs for steady light and flashing light indicating banks not included. *Order separately from accessories table on this page. Also order mounting accessories separately on this page.*

XVAC SERIES COMPONENT INDICATING BANKS

- **Applications Include: Conveyor Systems, Automated Process Lines, Assembly Work Stations, and Machine Tools**

Component **XVAC series** indicating banks feature the same characteristics as **XVAL** banks but additionally offer the capability to stack up to 5 lenses directly on equipment or on to a 4-inch mounting tube. Only 1 strobe may be used on each bank and must be mounted in the top position. UL listed, CSA certified, and CE compliant. Bulbs for steady light and flashing light indicating banks not included. *Order separately from accessories table on this page. Also order mounting accessories separately on this page. Intermittent tone audible sounder also available separately on this page.* AC/DC strobe light is also available. *Contact your local Newark sales office*

Pole/Mounting Base

LEDs

- **Provides 360° Illumination of Status or Alarm Conditions**
- **Units can be Either Base or Pole Mounted**
- **Flashing or Steady Lights**
- **Vibration-Resistant Bulbs, Up to 10W, Provide 2,000 Hours of Life**
- **Vibration and Shock Damping Base**
- **Bases are Available in Metal or Plastic**
- **Color-Coded Wires Make Assembly and Wiring Easy**
- **Heat and Shock-Resistant Polycarbonate Lenses**

SignaLight™ towers offer 360° of indication illumination for reporting the status of automated machinery. Easy to assemble and disassemble. Available in 120VAC or 24VAC/DC. Build Up to five tiers in five different color heat-and shock-resistant polycarbonate lenses (red, green, blue, yellow, and white). Choose from either steady or flashing lights and metallic or plastic bases. Lamp type: T-20; lamp base: BA15D. Prism-cut globe increases signal visibility. Built-in vibration/shock absorber, color-coded wires. Dimensions: each tier = 2.75H x 2.20″W (70 x 56). UL and cUL listed.

To build a complete SignaLight unit, pick: 1) Base unit + 2) Top cap + 3) Lenses + 4) Lamps + 5) Optional Pole unit for pole mounting and optional pole mounting base

AUDIO/VISUAL WARNING DEVICES

102 SERIES TRILIPTICAL™ STACKABLE STATUS INDICATORS

102

Audible-visual signalling device can contain up to 5 light modules and an optional tone module in a single stack. Modules are stackable in any combination or color. Units are PLC compatible and can be wired directly to most programmable logic controllers without the use of a relay or drop resistor. All electrical units are 120VAC. Surface mount or ¾" NPT conduit mounting. For indoor and outdoor applications. Meets NEMA enclosure types 3R, 4X, and IEC enclosure IP65 classifications. UL listed, CSA certified, CE compliant..

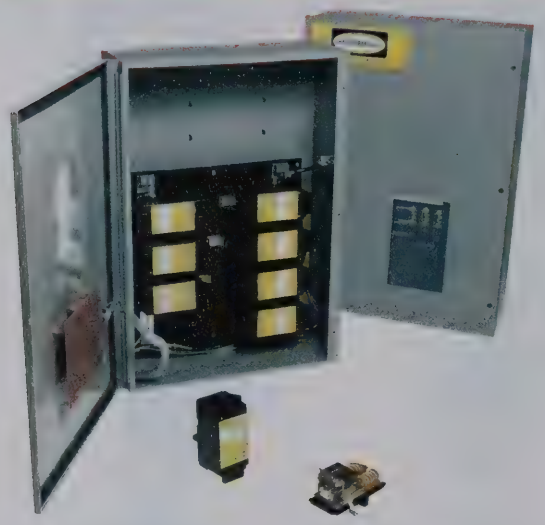
SURGE PROTECTION

SERVICE ENTRANCE SURGE PROTECTORS



Protects buildings from transients caused by lightning, utility grid switching, power line arcing, or electrical accidents. Peak current rating of 320kA exceeds worst case requirements for high-exposure environments. Thermal fuse remains functional to prevent MOVs from overheating when exposed to high current levels. LED and audible alarm status indicators. Dimensions: 25.25H x 16.45W x 6.32"D.

Stock No.	Type	Nominal Volts	1-5
83F5289	HBL4P320	120/208	**4769.04**
83F5290	HBL8P320	277/480	**5600.00**

(28375) (ne28375)

BRANCH PANEL SURGE SUPPRESSORS

Branch panel surge suppression for applications from 65kA to 160kA. Feed-through connection eliminates connecting leads and provides superior clamping performance. Thermal fuse remains functional to prevent MOVs from overheating when exposed to high current levels. Audible and visual status indicators. UL listed.

Stock No.	Type	Nom. Volts	Max. Surge	H x W x D	Each

HARDWIRED SURGE SUPPRESSORS

Hardwired surge suppressors can be mounted inside equipment cabinets. Have 65,000-amp peak capacity and thermal fuse that remains functional to prevent MOV from overheating when exposed to high current levels. LED status indicator, diagnostic contact. DIN rail or terminal mounting. DIN rail units have audible alarm. Terminal mount unit accepts 12 AWG wire. UL recognized.

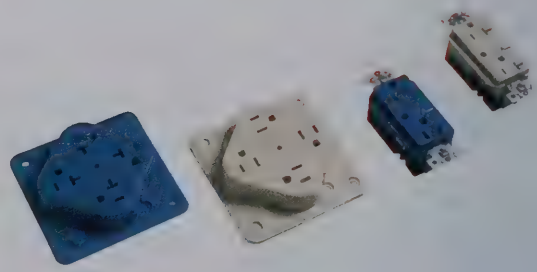
(28374) (ne28374)

SURGE SUPPRESSION RECEPTACLES



Contain four 18mm MOVs (two discs per package) to provide 210 joules of protection for each module. Power-on indicator light verifies that power is available and the suppression circuit is fully functional; light off means no power; flashing light indicates damaged surge protection circuit. Units with damage-alert audible alarm allow muting until unit is replaced. Rated 120VAC, 60Hz. Fit standard wall box. UL listed, CSA certified at 15A.

H-MOSS® MOTION SENSING SYSTEMS

OS120AL
Shown with lamps, not included

Motion Alert Outdoor Sensors offer:
- **Energy Savings**
- **Convenience and Security Through Automatic Lighting Control**
- **100° Field of View With 60′ (18m) Range**

Motion Alert outdoor sensors offer energy savings, convenience and security through automatic lighting control. H-Moss® passive infrared sensors switch lights on when you enter the room, and off when the room is empty. 100° field of view with 60′ (18m) range. For outdoor and indoor applications, and both fluorescent and incandescent lighting. UL listed, CSA certified.

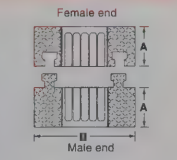
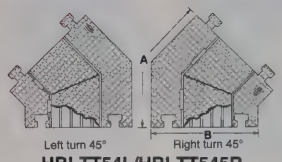
TRUCKTRAK™ AND TREDTRAK™ PROTECTION SYSTEMS

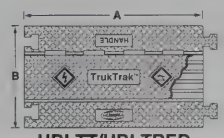
TredTrak™/TruckTrak™



End Cap



HBLTT54L/HBLTT545R



HBLTT/HBLTRED

TruckTrak™ system is designed to protect cables and cords from heavy trucks and fork lifts in industrial environments. Available in 3- (**types HBLTT3**) or 5-channel (**types HBLTT5**) and will protect cables up to 3.25″ (82.6) in diameter. Dimension B: 20.0″. TredTrak™ system is designed to support pedestrian and light vehicle traffic in public, institutional, and commercial applications. 5-channel system will protect cable diameters up to 1.28″ (32.5). Dimension B: 17.5″. Both TruckTrak™ and TredTrak™ systems comply with 1996 NEC® requirements for installing electrical cables and cords at carnivals, amusement parks, convention centers, and similar public areas. **Suffix EC** denotes that the unit is an end cap and is available in either male or female versions. **Suffix R** denotes unit that angles to the right. **Suffix L** denotes unit that angles to the left.

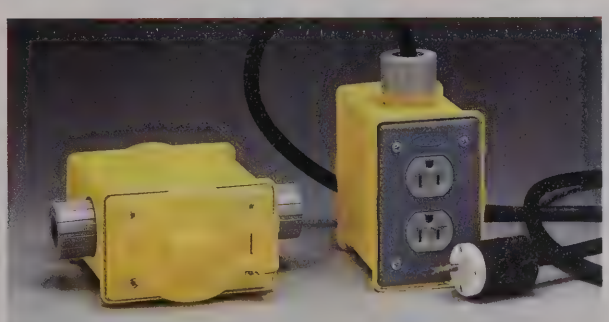
PORTABLE OUTLET BOXES AND COVER PLATES



Designed to provide a rugged enclosure for a variety of wiring devices. Nonmetallic construction is impact resistant. The deep back-to-back design of the box accommodates devices which other outlet boxes cannot. All boxes are field wired. Devices and power cord are not included. The box includes a liquidtight design cord connector and three bushings for various cord diameters. Other weatherproof cover plates also available; *contact your local Newark sales office.* UL listed, CSA certified.

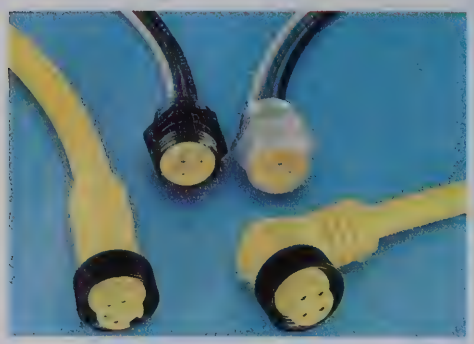
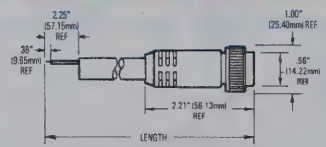
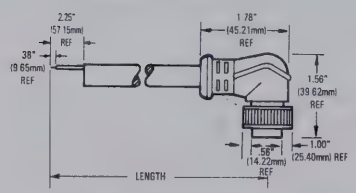
QUICK-DISCONNECT SYSTEM

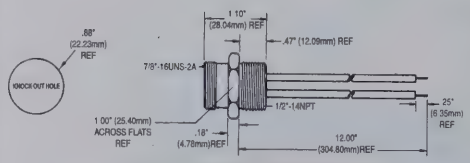




Straight Female Plug



90° Female Plug



Straight Male Receptacle

MINI-CHANGE® MOLDED CONNECTORS

Used with: 18mm and 30mm tubular proximity sensors, limit switches, rectangular proximity and photoelectric sensors, and solenoids. Applications include: sensors on conveyors, hydraulic valves, packing equipment, and material handling equipment. Quad-Beam® contact maintains constant pressure on the male pin to ensure optimum conductivity. High-performance, long-lasting gold over palladium-nickel plating on contact. An epoxy-coated coupling nut provides up to 500 hours of corrosion resistance and an anti-vibration guard. Plugs are straight or 90° and can be lighted. Rated 7-13A, 600V. Meets NEMA Enclosure Type 6P. Available through 12-pole configurations. UL recognized, CSA certified.

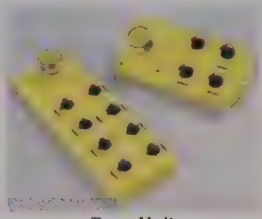
MULTIPORT INTERCONNECT SYSTEM

MULTIPORT INTERCONNECT SYSTEM (MPIS)®

Female Straight/Male Straight
Female Straight/Male 90°



Base Unit

STEP 1: MICRO CHANGE® MPIS® TOP-MOUNT BASE UNIT CABLE CORDSETS

Top-mount multi-port system offers conection for either input or output devices. Consolidate wiring, conserve space and reduce time and expense associated with control system wiring installation and maintenance. Protect against moisture and contaminants. Features factory-wired and tested base unit in which the wiring from 4, 6 or 8 control components is joined into a single cable extending back to the control panel. LED display offers quick and easy troubleshooting and confirmation of sensor status at a glance. Single keyway base unit with PVC jacketed 1.64′ (0.5m) cable. Used in conjunction with 8, 12 and 18mm proximity sensors, miniature controls, limit switches and solenoids.

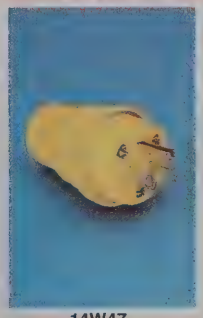
WATERTITE® PLUGS & CONNECTORS



14W47

15W47

Watertite® plugs and connectors made specifically for moisture-resistant performance. They deliver power longer, more reliably, and more safely than devices with slip-on boots. When properly mated, they form an enclosure that meets the requirements of NEMA 4, 4X and 6, IP 65, 66 and 67, and resists high-pressure hose down up to 1000 psi. *Watertite plugs and connectors each ordered separately.* UL listed.

MAX-LOC™ MULTIHOLE CORD GRIPS

These cord sealing grips are used when multiple conductors are being fed into control cabinets and similar applications. Engineered membrane can be removed to expose the exact number of holes needed for the cable being fed into the cabinet. Requires only one cabinet hole when multiple conductors are being fed into a control cabinet. Protect against cord pull-out. NPT form size: ½″ (F2). Liquidtight, moisture, and corrosion resistant. UL listed, CSA certified.

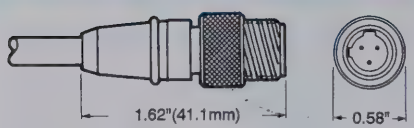
QUICK-DISCONNECT SYSTEM

USED IN CONJUNCTION WITH:

Proximity Sensors • Limit Switches • Photo Controls • Solenoids • Small Motors

(3012) (ne07100)



MICRO-CHANGE® MOLDED CONNECTORS

Used with 12 and 18mm tubular proximity sensors, tubular photoelectric sensors, and modular controls. Applications include: hydraulic and pneumatic cylinders, conveyors, and "pick-'n'-place" robots. Provide quick and easy replacement of miniaturized switches and sensing devices. Mechanically-keyed mating parts eliminate mismating and subsequent damage to control equipment. Rated 4A, 300V. Oil-resistant, PVC jacketed cable. UL listed, CSA certified. Available up to six poles. Meets NEMA enclosure Type 6 and IEC enclosure IP68 classification.

MICRO-CHANGE® ATTACHABLE CONNECTORS

Route cables through tight places where molded-on connectors won't fit. Replace damaged molded connectors quickly. Micro-Change® enables quick-disconnect wiring on specialty cables and pre-wired control system devices. Current rating: 4A. Meets IEC enclosure IP68 classification. Field wireable with a screwdriver.

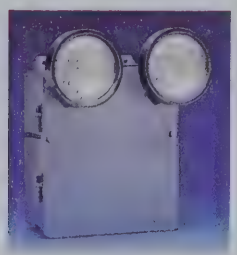
DUAL LITE

EMERGENCY LIGHTING UNITS

N4X SERIES INDUSTRIAL EMERGENCY LIGHTING UNITS



Compact sealed and gasketed emergency lighting units are corrosion and moisture resistant, capable of remote operation of 2 to 14 fixtures. Operating voltage: 120/277VAC. 7.2W heads. Feature fully automatic operation, pure lead maintenance-free battery, two glare-free sealed beam PAR-36 lamps, sealed and gasketed test switch and charge rate indicator light, silicone sealed lamp terminals, head and swivel, solid-state charger, automatic battery protection, and provisions for top conduit entry for power and remotes. 12V units are used to compensate for voltage drop when powering remote heads with long wiring runs. Constructed of injection-molded thermoplastic. Units can be wall or column mounted.

LITEFORMS™ NON-METALLIC EMERGENCY LIGHTING UNITS

Sleek styling in a low-profile silhouette that feature high-output halogen lamps and durable UV stable thermoplastic housing. 5W halogen lamps standard. **Type LZ2** and **LTURW** feature premium-grade pure lead battery. All others include lead-calcium battery. Wall-mount to standard electrical boxes. Provide relianble and consistent light fo a minimum of 1½ hours. High capacity units provide choice of system wattages to power remote fixtures. 12V units are used to compensate for voltage drop when using remote heads with long wire leads. Snap-together construction reduces installation time. 120/277VAC, 60Hz input voltage. Battery-operated models have lead calcium batteries. Color: white. Green lettering and black housings are available. *Contact your local Newark sales office.*

DUAL LITE

EMERGENCY EXIT SIGNS

LITEFORMS® LX SERIES NON-METALLIC LED EXIT SIGNS

Long-life LED lamps provide 20 years of service and low maintenance. Compact, UV-stable thermoplastic housing has universal mounting for easy installation. Operating voltage: 120/277VAC, 60Hz. Emergency operation module is optional for AC models; *ordered separately below.* All units are single/double face with canopy. Emergency models have nickel-cadmium batteries with expected life of 10 years. Wall, ceiling or end-mount to standard electrical boxes. Meets 1998 UL standards for brightness and uniformity. UL 924 listed. EPA/DOE Energy Star® compliant.

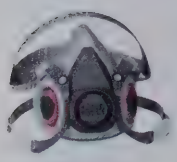
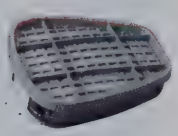
LOW-MAINTENANCE RESPIRATORS



Facepiece



Filter

Respirator

6000 series lightweight half facepiece respirators are low maintenance—there are no parts to replace except cartridges and filters. Can be disassembled, cleaned, and reused many times; replace the cartridges/filters when they have been used to capacity. *Order replacement filters separately below.* **Types 6191, 6291,** and **6391** come with P100 filters, which are 99.97% effective against dusts, fumes, mists, pesticide dusts, radionuclides, radon daughters, and asbestos-containing dusts. **Type 504** respirator cleaning wipes are also available; *order separately below.* NIOSH approved.

UNIVERSAL CIRCUIT BREAKER LOCKOUT

- For locking out electrical supply controlled by a circuit breaker
- Compact, universal design fits most circuit breakers
- Easily attached with no modifications to panel or circuit breaker
- Does not require hole in circuit breaker handle

Prevents inadvertent, accidental, or unintentional energization of electrical circuit for wide range of single-, double-, and triple-handle circuit breakers with 0.30″-0.60″ high and 0.25″-0.44″ thick switches. Permits individual circuit breakers to be locked in off position without locking out the entire panel. Lock and tag sold separately. *Contact your local Newark sales office for details.*

DIGITAL MULTIMETERS

80 SERIES III ANALOG/DIGITAL MULTIMETERS

- +/-0.05% VDC Accuracy - Type 87, 87/E
- +/-0.08% VDC Accuracy - Type 85
- +/-0.1% VDC Accuracy - Type 83

Series III Features:
- IEC-1010-1 1000V CAT III Input Protection, Enhanced EMI Shielding
- True RMS Measurement (Types 85, 87 and 87/E)
- Brighter Backlit Display with 20% Larger Digits

Types 87 and 87/E Only:
- Backlit Display
- True RMS Measurements
- 1ms Peak Min/Max
- 4½-Digit Modes

87 87/E

80 Series III features: high accuracy; 3¾-digit 4000-count display; Touch Hold® and relative modes; autoranging; Input Alert™ monitors jack connections; frequency, duty cycle, capacitance, min, max, average record mode; splashproof, and dustproof case. Each meter includes TL-75 test leads with HardPoints™ and AC70A alligator clips (except 87/E which comes with TL24 test leads, TP1 test probes, and an AC20 alligator clip) C81Y protective holster, 9V battery and a multi-lingual manual. Lifetime warranty. *Additional accessories available separately on page 1530.*

92F1137 Type 87-III Series III. **Each** **349.00**
83F2777 Type 87/E III Series III. **Each** **369.00**
92F1136 Type 85-III Series III. **Each** **319.00**
92F1135 Type 83-III Series III. **Each** **279.00**

METERS WITH NIST CERT. OF CALIBRATION

91F6362 Type 87-3-W/CERT Cert. of Calibration. **Each** **415.80**
91F6361 Type 85-3-W/CERT Cert. of Calibration. **Each** **369.00**

REPLACEMENT TEST LEADS

44F622 Type TL-75 Replacement Test Leads. **Each** **10.00**
50F9870 Type TL24 Replacement Test Leads (87/E). **Each** **18.00**

REPLACEMENT FUSES

52F4514 Type 943121 440mA/1000V Replacement Fuse. **Each** **6.50**
52F4513 Type 943118 11A/1000V Replacement Fuse. **Each** **9.00**

CARRYING CASE

44F7741 (r5508) Type C25 Soft Vinyl Case. **Each** **22.00** (ne00807)

26, 79 SERIES III TRUE-RMS DIGITAL MULTIMETERS

- ±0.3% VDC Accuracy
- ±1.9% VAC Accuracy
- 600V Cat. III And 1000V Cat. II Per IEC 1010
- Rugged Overmolded Case, Ergonomic Styling
- True RMS Measurements
- Frequency Counter
- Capacitance
- Low-Ohms Range With Zero Calibration
- Smoothing™ Mode
- Auto/Manual Ranging
- Automatic Touch Hold®
- *Lifetime Warranty*

79 Series III

High-resolution 4000/10,000-count display with 63-segment bar graph. VDC ranges: 10µV to 1000V. VAC ranges: 20mV to 1000V. Resistance: 10mΩ to 40.00MΩ. AC/DC current: 10A. Diode test. Audible continuity beeper. Sleep mode extends battery life. **Type 79** includes TL-75 test leads with HardPoints™. **Type 26** includes premium electricians test lead set with TL-24 test leads, one black AC-85A alligator clip and TPI test probes. Both models include 9V battery and manual. UL3111 listed, CSA and TUV approved. *See a selection of multimeter accessories on page 1530.*

52F4513 Type 943118 11A/1000V Replacement Fuse. **Each** **9.00**

CARRYING CASE

44F7741 (6510) Type C25 Soft Vinyl Case. **Each** **22.00** (ne53257)

27 SERIES INDUSTRIAL MULTIMETERS

- ±0.1% VDC Accuracy
- ±0.5% VAC Accuracy
- O-Ring Sealed Case
- EMI Shielding
- Autoranging
- Touch Hold® To Capture Readings
- -15°C to +55°C Operating Range
- MSHA Approval 2G-3665-0
- *Lifetime Warranty*

27

27 series analog and digital meters will withstand water, contaminants, chemicals, accidental drops, and several electrical overloads. Autoranging and manual range selection. Separately sealed battery/fuse door allows access without affecting primary case seal. Operates from –15°C to +55°C and in up to 95% relative humidity. High-resolution, 3200-count, 3½-digit analog display. Tests changing or stable signals. Includes TL-75 test leads, 2 insulated alligator clips, spare fuse, 9V battery, and manual. Features min-max mode to store highest and lowest readings and relative mode to display only changes in readings. Both types are UL 1244 listed. Meet MIL-STD-28800 for Style A, Class 2 instruments. *See a selection of multimeter accessories on page 1530.*

8060 SERIES 4½-DIGIT MULTIMETERS

Type 8062A Type 8060A

- **Measure True-RMS AC Voltage & Current, DC Voltage & Current and Resistance**
- **Fast Audible-Visual Continuity Tests**
- **Relative Reference (offset)**
- **Low-Power Ohms on all Resistance Ranges**
- **Frequency, Db & Conductance Measurements (Type 8060A)**
- ***1-Year Warranty***

20,000-count digital display multimeters offer more measurement capabilities than many bench/portable meters. Both meters combine precision and accuracy with features for use in audio, video, telecom or computer technology. Basic DCV accuracy: **Type 8062A**: ±(0.05% + 2 digits), **Type 8060A**: ±(0.04% + 2 digits). **Type 8060A** measures frequency to 200kHz. UL 1244 listed. Meters include TL70A test leads, 9V battery, spare fuse and operator's manual.

70 Series III

10 SERIES DIGITAL MULTIMETERS

- **Measures VAC/VDC/Ohms**
- **Capacitance to 9999µF (Types 11/12/12B)**

10 series compact digital multimeters are designed to support first-level electrical/electronic troubleshooting and provide quick checks around the house. User-friendly control panel and slide switch allow one-handed operation. Features: diode/continuity test, manual and autoranging, sleep mode, V Chek™ mode (**types 11/12/12B**), min/max record with relative time stamp (**types 12/12B**), Continuity Capture™ (**types 12/12B**), and input change alert (**types 12/12B**). 1.5% DC Accuracy (type 10). 0.9% DC Accuracy (types 11/12/12B). **Type 12B** has the same features as **type 12**, only it has an easy-to-use rotary dial. All models include 9V battery, test leads and manual. 2-year warranty. **Types 10-W/CERT, 11-W/CERT, 12-W/CERT,** and **12B-W/CERT** have NIST Certificate of Calibration. **Type C10** is a holster. **Type C12A** is a soft case. *For a complete selection of multimeter accessories, contact your local Newark sales office.* UL 1244 listed, and TUV approved.

FLUKE

MULTIMETERS AND TESTERS

TYPE 16 DIGITAL MULTIMETER WITH THERMOMETER

- ±0.9% VDC Accuracy
- Temperature and Microamp Measurements
- Millivolt Readings for Accessory Compatibility
- V-Check™ Auto Selection Features: Automatic Readings of AC and DC Voltage Ohms/Continuity Beeper
- Continuity Capture™
- Min/Max with Time Stamp
- Capacitance up to 10000µF

Type 16 digital multimeter has all the features of the **type 12** and adds temperature and microamp measurement capabilities. Includes **type C10** holster that can also be ordered separately as a replacement, **type 80AK** temperature adapter, **type 80PK-1** temperature probe, TL-75 test leads with Hard Points™, 9V battery, instruction manual, and 3-year warranty. **Type C12A** is a soft case; *ordered separately below.*

7 SERIES ELECTRICAL TESTERS

7-300

7-600

- ±1.5% DCV Accuracy
- ±2.9% ACV Accuracy
- 4000-Count Digital Display
- Auto Selection Features: Automatic Readings of AC and DC Voltage; 400 Ohm Range/Continuity Beeper
- TL-75 Test Leads Included
- High Visibility Yellow Plastic Housing

The economical **7 series** testers offer first-level electrical troubleshooting. The compact design and slide switch offer one-handed operation. Automatic readings of AC and DC volts (300V in **type 7-300**; 600V in **type 7-600**) and ohms. Includes **type TL-75** test leads with Hard Points™, 9V battery, instruction manual, and 2-year warranty. UL listed, CSA certified, TUV approved and CE compliant.

TYPE T2 VOLTAGE/CONTINUITY TESTER

- High-Resistance Voltage and Continuity Tester with LED and Audible Indicators
- One-Piece Unit with Attached Test Leads and Strain Relief
- Auto-On/Off Feature
- 1000V Maximum Operating Voltage

Type T2 voltage/continuity tester is a one-piece, pocket-sized unit with attached test leads that switches automatically between voltage and continuity modes. Tests for AC voltage to 600V and DC voltage to 220V. Unit will indicate continuity via beeper and LED when the impedance between the leads is less than 150kΩ. Unit comes with 2 AA batteries, instruction sheet, and 1-year warranty.

83F2779 Type H5 Holster. **Each** **14.95**
(ne10730)

T5 SERIES MULTI-TESTERS

T5-1000

- Measure AC or DC Voltage, AC Current, Resistance, and Continuity
- Voltage Indicator Lights when more than 30VAC or 60VDC is Present
- Display Hold/Automatic Power Down/Low Battery Indication

T5 series multi-testers provide a variety of measurements in one compact test unit. Leads are attached to unit with an integral strain relief. Measure up to 100A AC current and 1000 ohm resistance. **Type T5-600** measures AC or DC voltage to 600V. **Type T5-1000** measures AC or DC voltage to 1000V. Basic DCV accuracy: ±(1.0% + 1 digit). Units come with 2 AA batteries, instruction sheet, and 2-year warranty.

91F6069 Type T5-600. **Each** **89.95**
91F6070 Type T5-1000. **Each** **99.95**

(ne10731)

TYPE 30, 32, and 36 CLAMP METERS

36

30, 32

- Rugged, Easy-To-Use Meters
- Types 30 and 32 Measure ACV, Current, Resistance, and Continuity
- Type 36 Measures DCV and Current
- Types 32 and 36 Offer True-rms AC Measurements
- 600V Cat III per IEC 1010 Safety Rating
- *1-Year Warranty*

The **30 series** family are rugged, self-contained clamp meters for a variety of jobs. **Type 30** is excellent for troubleshooting commercial and residential electrical and HVAC systems with traditional linear loads to 400A/600V. **Type 32** is ideal for non-linear loads like adjustable frequency drives and HID lighting systems with a maximum reading of 600A/600V DC. **Type 36** adds max-hold for measuring in-rush current or maximum load on a circuit and can measure to 600A/600V AC; 1000A/600V DC. **Type 30** and **32** include C31 softcase, TL75 test leads, 9V battery and operator's manual. **Type 36** includes C36 soft case, TL75 test leads, 9V battery and operator's manual.

(6530) (nec7497)

TYPE 31 AND 33 CLAMP METERS

- True-rms Readings for Traditional and Non-Linear Loads
- Measures AC Current to 400A and Frequency to 10kHz
- Auto & Manual Ranging
- Typical AC Accuracy: ±2% + 2 Digits
- UL 1244, CSA & VDE Approved
- *1-Year Warranty*

Type 31 and **33** clamp meters are rugged and reliable units for electrical toubleshooting. **Type 33** also features Smoothing™, min/max/average record and crest modes. Models include **C30** holster, 9V battery and operator's manual.

93F1139 Type 31 Clamp Meter. **Each** **239.00**

(5559) (ne53233)

VOLTALERT ™ VOLTAGE DETECTOR

- Fits in Shirt Pocket for Convenience
- All Outer Surfaces are Non-Conductive for Safety
- Operating Range:24- 90-6VAC (Type1LAC-A), 90-600 VAC (Type 1AC)
- Detects Voltage Without Metallic Contact

VoltAlert™ is a pocket-sized AC voltage detector. The detector is easy-to-use, simply touch an outlet or cord with the tip. When the outlet or cord glows red, there is voltage in the line. The probe is composed of injection-molded high-impact, non-flammable PVC and ABS. Electricians, maintenance, service, and safety personnel can quickly test for energized circuits and defective grounds. For use on the factory floor, in the shop or at home. Packaging is UL listed, CSA certified, TUV approved; product is UL listed and CSA certified.

52F8879 Type FLUKE-1AC-A1. **Each** **20.95**
83F2778 Type 1LAC-A. **Each** **21.95**
(6534) (nec7501)

TYPE 45 DUAL DISPLAY BENCHTOP/PORTABLE DIGITAL MULTIMETER AND ACCESSORIES

- **0.025% Basic VAC Accuracy**
- **True-RMS Voltage and Current Readings**
- **Includes RS-232 Interface**
- **Closed-Case Calibration**

Type 45 multimeter is equipped with a multifunctional vacuum-fluorescent display that allows more measurements to be taken from a single connection and a single instrument set-up than previously available. 5-digit, 100,000-count meter has additional user-selected resolutions of 30,000 and 3,000 counts and a built-in RS-232 interface. Measurement functions include: DC volts/amps, true-RMS AC volts/amps, AC + DC capability, and ohms. Additional measurement capacity covers frequency, dB, audio power and audio continuity, diode test and min/max modes. Touch-hold and relative modes. The compare function offers in-tolerance testing that shows a high/lo/pass evaluation of components or inputs. Optional **Quickstart 45** software, *ordered separately from table below,* allows automated communications via the RS-232 interface. An optional rechargeable battery and soft carrying case are ideal for precision field-service applications. This multimeter may also be used in IEEE systems when used with IEEE-488.2 interface and rackmount kit. Both the battery and IEEE options can be installed without sacrificing any standard features. Multimeter includes **TL-70A** test leads, line cord, quick reference guide and manual. *Order optional accessories separately below.* One year warranty.

FLUKE 43 POWER QUALITY ANALYZER

- **Catch Intermittents with Monitoring Functions**
- **Sags and Swells**
- **True-RMS Voltage and Current**
- **Watts, Power Factor, Displacement Power Factor, VA, and VAR**
- **Voltage, Current, and Power Harmonics**

Combines capabilities of a power quality analyzer, multimeter, and scope. Measures power harmonics and catches intermittents. Volts/amps/hertz display shows voltage to 1250V, amps to 50.00kA, and frequency from 40.0 to 70.0Hz. Power display shows VA and VAR to 2.50MΩ, PF from 0.00 to 0.25, and DPF from 0.25 to 1.0. Harmonics display shows voltage, current, and power to 51st harmonic, line frequency between 40Hz and 70Hz fundamental, phase between 2nd to 51st harmonic, K-factor to 30.0. Minimum pulse width of transient capture is 200ns. Records sags and swells and 2 selectable parameters for up to 16 days. Also measures resistance, diode voltage drop, continuity, and capacitance.
Includes the following accessories: TL24 test leads, AC20 industrial test clips, AC85 large jaw alligator clips, TP1 flat-tipped slim-reach test probes, 80i-500s 500A AC current clamp, SW43W FlukeView® Power Quality Analyzer Software for Windows, and user manual, PM 9080/001 optically isolated RS232 interface adapter, BP120 rechargeable NiCad battery pack, PM 8907 line voltage adapter/battery charger, shielded banana-to-BNC adapter, user manual, application guide, and power quality video.

83F5083 Type FLUKE 43. **Each** **1995.00**

TYPE 39 POWER METER AND TYPE 41B POWER HARMONICS ANALYZER

39

41B

- **Combines a Digital Multimeter, Oscilloscope, and Harmonic Analyzer in One Tool**
- **Troubleshooting for Three-Phase Systems or Non-Linear Loads**
- **Three Views of Each Reading: Waveform, Harmonic Bargraph, and Numeric Values**
- **Direct Three-Phase Readouts from a Single-Phase Measurement**
- **True RMS Voltage from 5.0V to 600V; True RMS Current from 1A to 500A**
- **Min/Max and Average Recording**
- **1 Year Warranty**

Type 39 is designed for electricians and electrical contractors who need instantaneous, straightforward measurements to evaluate power usage, troubleshoot electrical problems, and manage energy costs. Offers direct three-phase readings from a single-phase measurement. **Type 41B** provides plant maintenance engineers and power quality consultants the features they need to optimize power system performance and analyze harmonics. **Type 41B** includes data storage for eight complete measurement sets, an optically isolated RS-232 interface cable, and DOS or Windows compatible software. All include 4 'C' batteries, TL24 test leads, TP20 test probes, AC20 test clips and 80i-500s AC current probe and operator's manual.

◆ = Optional and Recomended; ● = Included

1 Types 16, 12B and **10 series** DMMs will show 1° resolution, degree C or F
2 For Fluke **types 30, 32**, and **36** only
4 Types Y8101A: 1A resolution above 40A with **types 26** and **79**
5 Type 80i-400: 1A resolution above 40A with **types 26** and **79**
6 Type 80i-600A: 1A resolution above 40A with **types 26** and **79**
7 1A resolution
8 Minimum specified accuracy is 20A for AC current accuracy
9 Minimum specified accuracy is 30A for true RMS AC current measurements with **types 863** and **8678**. Low limit does not apply when doing average-sensing measurements
10 10A minimum AC specified accuracy
11 Types 80K-6 and **80K-40**: 1V resolution DC only with **10 series**
12 Types PV350: 1 psig/in Hg resolution
13 Type C17Y duracase will hold a **10 series** meter or 7 series in a **type C10** holster
14 loose fit
15 Type C800 hard case works with a variety of hand-held meters, but the fit will be loose
16 Without holster
17 1A resolution for AC current; 0.1A resolution for DC current
18 Compatible for DC only

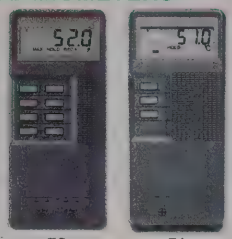
FLUKE

THERMOMETERS AND ACCESSORIES

50 SERIES HANDHELD DIGITAL THERMOMETERS



52 51

- **Work with K- or J-Type Thermocouples**
- **Select °C or °F Readout**
- **Simple Pushbutton Controls for All Functions**
- **Convenient HOLD Button**
- **Variety of Interchangeable Thermocouple Probes Available**
- **0.1°C (0.2°F) Resolution Over Entire Range of Instruments**
- **Dual Thermocouple Model (Type 52)**
- **Scan, Differential & Min/Max Recording Modes (Type 52)**

Types 51, 52 offer high accuracy and resolution, excellent repeatability. Accept any K- or J-type thermocouple with standard mini-connector plug. Include 9V battery, manual, one **80PK-1** probe; **type 52** has 2 probes. 3-year warranty. 0.1°C (0.2°F) resolution over entire range of instruments; select °C or °F readout.

Stock No.	Type	Accuracy ±(% of Reading + °C) K-Type	Accuracy ±(% of Reading + °C) J-Type	Each

80PK-IR INFRARED TEMPERATURE PROBE

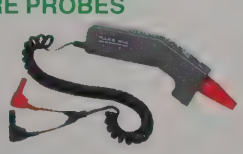
- **Compatible with Digital Thermometers with Type K Connector**
- **Non-Contact Measurement for Moving Subjects, Sterile Conditions, Electrically Live and Hard-to-Reach Objects**

Infrared probe withstands harsh and demanding conditions. Range: 0° to 500° (–18° to 260°C), accuracy ±3%. Use in a variety of temperature measurements, including predictive and preventive maintenance. Simple operation: plug into mini-connector input of a digital thermometer. Readings are taken by pointing the probe at the object. Temperature is shown on the thermometer's display.

92F3354 Type 80PK-IR. **Each** **159.00**

(5349) (de03840)

80T INFRARED TEMPERATURE PROBES



- **Compatible with Most DMMs**
- **Rugged, Ergonomic Design**
- **Non-Contact Measurement for Moving Subjects, Sterile Conditions, Electrically Live and Hard-to-Reach Objects**

Use in variety of temperature measurements, including predictive and preventive maintenance. Simple operation: plug into digital multimeter, set to mVDC and point probe at subject. Display temperature within 1 second. Include 9V battery, manual. **Type 80T-IR** has a range of 0° to 500°F (–18° to +260°C), accuracy ±3%, and is switch selectable °C or °F. **Type 80T-IR/E** is the same as **type 80T-IR** but with range of 32°F to 1000°F, measuring in °F only.

95F3641 Type 80T-IR. **Each** **159.00**
91F6066 Type 80T-IR/E. **Each** **195.00**

(5319) (de01479)

PV350 DIGITAL PRESSURE/VACUUM MODULE

- **Combination Pressure and Vacuum Gauge**
- **Compatible with Most DMMs**
- **Measures HVAC/R, Hydraulic, Pneumatic Pressures to 500 psig**
- **Vacuum Measurement to 29.9″ Hg**

Compact module plugs into standard banana jacks on most digital multimeters. Selectable display for English or Metric units. Solid-state transducer sealed in 316 stainless steel is compatible with most liquids and gases. Includes 8″, ¼″ diameter PVC cable, ¼″ male pipe thread connector, ¼″ female pipe thread to ¼″ flare male adapter, 9V battery, manual.

93F3050 Type PV-350. **Each** **269.00**

(5318) (de01478)

MULTIMETER SERVICE KIT

Kit 87-III

Fluke **type 87-III** service kit contains everything needed for use in a wide variety of mechanical and engineering fields. Kit includes a **type 87-III** digital multimeter with heavy-duty carrying case, TL20 test lead set, 80i-400 AC current clamp, and extensive training literature.

83F4178 Type KIT-87-3 SERVICE KIT. **Each** **484.00**

(5346) (de03811)

FIBER-OPTIC METER AND LIGHT SOURCES

FOM

FOS-850/1300

- **Input Connector: Fixed ST®**
- **Battery Life: 16 Hours Minimum; 8V Alkaline**
- **LED Low Battery Indicator**
- **Operating Temperature: 0°C to +40°C (+32°F to +104°F)**
- **Storage Temperature: –20°C to +70°C (–4°F to +158°F)**

Type FOM fiber-optic meter helps test and maintain fiber-optic cable without having to buy a whole new meter. Plugs directly into any DMM with an mV DC function and a 10MΩ input impedance, such as the Fluke **type 87**, *ordered separately on this page*. Quickly and accurately verifies fiber-optic cable system loss. Highly accurate readings mean less work and less repeated testing. A variety of light sources and patch cords, and an accessory coupler, *ordered separately below*, allows testing different cable types and lengths. UL listed, CSA certified, CE compliant.

Stock No.	Type	Description	Each
52F8875	FOM	Fiber-Optic Meter	295.00
52F8876	FOS-850	Fiber-Optic Source	195.00

FLUKE SCOPEMETER® COMPARISON CHART

Fluke's ScopeMeter® test tools are the best hand-held scopes for rugged on-the-go applications. ScopeRecord™ provides 30K deep memory for extended waveform recording and a time-of-day (real-time) clock to pinpoint events. TrendPlot™ meter logging now has a time-of-day and date stamp. This versatile electronic chart recorder helps to better identify measurement peaks and valleys for up to 40 days. Full-function true-rms multimeter measures VDC, VAC, Hz, duty cycle, pulsewidth, ohms, and much more. With the Measure Menu feature, one button access allows the user to select a set-up from 40 commonly used measurements. Continuous autoset provides a stable, user measurement on virtually any signal. UL listed. *Order accessories separately on this page.* **3-year warranty**.

FLUKE

CABLE TESTERS AND ACCESSORIES

TYPE DSP-4000 DIGITAL CABLEANALYZER™

NEW

DSP-4000

- **Exceeds All Specification Requirements for Category 5, 5E, and 6**
- **Accepts the New Manufacturer-Specific Category 6 Connectors**
- **Test High-Performance Cable to 350MHz**
- **Provides Extremely Fast Test Times: Performs a Complete Two-Way Auto Test in Approximately 10 Seconds**
- **Automatically Diagnoses Cabling Faults and Displays Results Graphically and in Test**
- **Monitors Network Traffic on 10Base-T and 100Base-T Ethernet Systems**
- **Shows Detailed Plots of NEXT, ELFEXT, PSNEXT, Attenuation, ACR, and Return Loss up to 350MHz**
- **Provides Built-In Talk Mode for Two-Way Voice Communication Between the Main and Remote Units**
- **Includes Tone Generator for Use with a Tone Probe, Such as Type 140, to Trace Wires and Identify Cable in LAN Installations**
- **Includes Free Windows®-Based DSP-Link Software**

Type DSP-4000 digital CableAnalyzer™ is designed for cable installers and network owners who need to certify high-speed copper and fiber, cabling to today's industry standards and tomorrow's emerging standards. Includes: cable analyzer, smart remote, display box, DSP-LINK software, quick-reference card, talk sets (2), AC adapter/chargers (2), instrument straps (2), Category 5E basic link adapters (2), Category 5E channel adapter, Category 5E channel/traffic adapter, coax patch cable (BNC), RJ-45 calibration cable, RS-232 serial cable, RJ-45 to BNC adapter cable, soft carrying case, and manual.

48F2922 Type DSP-4000. **Each** **5995.00**

ACCESSORIES

Type DSP-FTA410 is a fiber-optic test adapter that allows bi-directional testing of multimode fiber links at 850nm and 1300nm. Also measures optical power, loss, length, and propagation delay; provides pass/fail results based on common fiber test standards; and may be used with a separate source (**type LS-1310/1550**) to measure optical power and power loss of single-mode fiber at 1310nm and 1550nm. Includes: fiber test adapters (2), SC/ST patch cords (4), and ST/ST adapter.

48F2923 Type DSP-FTA410S. **Each** **3995.00**

Type DSP-FTK is a fiber-optic test kit that includes an optical power meter accessory (**type DSP-FOM**), a combination 850/1300nm fiber-optic source, patch cords, ST/ST adapter, and hard carrying case.

16F9098 Type DSP-FTK Fiber-Optic Test Kit. **Each** **995.00**

Type LS-1310/1550 includes a 1310/1550nm laser source, patch cords, ST/ST adapter, and hard carrying case.

48F2924 Type LS-1310/1550 Laser Source. **Each** **2995.00**

Type DSP-CMS is cable manager software that organizes cable test reports in a computer database.

01F097 Type DSP-CMS. **Each** **295.00**

Type 140 tone probe. Includes spare probe tip and 9V battery.

48F2925 Type FLUKE 140 Tone Probe. **Each** **150.00**

TYPE DSP-2000 DIGITAL CABLEANALYZER™

Includes DSP-2000 CableAnalyzer™, DSP-2000 smart remote, DSP-LINK software, PC serial interface cable, 2 AC adapter/chargers, hard carrying case, one coax patch cable, two 2 m UTP Category 5 shielded patch cables, one 10 inch calibration cable, one RJ45 to BNC adapter.

01F096 Type DSP-2000 120. **Each** **4595.00**
(34095) (ne34095)

620 LAN CABLEMETER®

Type 620 LAN CableMeter® allows one-person cable verification without a remote unit connected. Includes: cable identifier (#1), carrying case, one UTP category 5 patch cable (RJ45-RJ45, 3ft. length), reference card, and manual. *Order additional cable identifiers below.*

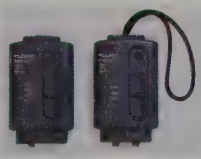
96F8722 Type 620. **Each** **595.00**
96F8723 Type N6201 #2-4 Identifiers. **Each** **90.00**
96F8724 Type N6202 #5-8 Identifiers. **Each** **120.00**
96F8725 Type N6203 STP Accessory Kit. **Each** **140.00**
(5387) (ne06118)

610 LAN CABLEMAPPER®

Type 610 LAN CableMapper® verifies UTP cables terminated to RJ-45 connectors—up to 400 feet. Includes: cable identifier (#1), soft carrying case, 9V battery, manual, and N6103 cable kit (one 24″ RJ-45 to RJ-45 patch cable, to RJ-45 to RJ-45 female couplers.)

95F8957 Type 610. **Each** **429.00**
95F8959 Type N6101 #2-4 Identifiers (For 610). **Each** **125.00**
95F8960 Type N6102 #5-8 Identifiers (For 610). **Each** **165.00**
95F8961 Type N6103 Cable Kit. **Each** **30.00**
(5386) (ne06117)

TYPE DSP-FTK FIBER-OPTIC TEST KIT AND ACCESSORIES



Adds optical power loss measurement to **types DSP-100**, **DSP-4000** and **DSP-2000** cable testers. A combination of power meter and optical source detects bad connections, broken fibers, plus loss of power from bends and fiber type mismatches. Test reports contain wavelength, measured loss, loss limit, test direction, and reference level. The fiber-optic meter and optical sources operate on 9V alkaline batteries (included) and have a minimum life of 16 hours. Units also include ST-to-ST patch cable and couplers.

FIBER-OPTIC TEST KIT

Stock No.	Type	Description	Each
16F9098	DSP-FTK	Contains **Type DSP-100** and **FOS-850/1300**	995.00

ACCESSORIES

01F099	DSP-FOM	Fiber-Optic Meter	495.00
52F8876	FOS-850	850nm ±30nm Fiber-Optic Source	195.00
52F8877	FOS-1300	1300nm –40/+50nm Fiber-Optic Source	395.00
52F8878	FOS-850/1300	850nm ±30nm/1300nm –40/+50nm Fiber-Optic Source	495.00
16F8500	FOC-ST/ST	ST-to-ST Fiber-Optic Patch Cable	32.00
16F8501	FOC-ST/SMA	ST-to-SMA Fiber-Optic Converter Cable	55.00
16F8502	FOC-ST/FC	ST-to-FC Fiber-Optic Converter Cable	49.00
16F8503	FOC-ST/SC	ST-to-SC Fiber-Optic Converter Cable	39.00

(19340) (ne11133)

DSP-CMS CABLE MANAGER SOFTWARE

Cable manager organizes cable test reports in a computer database. Find, edit, print, and save your cable information. Allows for simple PC to **types DSP-100**, **DSP-4000** and **DSP-2000** cable meter communication and downloading of autotest reports. Also capable of sort and searching through several fields, such as cable ID, site, pass/fail, and more. Features: quick sort allows choice of one sort criterion, such as pass/fail summary, and advanced sort allows choice of multiple sort criteria.

01F097 Type DSP-CMS. **Each** **295.00**
(19341) (ne11134)

DIGITAL PHOSPHOR OSCILLOSCOPES

DIGITAL PHOSPHOR OSCILLOSCOPES TDS3000 SERIES

- 500MHz, 300MHz, and 100MHz Bandwidths
- Sample Rates Up to 5GS/s
- 2 or 4 Channels
- Full VGA Color LCD On All Models
- Built-in Floppy Disk Drive for Easy Storage and Documentation
- Centronics Port Standard on All Models for Quick, Convenient Hardcopies
- 9-bit Vertical Resolution
- Multi-language User Interface
- QuickMenu User Interface for Quick, Easy Operation
- Optional Modules for:
  - RS-232, GPIB, or VGA Communication Ports
  - Video Applications - Custom Video Trigger, Line Count Trigger, NTSC, PAL, SECAM Display Graticules
- 4 Channel Models Standard Features:
  - Advanced Triggers - Glitch, Width, and Logic
  - FFT (Fast Fourier Transform) for Frequency and Harmonic Analysis
- Battery Power Option for Convenient Use in the Field or Away from the Bench (batteries not included)
- Support for Active Probes, Differential Probes, and Current Probes

TDS3000 series oscilloscopes are portable Digital Phosphor Oscilloscopes (DPOs). DPOs make dealing with complex signals simple. DPOs display, store and analyze in real-time three dimensions of signal information: amplitude, time and distribution of amplitude over time.
Benefits include: an intensity graded color display to provide frequency information of signal amplitudes and widths, to help locate and characterize elusive waveform anomalies; fast update rate makes it easier to capture and display infrequent waveforms or waveform variations.
Flexible features: optional communication and application modules enable the instrument to be configured for specific applications or upgraded without returning it to the manufacturer; the TekProbe® level II interface provides power to a range of application specific accessories.
Type TDS3000 series graphical user interface allows access to the main controls with a single button. It offers a new operating mode called quickmenu. It is quick to learn and quick to use, also an on-line tour disk gives an overview of the product's operation and capabilities. All models include probes, power cord, accessory tray, protective front cover, NIST - traceable certificate of calibration, 3-year warranty covering all labor and parts, excluding probes.
Types TDS3014, TDS3034, TDS3054 only include application modules **type TDS3FFT** and **TDS3TRG**.

TYPE TDS 3000 SERIES CHARACTERISTICS

Acquisition Modes: Peak Detect, Sample, Envelope, Average, Single Sequence
Trigger System: Main - Auto, Normal; B Trigger; Trigger after Time Range; Trigger after Events Range; External Trigger Input.
Trigger Types: Edge, Video, Logic (Standard on **types TDS30X4**, must purchase **type TDS3TRG** module for **TDS30X2**), Pulse (Standard on **types TDS30X4**, must purchase **type TDS3TRG** module for **TDS30X2**).
Measurement System: Automatic: Period, Frequency, +Width, -Width, Rise Time, Fall Time, +Duty Cycle, -Duty Cycle, +Overshoot, -Overshoot, High, Low, Max, Min, Pk-Pk, Amplitude, Mean, Cycle Mean, RMS, Cycle RMS, Burst Width, Thresholds, Gating
Waveform Processing: Deskew, Arithmetic Operators, Autoset
I/O Interface: Hardcopy Port (Standard - Centronics)
(See **types TDS3GM** and **TDS3VM** for optional I/O)
Hard Copy Capability: File Formats: img, TIF, PCX, BMP, EPS; Printer formats: Thinkjet, Deskjet, Laserjet, Epson (9&24 pin).
Electromagnetic compatibility: meets or exceeds EN55011 Class A Radiated and Conducted Emissions; EN50082-1; FCC 47 CFR, Part 15 Subpart B, Class A; Australian EMC Framework; Russian GOST EMC regulations
Safety: UL3111-1, CSA 22.2 No. 1010.1, EN 61010-1/A2:1995
Physical: 14.8 x 6.9 x 5.9" (375 x 176 x 149) W x H x D
Weight: 7 lbs (3.2); 11.5 lbs (5.2) w/battery

DIGITAL REAL-TIME OSCILLOSCOPES

TDS 540C SERIES INSTAVU™ ACQUISITION DIGITIZING OSCILLOSCOPE

- **500MHz Bandwidth**
- **Sample Rates to 2 GS/s**
- **4 Input Channels with 1mV to 10V/div. Sensitivity**
- **Floppy Disk Storage**

Type TDS 540C:GP digital storage oscilloscope has InstaVu™ acquisition, which lets you find infrequent glitches with a maximum waveform capture rate of 400,000 wfms/s. 29 built-in automatic measurements, waveform histograms, and measurement statistics to speed up circuit analysis. 4ms sample-rate window. Vertical resolution is 8 bits (256 levels over 10.25 div.), more than 13 bits with high resolution, 11 bits with averaging. Maximum input voltage is 300V CAT II ±400V peak. Main and delayed-time bases. Features InstaVu™, peak detect, sample, single-sequence, envelope, average, high-resolution, and FastFrame™ acquisition modes. Trigger system includes types edge, logic (pattern, state, setup/hold), pulse (glitch, runt, width, slew rate, timeout). Outputs include monochrome VGA display, GPIB interface, and GPIB, RS-232, and Centronics® ports. Power: 90 to 250V rms, 45 to 440Hz, 300W maximum. Weight: 31 lbs. UL 3111-1, CSA-22.2 No. 1010.1 safety certification. Includes 4 P6139A probes, front cover, user manual, quick reference guide, performance verification, NIST-traceable certificate of calibration, programmer's manual, US power cord. **Type TDS 540C:XL** includes option XL features: FFT and advanced math, and 500K max record length. 3-year warranty (1-year warranty on probes).

83F3797 Type TDS540C:GP. **Each** **14995.00**
83F3798 Type TDS540C:XL. **Each** **17,990.00**

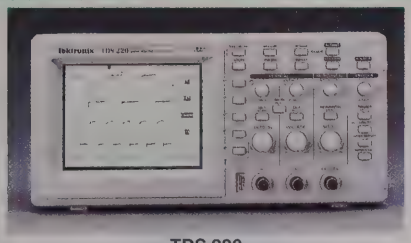
TDS200 SERIES DIGITAL REAL-TIME OSCILLOSCOPES AND ACCESSORIES



TDS 220

- **Maximum Sample Rate: 1 GS/s on Each Channel**
- **Sweep Speeds: 5 ns/div. to 5 s/div.**
- **Vertical Sensitivity: 10 mV/div. to 5 V/div. at Full Bandwidth; 2mV/div. to 5 mV/div. at 20MHz**
- **Record Length: 2500 Points per Channel**
- **2 Channels**

TDS series provides real-time acquisition to the full bandwidth. The waveform storage feature allows the user to save waveforms for later analysis, comparison, or printing. Cursors with readout, 2 reference waveforms, 5 setup memories, 5 automatic measurements, and autoset. Includes 2 **type P6112** passive probes; user manual, power cord, NIST-traceable certificate of calibration. **Type TDS210** has a 60MHz bandwidth; **Type TDS220** has a 100MHz bandwidth. *3-year warranty.*

TDS400 SERIES DIGITAL STORAGE OSCILLOSCOPES

TDS460A

TDS400 series feature 14 hardcopy formats, 25 automatic measurements, peak detect, roll mode (triggered and untriggered roll), pass/fail limit testing, advanced signal processing, and a floppy disk drive, 1ns/div - 20s/div sweep speeds, and 1mV to 10V/div vertical sensitivity. Vertical resolution: 8 bits (up to 12 bits w/hi-res). Record length: 120K/channel. Includes 1 probe per channel (**type P6138A**), video trigger, user manual, NIST-traceable certificate of calibration, power cord, and *3-year warranty.*

Stock No.	Type	Bandwidth	Max. Sample Rate	Channels	Each
01F2433	TDS430A	400MHz	100MS/s/Channel	2	**5,990.00**

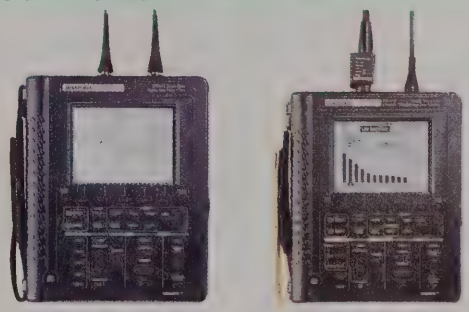
THS 700 SERIES DIGITAL REAL-TIME OSCILLOSCOPES



THS 730A THS 720P

- **Safety: Isolated Channel Architecture**
- **Advanced Triggering: Video & Pulse-Width**
- **Vertical Sensitivity: 5mV–50V per Div.**
- **Glitch Capture: ≥ 8 ns**
- **2 Channels; 2 Digitizers**
- **Max. Record Length: 2500 Pts**

THS700 series are full-featured digital real-time oscilloscopes combined with true RMS DMMs. Cursors. Video trigger. Voltage and resistance measurements. Waveform storage. Scope and meter modes operate simultaneously and independently—on the same or separate channels. **Type THS720P** provides power measurements capability. Applications: Design, test, and service of high-speed electronic circuitry; medical imaging, industrial automation, process control, computers, variable speed drives, research and development; and data compression. Include 2 probes, user manual, standard meter lead set, NiCad rechargeable battery pack, AC power adapter, soft carrying case, cable and adapter for RS-232 interface, and NIST-traceable certificate of calibration. **Types THS710A, THS720A,** and **THS730A** come with 2 **type P6117** probes; **type THS720P** comes with 2 **type P6113B** probes. *Order replacement probes separately; contact your local Newark sales office.*

DC-COUPLED CURRENT PROBE

NEW

When combined with a **TDS series** oscilloscope, **type TCP202** enables users to make direct readout DC and AC current measurements. Split core construction for easy circuit connection. DC to 5MHz bandwidth. 15 amps DC + peak AC current. 50 amps peak pulse current. Cable length: 7.2′ (2.2). For any Tektronix Probes/Accessories see quick reference chart, below.

85F021 Type TCP202. **Each** **1450.00**
(33697) (ne33697)

CURRENT PROBE

Type A600 series current probes are specifically designed for current measurements with **type THS series** oscilloscopes, available *on page 1535*. **Type A621** industrial-style clamp-on can measure AC currents from 100mA to 2000A peak over a frequency range of 5Hz to 50kHz. **Type A622** is a long-nose style clamp-on for AC/DC current measurements from 50mA to 100A peak over a frequency range of DC to 100kHz.

01F2438 Type A621. **Each** **400.00**
01F2474 Type A622. **Each** **430.00**
(33692) (ne33692)

CURRENT PROBE SYSTEM

NEW

Type AM503S consists of a current probe amplifier, **type A6302** current probe (50MHz/20A), a power module, and a plug-in toolbox. Provides simultaneous AC/DC measurements. DC up to 50MHz bandwidth. Supports different probes listed separately below. Continuous current amplitudes from mA up to 500A (peak up to 700A). High sensitivity. One-button auto-balance and probe degauss. No need to calibrate amplifier with specific probes.

Stock No.	Type	Description	Each
01F2475	AM503S	Current Probe System	**3350.00**
83F2190	A6302	50MHz/20A Probe	**920.00**
83F2191	A6302XL	17MHz/20A Probe	**1395.00**
83F2192	A6303	15MHz/100A Probe	**1850.00**
83F2193	A6303XL	10 MHz/100A Probe	**2295.00**
83F2194	A6304XL	2 MHz/500A Probe	**2395.00**

(33689) (ne33689)

HIGH-VOLTAGE PASSIVE PROBE

Type P5100 for use with **TDS200, 300, 400, 500, 600** and **700 series** oscilloscopes, available *on page 1535*. 2500V maximum input voltage. 250MHz bandwidth. 10MΩ input resistance. UL 1244 and IEC 1010 safety certified for 2500V (DC + peak). See Tektronix Probes/Accessories quick reference chart, below.

01F2422 Type P5100. **Each** **200.00**
(33698) (ne33698)

DIFFERENTIAL PREAMPLIFIER

NEW

Type ADA400A provides low-level single-acquisition capability to DSOs. 10uV/div sensitivity. Low-pass filter for 100Hz, 3kHz, 100kHz, and full (1MHz). Selectable gain: 100, 10, 1 or 0:1. Accurately measures signals as small as 5uV. Powered directly from **types TDS400, TDS500** and **TDS 600 series** oscilloscopes, available *on pages 1535-1536*. Can be used with other oscilloscopes when powered by a **type 1103** probe power supply. *See Tektronix Probes/Accessories Quick Reference Chart, below.*

Stock No.	Type	Description	Each
83F2202	ADA400A	Differential Preamplifier	**1025.00**
83F2213	P6101B	1X, 15MHz Passive Probe (Two Recommended)	**65.00**
83F2208	1103	TekProbe Power Supply	**995.00**

(33696) (ne33696)

GPIB-LAN ADAPTER

NEW

Type AD007 provides a physical, electrical and protocol interface to an Ethernet TCP/IP10 BaseT LAN for use with GPIB instrucments. Controls **TDS series** scopes and other instruments from any networked computer. Select and print to a networked printer from a **TDS series** scope, available *on page 1535*. Capture waveforms from **TDS series** scopes across a LAN by using WaveStar for Oscilloscopes software, *ordered separately, below.*

48F1557 Type AD007. **Each** **995.00**
(33694) (ne33694)

AC CURRENT PROBE

NEW

Type P6021 provides wide-band performance with all **TDS series** oscilloscopes, available below. Excellent low-frequency characteristics. Bandwidth: 120Hz to 60MHz, 15A peak, for 1MΩ inputs. Shielded probe head, AC only. Split core. For any Tektronix Probes/Accessories see quick reference chart.

83F2211 Type P6021. **Each** **700.00**
(33690) (ne33690)

HIGH-VOLTAGE DIFFERENTIAL PROBE

NEW

Type P5210 makes floating measurements with the scope grounded, resulting in safer, more accurate measurements for higher productivity. Maximum differential input voltage: 5600V (DC + peak AC) 4400V rms. 50MHz bandwidth. Used with all **TDS series** oscilloscopes, except **TDS200 series**, which requires **type 1103** tekprobe power supply. See Tektronix Probes/Accessories Quick Reference Chart, below.

83F2206 Type P5210. **Each** **1995.00**
(33691) (ne33691)

WAVESTAR SOFTWARE FOR OSCILLOSCOPES

NEW

Type WSTRO is a Windows 95/NT application bringing Tektronix oscilloscope measurement information to your computer. Enables remote access and control to **TDS** or **THS series** oscilloscopes on a PC, without the need for programming. Establish instrument links to automatically update new measurements. For the **TDS/THS series** oscilloscopes see *on page 1535*, and for Tektronix Probes/accessories quick reference chart, below.

48F1556 Type WSTRO. **Each** **299.00**
(33695) (ne33695)

WAVESTAR ELECTRONIC LAB NOTEBOOK SOFTWARE

NEW

Type WSTR31 is a Windows 3.1 application (operation has been verified under Windows 95) that can capture waveforms and/or screen shoots, related scope settings, and notes. For use with all **TDS** and **THS** series oscilloscopes, available *on page 1535*. For any Tektronix Probes/Accessories see quick reference chart, below.

01F2480 Type WSTR31. **Each** **345.00**
(33688) (ne33688)

DIGITAL HAND-HELD METERS AND ACCESSORIES

TX SERIES TRUE-RMS DIGITAL MULTIMETERS

NEW

TX1

TX3

- **4⅘ Digit/50,000 Count**
- **DCV Accuracy: ±(0.05%)**
- **True RMS**
- **Extra-Large, Dual Numeric Display with Backlight**
- **Built-in K-Type Digital Thermometer (Type TX3 only)**
- **Setup Menu for Custom User Defaults**
- **Optional Type WSTRM PC Interface Package**

Selectable display range: 50,000 and 5000 count; 4-4/5 and 3-4/5 digits; 1/s (50,000 count mode) and 4/s (5000 count mode). 20-segment analog bar graph has an update rate of 20/s. Peak hold: 1ms. Max. DC/AC voltage range: 1000V CAT III. **Type TX3 DC** accuracy: ±(0.05% + 1 ct.) and AC accuracy: ±(0.4% + 2 ct.). **Type TX1 DC** accuracy : ± (0.07% + 1 ct.) and AC accuracy ±(0.6% + 2 ct.). Best resolution: 10µV (50,000 count mode). DC/AC current ranges: 10.00A. DC accuracy ±(0.2% + 2 ct). AC accuracy ±(0.6% + 2 ct.) . Best resolution: 10nA (50,000 count mode). Resistance measured to 50.00MW. Capacitance measured to 50mF. Frequency range: 0.5 Hz to 1 MHz. MIN/MAX/AVG/MAX-MIN recording with time stamp. **Type TX3** also includes dBm and dB readings and 4-20mA process loop measurement with % readout. Measurements can be saved in memory and later downloaded to a PC using the optional **type WSTRM** PC interface package. Both models include boot with stand, ATL01 test leads, user manual, 2 AA batteries, and traceable calibration certificate. **Type TX3** also includes ATK01 K-type thermocouple adapter and ATP01 thermocouple-to-banana plug adapter. 3-year warranty.

83F4199 Type TX1. **Each** **275.00**
83F4200 Type TX3. **Each** **325.00**

DMM100 AND DMM200 SERIES DMMs

The **DMM 100** and **200** series includes many useful features. These include: autoranging, diode test, tone continuity test, true RMS (**types DMM249** and **DMM254**), frequency ranges from 100Hz to 1 MHz (**types DMM150** and **DMM254**), and analog bargraph display (not **type DMM157**). **Type DMM157** features a capacitance range of 2µF to 200µF and **type DMM254** capacitance range of 4µF to 40µF. Meets IEC Enclosure 1010 Classifications. UL Listed, CSA certified. *Three-Year Warranty.*

COUNTERS, FUNCTION GENERATORS AND POWER SUPPLIES

CMC251

COUNTERS AND FUNCTION GENERATORS

Type CMC251 frequency counter has a frequency range of 1-1.3GHz. Stability (+ or -): 1 ppm. Sensitivity (RMS): 5-35mV. **Types CFG253** and **CFG280** function generators have the following output capabilities: sine, square, triangle, and TTL pulse. **Type CFG253** frequency range: 0.03-3MHz; **type CFG280** frequency range: 0.01-11MHz.

Stock No.	Type	Description	Frequency Range	Each
01F2455	CMC251	Frequency Counter	1-1.3GHz	620.00
01F2453	CFG253	Function Generator	0.03-3MHz	420.00

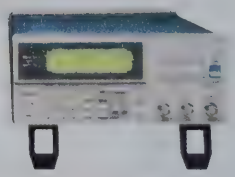
Type AFG310



Type AFG320

16MHz ARBITRARY FUNCTION GENERATORS

Types AFG310 and **AFG320** are 16MHz function generators with built-in arbitary waveform capabilities. Support standard waveforms including sine, square, triangle, ramp, pulse, DC, and noise. With sweep function and 3 operating modes: continuous, triggered, and burst. Arbitary waveform features include a sampling rate of 16MS/s, 12-bit vertical resolution, and nonvolatile memory that holds up to four 16,384-point waveforms. Waveforms can be loaded directly from any Tektronix® digital oscilloscope via the GPIB interface. Output frequency: sine, square: 10MHz to 16MHz; triangle, ramp, pulse: 10MHz to 100kHz; noise (Gaussian): maximum 8MHz bandwidth. Output frequency of arbitrary waveform: repetition rate: 10mHz to 1.6MHz; resolution: 7 digits; accuracy: 50 ppm. Rise/fall time (10 to 90%) of square signal: ≤20ns, pulse signal is <100ms. Linear of logarithmic frequency sweep. Power: 90 to 132VAC, 180 to 250VAC. **Types AFG310** has 1 output channel; **type AFG320** has 2. All functions are accessible via the front panel. Includes user manual, programmer's manual, calibration certificate, power cord, and WaveWriter™ waveform editing software.

PS2521G

PS280

TRIPLE-OUTPUT POWER SUPPLIES

Type PS2520G programmable power supply is a triple-output unit with one 0-6V, 0-3A section and two 0-36V, 0-1.5A sections. **Type PS2521G** programmable power supply is a triple-output unit with one 0-6V, 0-5Asection and two 0-20V, 0-2.5A sections. Both **types PS2520G** and **PS2521G** provide digital LED output indicator; SCPI compatible; 0.05% 5 mV +25mV. Voltage accuracy and 0.2% + 10mA current accuracy; constant voltage and constant voltage mode; and over-voltage and over-current protection. **Type CPS250** is a triple-output supply with two variable 0-20V, 0.5 sections and a fixed 5V, 2A section. The unit includes variable current limiting, and overload indicators. **Type PS280** is a triple output supply with two variable 0-30V, 2A sections and a fixed 5V, 2A section. The unit includes variable current limiting, selectable independent tracking mode, and dual tracking-variable 0-30V, 2.0A.

TFS3031

MINI-OPTICAL TIME DOMAIN REFLECTOMETER (OTDR)

Type TFS3031 mini-optical time domain reflectometer (OTDR) speeds fiber-optic cable installation and maintenance. Designed to withstand the rigors of on-site work, **type TFS3031** delivers precise measurements on both single-mode and multi-mode optical fiber networks. And the TekRanger mini-OTDR's patented IntelliTrace™ technology acts as an expert operator, so even the occasional user can completely and accurately document a fiber link. Applications: verifying splices, locating cable faults, checking overall cable loss, and documenting cable installing. Tektronix offers two pre-configured optional packages targeted at specific applications: installer configuration **type TFS3031AX** and LAN configuration option **type TFS3031AN**. **Type TFS3031AX** includes 850/1300 nm multimode optical module; 1310/1550 sm single mode optical module, disk drive, FMTAP software, hard case. **Type TFS3031AN** includes 850/1300 nm multimode optical module, disk drive, FMTAP software, hard case.

83F2024 Type TFS3031AN. **Each** **14985.00**
83F2025 Type TFS3031AX. **Each** **20930.00**
(15329) (ne10267)

TOP130, TOP160, TOP300

TOP SERIES HAND-HELD FIBER-OPTIC TOOLS

TOP series hand-held tools are compact, rugged and extremely reliable instruments for installing and maintaining fiber-optic networks. Products include both LED and laser sources, an optical power meter, and a visual fault finder.

Stock No.	Type	Description	Each
01F2468	TOP130	Dual LED Source (850/1300nm)	995.00
01F2469	TOP140	Laser Source (1310nm)	1255.00
01F2470	TOP150	Laser Source (1550nm)	1695.00
01F2471	TOP160	Dual Laser Source (1310/1550nm)	3400.00
01F2472	TOP200	Optical Power Meter	795.00
01F2473	TOP300	Visual Fault Finder	1445.00

OSCILLOSCOPES AND ACCESSORIES

500MHz OSCILLOSCOPES AND ACCESSORIES

54616C

- **Resolution: 8 Bits**
- **250MHz Single-Shot Bandwidth with 1GSa/s (Type 54615B Only)**
- **500MHz Single-Shot Bandwidth with 2GSa/s (Types 54616B and 54616C Only)**
- **Peak Detect for Glitches as Narrow as 1 nanosecond (Type 54615B Only)**
- **Full-Color Display (Type 54616C only)**

Types 54615B, 54616B, and **54616C** 500MHz oscilloscopes handle the most demanding applications. **Type 54610B** is a low-cost 500MHz scope that gives ±0.1% horizontal accuracy and a maximum display update rate of 1.5 million points per second.
Type 54615B gives a sampling rate to 1GSa/s with a horizontal accuracy of ±0.005% and a horizontal resolution of 20 picoseconds.
Type 54616B samples at a rate of 2GSa/s with a single-shot bandwidth of 500MHz.
Type 54616C has all the features of **type 54616B** and includes a full-color display for ease of viewing. All models include peak detect, with **types 54615B, 54616B,** and **54616C** detecting glitches down to 1 nanosecond.

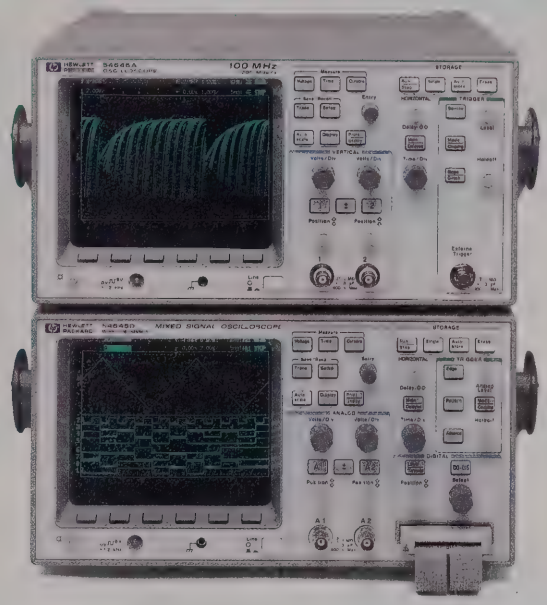
TYPE 54645A 100MHz OSCILLOSCOPE AND TYPE 54645D MIXED-SIGNAL SCOPE AND ACCESSORIES



- **2-Channel 100MHz Scopes Offer 200MSa/S Sampling and 1M Memory Behind Each Channel.**
- **Features MegaZoom Technology Which Allows Deep Memory Capture and a Responsive Display.**
- **Type 54645D Integrates 2 Scope Channels and 16 Logic Channels.**

Type 54645A 100MHz oscilloscope and **type 54645D** mixed-signal scope find the details buried in the most complex signals. **Type 54645A** gives the longer signal captures, sustained sampling, and a display update rate of 3 million points/s. The pan-and-zoom feature makes it easy to scroll through captured data to find points of interest. MegaZoom technology allows the user to catch two events separated by a long time delay, study signal variations leading up to a trigger condition, and measure high-speed and low-speed signals at the same time. **Type 54645D** mixed-signal oscilloscope combines the detailed signal analysis of a scope with the multichannel timing measurements of a logic analyzer and the benefits of deep memory. The combination of scope channels, logic channels, and MegaZoom deep memory provides new ways to solve digital- and mixed-signal problems.

Specifications	91F3006	91F3007

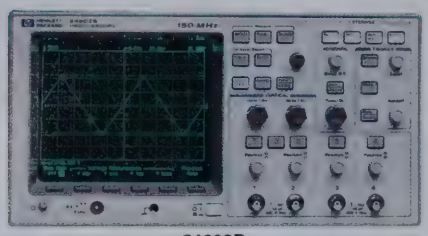
HEWLETT® PACKARD

2 AND 4 CHANNEL OSCILLOSCOPES

TWO- AND FOUR-CHANNEL OSCILLOSCOPES AND ACCESSORIES



54602B

54600B

- **TimeBase Range from 2ns/div to 5s/div**
- **100MHz Bandwidth and 2 Input Channels (Type 54600B)**
- **150MHz Bandwidth and 4 Input Channels (2+2) (Type 54602B)**

Types 54600B and **54602B** oscilloscopes give digital viewing with the analog feel of an interactive display and analog controls. Display updates at a rate of 1,500,000 points/s with a maximum sampling rate of 20MSa/s for single-shot measurements.

Type 54600B oscilloscope is for product test, field service, and education applications. **Type 54602B** is a 150MHz oscilloscope with a 1mV/div sensitivity for applications past 100MHz.

Measurement/connectivity kits have everything needed to hook a scope to an APC, through HP-IB or RS-232 interface.

Stock No.	Type	Description	Each
91F3000	54600B/ABA	2-Channel 100mHz Oscilloscope	**2550.00**

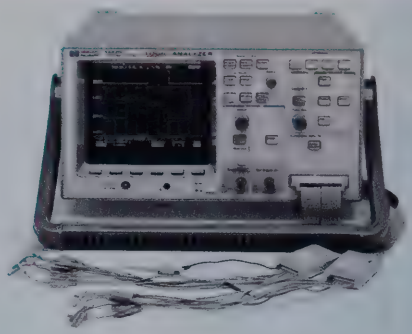
TYPE E54620A/C LOGIC ANALYZER



54620C

- **16 Channels of Logic Analysis**
- **Timing Channels: 16 (Numbered 0-15)**
- **Timebase Range: 5ns/div to 1s/div**
- **Maximum Sampling Rate: 500MSa/s**
- **Minimum Detectable Glitch: 3.5ns**
- **Triggering Source: All Channels and External**

Types 54620A/ABA and **54620C/ABA** have 500MSa/s sampling rates, which give the power to catch glitches. On-button auto scales show results immediately. Include automatic measurements of frequency, period, duty cycle, width, delay, and hold time. **Type 54620C/ABA** includes a full-color, active matrix LCD hat highlights particular signals or group sets of signals by color. Compatible with **types 54650A**, **54651A**, and **54652B** interface modules and **type 34810B** BenchLink scope software.

LOGICDART ADVANCED LOGIC PROBE

E2310A

- **Logic Monitoring**
- **Timing Diagrams**
- **Voltage**
- **Frequency**
- **Continuity Information**
- **Audio and Visual Feedback**
- **Stores up to 10 Waveforms**

Type E2310A LogicDart is an advanced logic probe. Combines the convenience of a logic probe and the versatility of a multimeter with the measurement power of a timing analyzer. Captures up to 3 logic channels simultaneously to analyze signal timing. 2048-point signal acquisition at 100MSa/s (10ns resolution) on all 3 channels. Choose preset levels for TTL, CMOS, and ECL, or set your own thresholds. Triggering: edge, pattern, edge/pattern combination. DC voltage: ±35V. Frequency: 1Hz to 33.0MHz. Resistance: 0.01kΩ to 200kΩ. Real-time clock, user-selected format. Languages: English, Spanish, German, French, and Italian. Power: (3) 1.5V AA alkaline or lithium batteries; AC adapter included. LogicDart includes carrying case, probe kits, AC adapter, batteries, and certificate of calibration. *Order replacement probe and kit separately below.*

FUNCTION GENERATORS, COUNTERS AND POWER SUPPLIES

FUNCTION GENERATORS

33120A

- **Waveforms with 40MSa/s Speed and Storage for Four 16,000-Point Waves**

10 Standard waveforms: sine and square to 15MHz; triangle, ramp, noise, sin(x)/x, exponential rise and fall, cardiac, DC volts. Sine and square waves from 100MHz-15MHz; triangle and ramp waves from 100µHz-100kHz. Sweep and modulation expand test options. Full programmability using standard commands for programmable instruments (SCPI) with standard HP-IB and RS-232. **Type 33120A/001/ABA** includes phase lock, TCXO timebase to increase frequency stability and create new system possibilities. **Type 3481A/ABA** benchlink ARB software allows the use of drawing tools and waveform library, or data generated in a spreadsheet or math program, to create a waveform which can be downloaded to the function generator. Power: 100V/120V/220V/240V.

Stock No.	Type	Description	Each
91F3041	33120A	Function Generator	1795.00

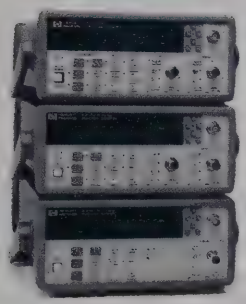
COUNTERS



53131A, 53132A, 53181A

- **Resolution of 10 or 12 Digits/Second**
- **Frequency Ranges: Up to 3GHz**

Types 53131A and **53132A** measure frequency, frequency ratio, time interval, period, rise/fall time, positive/negative pulse width, duty cycle, phase (CH 1 to CH 2), totalize, peak voltage, time interval average and time interval delay. **Type 53181A** measures frequency, frequency ratio (with optional CH 2), period, and peak voltage. All types feature automated limit tests, math (scale and offset), statistics (minimum, maximum, mean, and standard deviation). Versatile test and analysis features help extract information from measurement data. Add graphics, archiving, and more statistical analysis with HP benchlink meter software for Windows®.

Type	53131A	53132A	53181A
Frequency Range	CH 1 & CH 2: 225MHz	CH 1 and CH 2: 225MHz	CH 1: 225MHz
Frequency Resolution	10 Digits/Second	12 Digits/Second	10 Digits/ Second
Measurement Speed	Up to 200 Meas./Second	Up to 200 Meas./ Second	Up to 200 Meas./Second
Interfaces	Standard HP-IB (IEEE 488.1 and 488.2) with SCPI-compatible language; talk-only RS-232		
Power	90-132VAC; 45-66Hz or 360-440Hz/198-264VAC;45-66Hz

SINGLE- AND TRIPLE-OUTPUT POWER SUPPLIES

E3631A

Type E3631A:
- **Triple-Output Power Supply**
- **3 DC Outputs with 80W Total Power**
- **Programmable with HP-IB and RS-232 Standard**

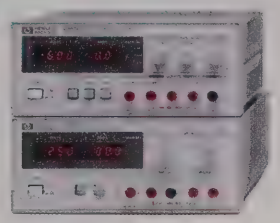
Type E3632A:
- **Single-Output Power Supply**
- **High-Output 120W**
- **Programmable with HP-IB and RS-232 Standard**
- **Dual Range: 0 to 15V, 7A; 0 to 30V, 4A**

Type E3631A features two 25V, 1A supplies and an isolated 6V, 5A supply. Load and line regulation: for voltage, <0.01% +2mV; for current, <0.01% +250µA, store and recall up to 3 power supply setups. Program and monitor both voltage and current through any computer with an IEEE488 card or RS-232.
Type E3632A is a single-output, dual-range power supply. Ranges: 0 to 15V, 7A; 0 to 30V, 4A. Load and line regulation: for voltage, <0.01% +2mV; for current, <0.01% +250µA. Store and recall up to 3 power supply setups. Program and monitor voltage and current through any computer with an IEEE 488 card or RS-232.

Stock No.	Type	Description	Each
91F3058	E3631A	Triple-Output Power Supply	1095.00
91F3059	E3632A	Single-Output Power Supply	995.00

(15237) (ne10491)

E3600 SERIES DC POWER SUPPLIES



E3630A, E3620A

- **Constant-Current (CC) and Constant-Voltage (CV) Modes**
- **Tight Linear Regulation, Low Ripple and Noise**
- **Line and Load Regulation: 0.01% +2mV**
- **Meter Accuracy: ± 0.5% +2 Counts at 25°C ±5°C**
- **10mA Meter Resolution Current (Types E3610A, E3611A, E3614A, E3615A, and E3630A)**
- **1mA Meter Resolution Current (Types E3612A, E3616A, E3617A, and E3620A)**

Nine models available, up to 120V, 6A. Isolation, 240VDC. **Types E3610A, E3611A,** and **E3612A** features: dual range, 10-turn pots, constant-voltage (CV), constant-current (CC) modes. **Types E3614A, E3615A, E3616A,** and **E3617A** features: adjustable overvoltage protection, voltage programming, remote sense, rear outputs, 10-turn pots, CV and CC modes, resistance programming; multiple supplies can be connected for tracking or higher power. **Type E3620A** features: dual outputs isolated, 10-turn pots, and CV and CL modes. **Type E3630A** features: tracking, common outputs, and CV and CL modes. Transient response time: <50µs following change in output current from full load to half load for output to recover to within 10mV (**types E3610A, E3611A,** and **E3612A**) and 15mV (**types E3614A, E3615A, E3616A, E3617A, E3620A**, and **E3630A**). Common mode current: <1µArms (**types E3620A** and **E3630A** only). Number of outputs: 1 (except **type E3620A** has 2 outputs; **type E3630A** has 3 outputs). 3-year warranty.

Type	Output Volts	Output Amps	Ripple and Noise Voltage	Meter Resolution Volts	Meter Resolution Amps

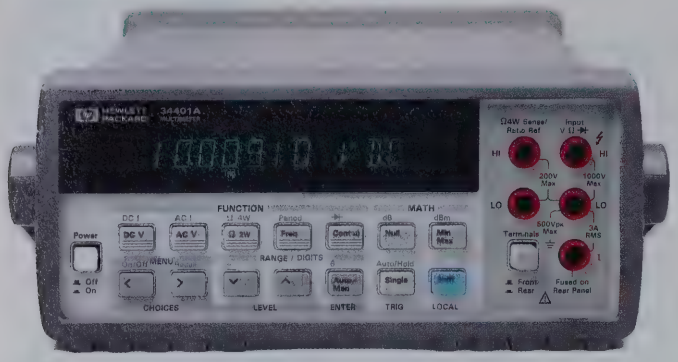
OSCILLOSCOPE AND MULTIMETER ACCESSORIES

BENCHTOP DIGITAL MULTIMETERS



34401A

- **6½-Digit Resolution**
- **HP-IB and RS-232 Interfaces Standard**
- **Store up to 512 Readings**

34000 series benchtop digital multimeters measure DC voltage up to 1000V across 5 ranges and true rms AC voltage up to 750V from 3Hz to 300kHz. Resistance measurement up to 100MΩ across 7 ranges. Other measurements include: AC/DC current, frequency and period to 300kHz, continuity, and diode test. Math functions include: null, min/max/avg., dBm, dB, and limit test. Standard commands for programmable instruments (SCPI) as well as types HP 3478A and Fluke types 8840/8842A command languages are built in. Power: 100/120/220/240V, 45-65Hz, 360-440Hz. Benchlink meter software allows graphing, basic statistics, and data storage.

MULTIMETER ACCESSORIES

Type 34300A 40kV AC/DC high-voltage probe. 40kVDC, 40kVAC to 150Hz. 1000:1 division ratio. For any DMM with 10MΩ inputs.

91F3032 Type 34300A. **Each** **103.04**

Type 34130A deluxe test lead kit. Test leads are 47" (1.2) long with fixed sheath on banana plugs. For **type 34401A DMM.**

91F3033 Type 34130A. **Each** **40.32**

Type 34161A Cordura® accessory pouch. Holds leads and other accessories. Fits on top of **type 34401A DMM, 53100 series** counters and **type 33120A** function/arb generator.

91F3034 Type 34161A. **Each** **40.00**

Type 34301A 100kHz to 700MHz RF detector probe. Range: 50Vrms; Accuracy: ±2dB to 700MHz. 1VDC output for 1Vrms input. For any DMM with 10MΩ input.

91F3035 Type 34301A. **Each** **82.00**

Type 34330A 30A current shunt. 1mV/A output. 15A continuous, 30A for 15 minutes max. For use with any DMM.

91F3037 Type 34330A. **Each** **56.00**

Type 11060A surface mount device probe. Maximum input: 42V. For use with any DMM.

91F3031 Type 11060A. **Each** **25.00**

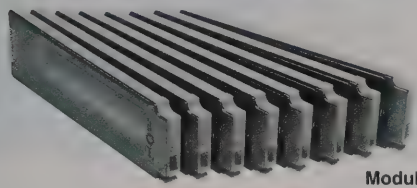
DATA LOGGER/SWITCH

DATA LOGGER/SWITCH AND ACCESSORIES

34970A



Modules

DATA LOGGER/SWITCH

- **6½-Digits (22-bits) of Resolution with 0.004% Basic One-Year DCV Accuracy**
- **11 Built-In Measurements Including DCV, ACV, Thermocouple, Thermistor and RTD Temperatures, and More**
- **Scan Rates Up to 250 Channels/Second Give the Speed and Accuracy to Get the Job Done Right**
- **3 Module Slots and a Choice of 8 Switch/Control Modules Allow Adapting Type 34970A to Meet Unique Needs**
- **Includes HP Benchlink Data Logger Software for Easy Analysis and Documentation**
- **Use HP Benchlink Software to Configure Tests, Transfer Data, Perform Real-Time Analysis and Archive Results**

The modular **type 34970A** combines the performance of a data acquisition system with the simplicity of a data logger. With **type 34970A**, the solution for unique needs is available. From 2 channels to 120 and a choice of modules, it can be used as a data logger, data acquisition system, or a switch box. If measurement needs change, reconfiguring the system is done by swapping modules in and out of 1 of the mainframe's 3 slots.

With a 20-channel relay multiplexer, **type 34970A** is a powerful data logger for quick tests in the lab or in the field. The user interface is easy to set up measurements and read results, and the non-volatile memory holds up to 50,000 time-stamped readings. HP Benchlink Data Logger software automates tests, process data and document measurements without having to program.

Measures any combination of temperature, volts, ohms, or frequency across any combination of input channels. Standard RS-232 and HP-IB interfaces, SCPI programming language and available drivers for Labview® software permits integrating **type 34970A** into an automated test system.

Configure **type 34970A** without the internal digital multimeter, and it is a high-quality switch system for automated testing with up to 120 single-ended channels or 96 matrix cross-points per frame. Choose from low-frequency and RF multiplexers, matrix, and general-purpose (form C) switching. Also, included is digital input/output, analog output and event counting all in a single module.

	Min Resolution	Best Accuracy	Input Resistance
DC Voltage 100mV to 300V	100nV	0.004%	10MΩ
AC Voltage True rms 100.0000mV to 300.0000V	100MHz	300MHz	1MΩ 100pF
Thermocouple -210°C to 1820°C	0.1°C	Probe + 0.6°C	B, E, J, K, N, R, S, T, Types J Type best accuracy
Resistance 100Ω to 100MΩ	100μΩ	0.010%	...
AC and DC Current	HP 34901 A channels 21 and 22 only. 10mA, 100mA and 1 A ranges		
Frequency and Period	3Hz (0.333 sec) to 400kHz (3.33 μsec)		
Memory	5000 Nonvolatile storage, including time stamp		
Other Features	Per channel: Mx+B scaling, alarming and Min./Max./Avg. Real time clock, HP-IB, RS-232, and SCPI programming standard

MEASUREMENT MODULES

- **From 1 to 120 Channels of Analog Input**
- **Measurements Include DCV, ACV, Thermocouple, Thermistor and RTD Temperature Measurements, 2- and 4-Wire Ohms, AC Current, Frequency, and Period**
- **50k Reading Non-Volatile Memory Including Timestamp**
- **Scaling and Alarms Available On Each Channel**
- **Full-Featured Front Panel for Stand-Alone Configuration, Troubleshooting, and Data Viewing**
- **Non-Volatile Storage for Five Complete Instrument States**

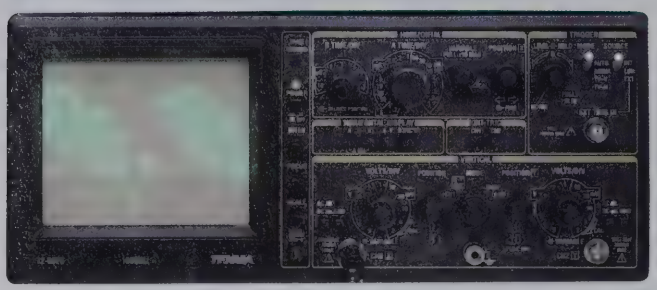
TENMA®

OSCILLOSCOPES AND ADAPTERS

100MHz OSCILLOSCOPE

NEW



Features:
- **Dual Channel**
- **Dual Trace**
- **X-Y Operation**
- **Dual Time Base**
- **Auto Triggering**
- **Delayed Sweep**
- **TV Sync**
- **2-Year Limited Warranty**

Specifications:
Vertical deflection: bandwidth: DC (to 100MHz), AC (10MHz to 100MHz); sensitivity: 2mV/div. to 5V/div. (11 calibrated steps); rise time:<3.5ns; input voltage: 250 (DC + peak AC) max.; input impedance: 1 Mohm in parallel with 25pF. Horizontal deflection: time base A: 0.1µs/div. to 0.5s/div. (21.calibrated steps); time base B: 0.1µs/div. to 10µs/div. (7 calibrated steps); display modes: A, A int B, B, X-Y, B triggered. Trigger system: modes: auto, norm, TV-V, TV-H; source: INT, LINE, EXT. Coupling: AC. Slope: ±. Power requirements: AC voltage 100/120/220/240 (50/60Hz). Two 10:1 probes incl. Order **type 72-6025c** with calibration certificate; *contact your local Newark sales office.*

52F3959 Type 72-6025 **Each** **965.00**
(32194) (ne32194)

60MHz OSCILLOSCOPE

NEW

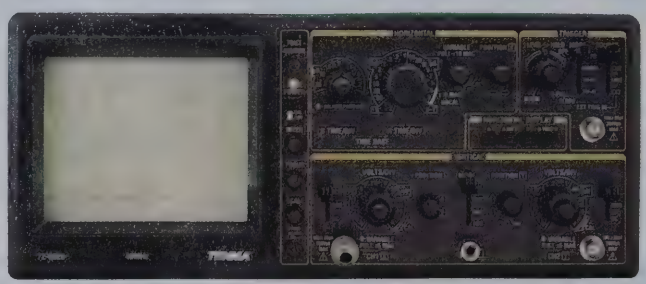
Features:
- **Dual Channel**
- **Dual Trace**
- **Dual Time Base**
- **Auto Triggering**
- **Delayed Sweep**
- **2-Year Limited Warranty**

Specifications:
Vertical deflection: bandwidth: DC (to 60MHz) AC (10MHz to 60MHz); sensitivity: 0.5mV/div to 5V/div; (10 steps); rise time: < 5.8ns;modes: CH1, CH2, ADD, Dual (CHOP, ALT); input voltage: 250 (DC + peak AC) maximum; input impedance: 1Mohm in parallel with 25pF. Horizontal deflection: time base A: 0.1µs/div. to .25s/div. (20 calibrated steps); time base B: 0.1µs/div. to 10µs/div. (7 calibrated steps). Trigger system: modes: auto, norm, TV-V, TV-H; source: CH-1,CH-2, Line, EXT. Coupling: AC. Slope: ±. Power requirements: AC voltage 100/120/220/240V 50/60Hz. Two 10:1 probes included. UL listed, CUL approved. Order **type 72-5025c** with calibration certificate; *contact your local Newark sales office.*

66F3583 Type 72-5025. **Each** **795.00**
(43370) (ne28365)

40MHz OSCILLOSCOPE

NEW



Features:
- **Dual Channel**
- **Dual Time Base**
- **Dual Trace**
- **Trigger Hold-off**
- **Delayed Sweep**
- **2-Year Warranty**

Specifications:
Vertical deflection: bandwidth: DC (to 40MHz), AC (10Hz to 40MHz); sensitivity: 5mV/div. to 5V/div. (10 calibrated steps); rise time: <8.8ns; modes: CH1, CH2, ADD, Dual (Chop, ALT); input voltage: 250 (DC + peak AC) maximum; input impedance 1Mohm in parallel with 25pF. Horizontal deflection: time base A: 0.2µs/div to 0.2sec/div (19 calibrated steps); time base B: 0.2µs/div to 20µs/div (7 calibrated steps); display modes: A, A int B, B, B triggered, X-Y. Trigger system: modes: auto, norm, TV-V, TV-H; source CH1, CH2, LINE, EXT. Coupling: AC. Slope ±. Power requirements: AC voltage 100/120/220/240 (50/60Hz). Two 10:1 probes included. Order **type 72-5020c** with calibration certificate; *contact your local Newark sales office.*

66F3584 Type 72-5020 **Each** **669.00**
(32195) (ne32195)

1GHz SPECTRUM ANALYZER ADAPTER

NEW

Features:
- **Frequency Range: 400KHz~1GHz**
- **250KHz Bandwidth with Variable Scan Width and Scan Speed**
- **High Accuracy (1.5dB Typical), Built-in Calibration Marker**
- **Wide Dynamic Range**
- **Digital Readout of Center Frequency**
- **1-Year Warranty**

Specifications:
Frequency range: 400KHz~1GHz. Center frequency adjust: 0MHz~1GHz. Bandwidth: 250KHz. Meter accuracy: 1%. Calibration marker: 50MHz (-30dBm±1dB) fundamental, harmonics to 1GHz. Frequency scan width: 1MHz~100MHz/div. Scan speed: 0.5msec~35msec/div. Input impedance: 50ohm. Applitude range: -70dBm~0dBm nominal. Amplitude scale: logarithmic, 10dB/div. Amplitude linearity: ±2dB. Amplitude flatness: ±1.5dB, 4MHz~1GHz. Maximum input level: ±10dBm. Power requirements 110/120V or 220/240VAC, 50/60Hz internally adjustable. Order **type 72-6600c** with calibration certificate; *contact your local Newark sales office.*
Converts almost any conventional oscilloscope into a highly cost effective spectrum analyzer. Requires an oscilloscope with X-Y mode, DC coupling, 0.5V/div and 5MHz minimum bandwidth.

84N2130 Type 72-6600 **Each** **879.00**
(32196) (ne32196)

TENMA®

OSCILLOSCOPES AND SPECTRUM ANALYZERS

20MHz OSCILLOSCOPE WITH EXTERNAL TRIGGERING

Features:
- **6″-High Brightness CRT with Internal Graticle**
- **2kV Accelerating Potential**
- **Auto Triggering**
- **Z-Axis Input**
- **X-Y Mode**
- **External Triggering**
- **Dual Channel, Dual Trace**
- **2-Year Warranty**

Specifications:
Vertical sensitivity: 5mV/div to 5V/div, 1mV/div to 1V/div in ten calibrated steps; Vertical rise time: 17.5nsec or less. Maximum input voltage: 250V(DC+peak AC). Modes: CH-1, CH-2, ADD, dual. Polarity inversion: CH-2 only. Horizontal sweep modes: A, X-Y. Delay sweep position: 1 div or less to 10 div or more. Horizontal sweep magnification: x10. Trigger modes: auto, norm, TV-V, TV-H. Source: CH-1, CH-2, Line, EXT. Coupling: AC, X-Y phase difference. 2-year limited warranty. UL listed. Order **type 72-3055c** with calibration certificate, *contact your local Newark sales office.*

66F3585 Type 72-3055. **Each** **439.00**
(5379) (ne07117)

1.25GHz PORTABLE SPECTRUM ANALYZER

NEW

Features:
- **Battery or Line Operated**
- **FM Audio Demodulator**
- **AM Detector**
- **Microprocessor Controlled Functions**
- **Digital Frequency Lock**
- **Sensitivity > -95dBm**
- **2-Year Warranty**

Specifications:
Frequency: 1MHz-1250MHz in one sweep. Bandwidth: automatically selectable by span control, 3MHz res B.W. (set span at 125MHz/div), 1MHz res B.W. (set span at 50MHz/div), 300kHz res B.W. (set span at 10MHz/div), 150kHz res B.W. (set span at 5MHz/div), 75kHz res B.W. (set span at 1 or 0.2MHz/div). Reference levels: +20, 0, –20, –40dBm/+69, +49, +29, +9dBmv. Frequency display: LCD frequency readout in 10ths of MHz. Power requirements: 115 VAC, 60Hz/12VDC, internal 12V Gelcell. Comes with batteries, carrying case, and owner's manual. Order **type 72-6552c** with calibration certificate, *contact your local Newark sales office.*

84N2129 Type 72-6552 **Each**..... **3499.00**
(6524) (nec7485)

60, 100 AND 200MHz OSCILLOSCOPE PROBE KITS

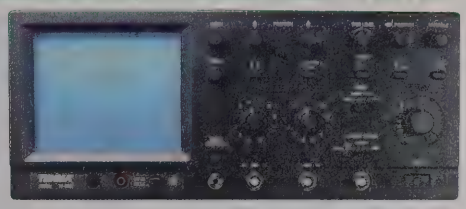
- **EN61010-2-031 CATI (IEC1010)**
- **600V (DC+AC Peak)**
- **Low Noise - Improved Compensation**
- **1.2m Cable Length**
- **10-35 pF Compensation Adjustment**
- **REF Position, Tip Disconnected and Scope Input Grounded (Types 76-102, 76-105 Only)**
- **Accessory Kit and Storage Pouch Included**

Type 76-109: 60MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 18pF capacitance, 5.8ns risetime. 15MHz -3dB, x1 position, 1MΩ imped. (scope input), 46pF capacitance, 27ns risetime. **Type 76-102**: 100MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 16pF capacitance, <3.5ns risetime. 6MHz @ -3dB, x1 position, 1MΩ impedance (scope input), 90pF capacitance, 58ns risetime. **Type 76-105**: 200MHz -3dB, x10 position, 10MΩ imped. (1MΩ input), 14pF capacitance, <1.8ns risetime. 10MHz @ -3dB, x1 position, 1MΩ imped. (scope input), 90pF capacitance, 35ns risetime.

Stock No.	Type	Description	Each
84N2151	76-109	60MHz Range	**24.99**
84N2144	76-102	100MHz Range	**34.99**
84N2147	76-105	200MHz Range	**39.99**
84N2152	76-110	Replacement Sprung Hook	**4.99**

(5923) (ne03106)

20MHz OSCILLOSCOPE WITH COMPONENT TESTER



Features:
- **Dual Channel, Dual Trace**
- **Component Tester Function Tests the V-I Characteristic Curve of Components Including: Open and Short Circuit Tests, Resistors, Capacitors, Forward and Reverse Characteristics of Rectifiers, Diodes and Zener Diodes, Transistors and Component Combinations**
- **X-Y Operation**
- **Auto Triggering**
- **External Triggering**
- **Alternate Trigger and Independent TV Synchronizing Signal Separator Circuit for Stable TV Signal Observation**
- **2-Year Warranty**

Specifications:
Vertical: sensitivity: 5mV/div~5V/div in 10 calibrated steps; bandwidth: DC to 20MHz (-3db), AC 10Hz to 20MHz (-3dB); rise time: 17.5nsec; maximum input voltage: 250V (DC + peak AC); Input Impedance: 1Mohm parallel with 25pF; modes: CH-1, CH-2, DUAL, and ADD; Input Coupling: AC-GND-DC; Polarity Inversion: CH-2 only. **Horizontal:** 0.2μsec/div to 0.2sec/div in 19 calibrated steps; sweep magnification: 10 times; accuracy: ±3%, magnified ±5%; Sweep Modes: norm, A-Y, X10, variable; Trigger Modes: auto, norm, TV-V, TV-H; source: VERT, CH-1, EXT, LINE; coupling: AC; external trigger input: 1Mohm in parallel with 30 pF. General: power requirements: 115V/230VAC, 50/60Hz, 42W. Component test lead and two 10:1 probes included. Order **type72-6547c** with calibration certificate, *contact your local Newark sales office.*

84N2127 Type 72-6547 **Each**..... **429.00**
(32191) (ne32191)

20 MHz OSCILLOSCOPE WITH FUNCTION GENERATOR

Features:
- **Dual Channel, Dual Trace**
- **Normal/Auto Trigger**
- **Built-in Function Generator up to 1 MHz**
- **Five Vertical Mode Selections: CH-1, CH-2, Dual, Add, Subtract (Using CH-2 Inverted)**
- **6″ High Brightness CRT**
- **2KV Accelerating Potential**
- **Trigger Hold-Off**
- **X-Y Phase Difference up to 50kHz**
- **2-Year Warranty**

Specifications:
Vertical: Sensitivity: 5mV/div to 5V/div in 10 calibrated steps. Bandwidth: DC to 20MHz, AC 10Hz to 20MHz. Rise time: 17.5 nsec. Maximum input voltage: 250V(DC to peak AC). Input impedance: 1Mμ parallel with 25pF. Modes: CH-1, CH-2, ADD, Dual. Polarity inversion: CH-2 only. Horizontal: Time base: 0.2msec to 0.2 sec/div in 19 calibrated steps. Display modes: X1, X10, X-Y. Sweep magnification: 10 times. Accuracy: ±3% magnified ±5%. Modes: AC, DC, TV-V, TV-H. X-Y mode. Source: CH-1, CH-2, Line, Ext. Coupling: AC. External trigger input: 1MΩ in parallel with 30pF. **Function Generator:** Frequency range: 0.1Hz to 1MHz. Output waveform: sine, triangle, square, TTL pulse. Output impedance: 50Ω ± 10%. **General:** Calibration voltage: 0.5V p-p at 1kHz. Two 10:1 probes included. Two-year limited warranty. UL listed. Order **type 72-6030c** with calibration certificate, *contact your local Newark sales office.*

92F5414 Type 72-3060. **Each** **513.00**
(5389) (ne08125)

TEST EQUIPMENT CART

Equipment cart features slanted top for convenient viewing angle. Adjustable back support with bumpers prevents damage to equipment. Heavy duty casters provide long life. Color: gray. Dimensions: 33.5H x 16W x 19″D.

92F5415 Type 21-1925 **Each** **86.95**
(32192) (ne32192)

OSCILLOSCOPE CASE

Case fits **types 72-6025, 72-5025, 72-5020, 72-3055, 72-3060,** and **72-6547.**

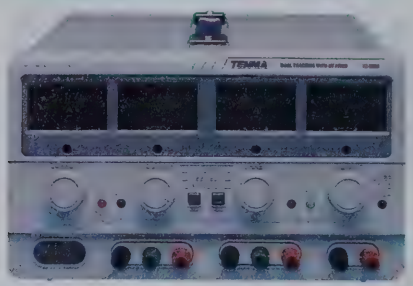
(5380) (ne07130)

TRIPLE-OUTPUT POWER SUPPLY



Features triple-output, auto-tracking, auto-series, and parallel operation. Separate voltage and current meters for each supply. Low ripple and noise. Continuous/dynamic load can be selected. Two 0-30VDC supplies rated at 3A maximum each. Series: 60V, 3A. Parallel: 30V, 6A. Constant voltage and constant current operation. Overload and reverse polarity protection. Output voltage (each supply): 0-30VDC variable. Voltage line regulation: ≤ 0.01% + 3mV. Voltage load regulation: ≤ 0.01% + 3mV. Ripple and noise: ≤ 1mVrms. Constant current line regulation: ≤ 5mV. Constant current load regulation: ≤ 10mV. Ripple and noise: ≤ 2mVrms. Output current: 3A. 1-year limited warranty. Order **type 72-2080C** with calibration certificate, *contact your local Newark sales office.*

66F3562 Type 72-2080. **Each** **499.95**
(5381) (ne07131)

40A POWER SUPPLY

Input voltage: 115/230V. Output voltage: 1-15VDC variable. Output current: 40A max., 32A continuous. Voltage fluctuation: less than 1% (with rated output). Ripple voltage: less than 3mV (with rated output). Protection circuit: 42A. Fuse 115/230VAC: 10A/5A. Power consumption: 800W maximum. One-year limited warranty. Order **type 72-6180C** with calibration certificate, *contact your local Newark sales office.*

52F7509 Type 72-6180. **Each** **299.00**
(5429) (nec7486)

HEAVY-DUTY POWER SUPPLY

1-15V variable DC power supply capable of supplying up to 30A. Use for servicing or powering car stereo products. Features lighted cross needle meter which simultaneously displays voltage, current, and power. Cigarette lighter jack for powering automotive electronics products. Over-current protection automatically shuts off current flow when maximum output is exceeded (31A). Overload indicator. Multiterminal output. One set of high current output terminals (30A maximum) and two sets of low current output terminals (5A maximum). Output voltage 1-15VDC variable. Output current 30A one minute on, three minutes off; 24A continuous. Voltage fluctuation: less than 0.5% at rated output. Ripple voltage: less than 3mV at rated output. General power requirements: 110VAC, 60Hz. Dimensions: 6H x 8¾W x 9"D. Weight: 20 lbs. One-year limited warranty. Order **type 72-630C** with calibration certificate, *contact your local Newark sales office.*

92F5412 Type 72-630. **Each** **219.00**
(5383) (ne07133)

COMPACT TRIPLE-OUTPUT DC POWER SUPPLY

Features triple-output, analog voltage and current meters (each 0–24V supply), current adjustable with automatic recovery, independant/series/parallel mode, and overload indicator. Specifications for fixed 5V output: voltage: 5VDC ±0.1V fixed; current: 2.0A max.; load regulation: 0.1% + 5mV; line regulation: 0.1% + 5mV; ripple: 2mV RMS (5Hz–1MHz). Specifications for 0–24 output: voltage: 0–24VDC x 2, variable; current: 0–500mA variable; load regulation 0.01% + 3mV; line regulation: 2mV RMS (5Hz–1MHz). Meter specifications: voltage range: 0–25V, 0–600A; accuracy 2.5% of full scale, tracking error ±0.2%, ±20mV. Power requirements: AC 100V, 120V, 220V, 240V, and 50/60Hz. Power consumption : 175VA max. Comes complete with power cord, test leads, and manual. One-year limited warranty. Order **type 72-4045Ac** with calibration ceritficate; *contact your local Newark sales office.*

92N5938 Type 72-4045A **Each** **299.00**
(5382) (ne07132)

ISOLATED VARIABLE AC POWER SUPPLY

Features variable-isolated output 0–145VAC; 3A continuous, 4A intermittent output. Circuit breaker overload protection. Displays volts, amps, and line voltage. Voltage adjustment range: 0–145VAC with 120V input. Output isolation: leakage less than 0.1mA. Current range: 0–3A continuous, 4A intermittent (one minute). Meter: 3¼ display; accuracy: 5% of full scale. Power requirements: 120VAC ± 10%, 60Hz. 1-Year warranty. Order **type 72-1095C** with calibration certificate, *contact your local Newark sales office.*

TENMA®

TRANSFORMERS, TEST SYSTEMS AND RF GENERATOR

10A VARIABLE AUTOTRANSFORMER

NEW

Specifications:
- **Input 120VAC, 60Hz**
- **Output 0–130VAC**
- **Current: 10A 1.3KVA**
- **Fuse 10A AGC (Included)**
- **Non Isolated**
- **90 day Warranty.**

Fused design enables user to limit curret by changing fuse value (10A maximum). Three prong grounded cord and socket provide convenience and safety.

66F3591 Type 72-110 **Each** **99.95**
(32185) (ne32185)

10A REGULATED POWER SUPPLY

NEW

Features:
- **Fuse Protected**
- **Easily Accessible Fuse Holder**
- **Neon Indicator**
- **Heavy-duty Binding Posts**
- **Effective Heat Sinks for Better Dissipation**
- **90 Day Warranty**

Specifications:
Output: regulated 13.8VDC. Input: 120VAC. Output current: 10A; 7A continuous.

84N1417 Type 72-290 **Each** **63.95**
(32186) (ne32186)

ISOLATION TRANSFORMER

NEW UL

Features:
- **Fused 150VA Isolated Outlet**
- **Fused 500VA Direct Outlet**
- **Illuminated Power Switch**
- **90 Warranty**
- **UL Listed**

Specifications:
Input 120VAC, 60Hz. Isolated output 120VAC 1.5A maximum; direct output 120VAC 5A maximum. Isolation: less than 0.1mA leakage.

92F5413 Type 72-545 **Each** **49.95**
(32187) (ne32187)

UNIVERSAL TEST SYSTEM

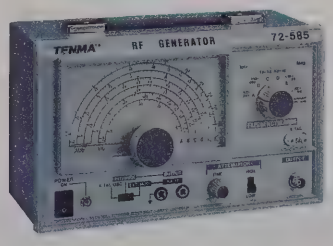
Features:
- **Triple Output Power Supply**
- **Full-function 3¾ Digit with Dual Display and Analog Bargraph**
- **2MHz Sweep Function Generator**
- **1GHz Frequency Counter**
- **1-Year Warranty**

Specifications:
Generator: waveform: sine, square, triangle, skewed line, ramp, pulse, TTL square wave; frequency: 0.2Hz-2MHz in seven ranges; VCF voltage level: 0-10VDC; internal sweep mode: linear, logarithmic. DMM: AC/DC voltage ranges: 400mV-1000V; AC/DC current range: 40mA-20A; resistance: 400ohm-40Mohm; capacitance: 4nF-400µF; Min/max/avg mode; relative offset; memory/memory recall; comparison mode; logic test. Frequency counter: range: 5Hz-1.3GHz; time base: 0.1sec, 1sec, 10sec selectable. Power supply: power supply 1: 0-30VDC variable; 0-2A; supply 2: 5VDC fixed; 2A fixed; power supply 3: 13.8VDC fixed; 3A fixed. Comes complete with DMM test leads and owner's manual. Order **type 72-5085C** with calibration certificate, *contact your local Newark sales office.*

66F3576 Type 72-5085. **Each** **592.92**
(18726) (nec7484)

RF GENERATOR

NEW



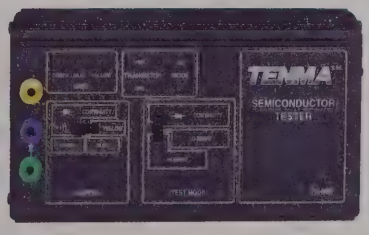
Features:
- **Solid-state Circuitry for High Stability**
- **Wide Frequency Range: 100KHz–450MHz**
- **Built-in 1KHz Oscillator**
- **1-Year Warranty**

Specifications:
Frequency range: (A) 100KHz–300KHz; (B) 300KHz–1000KHz; (C) 1MHz–3.2MHz; (D) 3.0MHz–10MHz; (E) 10MHz–30MHz; (F) 32MHz–150MHz (up to 450MHz on third-harmonics). Frequency accuracy: ±3%. RF output: 100mV RMS, approximately (up to 35MHz). Modulation: internal: 1KHz; external: 50Hz–20KHz, at less than 1V RMS. Power requirements: 110V/220VAC, 50/60Hz. Order **type 72-585C** with calibration certificate, *contact your local Newark sales office.*

66F3578 Type 72-585 **Each** **155.00**
(32188) (ne32188)

SEMICONDUCTOR TESTER

NEW



Features:
- **Auto Base or Gate Identifier**
- **Tests Transistors, FETs, SCRs, and Diodes**
- **Identifies NPN/PNP Transistors, N-channel/P-channel FETs, and Silicon/Germanuim Diodes**
- **Continuity Test: Audio Tone**

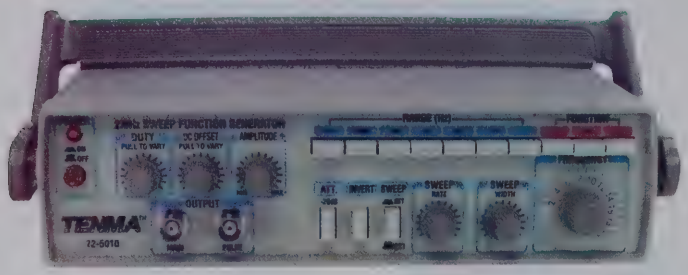
Specifications:
Test cycle: four quadrants. Maximum load: 15ohm. Audio tone: indicates less than 20ohm. AC adaptor supplied, 9V battery not included. 90 day warranty.

52F8014 Type 72-965 **Each** **99.95**
(32189) (ne32189)

TENMA®

FUNCTION GENERATORS AND FREQUENCY COUNTERS

2MHz SWEEP FUNCTION GENERATOR



Features:
- Produces Square, Triangle, Sine and TTL Pulse Sweep Outputs
- Variable DC Offset
- Variable Duty and Amplitude
- Adjustable Easel Stand
- Unique Stackable Case Design
- Internal/external Sweep Selection
- 1-Year Warranty

Specifications:
Input voltage controlled frequency (VCF). Frequency range: 0.2Hz~2MHz in seven ranges. Frequency multiplier: 0.2~2. Sweep Characteristics: Internal: linear; sweep rate: 0.5Hz~50Hz; sine wave distortion: <1% from 10Hz~100KHz; triangle linearity: <1% at 100Hz; square wave time symmetry: <3% at 100Hz; square wave rise and fall time: <100nsec at maximum output into 50ohm load; pulse output rise and fall time: <25nsec (20TTL loads); main output: >20V p-p (open circuit). Order **type 72-5010C** with calibration certificate, *contact your local Newark sales office.*

66F3590 Type 72-5010. **Each** **219.95**
(12440) (ne09885)

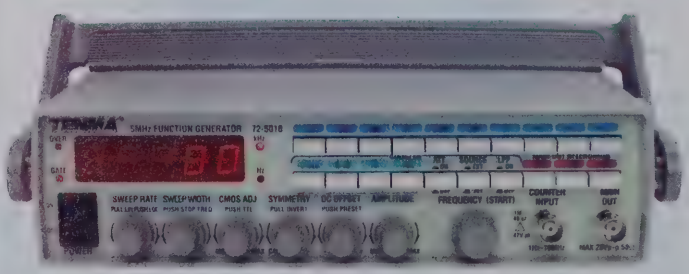
2MHz SWEEP FUNCTION GENERATOR WITH COUNTER

Features:
- Six-digit LED Display
- Built-in Frequency Counter
- Sine, Triangle, Square, TTL, CMOS, Pulse, Ramp and Sweep Outputs
- VCF inpu
- Variable DC Offset
- Switchable Attenuator
- Amplitude Control
- Unique Stackable Case Design
- 1-Year Warranty

Specifications:
Power consumption: 25VC maximum. Frequency ranges: 0.2Hz-2Hz at 1, .2MHz-2MHz at 1M. Sweep Characteristics: Internal: linear, log; sweep rate: continuously variable; main output: two ranges; frequency counter; time base: oscillation frequency 10MHz; gate time: 10 sec, 1 sec, 0.1 sec, 0.01 sec; frequency range: 5Hz-10MHz; maximum input voltage: 42V peak; input impedance: 1Mohm (–20dB). Order **type 72-5015C** with calibration certificate, *contact your local Newark sales office.*

66F3574 Type 72-5015. **Each** **299.95**
(12437) (ne09884)

5MHz SWEEP FUNCTION GENERATOR WITH COUNTER



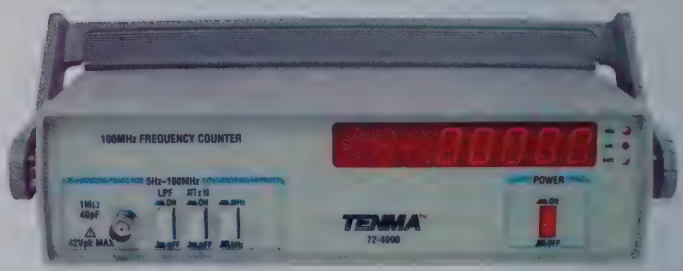
Features:
- Built-in Frequency Counter
- Produces Square, Triangle, Sine, Ramp, TTL, and CMOS Pulse Sweep Outputs
- Input: Voltage Controlled Generator (VCG)
- EXT Frequency Counter
- Frequency Range: 0.3Hz-5MHz in Seven Ranges
- 1-Year Warranty

Specifications:
Function generator power consumption: 25VA maximum. Voltage controlled sweep range: 1000:1. Sweep characteristics: internal: linear, log; sweep rate: 0.2Hz-100Hz continuously variable; sweep width: variable from 1:1 to 1000:1. Square wave amplitude: 5V-15V. Main output amplitude: two ranges: 100mV-10Vp-p, 200mV-20Vp-p open circuit; attentuator: 10dB, 20dB, -40dB; DC offset control variable. Frequency counter: 5 digit counting capacity; gate time: 10 sec, 1 sec, 0.1 sec, 0.01 sec; frequency range: 1Hz-10MHz. Order **type 72-5016C** with callibration certificate, *contact your local Newark sales office.*

52F7513 Type 72-5016. **Each** **349.95**
(12435) (nec7483)

NEW

100MHz FREQUENCY COUNTER



Features:
- Selectable Attenuation
- Low Pass Filter
- Selectable KHz/MHz
- Terminated BNC Type Input Connector
- Gate Indicator Light
- 8 Digit LED Display
- Unique Stackable Case Design
- 1-Year Warranty

Specifications:
Type 72-4090 range: 5Hz - 100MHz, AC coupled. Accuracy: ±1 time base accuracy ±1 count. Resolution: 1Hz @ KHz function, 10 HZ @ MHz function. Gate time: 1 second. Impedance: 1Mohm, shunted 40 pF. Sensitivity: 20mV (5Hz~10MHz @ KHz function), 20mV (5MHz~20MHz @ MHz function). Maximum input: 5Hz~100KHz=125V peak, 100KHz~10MHz=13.8V peak, 10MHz~100MHz=5.4V peak. Attenuator: x1, x120 switchable. Low pass filter: 100KHz nominal - 3dB cut off frequency. Time base characteristics. Type: crystal controlled oscillator. Frequency: 10MHz. Stability: less than ±10ppm, less than±1ppm (line voltage ±10%). Maximum aging rate: ±10ppm/year. Power requirements: 100V, 120V, 220V, 240VAC (±10%), 50/60Hz. Order **type 72-4090C** with calibration certificate, *contact your local Newark sales office.*

NEW

COUNTERS

175MHz UNIVERSAL COUNTER

Features:
- **8-Digit LED Display • Dual Input**
- **2-Position Attenuator (CH-A & B) • Selectable Trigger Slope (CH-A & B)**
- **Adjustable Trigger Level (CH-A) • Low Pass Filter (CH-A)**
- **External Time Base Input • Stackable Case**
- **1-Year Warranty**

Specifications:
Functions: frequency, period, period average, ratio, time interval, totalize, check (self test). Frequency A range: 5Hz~10MHz in KHz mode, 5MHz~175MHz in MHZ mode. Display: KHz or MHz with decimal point. Period A range: 0.5µsec~200,000µsec. Frequency range: 5Hz~2MHz sinewave. Resolution: 100psec~100nsec sinewave. Display: msec or µsec with decimal point. Minumum pulse width: 250nsec. Average 1, 10, 100, or 1000 cycles averaged. Ratio A/B. Range A: 5Hz~10MHz. Range B: 5Hz~2MHz. Time interval A to B range: 0.5µsec~200,000µsec. Frequency range: 5Hz~2MHz. Display: msec or µsec with decimal point. Average: 1, 10, 100, or 1000 intervals cycles averaged. Single event capability. Totalize A range: 5Hz~10MHz. Check (self test). Channel A input characteristics: bandwidth: 5Hz~175MHz, Ac coupled; sensitivity: at KHz mode 5Hz~10MHz, 20mV RMS, at MHz mode 5MHz~125MHz, 50mV RMS. 125MHz~150MHz, 100mV RMS, 150MHz~175MHz, 150mV RMS. Attenuator: x1, x10 switchable. Slope: ± switchable. Trigger level: preset or variable. LP filter: 10KHz. Max. input 42V peak. Channel B input characteristics: bandwidth: 5Hz~2MHz, AC coupled; sensitivity: 30mV RMS; impedance: 1Mohm,≤40pF; attenuator: x1, x10 switchable; slope: ± switchable; max. input: 42V peak; loading: 1 standard TTL gate; max. aging rate: ±10ppm/yr. Power requirements: 100V, 120V, 220V or 240VAC (±10%) selectable, 50/60Hz. Comes complete with owner's manual and power cord. Order **type 72-4095c** with calibration certificate, *contact your local Newark sales office.*

66F3588 Type 72-4095 **Each** **299.95**
(32181) (ne32181)

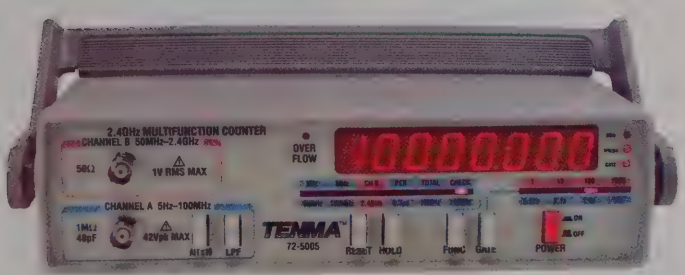
1.3GHz HAND-HELD COUNTER

Features:
- **5Hz to 1300MHz Frequency Range**
- **High Sensitivity at All Frequencies**
- **Large 8-Digit LCD Display with Full Range of Annunciators**
- **Frequency and Period Measurement, 0.0001MHz Resolution**
- **Reciprocal Counting Technique for Superior Accuracy**
- **Push-to-Measure Function with Auto Power-Down**
- **Selectable Low Pass Filter**
- **Hold Function**
- **1-Year Warranty**

Specifications:
Frequency: range 5Hz~25MHz (channel A), 20MHz~1.3GHz (channel B); resolution: 10-7Hz~10Hz (channel A), 1Hz~1KHZ (channel B); accuracy: ±(1digit + timebase error). Period: range: 5Hz~25MHz; resolution: 10-7nsec~1µsec; accuracy: ±(1digit + timebase error). Input: impedance: 1Mohm/25pF (channel A), 50ohm nominal (channel B). Sensitivity: 15mVRMS 10Hz~20MHz (channel A), 10mVRMS 20 MHz~700MHz, 50mVRMS to 1.3GHz (channel B). Maximum voltage: 200VDC; 250VRMS 50Hz~400Hz reducing to 1 VRMS above 1MHz (channel A), 250VDC; 250VRMS 50Hz~400Hz, 1VRMS 20MHz~1.3GHz (channel B). 9V battery not included. Order **type 72-6605C** with calibration certificate, *contact your local Newark sales office.*

84N2131 Type 72-6605 **Each** **195.00**
(32184) (ne32184)

2.4GHz MULTIFUNCTION COUNTER

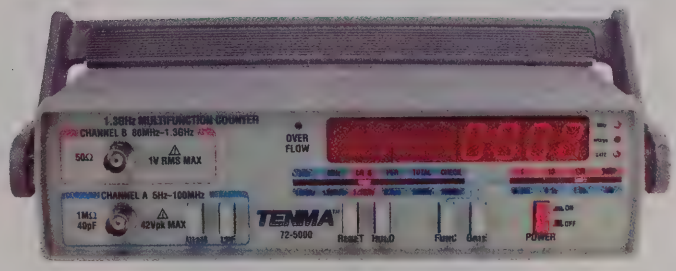


Features:
- **8 Digit LED Display • 2.4GHz Bandwidth**
- **Selectable Gate Times • Hold/Reset Function**
- **Switchable Attenuation • Low Pass Filter**
- **Period Average • Totalize • Self-test Mode**
- **Remote Start/Stop • Unique Stackable Case Design**
- **1-Year Warranty**

Specifications:
Channel A: 5Hz~100MHz sinewave, MHz mode; channel B: 50MHz~2.4GHz sinewave. Resolution: 0.1Hz~100Hz, KHz mode. Channel A: 1Hz~1000Hz, MHz mode; channel B: 10Hz~10KHz. Period characteristics: range 0.285µsec~200,000µsec; frequency range: 5Hz~3.5MHz sine wave; resolution: 100psec~100nsec; selectable in four decade steps. Totalize characteristics: range: 5Hz~10MHz sine wave; capacity: 0~99,999,999 plus overflow. LED Channel A input characteristics: 5Hz~100MHz input; sinewave: 20mV RMS, 5Hz~30MHz; attenuator: x1/x10, switch selectable; filter: low pass filter; impedance: 50ohm; sinewave: 10mV RMS, 50MHz~600MHz; sensitivity: 25mV RMS, 600MHz~1.3GHz, 50mV RMS, 1.3GHz~2.4GHz. Totalize start/stop input: logic levels: standard TTL levels; loading: One standard TTL gate; maximum input: 5VDC peak. Time base characteristics: type: crystal-controlled oscillator; frequency: 10MHz. Power requirements: 100V, 120V, 220V, 240VAC (±10%), 50/60Hz; 12W. Comes complete with owner's manual and power cord. Order **type 72-5005c** with calibration certificate, *contact your local Newark sales office.*

66F3589 Type 72-5005 **Each** **400.00**
(32183) (ne32183)

1.3GHz MULTIFUNCTION COUNTER



Features:
- **8-Digit LED Display • 1.3GHz Bandwidth**
- **Selectable Gate Times • Hold/Reset Function**
- **Switchable Attenuation • Low Pass Filter**
- **Period Average • Totalize**
- **Self Test Mode • Stackable Case Design**
- **1-Year Warranty**

Specifications:
Functions: frequency, 1.3GHz frequency prescaler. Channel A: 5Hz~100MHz sinewave MHz mode. Channel B: 80MHz~1.3GHz sinewave. Resolution:.1Hz~100Hz KHz mode. Channel A: 1Hz~1000Hz MHz mode. Channel B: 10Hz~10KHz. Gate time: 10sec, 1sec, 0.1sec, 0.01 sec. Range: 0.285µsec~200,000µsec. Frequency range: 5Hz~3.5MHz sinewave. Resolution: 100psec~100nsec. Gate (CH-A): 0.01sec, 0.1sec, 1sec, 10sec. Totalize characteristics: range: 5Hz~10Mhz sinewave; capacity: 0~99,999,999 plus overflow LED; control: manual reset. Prescale input characteristics: impedance: 50ohm; coupling: AC; sinewave 10mV RMS, 80MHz~600MHz. Totalize start/stop input: logic levels: standard TTL levels; loading: 1 standard TTL gate. Time base characteristics: type: crystal-controlled oscillator; frequency: 10MHz; stability: less than ±10ppm; max. aging rate: ±1ppm/yr. Time base characteristics: frequency: 10MHz; max. aging rate: ±1ppm/yr.; overflow indication; reset and hold switches. Power requirements: 100V, 120V, 220V, 240VAC (±10%), 50/60Hz, 12W. Comes complete with owner's manual and power cord. Order **type 72-5000C** with calibration certificate, *contact your local Newark sales office.*

TENMA®

CLAMP-ON METERS AND ADAPTERS

AC CLAMP-ON METER

NEW CE

Features:
- 3½-Digit
- 2000 Count LCD Display
- ACV, ACA, Ohms, and Audible Continuity
- Data Hold
- Overload Protection
- 1-Year Warranty

Specifications:
AC current range: 200A, 300A; accuracy: 1.0%. AC voltage range: 200V, 750V; accuracy: 1.0% Resistance range: 2000ohm; resolution: 1ohm; accuracy 1.0%. Jaw size: 28mm. Comes complete with test leads, carrying case, and owners manual. 9V battery not included.

84N2126 Type 72-6545 **Each** **59.95**
(32180) (ne32180)

AC/DC CURRENT CLAMP ADAPTER

Features:
- Connects to DMMs with 10Mohm Input Impedance
- Accommodates Conductors up to 1.18″(30mm)
- Zero Adjustment
- Power-On and Battery-Low LED Indicators
- 1-Year Warranty

Specifications:
Current Range (AC/DC): 0-600A. Load resistance: 10kohm typical. Rate output (AC/DC): 0-600mV for 0-600A. Frequency response: Up to 400Hz. Battery life is 100 hours typical with carbon-zinc.

52F7508 Type 72-6174. **Each** **49.95**
(6521) (nec7479)

HEAVY-DUTY AC/DC CLAMP-ON METER

Features:
- 3¾-digit LCD
- 40-segment Bargraph
- Over Range Indication
- Low Battery Indication
- Auto Power "Off"
- 1-Year Warranty

Specifications:
AC current range: 400A, 1000A. DC voltage range: 400mV, 4V, 40V, 400V, 1000V; input impedance: 10Mohm. AC voltage range: 4V, 40V, 400V, 750V; input impedance: 10Mohm. Response time: 3 sec. Frequency range (autorange for voltage): 100Hz, 1kHz, 10kHz, 100kHz, 800kHz. Frequency range (autorange for current): 100Hz-1kHz. Resistance range: 400ohm, 4kohm, 40kohm, 400kohm, 4Mohm, 40Mohm. Audible continuity beeper: ≤40ohm • ≤0.5V open circuit voltage. Diode test: 3V maximum open circuit voltage. Jaw opening: 46mm. Comes with carrying case, test leads, and manual. Order **type 72-6130C** with calibration certificate, *contact you local Newark sales office*

52F7504 Type 72-6130. **Each** **99.00**
(6519) (nec7477)

RUGGED MINI AC/DC CLAMP-ON METER

Features:
- 3¾-Digit LCD
- Analog bargraph
- Zero/relative mode
- Min/max
- Data hold
- AC/DC current
- Frequency
- Resistance
- Continuity
- 1-Year Limited Warranty

Specifications:
DC current ranges: 40A, 0-150A, 150-200A; AC current ranges: 40A, 0-150A, 150-200A. DC voltage: 400V. Resolution: 0.1V. AC voltage: 400V. Resolution: 0.1V. Resistance: 40ohm-400ohm. Continuity upon voltage: 0.4V. Maximum conductor size: 23mm. Power: 2 AA batteries (not included). Comes with carrying case, test leads, and manual. Order **type 72-6184C** with calibration certificate, *contact your local Newark sales office.*

52F7510 Type 72-6184. **Each** **139.95**
(6522) (nec7480)

HEAVY-DUTY MINI TRMS AC/DC CLAMP-ON METER

Features:
- TRMS
- AC/DC current
- Frequency
- Min/max
- Auto Zero
- Display Hold
- Overload Protection
- 3¾-Digit LCD with Bargraph
- Crest factor
- 1-Year Warranty

Specifications:
DC current range: 40A, 400A (0-150A), 400A (150-200A), 400A (200-400A); AC current (true rms, crest factor) range: 4A (0-500mA), 4A (500mA-4A), 40A, 100A (0-100A), 400A (100-200A), 400A (200-400A). Frequency range: 100-1000kHz. Conductor size: approximately 23mm maximum. Sampling rate: 2 times/sec (display), 20 times/sec (bargraph). Power: 2 AA batteries (not included). Comes with carrying case, test leads, and manual. Order **type 72-6185C** with calibration certificate, *contact your local Newark sales office.*

52F7511 Type 72-6185. **Each** **179.95**
(6523) (nec7481)

HEAVY-DUTY AC/DC TRMS CLAMP-ON METER

Features:
- 3¾-Digit LCD
- Analog Bargraph
- Resistance up to 40Mohm
- Audible Continuity
- DiodeTest
- Peak Hold
- Auto Power "Off"
- 1-Year Warranty

Specifications:
DC current (autorange and manual) range: 400A, 1000A; AC current (autorange and manual) range: 400A, 1000A. DC voltage (autorange and manual) range: 400mV, 4V, 40V, 400V, 1000V; AC voltage (autorange and manual) range: 4V, 40V, 400V, 750V. Frequency (autorange for voltage): 100Hz-800kHz; frequency (autorange for current): 100Hz, 1kHz. Resistance (autorange and manual) range: 400ohm, 4kohm, 40kohm, 400kohm, 4Mohm, 40Mohm. Audible continuity. Continuity beeper: ≤40ohm. Diode test: 3V maximum open circuit voltage. Peak hold AC voltage (manual range): 4V-750V; AC current (manual range): 400A, 1000A. Resolution: 0.1A, 1A. Jaw opening: 46mm. Power: one 9V battery (not included). Battery life: 100 hours. Comes with carrying case, test leads, and manual. Order **type 72-6131C** with calibration certificate, *contact your local Newark sales office.*

DIGITAL MULTIMETERS AND ACCESSORIES

TRUE RMS BENCHTOP DIGITAL MULTIMETER

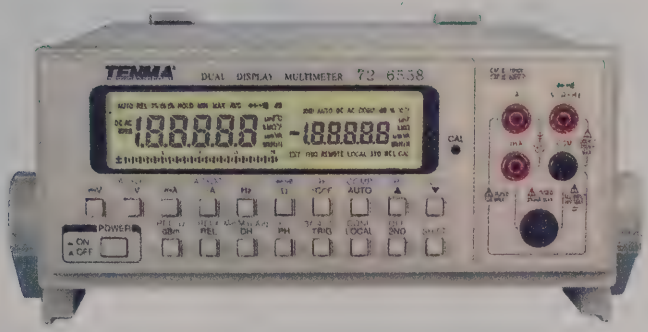
Features:
- 4½-digit
- 20,000-count
- TRMS audible continuity
- Frequency
- AC/DC current
- AC/DC voltage
- Resistance
- Transistor check
- Zero adjust
- Data hold

Specifications:
DC voltage: 200mV; AC voltage: 200mV, 750V. DC current: 2mA, 10A; AC current: 2mA, 2000mA, 10A. Resistance: 200ohm, 20Mohm. Frequency: 20KHz, 200KHz. HFE: base current: 3.5µA, VCE: 4.5V approx. Diode: test voltage: 4.5V approx., maximum test current: 1mA. Continuity: threshold: 200ohm or less. General power requirements: 115/230VAC; 50/60Hz. Comes complete with test leads and owner's manual. Order **type 72-410AC** with calibration certificate, *contact your local Newark sales office.*

91F2942 (12951) Type 72-410A. **Each** **249.00** (ne10251)

MULTI-DISPLAY BENCHTOP DIGITAL MULTIMETER

NEW CE



Features:
- Select 200,000/20,000/2,000 Counts
- True RMS (AC, AC+DC)
- RS-232 Interface
- Frequency Measurement Up to 1MHz
- Resistance Measurement Up to 200Mohm
- Capacitance Up to 200µF
- Temperature Measuring Range: –50°C to +1372°C
- Diode and Continuity Tests
- Direct dBm Readout
- Selectable Measurement Rate (80/sec. max.)
- 3-Year Warranty

Specifications:
Basic DCV accuracy: 0 .01%. Voltage ranges: DC (200mV to 1000V); AC (200mV to 750V). Current ranges: AC/DC (20mA to 10A). Measurement bandwidth: VAC (20Hz to 100kHz); IAC (20Hz to 10kHz). Meets CATIII 600V, CATII 1000V, IEC 1010. Comes complete with power cord, test leads, power fuse, protective fuse, and thermocouple probe/adapter. Power requirement: 110/120/220/240VAC, 50/60Hz. Order **type 72-6558C** with calibration certificate, *contact your local Newark sales office.*

DIGITAL MULTIMETERS

CE

Type 72-6203

Type 72-6202

Common Features:
- Full Isolation Optical RS-232 Communication (72-6251 Required)
- Primary Display 4,000 Count, Secondary 40,000 Count
- Capacitance Up to 9999µF
- dBM Measurement (20 Selectable Impedances)
- 1ms Peak Hold to Capture Glitch
- 3-Year Warranty

Type 72-6202 Exclusive Features:
- True RMS (AC or AC+DC) for Voltage and Current
- Frequency Counter (Up to 10MHz)
- Temperature measurement (–40°C to +1372°C) (72-6252, 72-6253 Required)
- Square Wave Output with Adjustable Duty Cycle
- Pulse Width Range (.1ms to 2000ms)
- Backlit Display

Specifications:
Basic DCV accuracy: 0 .06%. Voltage ranges: DC (40mV to 1000V); AC (40mv to 750V). Current ranges: AC/DC (400µA to 10A). Resistance ranges: 400ohm to 40Mohm. CAT III-600V, CAT II-1000V, IEC 1010-1. **Type 72-6202** exclusive specifications: conductance: 40ns/1000Gohm. Both come complete with 9V battery, test leads, holster, and manual. Order **type 72-6202C** and **72-6203C** with calibration certificate, *contact your local Newark sales office.*

TENMA®

DIGITAL MULTIMETERS

FULL-FUNCTION DMM WITH TEMPERATURE FUNCTION

NEW

Features:
- 3½ Digit LCD Display
- Three Phase Indicator
- Temperature
- Logic Test
- Frequency
- Capacitance
- Resistance
- AC/DC Voltage
- Diode Check
- 1-Year Warranty

Specifications:
AC/DC voltage: 200mV~600V. Resistance range: 200ohm~2000Mohm. Capacitance ranges: 20µF, 200µF, 2000µF, and 20mF; test frequency: 400Hz. Diode test: test current: 0.8mA±0.3mA; continuity: audible continuity less than 100ohm. Frequency (autoranging): range: 200Hz. Logic test: threshold: logic high (2.8±0.8V), logic low (0.8±0.5V). Indication: 40msec beep at logic low. Measurement rate: 2.5x per second. Comes complete with holster, test leads, and manual. 9V battery not included.

92F6213 Type 72-4030 **Each** **79.95**
(32178) (ne32178)

AUTORANGING TRUE RMS DMM

NEW CE

Features:
- 3½, 3200 Count LCD Display
- 34 Segment Bar Graph
- Automatic Polarity Indicator
- Over Range Indicator
- Auto/manual Range Selection
- Measuring Rate: 2 per second
- Diode Test
- Continuity Beeper
- Fused mA and A Overload Protection
- Meets IEC-1010 for 600V CAT III
- 1-Year Warranty

Specifications:
DC voltage: 600V maximum, 100µV resolution; AC voltage: 600V maximum, 1mV resolution. AC/DC current: 10A maximum, 0.1µV resolution. Resistance: 30Mohm maximum, 0.1ohm resolution. Comes complete with protective rubber holster with stand, test leads, and owner's manual. 9V battery not included.

84N2128 Type 72-6551 **Each** **79.95**
(32174) (ne32174)

AUTORANGING 3200-COUNT DMM

NEW

Features:
- 3½ Digit, 3200 Count Display
- Analog Bar Graph
- Diode Test
- Audible Continuity Check
- Data Hold
- Fuse Protected mA and 10A Inputs
- Meets IEC-1000 for 600V CAT III and 1000V CAT II
- 1-Year Warranty

Specifications:
DC voltage: 1000V maximum; 0.5% accuracy. AC voltage: 750V maximum. AC/DC current: 10A maximum. Resistance: 32Mohm maximum. Comes complete with protective rubber holster, test leads, and owner's manual. 9V battery not included.

84N1413 Type 72-6542 **Each** **79.95**
(32177) (ne32177)

AUTORANGING DIGITAL MULTIMETER

Features:
- 3½Digit LCD, 3200-count
- 34 Segment Bar Graph
- Auto Power Off
- Diode and Continuity Tests
- 1-Year Warranty

Specifications:
AC voltage ranges: 3.2 to 600V (1mV Resolution). DC voltage ranges: 320mV to 600V (100µV Resolution). AC/DC current ranges: 320µA, 3200µA, 32mA, 10A (0.1µA Resolution). Resistance ranges: 320 ohm, 3.2kohm, 32kohm, 3.2Mohm, 32Mohm (overload protection 500VDC). Measurement rate: 2x per Second. Comes complete with holster, manual, and test leads. 9V battery not included.

92F5407 Type 72-2050 **Each** **59.95**
(28366) (ne28366)

AUTOMOTIVE DMM

NEW

Features:
- 3½ Digit Display
- Switch Selectable for 4, 5, 6, and 8 Cylinder Engines
- Overload Protection
- Automatic Zero Adjust
- 1-Year Warranty

Specifications:
Tachometer: 10,000 RPM maximum, 10 RPM resolution. Dwell: 0.1° resolution. DC voltage: 200V maximum, 0.5% accuracy; AC voltage: 750V maximum. Resistance: 20Mohm maximum, 0.1ohm resolution. Diode check: displays approximate forward drop of diode. Comes complete with test leads and owners manual. 9V battery not included.

84N1415 Type 72-6544. **Each** **34.95**
(32176) (ne32176)

MANUAL RANGING DMM

NEW

Features:
- 3½ Digit LCD Display
- Over Range Indication
- Low Battery Indicator
- Transistor Test
- Battery Test
- 1-Year Warranty

Specifications:
AC voltage ranges: 200V, 500V. DC voltage ranges: 2V, 20V, 200V, 600V. DC current range: 2A, resolution: 1mA. Resistance ranges: 200ohm, 2Kohm, 20Kohm, 200Kohm, and 2000Kohm. Diode test current: 1.0mA. Transistor test: hFE: 0~1000hFE; VCE: 3.0VDC. Battery test: ranges: 1.5V, 9V; loaded current: 150mA (1.5V), 6mA (9V). Measurement rate: 2.5x per second. Comes complete with holster, test leads, and owner's manual. 9V battery not included.

92F5408 Type 72-2055 **Each** **34.95**
(32175) (ne32175)

TENMA®

DMMs, SOUND METERS AND THERMOMETERS

COMPACT DMM

NEW

Features:
- 3.5″ Digit LCD Display
- 1 Mohm Input Impedance
- 20A Scale
- Overload Protection
- Diode Test
- 1-Year Warranty

Specifications:
AC voltage ranges: 200V and 750V with an accuracy of ± 0.7%. DC voltage ranges: 200mV, 2V, 1000V. DC current ranges: 200µA, 2mA, 20mA, 200mA, and 2000mA with an accuracy of ± 1.2%. Resistance ranges: 200ohm, 2Kohm, 20Kohm, 200Kohm, and 2000Kohm with an accuracy of ± 1%. DC 20A resolution: 10mA with accuracy of ± 1.5%. Comes complete with test leads and owner's manual. 9V battery not included.

52F7976 Type 72-5095 **Each** **19.95**
(32170) (ne32170)

POCKET DMM WITH BARGRAPH

Features:
- 3½″ Digit LCD with Bargraph
- 3200-coun
- Over Range Indicator
- Auto Power Off
- Low Battery Indicator
- 450VDC/AC RMS Overload Protection
- 90-day warranty

Specifications:
Pocket DMM has a DC voltage range of 300mV-450V and an AC voltage range of 3V-450V. Resistance range is 300ohm-30Mohm. Continuity range is 300ohm. 0.6mA approximate diode test current.

66F1961 Type 72-4040. **Each**..... **22.95**
(5427) (nec7470)

PEN DMM WITH LOGIC FUNCTION

NEW CE

- 3¾-Digit, 3999-Count LCD Display
- Autoranging with Auto Polarity
- Auto Power-Off
- Data Hold
- TTL Logic Test
- AC/DC Voltage and Current Measurement
- Resistance with Continuity Beeper
- Fuse Protected Current
- Meets IEC-1010 Safety Standards 600V CAT II Applications
- 1-Year Warranty

Specifications:
AC/DC voltage: 600V max., 1mV resolution. AC/DC current: 400mA max., 1µA resolution. Resistance: 40MΩ max, 100mΩ resolution. Logic test: HI/LO LCD indicator. Continuity test: buzzer below 50Ω. **Type 72-6620** is used for troubleshooting complex circuits. Comes complete with 9V battery, ground lead, alligator clip, probe tip covers, and manual.

66F3571 Type 72-6620. **Each**..... **39.95**
(5392) (ne08128)

EXTENDED RANGE CAPACITANCE METER

NEW

Features:
- Measures Capacitance from 0.1pF ~ 2mF
- In-Circuit and Out-of-Circuit Measurements
- Crystal Oscillator Time Base
- Fuse Protected
- Low-Battery Indicator
- Zero Adjust
- 1-Year Warranty

Specifications:
Ranges: 200pF, 2nf, 20nF, 200nF, 2µF, 20µF, 200µF, 2mF, 20mF with accuracy of ≤20µF±0.5%, 200µF±1%, 2mF±2%. Measurement Rate: 2.5 per second. Comes complete with test leads, carrying case, and owner's manual. 9V battery not included.

66F3569 Type 72-040. **Each**..... **69.95**
(29485) (ne29485)

DIGITAL SOUND LEVEL METER

CE

Features:
- IEC 651 Type 2
- A and C Frequency Weightings
- 0.1dB Resolution
- Maximum Hold
- Internal Oscillation System (1kHz/Sine/94dB)
- AC/DC Signal Output
- Response Time Selector: Fast (Instantaneous)/ Slow (Averaging)
- 3½ Digit LCD Display
- 1-Year Warranty

Specifications:
Sound level ranges: low (30-100dB), high (65-135dB). Frequency range: 30Hz-12kHz. Accuracy: ±2dB @ 94dB. Dynamic range: 70dB. Microphone: ½″ electret condenser. Comes complete with instruction manual, carrying case, and screwdriver. 9V battery not included. Order **Type 72-860C** with callibration certificate; *contact your local Newark sales office.*

92F5411 Type 72-860. **Each**..... **169.00**

SINGLE AND DUAL INPUT DIGITAL THERMOMETER

72-2060 72-2065

Common Features:
- 3½ Digit LCD Display
- Select °C or °F (Annunciators Displayed)
- K-Type Thermocouple (4′ Bead Probe Included)
- Reading Hold
- Maximum Record

Type 72-2065 Exclusive Features:
- Dual Thermocouple Input
- Differential Temperature T1, T2
- 2 K-Type Thermocouples
- 1-Year Warranty

Specifications:
Digital thermometers have a temperature measuring range of –50°C to +1300°C. Resolution is 1°C or 1°F. 2.5 readings per second. Comes complete with holster and manual. 9V battery not included.

BASIC AND DELUXE TEST ACCESSORY KITS

76-082

Type 76-081 includes smooth body probes with replaceable tips: 4mm spring contact with IC tip protector and 0.080″ (2mm), in black and red. Also includes: safety pincer clips, in black and red; IEC leads, 4mm sheathed straight to right-angle plugs, PVC wire, 1m, in black and red. **Type 76-082** contains with everything in **76-081** but also includes fully-insulated IEC alligator clips, in black and red; insulated banana plug adapters in black and red: insulated spade lug adapters, in black and red; and spring-loaded tip probes, in black and red. Each kit comes with a plastic case.

Stock No.	Type	Description	Each

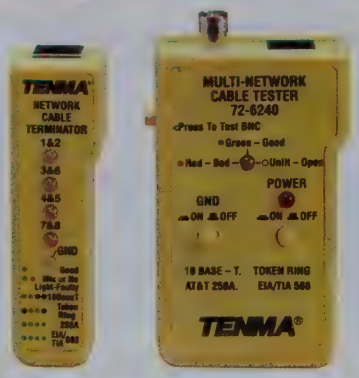
MULTINETWORK CABLE TESTER

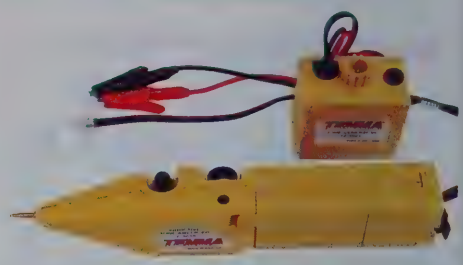


- **A Remote Terminator Allows For Cable Testing Before or After Cable II Installation**

Just plug in 2 wires. Now you can scan for continuity, miswiring and polarization in network cable, thin Ethernet (BNC)/10Base-T (UTP/STP)/356A/TIA-568/TIA-56B Token Ring. It also tests the ground of shielded twisted pairs cable. The tester is bright yellow so it is easy to see and find in the field. Comes in a zippered black leather case. 1 year warranty. 9V battery to be ordered separately; *contact your local Newark sales office.*

01F036 Type 72-6240. **Each** **55.00**
(18242) (ne11066)

TONE TEST KIT



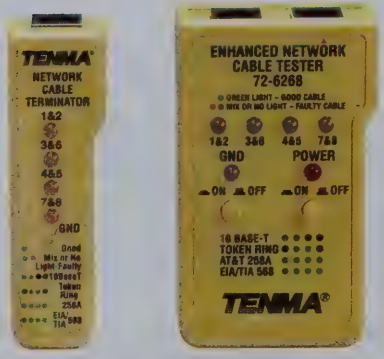
Type 72-6068 is designed to help identify the termination point of wires or to trace their paths. Built of high-impact plastic. Kit contains tone generator (**Type 72-6065**), inductive amplifier (**Type 72-6066**) and carrying case (**Type 72-6067**). The tone generator includes polarity, continuity and 1kHz warble or solid tone omission. A hanging strap minimizes strain on leads supporting the unit. The inductive amplifier offers features such as wrist wrap, low battery light and buttset connections with weather cover. It is crushproof up to 4000 lbs. One-year limited warranty. *Tone generator, inductive amplifier, and carrying case can also be ordered separately below.*

66F6719 Type 72-6068. **Each** **99.95**

Stock No.	Type	Description	Each
66F6716	72-6065	Tone Generator	**31.95**
66F6717	72-6066	Inductive Amplifier	**59.95**
66F6718	72-6067	Carrying Case	**14.24**

(5390) (ne08126)

ENHANCED II NETWORK CABLE TESTER



- **Remote Terminator Allows For Cable Testing Before or After Installation**
- **Tests the Ground of Shielded Twisted Pair Cable**

A tester that makes Ethernet and Token Ring cable checks speedy and simple. The Tenma Enhanced Network Cable Tester scans wire continuity and looks for miswiring and polarization in network cables, thin Ethernet (BNC)/10Base-T (UTP/STP)/356A/TIA-568/TIA56B Token Ring. A remote terminator allows for cable testing before or after cable installation. Comes in a zippered black leather case. 1 year warranty. 9V battery to be ordered separately; *contact your local Newark sales office.*

01F038 Type 72-6268. **Each** **55.00**
(18237) (ne11061)

COAXIAL CABLE TESTER

- **For Ethernet Network Installation Checks**

Here's the smart, fast tester needed at installation time. This test checks the coax cable (BNC, TNC) continuity and also tests for a short or open cable. Includes a terminator for testing previously installed cables. Handy size and bright yellow color make it easy to find and use. Comes in a zippered black leather case. 1 year warranty. 9V battery to be ordered separately; *contact your local Newark sales office.*

01F037 Type 72-6241. **Each** **45.00**
(18240) (ne11064)

MULTIMODULAR CABLE TESTER

- **Tester Autoscans Most Popular Modular Cables**

This user-friendly multi-modular cable tester checks USOC4/USOC6/USOC8 terminating with RJ-45, RJ-12 and RJ-11 modular plugs, wires continuity and miswiring. Also tests cable that is cross-pinned or wired straight through. Convenient portable size and bright yellow color make it the choice for modular job site testing. Comes in a zippered black leather case. 1 year warranty. 9V battery to be ordered separately; *contact your local Newark sales office.*

01F042 Type 72-6290. **Each** **49.95**

DM-II & DM-I DIGIMATIC™ 3-PHASE CHARTLESS RECORDERS

- **AC Data Logger/Recorder (Type DM-II) Single- or Three-Phase Capable**
- **AC Voltage to 600V, AC Current to 1000A: All Readings are True RMS**
- **Three Channels for Voltage Measurements**
- **4 Channels for Current Measurements**
- **Power Measurements Include: Watts , VARS , VA, PF (Power Factor)**
- **Energy Measurements Include: KW-HR's and Demand or Non-Demand**
- **User Selectable Variable Length Recording Mode**
- **Autoranging; Real Time Clock, Multi-Languages Built-In**
- **Rugged ABS Plastic Case with a Weather Resistant Design**

The Digimatic II is an AC chartless datalogger/recorder in a stand alone configuration. Data can be viewed in the field via large self-contained back lit LCD. Type DM-II view software allows the data to be accessed and downloaded through a personal computer. Line operated (120/240V, 60/50 Hz). Battery back-up protects memory. Test leads: 4 flexible straight to safety sheath banana plugs, rated 1000 Vrms, 10A max. w/extra large jaw alligator clips. Current transducers: (included) type DM-CT 1 to 1000A. *Order replacement fuses, leads separately below.*

16F336 Type DM-II. **Each** **2295.85**

CIRCUIT TRACERS

AT-2000 wire-tracing systems let you trace circuits and find opens quickly. Choose from 4 upgradeable, fully protected tracing systems. All versions feature handheld, dual-function receiver with LED readout, 20-foot range, and 9V battery, plus instructions and rugged carrying case. **Type AT-2001** commercial circuit tracing system includes receiver and 9-300V AC/DC load signal generator. **Type AT-2002** industrial circuit tracing system comes with receiver and 9-600V AC/DC load signal generator. **Type AT-2004** industrial multi-purpose tracing system comes with receiver, 9-600V AC/DC load signal generator, 3-level transmitter and clamp-on accessory for transmitter testing without interrupting electrical circuit. **Type AT2005** battery pack and charger. **Type AT1000** advanced tracer traces energized lines up to 300VAC/DC includes receiver and transmitter. Operating frequency 17kHz. **Type CT-326B** current tracer for use on live circuits and perform without interrupting service. Operating frequency: 6.25kHz. Transmit for 0.164 second every 0.82 second. Frequency: 150dB @ 60Hz, 100dB @ 400Hz; except **type CT-326B**, 156dB to 20kA @ 50/60Hz. Include carrying case, 9V battery, transmitter, probe, pigtail connector, extra fuse. **Type CT-326B** includes power cord, adaptor, earphone, and voltage converter.

96F5469 Type AT2001. **Each** **555.85**
96F5470 Type AT2002. **Each** **631.85**

HA-1000, HA-2000 HARMONIC/POWER ANALYZERS

HA-2000

Analyze building wiring to determine power factor and the extent of distortion generated by non-linear equipment. Help determine the source of nagging power quality problems. Record volt/amp signatures of equipment such as motors to aid in preventive maintenance. Displays: **type HA-2000** individual harmonics to the 31st w/THD; two cycles of the waveform; all power data (watts, vars, PF, etc.). **Type HA-2000** stores 21 waveforms in memory, downloads all data to your PC (software included). Voltage: 1-600Vrms AC/DC. Current: 1-1000 amps rms AC. Power: 0-600kW Frequency: 40-65Hz. First 19 odd harmonics plus THD. Memory: 21 non-volatile, user-addressable, protected locations. Powered by non-user serviceable lithium cell with expected life of 11 years.

96F9997 Type HA-2000. **Each** **989.85**
(5377) (ne06010)

OP-TACH™ DIGITAL TACHOMETER

- **Easy-to-Use, Non-Contact Operation**
- **"Last Measurement" Memory**

Type TMOT-220 kit includes **type OT-220** tachometer measures rpms by directing light source onto reflective marker on rotating object and counting light pulses reflected by each revolution. Range: 0-3′ (0.914m) from object–even through wire screens and transparent windows. Speed range: 50-20,000 rpm. Accuracy: ±1 rpm. 4½-digit, 0.4″ (10.16)H LCD readout–updates once per second. Includes 4 AA batteries, reflective tape, charger, case.

46F5208 Type TMOT-220. **Each** **542.85**
(5316) (de01261)

GP-1 EARTH GROUND RESISTANCE TESTER

GP-1

Type GP-1 is a rugged, battery-operated, earth ground resistance tester that automatically calculates resistivity and can download to a PC. 100 memory locations allow storage of 2-point, 3-point (fall of potential), and 4-point resistance/resistivity test results. Functions as a volt meter up to 600VAC. Voltage range: 0-600VRMS max ±2% of reading + 2 digits. Frequency response: 60Hz ±1%. Fuse: 5 x 20mm, 32mA @250V fast blow. Input power 4 "D" cells. Display: 3½-digit LCD ¾″ (H). Weight: 7.26 lbs. (3.3). Dimensions: 13.6 x 5.1 x 9.8″ (3.45 x 13 x 25). *50Hz models also available; contact your local Newark sales office.*

16F335 Type GP-1. **Each** **1985.85**
(5410) (ne08933)

BT-100 BREAKER TRACER

BT100

Type BT-100 identifies 120VAC circuit breaker or fuse supplying a receptacle or lighting fixture. Operating frequency: 47-63Hz. Maximum load: 18A (4mS) @ 120VAC, 200mW maximum @ 120VAC. Power: alkaline 9V battery. Audible tone and LED display confirm breaker identification. Adjustable sensitivity enables pinpoint accuracy. UL approved.

16F339 Type BT100. **Each** **39.85**
(5411) (ne08934)

MEGOHMMETERS AND RECORDERS

INSULATION TESTER

NEW

Type AMB-5D is a battery-operated insulation tester measuring up to 4000MΩ @ 1000V. Provides 3 test voltages 250V, 500V, and 1000V. Also acts as an 600VAC voltmeter, and continuity tester. 3¾-digit LCD, 4000-count display. Autorange 50-segment log scaled analog display. Easy to carry. Includes test leads, 8AA batteries and instruction manual. VDE approved.

83F7338 Type AMB-5D. **Each** **459.85**
(33687) (ne33687)

3½-DIGIT LCD MEGOHMMETER

- **Performs Dielectric Absorption Ratio Test**
- **Manual or Automatic Operation**
- **Audible & Visual Indicators**

Has built-in timer and signal for automatic dielectric-absorption-ratio testing, low-battery indicator, and auto shut-off. Includes test leads with screw-on alligator clips, carrying case. *Order 6 AA size batteries separately -- see Product Index for complete selection.*

Stock No.	Type	Range	Test Voltage	Accuracy (% of Reading)	Each
50F4911	AMB-4D	0-200Ω 0-200MΩ 0-200MΩ 0-2000MΩ	3VDC 250V ±12.5V 500V ±25V 1000V ±50V	±1% ±2LSD ±3% ±2LSD ±3% ±2LSD 0-1000MΩ ±3%, ±2LSD 1000MΩ-2000MΩ ±3.5%, 3LSD	**401.85**

(5310) (de01226)

BATTERY-POWERED ANALOG MEGOHMMETERS

AMB-2

- **Live Circuit 0-600VAC/DC Test Band**
- **Battery OK Test Band**
- **Rugged, Taut Band Meter**

Fuse-protected megohmmeters have 3-color scale plate. Include carrying case, test leads, adapter clips, 8AG-361 fast-blow fuse, manual. *Order 8 AA batteries separately—see Product Index for complete selection.*

Stock No.	Type	Range/Test Voltage	Accuracy (% of Reading)	Each
62F133	AMB-1A	0-100MΩ @ 500VDC (2.5MΩ Midscale) 0-100Ω @ 800mV (3Ω Midscale)	±5%, 0.1 to 10MΩ ±10% over 10MΩ ±3% of Arc	**312.85**

(5311) (de01227)

HAND-CRANKED ANALOG MEGOHMMETERS

AMC-3

- **Require No Auxiliary Power**
- **Spring-Loaded Terminal Connections**
- **High-Impact Housing**

Hand-cranked, constant-voltage megohmmeters feature guard terminal to eliminate effect of surface leakage on readings. Include test lead set (2 clip, 1 probe), dual carrying cases for instrument and leads, applications manual.

Stock No.	Type	Range/Test Voltage	Accuracy (% of Reading)	Each
62F2659	AMC-2	2-100MΩ @ 500VDC (1MΩMidscale) 0-200Ω @ 6VDC (10Ω Midscale)	±5% from 0.1 to 50MΩ ±10% All Other Points ±10%	**541.85**

(5312) (de01228)

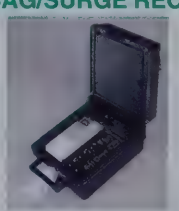
MEGOHMMETER

AMB-5KV

Type AMB-5KV is a battery-operated, high-voltage insulation resistance tester measuring up to 500Gohms of resistance. Provides 4 test voltages: 500V, 1kv, 2.5kv, and 5kv. Also acts as a AC/DC voltmeter. This feature insures that zero (0) voltage is present prior to making an insulation resistance test and will act as a capacitive discharge indicator. **Type AMB-5KV** can be used for checking motor windings, insulators and generator windings.

16F9052 Type AMB-5KV. **Each** **1995.85**
(14229) (ne10240)

SPIKE/SAG/SURGE RECORDER



- **Advanced, Solid State Circuitry**
- **Spike, Sag & Surge Appear on Same Chart**

Rugged, compact, easy-to-use strip chart recorder. Ranges: 0-220/440/880V, full scale, 50/60Hz. Voltage ranges are average-sensing, scaled rms; spike/sag/surge ranges peak-sensing, rms. Accuracy: volt ranges, ±3% full scale; sag/spike/surge modes, ±2% of reading based on sinusoidal waveforms. Input impedance: 220V range–387kΩ; 440V range–784kΩ, 880V range–1580kΩ; all ±1%/15pf. Chart speed: 12″ (304.80)/hour. Line fuse: 0.2 amp, 250V; *order* **type 3AG-313** *fuse separately with* **DM-1** *accessories on page 1557.* Line power: 120VAC, 60Hz, 9 watts. Battery power: two 9V alkaline batteries; *order separately–see Product Index for selection.* Comes with 1 red, 1 black test lead, power cord, 30′ (9.14M) roll of chart paper.

46F5209 Type LAS800-12. **Each** **1237.85**
(5314) (de01230)

AMPROBE

DIGITAL CLAMP-ON METERS

TRUE RMS AC + DC ADVANCED CLAMP-ON MULTIMETER

AC/DC3000

Type ACDC3000 combines true RMS measurements with frequency or duty cycle measurements. Features dual display, view current/frequency, current/duty cycle, voltage/frequency, voltage/duty cycle. Max, avg, or min recording. AC + DC true RMS current measurements to 1000A. VAC, 750V. VDC, 1000V. Resistance: 40MΩ maximum. Audible continuity and diode tests. Frequency: 10Hz to 200kHz. 3¾- or 4½-digit, 4,000/20,000-count LCD.
Type AC/DC-620T combines true RMS measurements with temperature and capacitance measurements. True RMS AC and DC current and voltage measurement to 1000A and 1000V. Capacitance measurement to 4000µF. Dual display of temperature in both C and F. Single, dual, and differential temperature measurement up to 2502°F (1372°C). (Requires optional adapters - **type DKTA-620** - dual input, **type TAC-DMM** - single input, and **type TPK-56** bead probe). Resistance to 4kΩ.

Type ACD330T similar to AC/DC3000 AC current measurement only. AC volt range 1000VAC. Resistance: 4kΩ. Frequency: to 1kHz. 4 digit, 4000 count LCD display. Dual display for frequency and current or frequency and voltage. Dynamic min/max/avg recording.
All are designed to conform to UL, Ulc, TUV, CE, IEC standards and include test leads, carrying case, battery, instruction manual.

(5302) (de01130)

DIGITAL AC/DC CLAMP-ON MULTIMETER

ACDC 1000

ACDC 610

Type ACDC 1000 measures AC/DC amps, ohms and voltage. Features hooded, fully-installed 2″ jaws; high-accuracy LCD readout; overrange and low-battery indicators. Auto ranging. Fused ohmmeter, 400V circuit protection. AC frequency: 40-400Hz; DC: 30-300Hz. AC/DC voltage and current ranges: 0-199.9/999 continuous, 1-999 peak. Includes test leads, replacement fuse, case. *Order 9V battery separately-see Product Index for complete selection.* **Type ACDC 610** measures AC/DC current and voltage, frequency and ohms/continuity. Features auto power shut-off, peak hold, data hold, over-range and low-battery indication, and continuity buzzer. Max. jaw opening: 1.65″. AC/DC volt ranges: 0-400/0-750VAC; 0-400/0-1000VDC. Includes 9V battery and instructions. **Type ACDC-600AT** is a true rms measuring instrument used for accurate measurement of loads with distorted waveforms or systems suspected of having harmonics. **Type ACDC-600A** is an average-sensing instrument calibrated to read out in rms. **Types ACDC-600AT** and **ACDC-600A** feature AC/DC current measurements to 600 amps, full annunciated LCD display, low-battery and over-range indicators, auto power off, and data hold. Jaw opening: 1.33″. Includes 9V battery, wrist strap, and SC-600 carrying case.

AC/DC CLAMP-ON MULTIMETERS

ACD-2000, -9A

ACD-2001, - 7A/8A

Type ACD-2000 and **ACD-2001** are Multi-Sensing™ meters that permit user to select mode: true rms, average or peak-sensing. 3½-digit LCD readout. Ohmmeter fused to 600V. AC voltage range: 0.1-199.9/999; resistance: 0.1-199.9/1999Ω; frequency: 40-400Hz.
Type ACD-7A/8A/9A measure AC Amps, AC/DC volts and resistance. Feature 3½ digit LCD. Units are average sensing rms calibrated. **Type ACD8A** and **ACD-9A** are peak sensing rms calibrated when switched to peak mode; push button select high/low range. AC/DC voltage ranges: 0.1-199.99/999; resistance 0.1-199.99/1999 Ω; frequency: 40-400 Hz.
Jaw size: **type ACD-2000** and **type ACD-9A** - 2″(50.8), **type ACD-2001** and **type ACD-7A/8A** - 1″(25.4). **Type ACD-200X** and **ACD-XA series** include all-weather test leads, ohmmeter attachment, alligator clip adapter and case. Order 9V battery separately - see Product Index for selection.

AM-15, AM-16, AM-18

- **Auto and Manual Ranging**
- **Supplied with Battery and Test Leads**

Type AM-15 features direct measurement of AC/DC voltage, AC/DC current, resistance, and diode. Push button offset to automatically compensate for lead impedance. Data hold button. **Type AM-18** feature capacitance to 1000µF; choice of Lo or High power ohms; push button offset to compensate for lead impedance; auto power off. **Type AM-18** has an input jack alarm. Voltage ranges: 0-1.999/19.99/199.9/600VDC/AC (**type AM-15**), 200mV, 2V, 20V, 200V, 600VDC (**types AM-16, AM-18**); 2V, 20V, 200V, 600VAC (**types AM-16, AM-18**). Resistance ranges: 0-1.999/19.99/199.9kΩ (**type AM-15**); 200Ω, 2kΩ, 20kΩ, 200kΩ, 2MΩ, 20MΩ (**types AM-16, AM-18**). Current ranges: 0-199.9 AC/DC, 0-10A (**type AM-15**); 2mA, 200mA, 10A AC/DC (**type AM-18**).

93F6368 Type AM-15. **Each** **76.85**

AM-12, AM-21 AND AM-22 3½-DIGIT MULTIMETERS

AM-22

- **Fuse Protected to 600V AC/DC**
- **Measures AC/DC Amps, Volts, Resistance**
- **10MΩ Input Impedance**

Voltage ranges: 0-1999.9/750VAC; 0-1.999/19.99/199.9/1000VDC; 0-1999mVDC. 15kV AC/DC can be added with high-voltage accessory probe HV-4 (not supplied). Resistance ranges: 0-199.9/1999K ohms; 019.99/199.9/1999KΩ. Current ranges: 0-1999µA DC; 0-19.99/199.9/1999mA AC/DC; 0-10A AC/DC. Battery: 9V alkaline; *see product index for battery selection.*

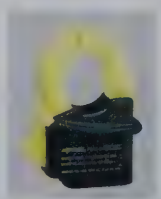
DIGITAL PEN MULTIMETER AND CLAMP-ON HEAD ADAPTER



PMM-C

PMM-1

Type PMM-1 multimeter features AC and DC current, ACV, DCV, resistance diode check, audible continuity check, 65-segment analog bar graph, data hold, auto power off; complete with test leads, carrying case, batteries, and manual. **Type PKT-2** is a dual-k type thermocouple. **Type PMM-C** adapter transforms **type PMM-1** into a one-piece clamp-on. 300A AC capability. UL listed. *Order additional adapters below.*

66F6669 Type PMM-1. **Each** **69.85**
66F6670 Type PMM-C. **Each** **49.85**
91F2914 Type PKT-2. **Each** **94.85**

91F2916 Type PCAP-2 Capacitance. **Each**.... **75.85**
(6593) (nec9186)

TYPE CDM-1 CREDIT CARD SIZE DIGITAL MULTIMETER

Features:
• Autoranging for ACV, DCV, and ohms • 32-segment analog bar graph • 3¾-digit, 3200-count annunciated LCD • Auto power Off • Convenient carrying case with test lead storage • UL listed, CE compliant

Specifications:
• DC voltage range: 320mV, 3.2V, 32V, 320V, 450V • AC voltage range: 3.2V, 32V, 320V, 450V • Resistance range: 320Ω, 3.2kΩ, 32kΩ, 320kΩ, 3.2MΩ, 32MΩ • Dimensions: 4.3H x 2.1W x 0.5"D • Weight: 3.5 oz.

16F9051 Type CDM-1. **Each** **39.85**
(6592) (nec9185)

AC/DC CURRENT TRANSDUCER FOR DMMs

A1000

CT-600

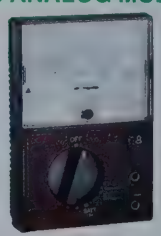
Type A1000 allows a non-true RMS digital multimeter to read true RMS current. Has waveform display capabilities when used with an oscilloscope. 2.00"(50.8) jaw capacity. Features AC and DC current ranges: 0-1000A; crest factor: >3:1; manual zero adjust. Includes 9V battery carrying case, test leads, and manual. Designed to meet IEC 1010-1 Category III, 300V, Pollution Degree.

16F9047 Type A1000. **Each** **199.85**

Type CT-600 features universal leads to measure AC and DC current up to 600 amps for all makes of digital multimeters. 1.33"(34) jaw capacity, AC current range: 0-100A, 40-400Hz with output voltage of 10mV/A; 0-600A, 40-400Hz with output voltage of 1mV/A. DC current range: 0-100A with output voltage of 10mV/A; 0-600A with output voltage of 1mV/A. Green flashing LED power ON indicator, red LED low battery indicator. Includes 9V battery and carrying case.

93F6372 Type CT-600. **Each** **126.85**
(5364) (de51859)

AM SERIES ANALOG MULTIMETERS



AM-2E

Type AM-2E ranges are fuse protected to 250V; can withstand misapplication to 220V. Voltage ranges: 0-10/50/125/250/1000VAC (10,000Ω/V); 0-0.5/2.5/10/25/125/250/1000VDC (30,000Ω/V). Resistance: 500Ω (20Ω midscale), 5kΩ (200Ω midscale), 1MΩ (10kΩ midscale). Current: 0-25/250mA, 0-50µA DC. Includes test leads, fast-blow fuse. *Order AA battery separately.* **Type AM-2EDP** rugged version withstands 5' drop.

81F9829 Type AM-2E. **Each** **57.85**
81F9830 Type AM-2EDP. **Each** **71.85**
(5308) (de01207)

ROTARY-SCALE AC CLAMP-ON MULTIMETERS

Type RS-1/300/300A measures current to 300A on up to 1″ (25.40) conductors. **Type RS-1000/1000S/1007S** measures current to 1000A on up to 2″ (50.80) conductors. Accuracy: ±3% full scale; ohmmeter: ±3% of scale length, based on sinusoidal waveform, 60Hz. All models include all-weather test leads, ohmmeter attachment (where applicable), and case. Meters with **A suffix** include extendo test leads, alligator clip, deluxe; **S suffix** includes surge-indicating capability. *Order AAA battery separately - see Product Index for selection.*

VOLT-AMP-OHMMETERS (25Ω MID-SCALE)

Stock No.	Type	AC Volts	Each

(5306) (de01205)

RS SERIES AC CLAMP-ON MULTIMETERS WITH 600V FUSE PROTECTION

Jaws measure current on conductors to 1″ (25.40) diameter. All models measure ACV to 600V and ACA to 300A and include all-weather test leads, case, and ohmmeter battery adaptor where applicable. 600V fuse protection. Accuracy: ±3% full scale; ohmmeter ±3% of scale length, based on sinusoidal waveform, 60Hz. 600V high-energy fuse protection. **Type RS3 SUPER** offers 50-400Hz calibration and withstands 5-foot drop. **Type RS-3A** includes extendo test leads, alligator clip adapter, deluxe case. *Order AAA battery separately; see Product Index for complete selection.*

Stock No.	Type	Each
62FX658	RS-3	94.85
62FX943	RS-3A	104.85
93F5414	RS3 SUPER	99.85

(5353) (de04195)

FLAT SCALE AC VOLT-AMP-OHMMETERS

- **Pointer Lock for Tight Spaces**
- **Average-Sensing, RMS Calibrated**
- **Ohmmeter Fused to 250VAC**
- **Drop-Proof to 5′**
- **±3% Full-Scale Accuracy**

FS-3 series multimeters have flat-scale display and 1″ (25.40) jaws. Ranges: 0-150/300/600VAC; 0-6/15/40/100/300ACA; 50/60Hz. Resistance: Rx1, Rx100Ω (25Ω mid-scale). **FS-3L** includes carrying case. *Order AA battery separately–see Product Index for complete selection.*

87F1124 Type FS-3. **Each** **49.85**
87F1125 Type FS-3L. **Each** **54.85**
(5307) (de01206)

VOLTPROBE 440® AC VOLTAGE TESTER

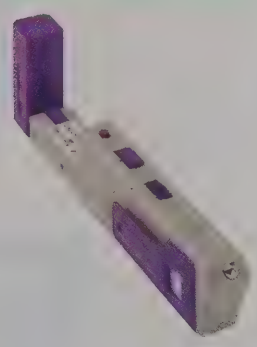
- **Rugged, Pocket-Sized Design**
- **Completely Insulated–No Exposed Metal Parts**
- **Voltage Range: 110-440VAC**
- **Locates Breaks in Cables**
- **Detects Energized Circuits**
- **Checks Circuit Breaker Functions**
- **Identifies Faulty In-Line Switches**
- **Distinguishes Between Live/Neutral Wires**

Compact voltage tester works without interrupting service. Does not require current flow to operate. 2 AAA batteries included.

93F6370 Type VP440. **Each** **17.85**
(5309) (de01208)

AC VOLTAGE TESTER

NEW



Type VCM-2 is a pocket-sized tester that indicates AC voltage using a noncontact method. Features: adjustable distance sensitivity and sensing arm (0-90°), continuity 0-5MΩ (with audible sound adjustment), verifies DC voltage/polarity check (2-36 VDC), AC voltage test - noncontact (70-600VAC), microwave leakage monitor, negative ions detector. Includes 4 LR44 1.5V batteries.

83F7334 Type VCM-2. **Each** **17.85**
(33683) (ne33683)

ALL-WEATHER TESTER

NEW

Type CVF-3 all weather tester will detect ACV (contact methods from 70-250VAC; noncontact method 70-600VAC), DCV 1.5 to 250VDC, polarity test, continuity test, and microwave leakage test. Includes battery.

83F7335 Type CVF-3. **Each** **9.85**
(33684) (ne33684)

LASER TEMPERATURE PROBE

NEW

Type LTP-1 probe provides noncontact optical method of measuring temperature. Simply point at the desired target and press the on button for a temperature reading. Response time of 1 second and a continuous reading feature for thermal scanning. Temperature range: 0°F-600°F or -18°C- 315°C.

83F7336 Type LTP-1. **Each** **299.95**
(33681) (ne33681)

PHASE SEQUENCE/MOTOR ROTATION TESTER

NEW

Type PRM-1 tester identifies phase sequence and motor rotation. Voltage range from 20 to 600Vrms. Frequency range: 50-400Hz. 4 bright LED indicators indicate normal (ABC), reverse (CBA), phase loss, and low-battery tests. Integrated test leads. Includes 9V battery.

83F7337 Type PRM-1. **Each** **89.85**
(33682) (ne33682)

BK PRECISION®

GENERATORS AND POWER SUPPLIES

FUNCTION AND SIGNAL GENERATORS

3001

4011

4017

4040

Types 4011 and **4017** function generators have frequency bandwidth of 5 and 10MHz, respectively. **Type 4040** function generator features 20MHz frequency bandwidth, AM, FM, sweep, burst, TTL, and CMOS outputs. **Type 3001** sine/square wave generator has a frequency range of 20Hz to 150kHz in 46 steps. Accuracy 20Hz to 100kHz (±3%); 120/150kHz (±5%). Output impedance: approximately 600Ω. Low distortion R-C oscillator, variable output control, low-battery indicator. Distortion: 200Hz-15kHz (0.05%); 50Hz-28kHz (0.1%); 20Hz-100kHz (0.3%). Weighs 7 oz. Includes 2 standard banana plug to insulated clip test leads, 9V battery, instructions.

SINGLE AND TRIPLE OUTPUT DC POWER SUPPLIES

1760

1651

1670FR

1746, 1743, 1740

1735, 1715, 1705

1710, 1711, 1730

1688, 1686FR

1682

1680

All power supplies are designed for continuous duty at maximum rated output. The designs protect the load, the power supply, and the user from accidental problems. Circuitry includes reverse polarity protection, thermal protection, short-circuit protection, and current limiting. Regulation is tight, and ripple is low, regardless of variations in the load or the input AC line voltage. All units are constant voltage and constant current except **types 1688, 1686, 1682,** and **1680** (which are constant voltage only). Ripple is ≤1mV rms for all models except **type 1651** (≤2mV rms); **1670** (≤5mV rms); **1688, 1686, 1682** (≤10mV rms); and **1680** (≤6mV rms). Line regulation is ≤0.01%+3mV for all models except **type 1670** (≤0.05%+10mV); **1743, 1746,** and **1740** (≤0.02%+2mV): **1688, 1686, 1682** (±0.8%); and **1680** (≤130mV). Load regulation is ≤0.01%+3mV for all models except **type 1670** (≤0.05%+10mV); **1743, 1746,** and **1740** (≤0.04%+2mV): **1688, 1686, 1682** (±0.8%); and **1680** (≤320mV).

POCKET DIGITAL MULTIMETER

2700

The pocket digital multimeter includes a 3¾-digit LCD display with bargraph, autoranging, DCV, ACV, Ω, continuity and diode tests.

92F3256 Type 2700. **Each** **35.00**
(5415) (ne08960)

TEST BENCH SERIES DIGITAL MULTIMETERS

389

The Test Bench series are high quality, ruggedized multifunction digital multimeters. Features include: 3¾-digit LCD (4½ LCD for **type 391** only); accuracy: 0.05% DCV (**types 391** and **388A**), 0.1% DCV (**type 390**), 0.25% DCV (**type 389**); Autoranging: **types 390** and **389**, manual ranging: **types 391** and **388A**; 1000VDC and 750VAC ranges; min/max (**types 390** and **389**); temperature (**type 390**); logic, Hz (**type 391**); C, Hz (**types 390** and **389**); V, A, Ω, Hz, C, hFE, logic (**type 388A**); duty cycle (**type 391**), relative (**types 389** and **390**). All include test leads, battery, instruction manual, and rubber boot. (Thermocouple probe - **type 390** only).

93F3749 Type 391. **Each** **185.00**
93F3748 Type 390. **Each** **165.00**
93F3747 Type 389. **Each** **145.00**
89F862 Type 388A. **Each** **125.00**
(5416) (ne08961)

BENCH DIGITAL MULTIMETERS

2831A

Type 2831A features 3½-digit LED display, 0.1% DCV accuracy, 1200VDC, 1000VAC, 20A, manual ranging, 40KHz AC response, and high energy fused. Power requirements: 120/240VAC, 50/60Hz (5W). Includes test leads, spare fuses, and instruction manual.

60F2760 Type 2831A. **Each** **299.00**
(5419) (ne09077)

MINI-PRO SERIES DIGITAL MULTIMETERS

2407

The Mini-Pro series are professional quality multimeters at low cost. **Type 2405** includes DCV, ACV, CDA,Ω, hFE, manual range selection, 3½-digit LCD display, and 0.5% DCV accuracy. **Type 2407** includes all **type 2405** features (except hFE) plus autoranging and audible continuity. All include test leads, battery, and instruction manual.

52F6792 Type 2407. **Each** **55.00**
52F6291 Type 2405. **Each** **27.00**
(5418) (ne09076)

BK PRECISION®

COMPONENT TESTERS

CAPACITOR SORTING METER

NEW

Type 890 features large LCD with dual display, 5,000 count resolution and 9 automatically selected ranges with full scale value from 0.1pF to 50mF. Visible and audible alerts for fast sorting of capacitors against standard or user-programmed tolerances. Static recording for automatic calculation of max/min/avg values. Data hold. Computer interface (RS-232) for recording and comparison of test results.

83F7341 Type 890. **Each**..... **149.00**

Type AK-890 software available; order separately. Includes protective holster, test leads, 9V battery, and operation manual. Books, videos, and software are nonreturnable.

83F7339 Type AK-890 Software. **Each**..... **45.00**
(33279) (ne33279)

AUTORANGING CAPACITANCE METER

Type 830 measures up to 199.9mF with 0.2% accuracy. Features 3½ digit LCD and autoranging operation. Test method is DC. RC time. Uses 4 C-size NiCad or alkaline, or **type BC-28** AC adapter/charger available separately; *contact your local Newark sales office.*

60F2766 Type 830. **Each**..... **350.00**
62F549 Type BC-28 Adapter/Charger. **Each**... **23.00**
(33280) (ne33280)

MANUAL RANGING CAPACITANCE METER

Type 810B measures capacitance to 20mF. Basic accurance is 0.5%. Manual ranging. 3½ digit LCD. Test method: AC, X_C. Powered by 9V battery (included). **Type LC-29A** carrying case available; *order separately below.*

46F8204 Type 810B. **Each**..... **99.00**
89F863 Type LC-29A Carrying Case. **Each**.... **10.00**
(33274) (ne33274)

TYPE 878 DUAL DISPLAY LCR BRIDGE WITH STATISTICAL FUNCTIONS

- **8 Capacitance Ranges: 1000pF to 10mF**
- **7 Resistance Ranges: 10Ω to 10MΩ**
- **8 Inductance Ranges: 1mH to 10,000H**

Also measures capacitor dissipation factor and inductor Q factor. Simultaneously displays these values and remembers minimum and maximum. Keeps running average of tested component values. Relative mode displays difference between measured and reference values. Tolerance mode beeps to indicate component outside 1%, 5% or 10% reference value. Two test frequencies (120Hz, 1kHz) and auto or manual ranging. Uses one 9V battery or AC adapter. Includes test leads, adapter, instructions.

93F3750 Type 878. **Each**..... **275.00**
(5294) (de00886)

TYPE 875B 3½-DIGIT LCD LCR METER

- **8 Capacitance Ranges: 200pF to 20mF**
- **7 Resistance Ranges: 2Ω to 20MΩ**
- **7 Inductance Ranges: 200µH to 200H**

Rotary switch allows easy function/range selection. Measure dissipation factor of capacitors and 1/Q of inductors. Low battery and overload indicator. Overload: fuse-protected 250VAC, 100mA. Measurement rate: 2.5 per second, nominal. Includes test clips, 9V battery, spare fuse, instructions.

46F8205 Type 875B. **Each**..... **189.00**
(5293) (de00885)

COMPONENTS TESTER

Type 815 measures capacitance to 20mF, resistance to 20MΩ, diode test, transistor leakage, transistor gain, LED test, 2mA, 10mA battery test underload 9V, 1.5V, 1.55V. 3½ digit LCD. Powered by 9V battery (included). **Type LC-29A** carrying case available; *order separately below.*

50F434 Type 815. **Each**..... **99.00**
89F863 Type LC-29A Carrying Case. **Each**.... **10.00**
(33275) (ne33275)

2.7GHz MULTIFUNCTION COUNTER

NEW

Type 1856B benchtop multifunction counter measures frequency to 2.7GHz. Includes period, selectable gate time, min/max/avg, RS-232 data output. 8 digit display. Uses battery or AC power.

83F6854 Type 1856B. **Each**..... **469.00**
(33278) (ne33278)

1.25 AND 2.5GHz FREQUENCY COUNTER

NEW

Hand-held multifunction counters measure frequency, period, selectable gate time, and min/max/avg. RS-232 data output. 8-digit display. **Type 1870** measures frequency to 1.25GHz, has 2 channel input selection, and selectable sensitivity of 50-120mV rms. **Type 1875** measures frequency to 2.5GHz, has 3 Channel input selection, and selectable sensitivity of 50-120mV rms. Both types use battery (not included) or AC power.

83F6852 Type 1870. **Each**..... **209.00**
83F6853 Type 1875. **Each**..... **249.00**
(33276) (ne33276)

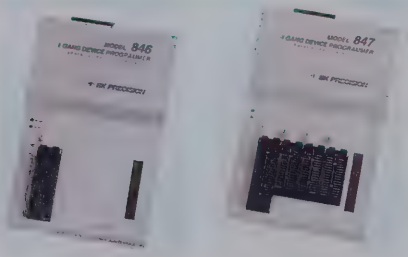
175MHz UNIVERSAL COUNTER

Type 1823 benchtop universal counter measures frequency to 175MHz. Includes period, period average, totalize, ratio, time interval, selectable gate time and min/max/avg. 8 digit LED. Sensitivity to 20mV rms. AC power: 100/120/220/240VAC, 50/60Hz.

50F3660 Type 1823. **Each**..... **399.00**
(33277) (ne33277)

EPROM PROGRAMMERS AND UNIVERSAL TESTERS

UNIVERSAL DEVICE PROGRAMMERS



846 847

Types 846 and **847** plug directly into printer port and programs FPGA's, GAL'S, PEEL'S, EPLD'S, EPROMS, EEPROM'S, micro's, and serial PROM's. Operates in conjunction with the full spectrum of IBM compatibles: PC, XT, AT, Pentium, PS/2, portables and clones. Over 50 different optional converters are available for device packages such as PLCC, SOP, TSOP, QFP and SDIP. **Type 846** includes 48 pin ZIFF socket. **Type 847** includes 48 pin ZIFF socket and (3) 32 pin ZIFF sockets. Both include software diskette, instruction manual, power transformer, and parallel printer cable.

91F2908 Type 846. **Each**..... **495.00**
(12530)
91F2909 Type 847. **Each**..... **595.00**
(ne09887)

SINGLE VOLTAGE ANALOG INSULATION TESTERS

305

Type 300 provides 1000V, 2000MΩ to insulation resistance; measures ACV to 600V; battery powered analog display. **Type 305** same as **type 300** except 500V, 1000MΩ. Both types include test leads, batteries, carrying case and instruction manual.

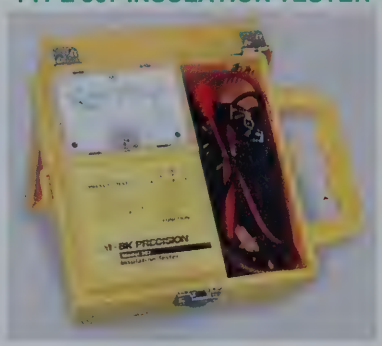
92F3257 Type 300. **Each**..... **135.00**
16F9058 Type 305. **Each**..... **135.00**
(6574) (nec9167)

UNIVERSAL CABLE/HARNESS TESTER

Type 205 detects opens, shorts, and miswires. RS-232 interface with an easy-to-read, 2 line x 16 character LCD display provides instant pass/fail or error messages. Test up to 128 points in fractions of a second. Stores up to 50 test programs. Adapter card accepts industry's most popular connector styles (connectors not included with adapter card). Includes single wire test probe.

83F7340 Type 205. **Each**..... **895.00**
(37472) (ne37472)

TYPE 307 INSULATION TESTER



307

Type 307 provides multiple voltage testing with 250V/50MΩ, 500V/100MΩ, or 1000V/200MΩ ranges. Analog display. Battery operated. Low resistance test. Includes batteries, integral carrying case w/strap, test leads, and instruction manual.

16F9057 Type 307. **Each**..... **195.00**
(6573) (nec9166)

EPROM PROGRAMMERS

Type 840 programs EPROMS, EEPROM'S Flash, PROM. Library contains over 500 devices. Includes 32 pin ZIFF socket, software diskette, 40 pin ribbon, and instruction manual. **Type 843** programs PAL's, GAL's, EPROMS, EEPROMS, micro's and bipolar PROM. Library contains over 1800 devices. Test TTL and CMOS logic IC's. Includes 48 pin socket. Test chips up to 246 MB. Plugs directly into printer port. Includes 32 pin ZIFF socket, software diskette, 40 pin printer cable, and instruction manual.

52F6286 Type 840 Device Programmer. **Each** **205.00**
52F6290 Type 843 Parallel Port Version. **Each** **795.00**
(6516) (nec7039)

TYPE 308 INSULATION TESTER

308

Type 308 provides multiple voltage testing of 250V, 500V or 1000V with resistance to 2000MΩ. 3½ digit LCD. Battery Operated. Low resisance test. Includes batteries, integral carrying case w/strap, test leads, and instruction manual.

16F9056 Type 308. **Each**..... **265.00**
(6572) (nec9165)

TYPE 1280 COMPUTER MONITOR PATTERN GENERATOR

1280

Generates RGB test patterns for most computer monitors, CGA, EGA, VGA, SVGA, and MACII. Color bars, crosshatch, grayscale and solid color raster, red, green, blue or white. Connects directly to 9-pin or 15-pin D connector or BNCs. H sync and V sync or sync on green. Power: supplied AC adapter for 120VAC ±10%, 60Hz; external DC, 7.5-12V; or 9V battery.

52F552 Type 1280. **Each**..... **429.00**
(5405) (ne08880)

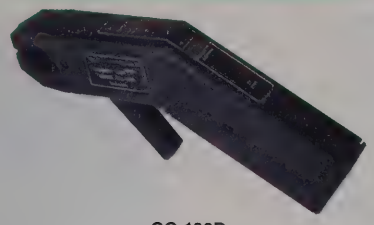
GAUSSMETERS AND TEST EQUIPMENT

CURRENT METERS/PROBES



CG-100D

- **Non-contact measurements**
- **For conductors up to ¾″ diameter**

Types CG-100A and **CG-120A** current probes work with any multimeter, scope, or recorder. Frequency: DC to 1kHz. **Type CG-100D** current meter features 3½-digit LCD and analog output.

Stock No.	Type	AC/DC Range	Each
93F9846	CG-100D	±200A	**385.25**
93F9847	CG-100A	±10A, ±100A	**306.00**
93F9848	CG-120A	±50A, ±500A	**198.00**

(6575) (nec9168)

NON-CONTACT CLAMP-ON MILLIAMMETER, DC/AC TRUE RMS

Non-contact measurements of very low DC or AC currents from 1mA to 2000mA, with resolution as low as 0.1mA. Frequency range: DC to 100kHz in 2 ranges: DC to 200Hz and 200Hz to 100kHz. Basic accuracy: 1% of reading. Aperture: 0.21″. Easy-to-read 3½-digit LCD displays DC or true RMS AC currents in milliamps. Analog output through BNC connector for scopes or recorders. Detachable probe. Lightweight, battery operated.

92F6663 Type MA-2000. **Each** **625.07**
(6577) (nec9170)

5000 SERIES GAUSSMETERS

5080

Test, sort, and classify magnets, test AC and DC motors, check residual and stray fields. Meters feature readings in Gauss or Tesla on easy-to-read, built-in LCD. Standard transverse probe, zeroing chamber, batteries, and hard carrying case included. **Type 5060** DC only, 4% accuracy. **Type 5070** DC to 10kHz, peak hold, 2% accuracy. **Type 5080** DC to 20kHz, 1% accuracy, peak hold, RS-232 and analog outputs.

Stock No.	Type	Ranges	Each
16F9078	5060	2kG, 20kG	**520.01**
16F9079	5070	200G, 2kG, 20kG	**730.12**
16F9080	5080	300G, 3kG, 30kG	**1045.28**

(6578) (nec9171)

6000 SERIES HALL EFFECT GAUSSMETER

Type 6010 hall-effect gauss/tesla meter represents the latest innovations and state-of-the-art design. F.W. Bell's exclusive Dynamic Probe Correction feature, along with temperature compensation, allows measurements up to 300kG with a basic correction of 0.025%. Features include: peak hold, min./max. hold, auto zero, auto range, relative mode, and temperature measurement. Measurement range (depending on probe option): 1mG (0.1μT) to 300kG (30T). Frequency response: dc to 20kHz. Temperature measurement (requires optional temperature compensated probes): –40°C to +100°C. Display: large alpha-numeric LCD with dual 3¾-digit readout. Measuring units: gauss, tesla, amperes/meter. Includes a zero gauss chamber, accessory hard case, built-in rechargable battery, quick-reference card, and instruction manual.

83F9146 Type 6010 Hall-Effect Gaussmeter. **Each** **1923.43**
(41770) (ne41770)

CURRENT/POWER PROBES

UM-7700

- **For Conductors up to 2⅜″ Diameter**
- **Measure AC And DC Currents up to 1000A**
- **Type UM-7700 Measures AC Power up to 330kW**
- **Analog Output Connects to Multimeter or Recorder**

Type UM-1000 measures DC current: 1-1000A, 1.5%; AC current: 1-1000A, 2.5%. Output is 1mV/A. **Type UM-7700** measures DC current: 1-1000A, 1.5%; AC current 1-1000A, 1.5%. Output is 1mV/A. Actual power: 1-330kW, 3%. Output is 1mVDC/kW. Comes with hard case and battery.

99F3376 Type UM-1000. **Each** **479.25**
99F5274 Type UM-7700(131956. **Each** **630.50**
(10525) (ne09873)

ELF MAGNETIC FIELD METERS

4070 4080 4090

Measure extremely low frequency magnetic fields from AC power lines, appliances, and electrical equipment. Large 3½-digit display. Battery and instructions included. Simple one-switch operation. **Type 4070** is a single-axis meter. **Type 4080** and **4090** feature 3 axis measurements to eliminate errors caused by improper alignment. **Type 4090** is most accurate (±1% of reading).

16F9075 Type 4070. **Each** **136.52**
16F9076 Type 4080. **Each** **209.58**
16F9077 Type 4090. **Each** **414.96**
(6580) (nec9173)

MULTIMETERS, SOUND METER KITS AND ACCESSORIES

260 SERIES ANALOG VOM

260-8 AND 260-8XI

The **260 series** is for monitoring fluctuating trends and rates. Large color-coded dial with mirrored scale to eliminate parallax error. More than 20 measuring ranges for DC voltage, AC voltage, DC current, resistance, and dB level. Also measures AC current up to 250A with **Type 150-2** amp clamp accessory, *ordered separately; contact your local Newark sales office.* **Types 260-8P** and **260-8PRT** also feature overload protection and audible continuity check. **Types 260-8RT** and **260-8PRT** include roll-top case. All models include batteries, test leads with alligator clips, and manual. *Carrying cases and other accessories sold separately; see below.*

62F300 Type 12388 (260-8). **Each** **194.07**
62F303 Type 12389 (260-8RT). **Each** **232.88**
62F1191 Type 12391 (260-8P). **Each** **258.75**
62F2270 Type 12392 (260-8PRT). **Each** **296.79**

Types 260-8Xi, 260-8XPi offer the same features in a highly-visible yellow, durable ABS plastic housing designed for the toughest environments. **Type 260-6XLM** has special low power ohms. **Type 260-6XLMP** also features overload protection.

50F3533 Type 260-8Xi. **Each** **209.59**
50F3534 Type 260-8XPi. **Each** **274.28**
98F3358 Type 260-6XLM. **Each** **257.72**
16F2246 Type 260-6XLMP. **Each** **294.99**
(5320) (de01487)

TYPE 270-5 HIGH-ACCURACY VOM

270-5

Extra-high accuracy VOM for applications requiring critical measurements: ±1.25% f.s. DC volt accuracy, ±2% f.s. AC volt accuracy. Large color-coded dial with mirrored scale to eliminate parallax errors. Self-shielding meter movement. More than 20 measuring ranges for DC voltage, AC voltage, DC current, resistance, and dB level. Also measures AC current with **type 150-2** amp clamp accessory, *order separately; contact your local Newark sales office.* Both models include test leads with alligator clips, batteries, and manual. **Type 270-5RT** comes with roll-top case. *Order other accessories separately; contact your local Newark sales office.*

62F380 Type 12226 (270-5). **Each** **220.46**
16F2247 Type 270-5RT Roll-Top Case. **Each** . **246.83**
(5321) (de01488)

TYPE 160 COMPACT ANALOG VOM

160

Compact, lightweight VOM with the same reliable performance of the Simpson 260. High immunity to voltage transients and RF interference. More than 20 measuring ranges for DC voltage, AC voltage, DC current, resistance and dB level. Includes batteries and test leads with probe tip. *Carrying cases and other accessories sold separately; see below.*

62F1723 Type 12271 (160). **Each** **191.48**
62F1682 Type 02225 CASE. **Each**..... **48.98**
62F1686 Type 02055 LEADS. **Each** **18.66**
(5322) (de01489)

228 AC/DC & 229-2 CURRENT LEAKAGE TESTERS

228

229-2

Type 228 AC/DC is designed to mimic the human body's sensitivity to electrical shock (Let-Go, reaction, and burn hazard). **Type 229-2** detects small leakage currents in appliances, motors, and other equipment. **Type 228** complies with UL, IEC, and ANSI guidelines. **Type 229-2** checks both 120 and 240 VAC equipment. Both include test leads, battery, and manual. *Carrying cases and other accessories ordered separately, see below.*

93F6825 Type 228. **Each**..... **553.73**
62F324 Type 229-2. **Each**..... **294.98**
(13528) (ne09876)

TYPE 380-2 MICROWAVE LEAKAGE TESTER

380-2

Type 380-2 microwave leakage tester measures energy radiated by ovens, heaters, and other equipment generating high power at microwave frequencies of 2450MHz. Nonpolarized probe allows selection of 4 ranges for power-density measurements: 0-2.5-10-25-100mW/cm^2. High-impact case electrically shielded. Calibration frequency: 2459MHz ±10MHz. Response time: fast, 1.2 sec. max.; slow, 3.0 sec. max. Power: one 9V battery (included). Also includes probe, foam spacer, manual, durable case.

92F4076 Type 380-2. **Each**..... **879.75**
(13535) (ne09878)

INSULATION TESTER AND GUARD CABLE

Measures insulation resistances up to 1Tohm(10^{15}) with 8 test voltages up to 5000V and battery self test. AC/DC voltmeter to 2000V AC/DC with automatic discharge feature. Includes padded case, 2 test probes, 2 alligator clips, and a plug-in battery module (D size batteries are included). **Type 45065**, optional guard cable, minimizes surface leakage errors.

83F7552 Type 505. **Each** **2068.97**
83F8111 Type 45065. **Each** **102.47**
(33281) (ne33281)

MICRO-OHMMETER

Type 444 micro-ohmmeter uses test voltage of 100µV max. to avoid punch-through of contamination or corrosion. Ideal for testing antenna grounding systems, conductive coatings, high power fuses, or aircraft skin bonding. 4½-digit, 20,000 count LCD display. 20mΩ, 200mΩ, 2Ω, 20Ω ranges. AC pulse and DC polarity switching measurement methods. 120VAC power. Includes test leads and nicad battery for field use. *240VAC version also available; contact your local Newark sales office.*

89F2214 Type 12681 (444). **Each** **1509.12**
(13168) (ne09875)

SOUND NOISE MEASURING SYSTEMS

Type 12646 (SMS-2 Kit) dosimeter sound measuring system computes dosage and records up to 31 hours at 1 minute intervals, perfect for performing accurate noise surveys for OSHA and IEC requirements. Can be calibrated in the field with **type 12648** calibrator. General purpose **types 886-2 and 899** sound level meters are full-function, type 2 instruments used for taking quick, accurate sound level measurements in industrial, laboratory and other environments. All models include carrying case, batteries, and manual.

Stock No.	Type	Each
92F4071	12646(SMS-2 Kit)	**1221.82**
92F4072	12648(887-2)	**314.64**

TRIPLETT

MULTIMETERS AND TESTERS

VISUALEYEZER HEADS-UP DIGITAL VOM

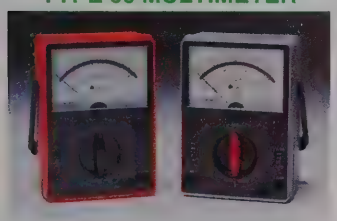
MADE IN USA

- View Measuring Points and Reading Simultaneously
- Reduces Chance of Accidental Probe Slippage
- High Energy Fuse in Each Probe Tip
- All Ranges and Functions Protected to 600VAC RMS
- 4 DCV Ranges to 600V, Autopolarity
- 3 ACV Ranges to 600V RMS (True RMS, 20Hz to 20kHz)
- 5 Resistance Ranges to 4000kΩ
- True Continuity Beeper with Loudness Control
- Decibel Function (True RMS, 20Hz to 20kHz)
- Relative Mode Including Relative dB
- Auto and Manual Range Selection
- 2-Year Warranty, 1-Year Calibration

Type 3250 includes hard-sided foam-lined carrying case, 60″ fused test leads with screw-on alligator clips, beltpack with adjustable strap, AC power pack, eyepiece assembly, and manual. Uses 4 alkaline C-cell batteries not included.

01F158 Type 3250. **Each**..... **369.00**
(19335) (ne10992)

TYPE 60 MULTIMETER



- Case Withstands 5′ Drop
- Accuracy: ±1.5% DC, ±3% AC
- Mirrored Scale, Polarity Reversing Switch
- 3-Year Warranty
- 5 Ohm Ranges to 10MΩ

28 ranges up to 1000VAC or DC: 8 DC 6 AC volt ranges, 4 DC current ranges, 5 decibel ranges. 3-fuse arrangement overload protection. Includes: 48″ leads, alligator clips, batteries, fuses, instructions.

62FX170 Type 60(3145). **Each**..... **199.00**
(5357) (de50617)

ANALOG MULTIMETERS & VOM'S

Type 630 features: 25 ranges up to 600VAC/DC, glass meter window for added chemical resistance, 2 input jacks, ACV frequency response to 40kHz, resistance measurement of 30V/100M on R x 100k range for testing insulation. Includes: test leads, screw-on alligator clips, batteries, fuses, and manual.

62F212 Type 630 (3030). **Each** **189.00**

Type 630-PLK features: 28 ranges up to 1000VAC/DC, AC voltage frequency response to 40kHz, output voltage measurement (DC block), current measurement to 10A (no external shunt required), overload relay provides resettable protection, polarity reversing switch, large durable plastic window for easy viewing, resistance measurement of 30V/100M on R x 100k range for testing insulation. Includes: 48″ test leads, screw-on alligator clips, batteries, fuses, and manual.

62F1775 Type 630-PLK (3055). **Each**..... **289.00**

Type 666-R is a compact and portable VOM. Features: 14 ranges to 1000VAC or DC, 4 DC and AC volt ranges, 3 DC current ranges and 3 ohm ranges to 3MΩ. Includes 48″ leads, alligator clips, batteries and instructions. 3-year warranty.

62FX209 Type 666-R. **Each** **135.00**
(5356) (de50616)

TRUE-RMS CLAMP-ON METERS

NEW

- Meets IEC 1010 Category III 600V
- 3-Year Warranty
- Clamps Fit One 750 MCM Cable or Two 350 MCM Cables
- Rugged - Designed to MIL-T-28800 for Class II Instruments
- Includes Vinyl Carrying Case, Test Leads, Screw-On Alligator Clips, 9V Battery and Manual
- CE Compliant

Type 9300 is a basic ACA clamp-on meter. 3½ LCD with max. reading of 1999, AC/DC voltage measurement to 600V, AC current measurement to 600A, resistance measurement to 200Ω, average AC responding measurements, continuity test, manual ranging, and data hold features.

48F4012 Type 9300. **Each**..... **79.00**

Type 9310 is an AC/DC clamp-on meter. 3¾ LCD with maximum reading of 3999, AC/DC voltage measurement to 600V, AC/DC current measurement to 1000A, resistance measurement to 400Ω, frequency measurement to 4MHz, average AC responding, DCA zero-adjust knob, continuity test, manual ranging, and peak hold features.

48F4013 Type 9310. **Each**..... **99.00**

Type 9320 is same as **type 9310** except that it has true rms, autoranging, and diode testing capabilities.

48F4014 Type 9320. **Each** **119.00**
(34099) (ne34099)

TYPES 9000 AND 9030 DIGITAL MULTIMETERS

- 3½-Digit LCD
- 5 DCV Ranges to 1000V
- 5 ACV Ranges to 750V
- 6 DC and 5 AC Current Ranges to 10A
- 6 Resistance Ranges to 20MΩ
- Diode Test
- Continuity Test
- Transistor Test
- 3-Year Warranty

Type 9000 multimeter also tests batteries and temperature. Rugged case design. Red rubber boot. **Type 9030** multimeter has same features as above except temperature test. Also features dual display, bargraph, frequency, capacitance, data hold, auto hold, min/max, relative mode, and stop watch.

91F3081 Type 9000. **Each**..... **49.00**
91F3084 Type 9030. **Each**..... **79.00**
(19336) (ne10994)

TYPE 310 MULTIMETER

- High-Impact Thermoplastic Case
- 5 AC/DC Voltage Ranges
- 4 DC Current Ranges
- 4 Resistance Ranges to 20MΩ
- Accuracy: ±3% DC, ±4% AC
- 3-Year Warranty

Diode overload protection and fused ohm range. Includes 42″ leads, alligator clips, batteries and instructions.

62FX230 Type 310 (3018). **Each** **86.00**

TYPE 310-C MULTIMETER

Same as **type 310** except 18 ranges to 600VAC and DC polarity reversing switch.

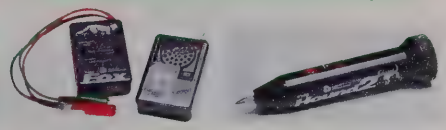
62FX292 Type 310-C. **Each** **112.00**
(5354) (de50614)

MULTIMETER MAINTENANCE KITS

Type 100 maintenance kit includes **type 310** multimeter, **type 10** clamp-on AC ampmeter, **type 101** line separator, 42″ separating leads and carrying case. **Type 100-C** same as above except with **type 310-C** multimeter.

62FX249 Type 100(3014). **Each**..... **199.00**
62FX252 Type 100-C. **Each** **229.00**
(5355) (de50615)

FOX AND HOUND WIRE TRACER



Fox (tone generator) and Hound (inductive tracer) locate hard-to-find wires easily. Fox generates 3 distinct tones for wire tracing. LED indicator for continuity. Hound has hi-gain, hi-impedance amplifier. Can identify Fox's tone up to 12″ away from testing wire through various surfaces. Moisture-resistant Mylar cone speaker. Locate wire without piercing insulation. Uses 9V alkaline battery; *ordered separately on page 4.* LAN Fox also available for LAN Cable tracing.

90F9691 Type 3385-FOX/HOUND. **Each**..... **69.00**
98F6066 Type 3380-FOX. **Each**..... **27.00**
92F6146 Type 3390-HOUND. **Each**..... **47.00**
92F4094 Type 3236-HOUND2. **Each** **47.00**
92F6147 Type 3245-FOX/HOUND 2. **Each** **69.00**
92F6148 Type 10-3983 Case. **Each**..... **17.50**
16F8187 Type 3243 LAN Fox. **Each**..... **29.00**
16F8188 Type 3249 LAN Fox/Hound. **Each** ... **71.00**
16F8189 Type 3248 LAN Fox/Hound 2. **Each**.. **71.00**
(5331) (de01945)

LAN CABLE TESTERS

WIREMASTER RJ-45 LAN CABLE TESTER

Verifies point-to-point wiring of RJ-45 patch cables. 8 LEDs identify the destination of each conductor in cable. Checks for continuity in straight-through wiring. 1-year warranty. For cable types: AT&T 258A, EIA/TIA T568A or T568B, TP-PMD and any RJ-45 cable.

52F9724 Type 3251WMRJ-45. **Each**..... **35.00**

WIREMASTER XR

Verifies point-to-point wiring of twisted pair LAN cables. Checks for continuity in straight-through wiring. 8 LEDs identify the source and destination of each conductor. Direct connection of 8-pin RJ-45 or 6-pin RJ-11 cables. Generates 2 district tones usable for cable tracing. Allows remote testing of cable runs up to 1000 ft. Carrying case included. 1-year warranty. For cable types: RJ-45 8-pin, RJ-11 6-pin 6 conductor, RJ-11 6-pin 4 conductor, straight-through or reverse wiring.

52F9723 Type 3254WMXR. **Each** **99.00**
(37276) (ne37275)

"SNIFF-IT" CIRCUIT BREAKER LOCATOR

UL NEW

Type 9650 locates circuits without turning off breakers. No adjustments necessary. Audible/visual indicators. Impact-resistant rubberized case. Magnetically attached to panel. Exclusive probe design for improved sensitivity. Uses 9V battery (not included). UL listed. 5-year warranty.

48F3891 Type 9650. **Each**..... **46.00**
(34097) (ne34097)

TYPE 9600 "SNIFF-IT" AC VOLTAGE DETECTOR

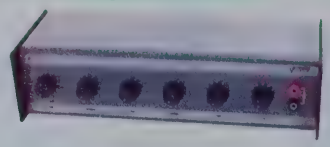
NEW UL

Type 9600 provides an easy and economical way to check for AC voltage. Safe, noncontact. Check 50- to 600VAC. Visual and audible alerts when AC voltage is present. UL listed. 5-year warranty.

48F4015 Type 9600. **Each**..... **16.00**
(34098) (ne34098)

DECADES, POWER SUPPLIES AND MULTIMETERS

DECADE BOXES



WR-418

Decades have precision switches with 12 self-wiping contacts, 10 steps/range and 5-year accuracy stability. **WR series** resistance decades offer accuracy to 0.03%. Additional models available; *contact your local Newark sales office.*

WR SERIES RESISTANCE DECADES

Stock No.	Type	Max. Ohms	Ohms Ranges	Accuracy	Each
97F8341	WR-415	1,111,111.1	100K, 10K, 1K, 100, 10, 1, 0.1, 0.01	0.1%	1363.73

WP SERIES ISOLATED AC POWER SOURCES

WP-32

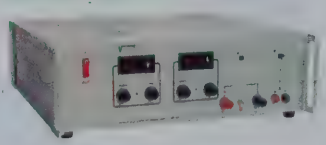
Designed to isolate equipment and circuits from the AC power line. Useful for safe servicing in the school, lab or shop. And to help service transformerless AC-operated equipment and devices with intermittent troubles and hazardous equipment. Maximum VA continuous is 1050. Maximum leakage is 0.01mA. **WP29B, WP30** and **WP32** feature variable and fixed isolated AC outputs, leakage of less than 0.2mA, audible leakage test, and adjustable current limiting. 105/130VAC, 50/60Hz for all models.

Stock No.	Type	Output	Ratings	Each
55F5354	WP29B	Single	0-150VAC @ 0-3A	489.58
46F5200	WP-30	Double	0-150VAC @ 0-5A	783.75
46F5199	WP-32	Double	0-150VAC @ 0-10A	1018.88

(5367) (de52261)

DC POWER SUPPLIES

WP-75



WP-718

Type WP-75 is a DC single output regulated power supply. Features include CC/CV operation, automatic overload protection circuit, very low output ripple, SCR prereg-ulator technique for high efficiency, floating ground and rack mountability. **WP-76** same except dual outputs. **WP-718** high-power, single-output, digital CC/CV laboratory power supply. High-performance design provides precision DC voltage and current.

Stock No.	Type	Output	Rating	Each
93F6868	WP-75	Single	0-50V @ 0-2A	531.91
93F6869	WP-76	Dual	0-50V @ 0-2A	1222.65
93F6871	WP-718	Single	0-36V @ 0-20A	1713.80

(5369) (de52263)

POWER LINE MONITORS

WV-120D

- **High Accuracy**
- **Easy-to-Read LED Display**
- **Reveals Voltage Fluctuations**
- **Indicates Brown-Outs**
- **50 to 60Hz Frequency**
- **Large, 3-Color Scale**
- **True RMS Readings Even on Distorted Sine Waves**
- **Fast Meter Action Shows Bounces and Fluctuations in Line Voltage**
- **25 to 400Hz Frequency**

AC current: 0 to 8A maximum. Size: 4 x 5 x 3″. Weight: 1.5 lbs.

Stock No.	Type	Voltage Range	Accuracy	Each
62F1657	WV-120D	100-140VAC	±2%	198.14
98F6211	WD-121A	100-150VAC	+1% @ 117V	245.26

(5334) (de03074)

WP700 SERIES LAB AND INDUSTRIAL REGULATED DC POWER SUPPLIES

WP-707B

WP700 series DC power supplies feature constant current, constant voltage (CC/CV) regulated supplies that range from 0-20VDC to 0-64VDC. Ideal for laboratory, industrial, school and hospital applications. Output voltage and current values are displayed on a 3-digit DPM with ±0.1% resolution. All DC power supplies can be converted to 220/240VAC; *contact your local Newark sales office.*

Stock No.	Type	Output	Rating	Each
55F4983	WP-705B	Single	0-64V @ 0-2.5A	600.88

DIGITAL WATTMETERS

WD767
WD-768

Designed to provide quick, accurate, and direct measurement of true rms voltage, rms current, and power. Operate from 120VAC line, and line voltage can be measured up to 150V. All units indicate when power over range occurs. Front and rear outlets allow for more flexibility. **Type WD-766A** features 1KW, 10A, 3-digit 0.56″ (14.22) LED display. Measures to 999W. Accuracy volts: ±1% ± 1 digit. Resolution volts: 1V. **Type WD767** features 2KW, 20A, 3.5-digit 0.56″ (14.22) LED display. Measures to 1999W. **Type WD-767E** is the same as **type WD767**, but operates from 220/240VAC; *contact your local Newark sales office.* Accuracy volts: ±0.75% ± 1 digit. Resolution volts: 0.1V. **Type WD-768** features simultaneous data outputs (4-20mA) for volts, amps, and watts.

44F1075 Type WD-766A. **Each** **484.20**
89F1173 Type WD767. **Each** **585.20**
93F6872 Type WD-768. **Each** **804.65**

DIGITAL MULTIMETERS

POCKET-SIZED METER AND COUNTERS

AM8, DM7, DM9

Type AM8 analog meter features voltage range: VDC 10/500V, VAC 10/500V. DC current range is 500µA-250mA. Resistance: Rx1kΩ/1MΩ. Battery tester: 1.5V, 9V. Dimensions: 5.1 x 2.6 x 1.7″. Weight: 6.7 oz.

16F3261 Type AM8. **Each** **16.95**

Type DM7 is a digital meter with 2,000-count. Voltage range: DC 2/600V, AC 200/600V. DC current: 200mA. Resistance: 2000Ω/2MΩ. Battery tester: 1.5V, 9V. Dimensions: 5.5 x 3.1 x 1.6″. Weight: 8.2 oz.

16F3262 Type DM7. **Each** **25.33**

Type DM9 is a compact autoranging digital multimeter with 4,000-count display. Ideal for field service. 600V AC/DC, 400mA AC and DC current, resistance to 40Mohm, diodes, batteries and continuity.

16F3263 Type DM9. **Each** **45.63**
(5408) (ne06886)

POCKET SERIES 3½–DIGIT MULTIMETERS

DM2

15XL

- **Compact, Easy-to-Use**
- **Rugged Construction**
- **Fused Current Inputs**
- **User Safety Features**
- **DC Voltage to 1000VDC**
- **CE Compliant, Except Type DM2**

Type DM2 compact DMM measures voltage to 1000VDC/500VAC, DC current to 200mA (fused) and resistance to 2MΩ. Diode testing. Includes 9V battery, test leads, spare fuse and manual.

95F3650 Type DM2. **Each** **33.45**

Type DM5XL. Full-function, pocket-size meter is ideal for shop or classroom. Large, easy-to-read LCD with 17 ranges to measure AC/DC volts, DC current to 200mA and resistance to 2MΩ. Diode testing and a continuity beeper. Includes 9V battery, test leads and manual.

50F4976 Type DM5XL. **Each** **42.58**

Type DM10XL. This pocket-size meter provides 21 ranges, measuring AC/DC volts, DC current to 10A (fully fused) and resistance to 20MΩ. Diode testing and a continuity beeper. Built-in Safety Tester™ quickly indicates live voltage levels with LEDs (12, 24, 50, 110 and 220V). Includes 9V battery, test leads and manual. *Order carrying cases and accessories separately; contact your local Newark sales office for details.*

82F9921 Type DM10XL. **Each** **52.73**

Type DM15XL. Ideal for testing digital equipment, this pocket-size meter features a built-in 20MHz TTL logic detector and 28 measurement ranges, including AC/DC volts, AC/DC current to 10A (fused) and resistance to 2000MΩ. Diode testing and a continuity beeper. Includes 9V battery, test leads and manual. *Order carrying cases and accessories separately; contact your local Newark sales office for details.*

44FX567 Type DM15XL. **Each** **62.88**

Type DM16XL Pocket-size meter with all the features of **type DM15XL** plus TTL logic detector, capacitance to 20µF frequency to 15Mhz and transistor hFe.

16F3251 Type DM16XL. **Each** **81.15**

Type H10Y Protective Holster, blue for XL DMMs. Combination protective rubber holster and tilt stand. Allows user to place meter in backwards for protection during storage.

Type VC30 Padded soft carrying case comfortably fits meter when in holster. Storage pocket inside for test leads and operators manual.

96F6749 Type H10Y. **Each** **10.60**
99F4595 Type VC30. **Each** **15.93**
(5424) (ne53030)

XT SERIES HIGH-PERFORMANCE MULTIMETERS

28XT

27XT

- **Full Featured DMMs + Component Testing**
- **Built-in LCR, Type 27XT**
- **Built-in CR, Type 25XT**
- **Temperature Test, 23XT & 28XT**
- **Large 3.5-Digit Display, 2000-Count**
- **Volt Ranges to 1000VDC/750VAC**
- **0.5% VDC Accuracy**
- **Resistance to 2000MΩ**
- **Audible Continuity Check + Diode Test**
- **CMOS & TTL Logic Test**
- **Input Warning Beeper**
- **Fused Current Inputs**
- **28XT Ideal for HVAC/R, Computer Rooms, Field Service**
- **CE Compliant**

Type 23XT mid-sized, full functioning DMM measures ACV/DCV to 750/1000V, current to 10A, fully fused, resistance to 2000MΩ, diode and continuity tests, transistor hFE, TTL and CMOS logic and temperature from 1400°F (750°C) and data hold, 550VAC safety tester. Units shipped with K-type beaded wire thermocouple, test leads, multilingual operator manuals and spare fuse.

16F8165 Type 23XT. **Each** **97.93**

Type 25XT mid-sized, full functioning DMM with built-in capacitance/resistance measures ACV/DCV to 750/100V, AC/DC current to 10A, fully fused, resistance to 20MΩ, capacitance to 20mF (full capacitance meter with zero adjust cap slots), frequency to 40kHz, TTL and CMOS logic and transistor hFe, data hold, test leads, multilingual operator manuals and spare fuse.

16F8166 Type 25XT. **Each** **108.58**

Type 27XT mid-sized, full functioning DMM with built-in inductance/capacitance/resistance measures AC/DCV to 7500/1000V, AC/DC current to 20A, fully fused, resistance to 2000MΩ, frequency to 20Mhz, capacitance to 2000µF, inductance to 20H, both CMOS and TTL logic, diode and continuity tests. Multilingual operator manuals and spare fuse.

16F8167 Type 27XT. **Each** **129.33**

Type 28XT field service multimeter includes temperature to 2000°F (1300°C), capacitance to 20mF, frequency to 20kHz, resistance to 20MΩ, TTL and CMOS logic, continuity and diode tests. Includes beaded type K thermocouple probe, test leads, multilingual manual and spare fuse.

16F8168 Type 28XT. **Each** **129.33**

Type H30Y protective holster, blue for XT DMMs. Combination protective rubber holster and tilt stand. Allows user to place meter in backwards for protection during storage.

Type VC231 padded soft carry case. Comfortably fits meter when in holster. Storage pocket inside for test leads and operations manual.

52F5889 Type H30Y. **Each** **12.13**
99F3205 Type VC231. **Each** **16.99**

CREDIT CARD SIZE AND PEN-STYLE DIGITAL MULTIMETERS

CE

DM78A

DM73A

- **3.5 Digit Display**
- **Autoranging**
- **Diode Test (Type DM78A)**
- **Audible Continuity Test**
- **One-Hand Operation**
- **Data Hold (Type DM73A)**
- **CE Compliant**

Type DM78A is highly functional and powerful, yet fits in shirt pocket or toolbox. Nickel-plated test leads. DC ranges: 5/200mV, 2V, 20V, 200V, 450V. AC ranges: 4/2V, 20V, 200V, 250V, 450V. Resistance ranges: 6/200Ω, 2k, 20k, 200k, 2MΩ, 20MΩ. Includes carrying case and batteries. Dimensions: 4.25″H x 2.1″W x 0.4″D (108 x 54 x11).

Type DM73A is a pen-style DMM that allows one-hand measuring in tight spots. It has 13 measurement ranges, and 0.5% basic VDC accuracy. DC ranges: 4/2V, 20V, 200V, 450V. AC ranges: 4/2V, 20V, 200V, 450V. Resistance ranges: 7/200Ω, 2K, 20K, 200K, 2MΩ, 20MΩ. Dimensions: 5.2″H x 1.1″W x 0.7″D (165 x 28 x 19). Includes batteries.

66F1958 Type DM73A. **Each** **73.03**
66F1957 Type DM78A. **Each** **38.52**

TYPES 2005 AND 2015 DIGITAL MULTIMETERS

2015

- Professional DMMs, 0.25% Basic Accuracy
- Easy-to-use Menu Control
- Capacitance, Frequency Measurements
- Autoranging
- 42-Segment Bargraph, 4,000 Count Display
- Fused Current Inputs
- Audible Continuity Check
- Diode Test
- Data Hold, Min/Max and Relative Measuring Modes
- True RMS (Type 2015 only)

Types 2005 and **2015** are high-resolution multimeters with digital/analog display and 4000-count. AC & DC voltage range: 1000VDC/750AC. AC & DC current: 4ma/20A. Resistance: 40MΩ. Capacitance: 40µF. Frequency counter range: 400KHz. Overrange indication: MSD blinks. Measurement rate: 2/sec. nominal; 1/sec. in capacitance and frequency mode; 20/sec. analog display. Operating environment: 0°C to +50°C at ≤80% RH. Includes holster, test leads, one 9V battery, and multilingual manual. **Type 2015** has true rms for measuring noisy signals. CE compliant.

52F6712 Type 2005. **Each** **167.43**
52F6713 Type 2015. **Each** **187.73**

320B PROFESSIONAL MULTIMETER

- Large 0.8″ Display
- Voltage Ranges: 1500VDC/1000VAC
- AC/DC Current to 10A
- Resistance to 20MΩ
- Audible Continuity Test

Designed for heavy-duty use: will withstand a 6-foot fall and continue to operate. Recessed display and single rotary switch prevent damage in most situations. 22 megohm impedance. Voltage ranges are protected to 1500V with 6KV transient protection. In-circuit diode/transistor test function allows accurate measurement of forward voltage drops across diode and transistor junction with 5mA test current. Semiconductors can be measured while in-circuit with a shunt as low as 200 ohms. Test leads, spare fuse and 9V-NEDA 1604 battery included. Meets MIL-T-28800 specifications.

Stock No.	Type	Description	Each

SERIES 200, T-SHAPE DMMs WITH DIGO-GLO™

220 RMS225A 235

- Digi-Glo™ Backlight, Industry's Best
- Easy-to-Use Push Button Menu Operation
- Professional, Autoranging, 0.25% Basic Accuracy
- Probe Hold, Auto MiniMax™
- Auto Power Off with Disable Button
- CE, E61010 Safety Approved, CAT III
- True RMS, 10,000 Count (Type RMS225A)
- RS232C Output, Capacitance, Frequency (Type 235)

Type 220 full featured yet low cost professional DMM, AC/DC volts to 750/1000V, AC/DC current to 10A fused, resistance to 43MΩ, continuity, diode and TTL logic test.

Type RMS225A true rms measuring, 10,000 count display for highest resolution, 41 segment bargraph display, AC/DC volts to 750/1000V, AC/DC current to 10A fused, resistance to 40MΩ, continuity and diode test.

Type 235 has RS232C serial computer output, capacitance to 40mF, frequency to 40Mhz, temperature to 1300°C/2372°F, AC/DC volts to 750/1000V, AC/DC current to 10A fused, resistance to 40MΩ, continuity and diode test. Shipped with serial cable and Windows 95/98, NT software.

HD160 HEAVY-DUTY TRUE RMS MULTIMETER

- True RMS
- 41-Segment Analog Bargraph
- High-Energy 10kV Transient Protection
- 4-Digit Display 10,000 Count
- Autoranging
- Contamination-Proof
- Auto Min Max™
- AC/DC Current to 20A
- Voltage to 1000VAC/DC
- Drop-Proof Case
- Probe Hold™
- Test Lead Set
- Durable, Electrical Test Lead Set

Type HD160 true rms heavy-duty multimeter is waterproof and designed for rugged industrial conditions. 41-segment analog bargraph and extended operating temperature range (–20 to +55°C) operating range for use in extremely cold conditions. Designed for rugged applications in utilities, plant and facility maintenance, and HV AC/R companies. Includes holster, 9V-NEDA 1604 battery, test leads and manual.

50F4975 Type HD160. **Each**..... **228.32**
96F6741 Type VC221A Soft Carry Case **Each** . **16.99**
(5371) (de52971)

TYPES HD110B AND HD115B TRUE HEAVY-DUTY DMMs

HD110B HD115B

- Unparalleled Ruggedness, Reliability and Safety
- Digi-Glo™ Backlight, Worlds Brightest (TypeHD115B)
- Large Shock Mounted LCD, with 0.70″ (18mm) High Digits
- Waterproof and Dustproof Enclosure
- Highest Input Protection for Industrial Applications
- Fully Fused Current Inputs
- Backlit LCD on HD115B
- Tech Preferred™ Probe Hold, Min/Max, and Peak Hold Features on HD115B
- Most Rugged Case Withstands 10′ Drops
- Extra Protective Rubber Holster with Tilt-Stand and Flex-Strap™

Types HD110B and **HD115B** are the true heavy-duty DMMs from Wavetek. They have added input protection and expanded measurement ranges for safer measurements on voltages up to 1500VDC and 1000VAC where transient of greater than 6kV may occur. Shrouded safety test leads help prevent accidents as well as the input jack safety blocker that prevents voltage measurements when the leads are in the current input jacks. Surpass the most stringent UL and EN standards for overvoltage protection (EN61010-1 Cat. III). **Type HD115B** comes equipped with capacitance and backlight. CE compliant.

(13537) (ne10241)

HD110T SERIES HEAVY-DUTY MULTIMETERS

- Measure Temperature from -4°F to +1999°F
- Resistance to 20MΩ
- New Large Display
- Completely Sealed, Waterproof and Environment Proof
- Extra Overload Protection
- Voltage Ranges to 1500VDC/1000VAC
- AC/DC Current Ranges to 10A

This drop-proof, contamination-proof multimeter is designed for rugged industrial conditions. Fire-retardant thermoplastic, with all sensitive components shock-mounted. Voltage ranges can withstand transients up to 6kV. Current ranges are protected by a 2A/600V fuse and a 15A/600V high-energy fuse. Includes K-type thermocouple wire probe, test lead set, spare fuse, and battery.

44F3802 Type HD110T. **Each** **253.70**

WAVETEK
TEST INSTRUMENTS

DIGITAL COMPONENT TESTERS

CE

CR50 LCR55

Type CR50, dedicated capacitance and resistance meter with front panel adjustment control to zero out stray capacitance or resistance. Resistance has 7 ranges from 20Ω to 20MΩ. 9 capacitance ranges from 200pF to 20mF. Diode and continuity tests. Dual zero-adjust plots. Dimensions: 6.1 x 2.8 x 1.3″. Weight: 6.0 oz. CE compliant.

16F3259 Type CR50. **Each** **74.05**

Type LCR55 is a 3½-digit LCR meter with front panel control to adjust out stray resistance in 20Ω range. Measures resistance, capacitance, inductance, and transistor hFe. Includes continuity and diode tests. 7 resistance ranges to 20MΩ, 8 capacitance ranges to 2000μF, 7 inductance ranges to 200H. Dimensions: 7.2 x 3.1 x 1.5″. Weight: 11 oz. Designed to IEC-1010-1, Cat.II, UL3111. CE compliant.

16F3260 Type LCR55. **Each** **192.80**
(10014) (de03145)

FUNCTION GENERATORS

FG2A

FG3B

FG2A SERIES 2MHz FUNCTION GENERATOR

FG2A general purpose signal source has five different outputs that can be modified with variable duty cycle and DC offset controls. The VCF input allows the frequency output to be controlled by DC voltage. 7 frequency ranges: 0.2Hz to 2MHz. Output: square wave, triangle wave, sine wave and TTL pulse. Power consumption: 15VA max. at 117VAC. Includes 2 BNC test cables, AC power cord, spare fuse and manual.

44F3855 Type FG2A. **Each** **270.66**

FG3B SERIES 2MHz SWEEP/FUNCTION GENERATOR

FG3B generator provides five different outputs that can be modified with the variable duty cycle and DC offset controls. 7 frequency ranges: 0.2Hz to 2MHz. Output: sine wave, square wave, triangle wave, TTL pulse, and CMOS pulse. Also provides sweep of any signal output, AM/FM modulation with internal or external signals, and a 100MHz frequency counter. Power: 117VAC or 234VAC; 50Hz or 60Hz ≤20VAC. Sensitivity: ≤25mV rms. Includes 2 coaxial BNC test cables, AC power cord, spare fuse and manual.

89F2454 Type FG3B. **Each** **521.46**
(5335) (de03142)

BENCHTOP DMM

BDM40

Type BDM40 measures voltage from 10μV to 1200VDC and to 1000VAC, current from 10μA to 20A, resistance from 10mΩ to 20MΩ, and provides diode testing on the 2kΩ range. 4½-digit (20,000 count) digital multimeter features true RMS (AC or AC+DC coupling) measurement capabilities to assure accuracy. Includes test lead set, power cord, and operator's manual.

92F1996 Type BDM40. **Each** **476.04**
(5412) (ne08940)

LOGIC AND PULSE PROBES

Type LP-10A pen-sized logic probe with LED indicators is ideal for analyzing digital logic circuits. Detects pulses as narrow as 30nsec at up to 17MHz. Selects TTL or CMOS operation. Power input is overload protected ±20VDC. Signal input is protected to ±220VAC/VDC. Powers from circuit under 4V-18V.

44F3857 Type LP-10A. **Each** **21.90**

Type LP-25A pen-sized logic probe with LED and audible tone indication measures TTL, DTL, RTL, CMOS, NMOS and MOS logic levels at speeds up to 25MHz. Detects pulses as short as 30nsec. Bright LEDs indicate measured logic state, high versus low. Plus memory captures fast pulses. Overload protected to 200VAC/VDC.

82F9924 Type LP-25A. **Each** **43.84**
(5339) (de03146)

COUNTERS

FC-130A

UC-10A

FC-130A SERIES HIGH FREQUENCY COUNTER

FC-130A microprocessor-controlled frequency counter measures signals 0.01Hz to 1.3GHz with up to 10mV sensitivity. Capable of monitoring transmitter output frequencies with a simple whip antenna. Large 8-digit LED display. Power: 117VAC or 234VAC, 50 or 60Hz. Also measures period and rate per minute. Channel A (AC range): 30Hz to 120MHz; DC range, 0.01Hz to 120MHz. Channel B (frequency range): 50MHz to 1.3GHz. 10mV sensitivity. Includes 2 test cables, spare fuse power cord and manual.

89F2455 Type FC-130A. **Each** **657.31**

UC-10A SERIES UNIVERSAL COUNTER

UC-10A counter has 6 measurement functions and 4 gate time selections for a wide variety of applications. Functions: frequency, period, frequency ratio, time interval, unit count, check. Large 8-digit LED display indicators: kHz, S, OVER GATE, 6 functions, 4 gate times. Frequency input: low range is 5Hz to 10MHz; high range is 50Hz to 100MHz. Count capacity: 99,999,999. Power consumption: 15VA max. at 117VAC. Includes 2 BNC test cables, spare fuse, AC power cord, and manual.

44F3854 Type UC-10A. **Each** **416.96**
(36070) (ne36070)

PROFESSIONAL CLAMP-ON METERS

CABLE TESTERS AND DMM ACCESSORIES

LAN CABLE TESTERS

NEW

These testers are the basic verifying tools that every cable installer and on-site network hardware staff should carry. They are simple, low-cost solutions to test for correct continuity and connector wire-up of various LAN cables. With their 2-piece design, they can be used before or after cable installation.

Type CV20 is the most popular, low-cost, pair continuity tester for LAN cables. Tests shorts, opens, and crosses on cables with RJ-45 connectors. Has an additional, separate mode which will also verify continuity of USOC telephone wire pairs terminating in an RJ-45 connector.

48F1580 Type CV20. **Each** **81.15**

Type CV25 provides more comprehensive testing than **type CV20**. Performs full tests on pairs and individual wires, including split detection. For use with 10Base-T, T568 cables terminating in RJ-45 connectors. Tests shorts, opens, crosses, and split-pairs.

48F1583 Type CV25. **Each** **152.20**

Type CV22 is used with thinnet (10Base-2) LAN cabling installations. Tests for continuity, shorts, opens, and good terminators.

48F1581 Type CV22. **Each** **101.45**

Type CV32 is a dual-function LAN tester that includes both RJ-45 and BNC connections to test both 10Base-T/T568 and thinnet with the same unit. It performs all of the functional LAN cable tests of **types CV20** and **CV22** in a single unit.

48F1584 Type CV32. **Each** **202.95**

Type CV34 is for use with token ring cabling. Will test Type 1 IBM and DE9 token ring cables. All 4 wires and the shield are tested. Tests for opens, shorts, swaps, and even shorting bars. Internal beeper also provides an audible indication when any error is detected.

48F1585 Type CV34. **Each** **202.95**

Type CV35 is an extended-feature 10Base-T, T568 LAN cable tester. Has cable test and traffic detection modes. Checks for opens, shorts, reverses and will detect split pairs. Traffic mode will indicate an active hub or the presence of network traffic.

48F1586 Type CV35. **Each** **233.40**
(33772) (ne33772)

CATV CABLE TESTERS

NEW

Type CV23 is dedicated to quick, low-cost and easy verification of 75ohms CATV cabling or any cabling with "F" type connectors. Performs 4 tests: live cable, cable OK, open cable and shorted cable. Results are indicated on 5 LEDs. Powered by 5 9V battery. Test cables up to 650' (200).

48F1582 Type CV23. **Each** **101.45**
(33773) (ne33773)

UNIVERSAL LAN CABLE TESTERS

Type CV50 tests 10Base-T, T568 via RJ-45 connector and Thinnet via BNC connection.

48F1587 Type CV50. **Each** **502.43**

Type CV51 is identical to **type CV50** and adds token ring, type 1 testing.

48F1588 Type CV51. **Each** **603.93**

Type CV52 verifies 10Base-T, T568, Thinnet, and token ring. 8 different modes are selectable via the tester's front panel rotary knob. For 10Base-T, T568, select continuity test, split-pair detection and traffic. For Thinnet and token ring, verify continuity and traffic. The LCD display will read out messages concerning the condition of the cable or traffic.

48F1589 Type CV52. **Each** **806.93**
(33774) (ne33774)

SHORT FINDER BRUSH

NEW

Type SF10 allows electronics manufacturing personnel to quickly sweep over multiple test points and instantaneously find the approximate location of continuity. Unique brush design improves overall manufacturing productivity by eliminating the need to check each test point individually. Also has a built-in search probe to conduct a point-to-point search within the area previously identified by the brush. Includes two AAA batteries.

48F2502 Type SF10. **Each** **40.55**
(33770) (ne33770)

VISUAL FAULT FINDER

NEW

Type VFF5 finds breaks, faulty splices, and crimps, poor components or connections in fiber-optic cable. Low-cost, basic fiber-optic test tool. Rugged metal housing. Unit is a hand-held, battery-operated device that projects a highly-visible, 670nm red, Class 2 laser light into the fiber-optic cable. Switch-selectable continuous or modulated mode. Useful over a distance of 3 miles (5km). Standard ST connector termination. Includes carrying case, lens cap, batteries, lanyard, and instruction sheet.

83F7329 Type VFF5. **Each** **400.93**
(33771) (ne33771)

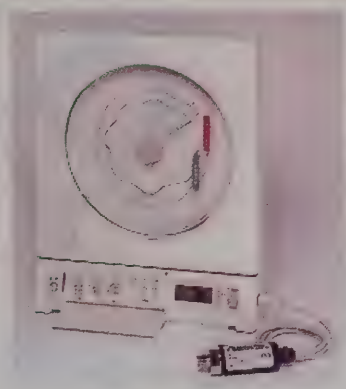
CHART RECORDERS AND INFRARED THERMOMETERS

MICROPROCESSOR-BASED PRESSURE/TEMPERATURE RECORDER

- **Temperature Range to 120°F (49°C); Pressure to 100 psi**
- **Double-Sided Circular Charts: 1, 7, 32 Day Records**
- **Convenient Front Panel Programming**
- **Benchtop or Wall Mounting**
- **Operates on Battery or Wall Socket Power**
- **Alarm Contact Standard**
- **Calibration Lockout Kit**



Completely self-contained recorder is microprocessor-based for accurate indication of temperature and pressure, along with the current time and storage of peak values (max. and min.). Each function is easily accessible from the front panel. The user may select 1, 7, or 32 day operation on the large 8″ (200) chart, and may program the digital display for PSIG, °F, or °C indication. Units come with detachable solid-state pressure/temperature transducer with 6′ of cable, additional 6′ extension cable, voltage signal input adapter, 100 double-sided charts, 2 pressure and 2 temperature pens, wall mount template and hardware, 110VAC power adapter, chart lights, 4 "D" alkaline batteries, and operator's manual.

MICROPROCESSOR-BASED TEMPERATURE/RELATIVE HUMIDITY RECORDER

CE

- **Versatile remote mounting sensor**
- **Fully electronic microprocessor control**
- **CE compliant**

Has convenient front panel programming. 8″ chart for 1-, 7-, or 32-day recording. Comes with 120 assorted double-size charts, 2 sets of pens, 6″ remote sensor cable, wall-mounting kit, cal-lock kit, batteries, and charger. Temperature recorder range: –17°C to +49°C. Accuracy: ±1°C. Sensor: solid-state. Response time: 5 minutes for 63% step change. Display resolution: 1°C. Humidity recorder range: 2% to 98% RH. Accuracy: ±3% @ 25°C, between 20% and 90% of range (±5% below 20% and above 90% @ 25°C). Sensor: resistive polymer. Response time: 5 minutes for a 30% to 80% step change. Display resolution: 1% RH.

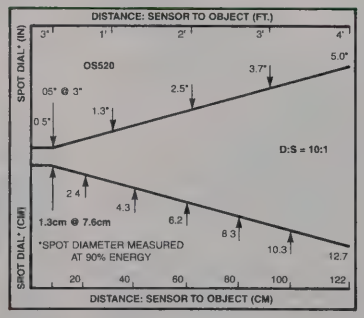
OS520 SERIES INFRARED THERMOMETER

CE



- **Rugged, high-performance design**
- **CE compliant**

Offer solutions for many non-contact temperature measurement applications. Emissivity adjustable from 0.1 to 1.00 in 0.01 steps. Accuracy: ±2% of reading or 3°F, whichever is greater. Backlit LCD. Dual digital display of both current and min./max. temperatures simultaneously. Celsius and Farhenheit selectable. Analog output standard. **Type OS521** and **type OS522** have RS232 output. Audible and visible alarm. Includes two laser modules from which to choose. 1mV per degree analog output allows interfacing with data acquisition equipment, including chart recorders, data loggers, and computers. Electronic trigger lock standard. Integral tripod mount included.

DMM TEST LEAD KITS

TYPE 5904 DELUXE ELECTRICAL DMM TEST LEAD KIT

Type 5904 contains two each (black/red): probe handles, right angle to straight plug silicone test leads, Maxigrabber® test clips with hook tip, Maigrabber® test clips with pincer tip, Maxigrabber® test clips with jaws, and extra large alligator clips. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek meters.

Stock No.	Type	1-4
95F1288	5904	110.85

TYPE 5903 AUTOMOTIVE DMM TEST LEAD KIT

Type 5903 contains two each (black/red): probe handles, right angle to straight plug silicone test leads, Maxigrabber® test clips with pincer tip, insulation piercing Maxigrabber® test clips, and extra large alligator clips. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek meters.

Stock No.	Type	1-4
95F1290	5903	95.73

TYPE 5899 GENERAL USE DMM TEST LEAD KIT

Type 5899 contains two each (black/red): probe handles, right angle to straight plug silicone test leads, Maxigrabber® test clips with pincer tip, and Medium alligator clips. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek meters.

Stock No.	Type	1-4
95F1289	5899	61.72

PROBE LEAD SETS

Type 5898 contains set of two 48″ long silicone insulated leads, one black and one red. Features stainless steel tip, excellent for penetrating oxidation or conformal coating. Fits most Fluke, Tektronix, HP and Wavetek Meters.

Stock No.	Type	1-24
95F1303	5898	13.57

TYPE 5906A TEST PROBE HANDLE SET

Type 5906A set contains test probe handle with brass caged banana plug tip and sheathed 0.158″ (4) banana jack in handle. Set contains one black, one red probe rated 1000VRMS, 10 amps. **Type 6232** similar to type 5906A except .080 notch tip.

Stock No.	Type	1-24
95F1302	5906A	10.86

FLEXIBLE TEST LEAD SETS

Sets fit Fluke HP, Tektronix, and Wavetek brand multimeters. Rated 1000VRMS, 10 amps. One black, one red lead. 48″ long high-temperature silicone wire. **Type 5907A** right angle sheathed banana plug to straight sheathed banana plug. **Type 5908A** straight sheathed banana plug each end. **Type 5909A** right angle sheathed banana plug each end.

Stock No.	Type	1-9
95F1291	5907A	13.03
95F1292	5908	13.03
95F1293	5909-A	13.03

TYPE 5900 INDUSTRIAL TEST LEAD KIT

Type 5900 kit contains 2 each: probe handles, right angle to straight plug test leads and Maxigrabber® grip clips, one black and one red.

Stock No.	Type	1-4
16F1590	5900	55.43

TYPE 5901 DELUXE BENCH METER DMM KIT

Type 5901 contains 2 each (black/red), probe handles, straight to straight plug silicone test leads, Maxigrabber™ test clips with pincer tip, and Medium alligator clips. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek meters.

Stock No.	Type	1-4
16F1591	5901-A	40.18

DMM KITS

MULTIMETER TEST LEAD SETS

Each set contains 2 PVC insulated leads, one black and one red. Type 5517A fits meter types Simpson 260-7,-8. Type 5519A fits meter types Fluke, HP, Tektronix, and Wavetek, and newer Amprobe.

90F2362 Type 5517A. **Each** **17.14**
90F2354 Type 5519A. **Each** **13.44**

TYPE 5677A POP JACK MAXI-KIT

Type 5677A kit contains 2 each, one black and one red: extendable tip probe leads, replaceable tip probe handle, pop jack leads and couplers, medium alligator clips, heavy-duty large alligator clips, Minigrabber® leads, Minipincer® leads, and slide-on IC tips. Kit also includes 2 each spade lugs, dog-leg micro-tips, needle tips, shouldered micro-tips and 4 each standard brass tips. All supplied in a nylon storage pouch.

50F845 Type 5677A. **Each** **119.67**

TYPE 5673B ELECTRICAL TEST LEADS KIT

Type 5673B contains 2 each (black/red), Probe Handles, Extra Large Alligator Clips, Slide-on Extended Tips, Pop Jack Silicone Leads, Medium Alligator Clips and Couplers, and two spade lugs. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek Meters.

95F1300 Type 5673-B. **Each** **55.43**

TYPE 5543A MULTI-USE POP JACK KIT FOR ELECTRONICS

Type 5543B kit contains 2 each, one black and one red: probe handles, pop jack silicone leads. Kit also includes 1 each: medium alligator clip, spade lug, Minigrabber® leads, extended slide-on tip and nylon storage pouch.

95F1301 Type 5543B. **Each** **48.37**

TYPE 5672A BASIC ELECTRONIC DMM TEST LEAD KIT

Type 5672Acontains 2 each (black/red), Test Probes with silicone insulated leads (Banana Plugs on meter end have no sleeve), Slide-on Extended Tips and Alligator Clips. Supplied in a reusuable plastic case. Fits most multimeters and other equipment with banana jacks.

50F847 Type 5672. **Each** **30.36**

TYPE 5674B DELUXE KIT FOR ELECTRONICS

Type 5674B contains 2 each (black/red), Probe Handles, Medium Alligator Clips, Minigrabber® Leads, Slide-On IC Tips, Slide-on Extended Tips and Pop Jack Silicone Leads. Also included are 2 Spade Lugs. Supplied with a nylon pouch. Fits most Fluke, Tektronix, HP and Wavetek meters.

50F846 Type 5674-B. **Each** **107.07**

(5329) (de01832)

MAXIGRABBER® TEST CLIP SETS

Sets have 0.16″ (4) sheathed receptacle to accept shrouded banana plugs, flexible test leads or Fluke brand multimeter leads. Rated 1000 V, 10 amps. Sets contain one black and one red clip. **Type 5910A** flexible Maxigrabber® has pincer-type tip. **Type 5911A** Maxigrabber® has hook tip. **Type 5912A** Maxigrabber® has grip teeth. **Type 5913** Maxigrabber® pierces cable insulation up to 0.14″ (3.5) without damaging wire.

Stock No.	Type	1-9

DMM TEST LEAD KITS

LARGE TEST COMPANION™ TEST KITS

These Test Companion™ test kits are designed to hold and protect Fluke, Hewlett-Packard, or Tektronix meters and include Pomona test leads, probes, grabbers, and clips organized in a large, briefcase-style Cordura carrying case with shoulder strap. The case is designed to be weather resistant, with extra padding to protect instruments and a variety of Velcro®- hook-and-eye-and zipper-fastened pockets in which to store manuals, tools, batteries, and other equipment. Meters and scopes not included.

FLUKE 80 SERIES DMM TEST COMPANION™ BRIEFCASE TEST KIT

Includes briefcase, DMM test lead set, probe bodies with banana plug tips, flexible Grabber® test clips, large safety alligator clips, medium alligator clips, modular electronic probes, and splices.

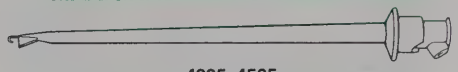
MAXIGRABBER® 6″ TEST CLIPS



4225, 4565

For high-rise packaging of components where test point depth is key factor. Fit 0.25″ (6.35) diameter entry holes. 45VAC, 5A. +102°C. **Type 4225** has 0.090″ (2.29) wire O.D. **4565** has 0.144″ (3.66) wire O.D. **5830** has easy-access rotating pincer contact and standard banana jack and screw for direct wire termination.

TEST LEADS AND SCOPE PROBES

GENERAL-PURPOSE TEST PRODS AND KITS

Multifeature test prods offer flexibility and adaptability to meet a wide range of test lead requirements. There is a test lead for every popular multimeter, handheld and VOM. 4″ prod handles made of ABS feature anti-slip ribs and shock guard collar. Stainless steel needle tip with 8-32 threaded insert accepts a wide range of accessories. Hook-up wire is 18AWG (65x36AWG), 90°C PVC, 48″ long. Kits consist of a pair of test leads and two each: **type BU-60TBO** clips, **BU-207** plungers, **BU-225** spade lugs, **BU-230** insulator covers, **BU-62** clip insulators. Both test leads only and complete kits are sold in pairs, one each: red and black.

VARIABLE LENGTH TEST PRODS

For applications needing a thin, streamlined test prod. The extendable tip permits testing of SMD, SOT, and other electronic components that may not easily be reached with a standard set of test leads. The probe may be extended to 2.5″. Stainless steel probe is Teflon® insulated. Sold in pairs, one each: red and black. Length: 48″ (1.22m).

MONOLITHIC OSCILLOSCOPE PROBE KIT

This kit is designed for all major brands of oscilloscopes. Kit comes with 6″ ground clip and insulator, plunger clip, probe tip shield, BNC male-to-probe adapter, screwdriver and IC test clip (not modular), and instruction manuals. Max. input: 600V. Compensation range: 15-75pF. Comply with MIL-I-45602A. Other style kits available, *contact your local Newark sales office.*

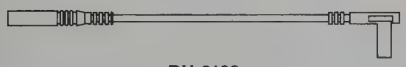
ONE-PIECE SAFETY TEST PRODS - RATING 1000V

BU-4061

BU-6161



BU-6162

Features finely stranded 18 AWG silicone test lead wire. Premium cage spring assembly for long life and consistent insertion/extraction force. **Type BU-4061** and **BU-4062** test leads instrument end features a nine-lead cage spring 4mm shielded banana plug. Probe end has a stainless steel tip. 18 AWG wire (M = Sillicone, N = PVC). Use **Type BU-6161** or **BU-6162** test lead interconnects as mating assemblies. UL listed. Type with suffix 0 = black, 2 = red. Length: 39″.

BU-1150

BU-1170

Type BU-1111 mini-plunger test leads make difficult connections easy. Spring-loaded beryllium copper conductor attaches to component leads and terminals. **Type BU-1120** attach to delicate component leads and terminals. Stackable banana plug terminates the other end of test lead. **Type BU-1150** positive and negative with 3″ and 8″ leads with molded "Y" block to BNC male. **Type BU-1170** positive and negative with 3″ and 8″ lead wires with molded "Y" block to stackable double banana plug. Type numbers with **suffix 0** = black, **suffix 2** = red.

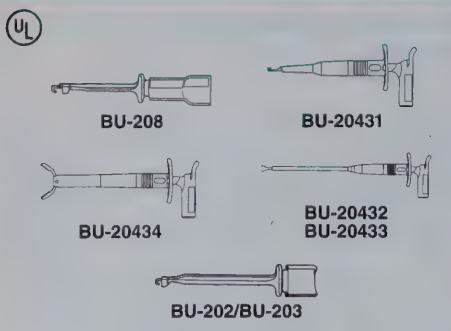
INSULATED TEST LEAD ACCESSORIES



PLUNGER-TYPE TEST CLIPS

Type BU-20431 insulated plunger hook clips with spring-loaded rigid hook for connection to terminals up to 0.059″ (1.5). **Type BU-20432** insulated hook clips with two fine steel wire hooks for connection to small circuitry. Flexible shaft. **Type BU-20434** insulated plunger jaw clips feature steel alligator clip type jaw that opens up to 0.78″ (19.91) when plunger is depressed. **Type BU-20431, BU-20432** and **BU-20433** are UL listed. **BU-00208** is small and extremely lightweight. Shorting between DIP legs is prevented by plastic barrier. Connect to component leads up to 0.025″ (0.6). BeCu contacts. MIL Spec G45204. **BU-00202** and **BU-00203** spring loaded hook attaches to fragile components leads and terminals. Design for connection to components up to 0.060″ (1.5). BeCu contacts. Suffix 1 = black, suffix 2 = red.

INSULATED TEST ACCESSORIES

Type BU-26130 test prods accept both safety and uninsulated 4mm banana plugs. Clear Kynar insulated sleeve for easy testing in confined areas. **Type BU-26101** and **BU-26106** accept both safety and uninsulated 4mm banana plugs. Tip is 0.08″ (2mm) stainless steel. **Type BU-26106** has 8-32 thread to accept accessories, and accepts 4mm banana plugs at both ends. **Type BU-32601** convenient coupler to extend test leads. **Type BU-32101** adapter allows use of insulated banana plugs with equipment having standard banana jacks. UL listed.

Weller®

SOLDERING STATIONS

SILVER SERIES SOLDER STATIONS

WSD130

WCB1

WS80

WSD80

Silver series soldering stations maximize work space and provide 80 watts of power. The combination of a silver heating element and the tip configuration in the **type WSP80** soldering iron gives immediate heat. These soldering stations are ESD safe. Compatible with existing Weller tools

80-WATT ANALOG SOLDER STATION

Dial control temperature settings from 300°F to 850°F. **Type WSP80** soldering pencil and a soldering tool holder included.

83F4095 Type WS80. **Each** **287.34**

80-WATT DIGITAL SOLDER STATION

Actual and preset soldering tempertures are displayed digitally. Temperature adjusted from 100°F to 850°F via buttons. **Type WSP80** soldering pencil and a soldering tool holder included.

83F4096 Type WSD80. **Each** **387.08**

80-WATT DUAL DIGITAL SOLDERING STATION

Type WSD130 accepts one 80-watt iron plus any other 50-watt accessory. Digital display for both channels shows pre-set and read temperatures. Antistatic housing. 2 independent, adjustable temperature controls from 150°F to 850°F. Automatic tool recognition. May be connected by programming time (setback), locking functions (lock-out), and calibration. Accuracy ±2% of final value.

48F4018 Type WSD130. **Each** **418.14**

CALIBRATION BOX

For **type WSD80** silver series solder station, **type WCB1** features temperature lock-out and set-back capabilities to extend the life of the tips. Temperature lock-out ensures that the temperature can't be altered. The set-back feature automatically reduces the temperature of the iron when not in use.

83F4099 Type WCB1. **Each** **245.92**
(28343) (ne28343)

WLC 100 SOLDERING STATION

Type WLC 100 soldering station features on/off switch with "power-on" indicator light. Safety guard iron holder. Natural sponge tip cleaning pad. Variable power control (5 to 40 watts). Replaceable heating element. Cushioned foam grip.

MICROTOUCHPLUS SOLDERING STATION

MT1500

The **MicroTOUCHplus** has a large LED readout display. Includes the Touch feature, which lowers the temperature of the iron when not in use, extends tip life and reduces heat loss. Tips can be interchanged within seconds. More than 50 styles and sizes of tips are available for use with the **MicroTOUCHplus.** Includes ESD safe soldering stand. *Contact your local Newark sales office for a complete line of accessories.*

66F7804 Type MT1500. **Each** **619.11**

DEC1001 DUAL-IRON ESD SOLDERING STATION

Combines two temperature-controlled units in one housing to minimize bench space. Features ESD construction and dual temperature dials, each with 350°F - 850°F (177°C - 437°C) range. Use with two 40, 20 or 42W **EC series** soldering irons. Comes with two tool stands. Power: 120V/60Hz. Power output: 24VAC. UL listed. Meets MIL-S-45743, DOD-STD-2000, MIL-S-2000, WS6536, WS570, and DOD-STD-1686. *Order* **EC series** *soldering irons sold separately on page 1590.*

84F1072 Type DEC-1001. **Each** **269.95**

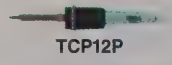
CONTROLLED-OUTPUT SOLDERING IRONS

W60P



TCP12P

Portable soldering tools for production work feature output and temperature control. Plug-in heating element barrel assembly makes replacement easy. Temperature selection 600°F, 700°F or 800°F by changing tips. **W60P series** irons include a 700°F 1⁄16″ screwdriver blade tip. **W100P series** irons include a 700°F ⅜″ screwdriver blade tip. Both come with a 6′ cord. Use with **PH** or **SF series** soldering tool stands, *sold separately on this page*, to create a complete soldering station. **Type TCP12P** is a 12- to 14-volt soldering tool for field servicing. Operates from suitable batteries or low-voltage power source. Includes 700°F 3⁄16″ screwdriver blade tip, battery clips and 12′ power cord. UL listed. *Order Weller® tips on page 1596 and desoldering tools separately; contact your local Newark sales office.*

Stock No.	Type	W	Voltage	1-4	5-9

TYPE 1095 GENERAL-PURPOSE HEAT GUN

Rugged design and high- and low-temperature settings. 1000 watts (maximum), 120VAC, 60Hz, 3-wire grounded. Temperature range: 790°F to 1200°F. *Order accessories separately below.*

Stock No.	Type	Description	Each
87F3433	1095	General-Purpose Heat Gun	61.92
87F1629	1080	Reducer for Concentrating Heat	7.26
87F1630	1081	Scraper for Paint Stripping	7.26
87F1631	1082	Reflector for Heat Shrink	7.26

(5889) (de52944)

TYPE 6966C GENERAL-PURPOSE HEAT GUN

Type 6966C delivers heated or ambient air. Comes complete with 4 attachments for applying heat-shrink tubing (**types 6956** and **6957**), concentrating (**type 6958**) and focusing (**type 6964**) heated air. 120VAC, 2.2 amps, 3-wire grounded plug. 6′ cord, 750°F-800°F, 60Hz, weighs 13 oz. *Order accessories separately below.*

Stock No.	Type	Description	Each
35F3074	6966C	Heat Gun with 4 Attachments	147.25
87F1633	6956	½″ Reflector	2.69
87F1634	6957	1½″ Reflector	2.82

ESD SERVICE CENTERS

4624P

4024P

4924P

The **4000 series (types 2024P, 4024P, 4624P** and **4924P)** are compact, ESD-protected stations with multiple functions for rework and repair of PC boards. All units can power 24VAC desoldering irons and either micro or macro soldering irons. Variable temperature settings are controlled electronically by a closed-loop feedback system that provides rapid heat up and quick response. Meet MIL-STD-2000, DOD-STD-2000-1B, WS-6536E, and MIL-S-45743E. 120VAC, 60 Hz, 3-wire grounded. UL listed.

Type 4924P service center powers soldering iron and desoldering iron or two soldering irons concurrently and has added power supply for optional tools such as thermal wire strippers and resistance soldering tweezers. Vacuum switches positive heated air flow for heat gun applications. Equipped with **5098AS** ESD desoldering pistol **9931AS** ESD macro soldering iron, **9911AS** micro soldering iron, machine center motor for milling, drilling and grinding, and **8800** deluxe iron holder. Soldering temperature: 550°F to 850°F. Desoldering: 500°F to 1000°F. *Order accessory pack separately on this page.*

46F3178 Type 4924P. **Each** **1669.84**

Type 4624P has self-contained vacuum system to operate soldering and desoldering irons concurrently or two soldering irons. Equipped with **5098AS** ESD desoldering iron and **9931AS** macro ESD soldering iron. Soldering temperature: 550°F to 850°F. Desoldering: 500°F to 1000°F.

92F8116 Type 4624P. **Each** **811.27**

Type 4624IL same as **4624P** except with **5088AS** desoldering pencil.

92F8115 Type 4624IL. **Each** **811.27**

Type 4024P has self-contained vacuum system to operate desoldering pencils. Equipped with **type 5098AS** desoldering pistol. Temperature: 500°F to 850°F. **Type 4024IL** same as **type 4024P** except with **type 5088AS** pencil style desoldering iron.

66F3493 Type 4024P. **Each** **620.63**
66F3494 Type 4024IL. **Each** **620.63**

Type 2024P powered by 60-65 psi shop air, and equipped with **5098AS** ESD desoldering pistol and cleaning tool. **Type 2024IL** same as **type 2024P** except with **type 5088AS** pencil style desoldering iron.

92F5987 Type 2024P. **Each** **580.67**
92F5988 Type 2024IL. **Each** **580.67**

HOT AIR REWORK SYSTEMS

WHA 2000 HOT AIR REWORK SYSTEM

WHA 2000

Type WHA 2000 has been developed for easier repair or replacement of large SMD ICs. It is self-contained and controlled electronically. Temperature and volume of the hot air is continuously adjustable. The vacuum for pick up of components is generated by a pump and activated by a foot pedal or remote control. A standby function can be used for preheating the nozzles. ESD safe. Specifications: 820W power consumption; vacuum: –0.6bar (17.7 inches of Mercury); power supply: 120V, 50/60Hz.

Stock No.	Type	Description	Each

TYPE WLSK1000 QFP LEAD REPAIR KIT

Designed for precise repair of bent or deformed leads on gull wing QFP components. Kit includes patented precision alignment templates, lab-grade true flat granite surface plate, 2 lead-straightening probes, precision tweezers, vacuum pick-up tool, Kapton® tape, rugged storage box, and instruction manual.

91F2849 Type WLSK1000. **Each**..... **563.56**
(19646) (ne11139)

TYPE WHP300 PREHEAT AND REFLOW SYSTEM

Type WHP300 is a preheat and reflow system suitable for soldering and desoldering work with hybrids. This system's base material heats evenly and precisely to the required temperature to provide high-quality soldering without the risk of heat damage. The wide temperature rage, continuously adjustable between 120°F and 575°F, allows for reflow soldering as well. Heat plate dimensions: 4″ x 6¼″.

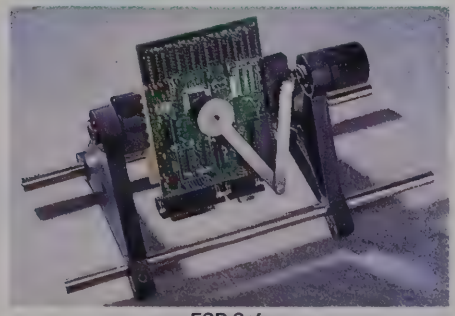
91F2851 Type WHP300. **Each**..... **1303.22**
(19629) (ne11141)

TYPE WHA300 HOT AIR REWORK SYSTEM

Type WHA300 rework system is a low-cost, self-contained hot air station that generates 700W of heating power. Temperature and air flow are controlled on highly visible front panel. Extremely compact size uses less space on the bench. Air flow can be activated by a finger switch on the hand piece or with optional foot switch. A full range of nozzles are available; *contact your local Newark sales office.*

91F2840 Type WHA300. **Each**..... **985.84**
(19427) (ne11137)

ESF 120 ESD CIRCUIT BOARD VISE



ESD Safe

Type ESF 120 ESD circuit board vise has the same design as the **type ESF** vise but is ESD safe. Complete work center for placing, soldering, and desoldering printed circuit boards. Allows boards to be rotated 360 degrees. Adjusts to handle circuit boards up to 6¼″ x 9⅛″ (160 x 235).

66F7803 Type ESF-120ESD. **Each**..... **106.97**
(19430) (ne11114)

Weller®

REWORK AND REPAIR SYSTEMS

WRS4000, WRS5000 AND WRS7000 REWORK STATIONS

WRS7000

- **Self-Contained Desoldering and Hot Air**
- **Lock-Out Equipped**
- **Temperature Set Back**
- **ESD Safe**
- **Temperature Range: 350°F to 850°F**
- **Static-Free Hot Air System**

Type WRS7000 rework and repair system comes with **type EC1204** 54-watt soldering iron, **type DS58** 60-watt in-line desoldering pencil, **type HAP1** 100-watt hot air pencil, **type WT50** SMD tweezers, Erem® vacuum pick-up pen for component handling, dispenser for solder paste or adhesive, and a built-in 700-watt hot air pencil with vacuum pick-up and static-free air flow capable of removing or replacing the largest of components.
Type WRS4000 rework and repair system comes with **type EC1204** 54-watt soldering iron, **type DS58** 60-watt in-line desoldering pencil, **type HAP1** 100-watt hot air pencil, and **type WT50** SMD tweezers.
Type WRS5000 rework and repair system comes with **type EC1204** 54-watt soldering iron, **type DS58** 60-watt in-line desoldering pencil, **type HAP1** 100-watt hot air pencil, **type WT50** SMD tweezers, Erem® vacuum pick-up pen, and dispenser for solder paste or adhesive. Shop air is required for dispensing and vacuum pick-up pen. A full range of tips and nozzles for rework and repair are available for all rework stations; *contact your local Newark sales office.*

WRS1000 AND WRS2000 REWORK STATIONS AND ACCESSORIES

WRS2000

A self-contained, ESD-safe station designed to handle a variety of rework and repair tasks. Selector switch allows user to choose either solder or desolder tools compatible with the Weller® WRS systems or the **type HAP1** 100W hot air pencil, which is supplied. **Type WRS 2000** is a versatile rework system combining a solder paste dispenser, the Erem® vacuum pick-and-place tool and **type HAP1** hot air pencil for solder paste reflow. *Contact your local Newark sales office for replacement nozzles.*

WRS-3000S REWORK STATION AND ACCESSORIES

WRS-3000S

- **Latest Multipurpose Rework System for Soldering/Desoldering and SMT Applications**
- **Simultaneous Control of 3 Tools, Internal Pump, and Air Supply**
- **Compatible with Weller® Solder/Desolder Tools or New Inline and Pistol-Style Tools**
- **Auto Soldering Iron Temperature Setback**
- **Operator Lockout Protection**

The **WRS-3000S** is designed to handle all rework and repair of mixed technology boards. Includes built-in microprocessor that provides simultaneous controlled desoldering, soldering, and hot air functions. Temperature, hot air time, and automatic temperature set-back can be programmed. Includes its own internal pump—eliminating the need for shop air. ESD safe. The **WRS-3000S** comes complete with **type EC1201A** 40W soldering iron, **type DS58** desoldering pencil, **type HAP1** 100W hot air pencil, and **type WSS1** stand system, which holds 3 irons. The **WRS3000** rework station is a base unit only and does not include tools.

16F8989 Type WRS-3000S. **Each** **2102.74**
92F7644 Type WRS3000. **Each** **1446.56**

SOLDER FUME EXTRACTORS

WFE2P

- **Efficient Four-Stage, Replaceable Filter System**
- **Silent-Running, Maintenance-Free Pump**
- **For Use with FE Series Soldering Irons**

Types WFE2P and **WFE20** fume extractors are bench-top filtration units that reduce harmful soldering emissions by extracting 99.99% of the fumes before they can be released into the environment. **Type WFE20** accommodates up to 20 users.

Stock No.	Type	Description	Each
52F6559	WFE2P	Solder Fume Extractor, Up to 2 Operators, Internal Pump	716.95
52F6560	WFE20	Solder Fume Extractor, Up to 20 Operators, Arm Extraction Option	3468.05

Weller®

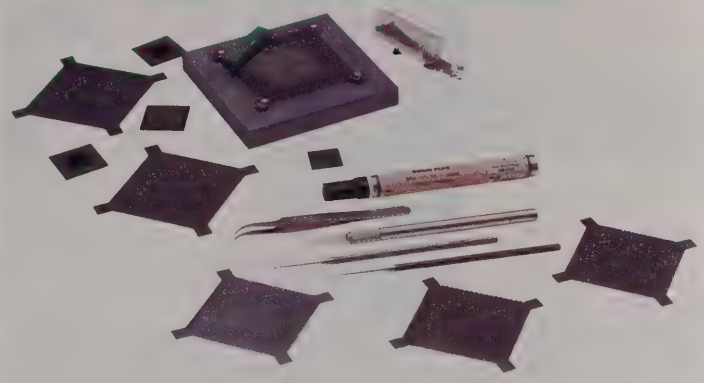
HOT AIR REWORK SYSTEMS

TYPE WQB2000 BGA/SMT REWORK SYSTEM

Capable of removal of BGA or fine pitch SMT devices without thermal or physical damage, precisely replacing a component in the proper position and reflowing the solder joints for a complete repair. Hot air temperature profiling is controlled by either programmed or custom routines from a microprocessor-based BGA time control module. The BGA time control module stores the following four parameters: 1) hot gas temperature, 2) hot gas flow rate, 3) preheat time, and 4) reflow time. Special BGA nozzles with external sensor in the nozzle body provide homogeneous temperature inside nozzles.

91F2843 Type WQB2000. **Each** **7760.95**
(19428) (ne11143)

TYPE WPRB1000 BGA REBALLING KIT



Precise reballing kit for plastic BGA components. Kit includes 6 templates, vile of 10,000 eutectic solder balls, straight probe, bent probe, precision tweezers, spatula, screwdriver, flux pen, Kapton® tape, dummy BGA components, and instruction manual.

91F2852 Type WPRB1000. **Each** **596.01**
(19429) (ne11144)

TYPE WAAB1000 ALIGN-A-BALL DEVICE

Provides low-cost alignment of BGA components in rework/repair situations. Proprietary positioning template strips allow simple locating of BGA components on circuit boards during rework/repair operations. NOTE: A hot air rework tool (not included) should be used in conjunction with this kit. *Order hot air rework tool separately; contact your local Newark sales office.* Includes 10 template positioning strips.

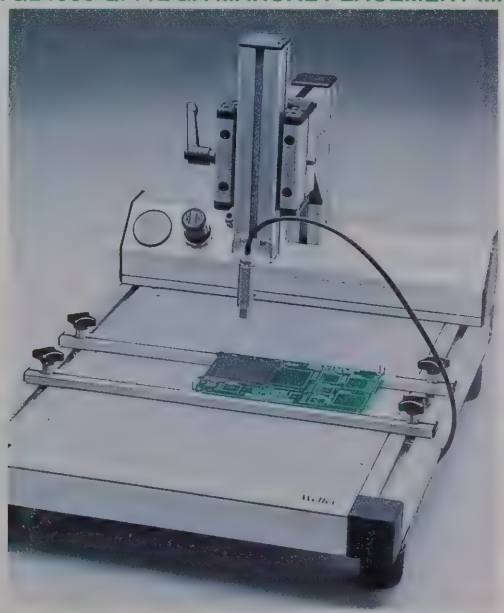
QFP/BGA PRINT MACHINE

NEW

Two-vacuum-head modular design with pushbutton release for optimal printing and placing. Fast and accurate setup with placement to 0.005″ accuracy. Features stable base, precision ball-slide heads, and easy vacuum release operation. Ideal for working with boards that have a small amount of BGA components, contract houses, OEMs, prototyping, and small production runs. Patented stencils and locating templates allow for versatility and quick setup. Comes with an easy-to-follow illustrated manual. Includes: 6 index pins, training kit with 2 clear boards, 1 BGA alignment square, spatula handle with interchangeable spatula sizes and knife blade, spacers, 2 different size vacuum nozzles, Kapton® tape, extra O-rings, and extra rubber vacuum heads.

48F2400 Type WQB1500. **Each** **3748.50**
(34770) (ne34770)

TYPE WQB1000 QFP/BGA MANUAL PLACEMENT MACHINE



Provides low-cost placement of fine pitch quad flat pack (QFP) components or BGA components on circuit boards. Much more accurate and repeatable than hand placement. Ideal for prototyping, small production runs, or contract work. The system allows for flexibility in board and component size. Allows users to place accurately to 0.0005″ accuracy and reduce rework. Includes flat accurate, rugged table base, templates for QFP and BGA, and vacuum pickup tool. Uses shop air.

91F2844 Type WQB1000. **Each** **2327.20**

Wire-Wrap® WIRE WRAPPING TOOL

- **Easily Wraps and Unwraps Wire**
- **Recharges in 1 Hour**
- **Operator-Adjustable Indexing**
- **Complete with Battery Cell + Charger**

Type 27600AE6 is a battery-powered wire wrap/unwrap tool which features slim design to lessen strain and fatigue for operator. Makes 1100 connections with one charge. Comes complete with 1-hour battery recharger and battery cell. Also has operator adjustable indexing, self-aligning gearing system and snap-action switch. Operates on 120 volts, 60Hz, with speed of 3000 RPM. Wraps wire sizes 22-32 AWG and accepts all standard bits and sleeves for wrapping 22-34 AWG wire. *Bits and sleeves are available. Contact your local Newark sales office.*

89F283 Type 27600AE6. **Each** **351.77**
(5882) (de52578)

Wire-Wrap® HAND OPERATED WRAPPING TOOL

Type 28000AC1 is for telephone installers, electronic technicians, and servicemen. Strong, light-weight plastic housing. Universal collet handles all wrapping bits and sleeves. Ten revolutions of wrapping per squeeze. Precision construction, heat treated gearing, adjustable pivot, and ball bearing mechanism. Right hand rotation. For 22 to 32 AWG wire. *Bits and sleeves are available. Contact your local Newark sales office.*

44F1795 Type 28000AC1. **Each** **120.16**
(5884) (de52581)

WICK

Woven copper for absorbing heated solder. Use in confined areas in place of desoldering tool. Contains rosin-core flux.

PORTABLE SOLDERING IRON ANALYZER

Type WA-2000 tests soldering stations for compliance with DOD-2000 specification. Tests either tip temperature stability or absolute temperature when measured with a thermocouple. Also tests tip-to-ground resistance (iron tip-to-ground post on plug) and tip-to-ground noise (mVrms). Battery life: 50 hours.

50F1821 Type WA-2000. **Each** **659.78**
(5995) (ne53269)

Wire-Wrap® WIRE WRAPPING TOOLS

Types 27160AB6 and **27170AB5** are heavy-duty, easy-to-operate electric wire wrap tools. Designed for production, installation, and service uses. Features include powerful motor for steady performance, high starting torque, rapid acceleration, and high impact-resistant plastic housing. **Type 27160AB6** accepts bits for wire sizes 18-32 AWG. **Type 27170AB5** accepts bits for wire sizes 24-32 AWG. Free speed is 4500 RPM. Right hand rotation. Both models are double insulated. Other features include planetary gear reduction drive, insulated collet and collet nut, light trigger pull, and two wire, 8-ft. cord. Only **Type 27170AB7** has back force feature. Both types have 120VAC. *Bits and sleeves are available. Contact your local Newark sales office.*

(5885) (de52582)

Wire-Wrap® ERGONOMIC WRAPPING TOOL

Type 27300AC6 is an easy-to-operate, two-finger wrapping tool for service work and medium production. Offers greater comfort and helps avoid carpal tunnel syndrome. Lighter trigger pressure relieves stress on hand and wrist. Shorter trigger travel reduces motion required for activation. Slim, lightweight design. 6-position indexing for operator preference. Double-insulated with two-wire cord. *Bits and sleeves are available. Contact your local Newark sales office.*

SP200-11 SOLDERING SYSTEM

NEW

Type SP200-11 soldering system is an ideal choice for thru-hole soldering and surface mount touch-up benches. No calibration is required. 115VAC. Includes power supply with power cord, handpiece with cord, workstand with sponge, and cartridge removal pad. *Order soldering tips for* **type SP200-11** *separately on this page.*

48F3820 (34274) Type SP200-11. **Each** 313.95 (ne34274)

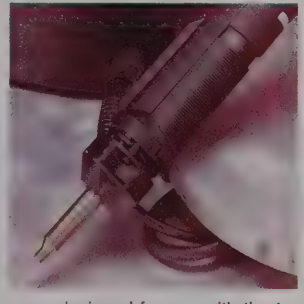
SP440-11 DESOLDERING SYSTEM

NEW

Type SP440-11 desoldering system is designed for production thru-hole rework. Delivers high-watt density power at low temperatures. 50-watt power is ideal for heavy-load desoldering of components on heavy ground plane and multi-layer PC boards. Whisper-quiet, self-contained vacuum pump delivers a powerful vacuum and is portable. Lightweight, ergonomic pencil grip is designed to maximize control and comfort. Cable and vacuum tubing are burn-resistant. Solder collection chamber has no glass tubes, allowing easy cleaning. Features automatic time-out to extend tip life. 120VAC. Include: power supply with power cord, desolder tool assembly with front seal, filter pack, desolder workstand with sponge, cartridge removal pad, and tip cleaners. *Order desoldering tips for* **type SP440-11** separately *on this page.*

48F3821 (34273) Type SP440-11. **Each** 682.50 (ne34273)

SDC SERIES DESOLDERING TIP CARTRIDGES



SDC series tip cartridges are designed for use with the **type SP440-11** desoldering system; *order separately on this page.* **600 series** desoldering tip cartridges are also available, *contact your local Newark sales office.*

MX SERIES SMARTHEAT SOLDERING/SMT REWORK STATIONS AND ACCESSORIES

MX-500S

MX-500TS

MX series soldering and desoldering rework stations utilize a patented heating technology which provides accurate, instantaneous tip temperatures and rapid thermal recovery with high mass boards. Heat is delivered to the tip through a pencil-like, ergonomic handpiece with a minimal tip-to-grip distance. The tip cartridge combines heating and sensing capabilities into a self-regulating cartridge with no electronics to calibrate. Tip cartridges provide continuous temperature control with no maintenance, providing high soldering throughput at low temperatures for easy, fast, safe soldering and desoldering.

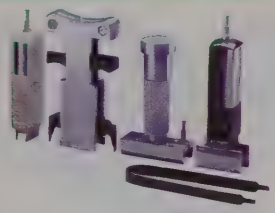
PC BOARD AND SOLDERING EQUIPMENT

WK-7 INSERTION/EXTRACTION TOOL KIT



Type WK-7 DIP insertion and extraction kit contains all tools listed in the table below. These range from inserters and extractors for DIPs, from 14 to 40 pins. Tools engaging conductive surfaces are CMOS safe. Grounding lugs included where needed.

10F7495 Type WK-7. **Each** **83.20**
(5987)

ESD HOT AIR SOLDERING IRON AND HOTPLATE

SMT 1160 Series

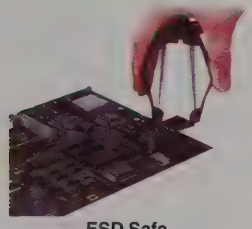
- **For Surface Mount Applications**
- **Self-Contained Air Pump**

60W heater produces temperatures 486°-840°F. Airflow: 1-6 liters/minute. Nitrogen input facility. Includes tool holder, 3 nozzles (round, oval, angled). 115VAC. **Type SA-751** ESD hotplate can be used as preheater for soldering on multilayer boards or while reworking with hot air. Hinged hood creates oven-like environment. Temperature range: 150°-500°F. *2-year warranty. A complete line of nozzles is available; contact your local Newark sales office.*

Stock No.	Type	Description	Each
95F3901	SMT-1161-V	Variable Temperature Station	817.34

(6000) (de52332)

UNIVERSAL PLCC EXTRACTION TOOL

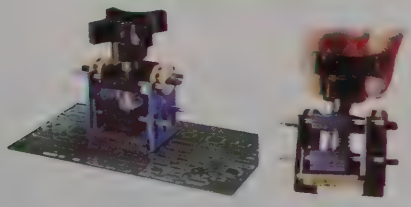


ESD Safe

Type EX-5 extracts 20-84 pin PLCC's from any socket without damaging chips. Spring-loaded, one hand design requires no pulling. Squeeze handles and lift chip from sockets. ESD handles for use on static sensitive components.

50F5444 Type EX-5. **Each** **23.69**
(5929) (ne06305)

PGA-X EXTRACTOR



Type PGA-X extractor provides a means for extraction and insertion of PGAs. Adjustability for 9 x 9 to 26 x 26 pin sizes eliminates the need for fixed-size tools. Includes heavy-duty storage case.

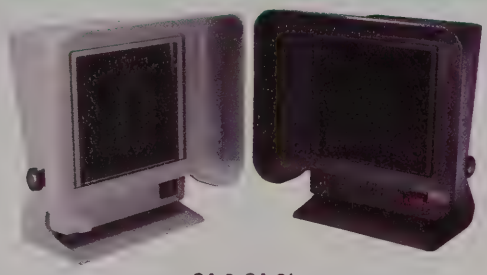
96F5459 Type PGA-X. **Each** **213.94**
(5989) (ne52301)

PORTABLE DESOLDERING IRON/PUMP

Type SA-6-115 electric desoldering iron is a compact, lightweight hand-held pump which features high performance with low maintenance. The convenient 115VAC, 50/60Hz powered tool features one-hand desoldering, eliminating the need for a separate soldering iron and desoldering pump. Self-contained heating element and suction power—no factory air is required. 3-wire cord. *For a complete* **SA-6** *nozzle selection, contact your local Newark sales office.*

44F1657 Type SA-6-115. **Each** **64.28**
(5879) (de52300)

SA-9/SA-91 BENCHTOP FUME ABSORBERS



SA-9, SA-91

SA-9 and **SA-91 series** fume absorbers feature aerodynamic hood design that effectively draws soldering fumes away from work area. Carbon-impregnated filters trap flux fumes. Compact size and adjustable stand allow placement 6-8″ from work area. **SA-91** units have articulating arm to allow positioning and to save bench space. Include bench-mounting clamp and 3 filters.

Stock No.	Type	Description	Each
50F5445	SA9-115	Benchtop Fume Absorber, 115V	115.20
50F5446	SA9-E-115	ESD Fume Absorber, 115V	148.11

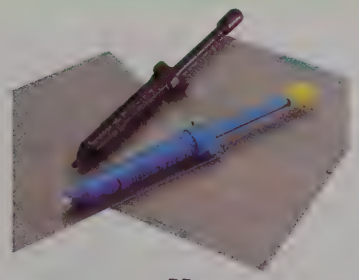
(5988) (ne52299)

HIGH-POWER SOLDERING STATION

Type SA571 externally-fused soldering station features powerful 70W ceramic heating iron and closed loop, variable temperature control. Exceptional heat recovery for demanding multilayer PC board applications. User-selectable temperature range of 600°F (316°C) to 800°F (427°C) ±10°F temperature repeatability. Grounded tip. Zero voltage heater switching. External calibration ports. Includes lightweight soldering iron and non-burn silicon cord. 115VAC.

51F3443 Type SA571. **Each** **137.14**
(5992) (ne52888)

DP SERIES DESOLDERING PUMPS



DP

Specially engineered to high specifications. Provide precise repeatable operation. Fitted with Teflon® tip. Feature durable corrosion-resistant plastic construction, self-cleaning precision metal plunger, and corrosion-treated springs.

Stock No.	Type	Description	1-4	5-9

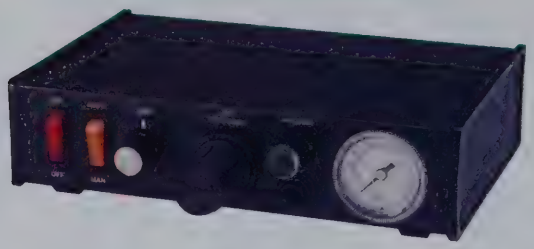
DISPENSING SYSTEM AND ACCESSORIES

TYPE TS9151 DISPENSER



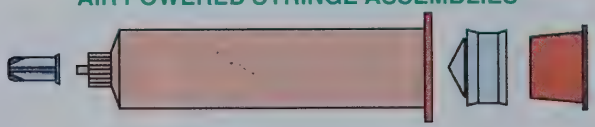
TS9151

Type TS9151 is a precision fluid dispensing system with vacuum control of all viscosities of fluids using air powered disposable syringes. Solid state digital integrated circuitry timer. Lighted function switches, adjustable vacuum feature for controlling drip, microaction foot switch. *10-year warranty.*

Input voltage:	115VAC 60Hz (**TS9150**)
Operating pressure:	1 to 100 psi (0.1 - 7 bar)
Timer:	Programmable from 0.01 to 30 sec, ± 5%
Cycle actuation:	Manual or timer mode
Minimum deposit size:	0.01 ml

52F9939 Type TS9151. **Each**..... **543.07**
(5943) (ne08017)

AIR POWERED SYRINGE ASSEMBLIES



OKA6-20

Air powered syringe assemblies are available in three sizes: 6cc (**type OKA6-20**), 10cc (**type OKA10-15**) and 35cc (**type OKA35-10**). Include syringe barrel, stopper, tip cap and plug. Syringe barrels and tip caps are molded from polypropylene; stoppers and plugs are molded in polyethylene. Combined with dispenser (**type OK9151**), these syringe assemblies produce a low cost method of applying all types of fluids.

SE SERIES DISPENSING TIPS

SE

These stainless blunt tips are the finest general purpose dispensing tips available. Stainless steel tubing is precision cut to precise lengths and ground to be burr free. Cut tubing is epoxy bonded into polyethylene hubs molded on colors that correspond to gauge size. All OK International tips secure to OK International syringe barrels, correspond to the Luer Lock specification, and are produced in a silicone-free environment. **Sold in packages of 50.**

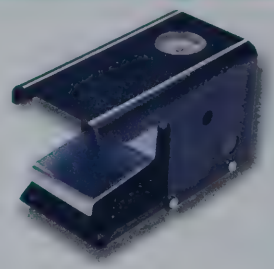
*Crimped hub construction.
(5940) (ne08014)

TYPE OK924 FOOT VALVE DISPENSER



OK924

Type OK924 offers the best of both worlds: increased production combined with dispenser economy. Floor-mounted, has a built-in pressure regulator, pressure gauge and a unique fast-dump 3-way air valve. Output rate and shot size are operator controlled. **Type OK924** is the ideal basic dispensing unit for most general applications of adhesives, sealants, coatings and compounds. Connects to any OK syringe adapter. Input pressure: 100 psi max. Operating pressure: 20-100 psi max. *10-year warranty.*

(5942) (ne08016)

STARTER KIT FOR TYPES OK924 AND OK9151

OKD-KT

Type OKD-KT includes 3 barrels (6cc, 10cc & 35cc), 3 air stoppers (6cc, 10cc & 35cc), 3 tip caps, 3 syringe adapters (6cc, 10cc & 35cc), 50 tips (2 each size), in-line filter, shop air filter and syringe stand.

52F9940 Type OKD-KT. **Each**..... **115.20**
(5939) (ne08013)

MANUAL SYRINGE ASSEMBLIES

OKM6-20

Manual syringe assemblies are available in three sizes: 6cc (**type OKM6-20**), 10cc (**type OKM10-15**) and 35cc (**type OKM35-10**). Include syringe barrel, stopper, manual plunger and tip cap. Syringe barrels, manual plungers and tip caps are molded from polypropylene; stoppers are molded from polyethylene. The manual plunger locks to the stopper for smooth, controlled manual dispensing.

SOLDER, SOLDERING TOOLS AND ACCESSORIES

DESOLDERING BRAID

Desoldering braid eliminates shorts caused by solder bridging, corrects poor solder conditions, removes components, and removes solder from flat surfaces. **Type 1664** combines solder with desolder in one package called perfect pair.

Stock No.	Type	Width	Spool Length	1-9	10-24

ROSIN ACTIVATED SOLDER

Rosin activated solder offers the most effective form where wetting action is completely non-corrosive and electrically non-conductive. Water-soluble is more effective and heat stable than rosin fluxes. Residue can be completely removed with water. Mildly active solder has high mobility, fast spreading action that meets military specification QQ-SS-571. No-clean solder is environmentally safe, it leaves low amounts of residue which doesn't require cleaning.

30 AND 40 WATT SOLDERING IRONS

Compact, light weight, smart design permit fatigue-free work even during continuous soldering operation. **Type 2788** has a specially designed handle with heat-resisting ring for low thermal efficiency. Super quick heat-up and heat recovery qualities for work efficiency. Simple tip replacement. Long tip life. ABS handle. Voltage: 110V.

SOLDERING TOOLS AND ACCESSORIES

ADJUSTABLE TEMPERATURE-CONTROLLED SOLDERING STATION

NEW CE TUV Rheinland

Digital display for temperature control. Adjustment range from 320°F-900°F (160°C-480°C). Temperature control can also be set for accurate operation. Features voltage of 110/120VAC or 220/240VAC, power consumption of 48W, heater operation voltage of 24VAC. CE compliant, TUV approved.

84N1044 Type 4004. **Each** **99.99**
(32970) (ne32970)

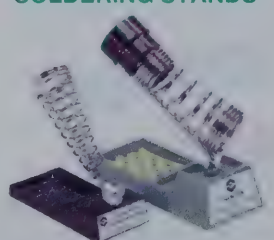
SOLDER SUCKER

NEW

Easy to operate. Cleans solder instantly. Made of aluminum and plated with a special metal. Tip is replaceable.

84N1045 Type 4005. **Each** **6.99**
(32971) (ne31971)

SOLDERING STANDS



Low central design for user's safety and protection against burns. Spring holder prevents damaging soldering irons. Tip cleaner makes it possible to solder under clean environments. Sponge included.

(19333) (ne11103)

STATIC-DISSIPATIVE BOTTLES

ESD safe bottles are non-static generating. Regular plastic bottles can generate a 10,000V charge that will cause damage in static sensitive areas. These bottles offer an average surface resistivity of 10^9 to 10^{10} ohms and can dissipate a charge of ±5000V in less than 2 seconds at 40% relative humidity. The bottles do not chemically react with TCE or alcohol. In tests, it was found that after a seven-day period, the pH of de-ionized water solutionns in these bottles remained stable. **Type 1466** has a pump and **type 1465** does not.

Stock No.	Type	Description	Each
10N685	1462	2 oz. Flux Bottle, 26 Gauge	5.33
10N686	1463	2 oz. Flux Bottle, 20 Gauge	5.33
10N687	1464	2 oz. Flux Bottle, 16 Gauge	5.33
10N688	1465	6 oz. Solvent Container	17.96

10N691	1468	32 oz. Water Bottle/ESD Safe	11.29
10N692	1469	16 oz. Catch-All Container	5.13
10N693	1470	16 oz. Spray Bottle	11.29

(19350) (ne11086)

STATIC-DISSIPATIVE HAND LOTIONS

Blue lotion is enriched with aloe vera and vitamins A, D, and E. These natural moisturizers help achieve healthier, softer, younger looking hands and nails. This non-acidic lotion relieves chapping, skin flaking, irritation, and skin sensitivity caused by regular use of latex gloves and finger cots. Non-petroleum, non-contaminating, greaseless formula contains no glycerin, mineral oil, silicones or lanolin. Absorbs immediately into the skin without interfering with grip or dexterity.

Stock No.	Type	Size	Each
10N670	1447	10 oz.	1.92
10N671	1448	8 oz.	3.89
10N672	1449	16 oz.	11.65

HAND CLEANERS

A neutral, mildly cationic hand cleaner formulated especially for electronic/cleanroom evnvironments. Regular hand cleaners contain soaps, which are derivatives of animal and vegetable fats. These fatty materials along with the silicone, lanolin, and mineral oil can cause contamination. This advanced formula softens and protects your skin yet effectively removes soils and other contaminants. White lotion is the same formula as the static-dissipative hand lotion, but without perfumes or dyes. Meets rigorous requirements of Class 1 to 10,000 cleanroom environments. Ion <50ppm.

Stock No.	Type	Size	Each
10N678	1455	Gallon White Lotion	48.96
10N679	1456	32 oz.	11.39
10N680	1457	Gallon	33.33

(19352) (ne11088)

SPRAY CLEANERS

Spray cleaner is both biodegradable and odorless. Contains no alcohol, ammonia, amines, and silicones. Contains less than 100ppm of alkali, bromides, chlorides, sodium, aluminum, calcium, and magnesium. A low-ionic general-purpose cleaner fomulated for electronic/cleanroom environments. This unique formula is mildly cationic to neutralize static charge. Spray cleaner can be used to remove the everyday flux residues, oil, dirt and grime found around assembly areas. Meets SARA Title 3 and T.S.C.A.

Stock No.	Type	Size	Each
10N681	1458	2 oz.	3.16
10N682	1459	16 oz. ESD Safe	11.65
10N683	3321	24 oz.	6.21

SOLDER/DESOLDER STATIONS AND TOOLS

TYPES 951SX AND 952SX LONER® SOLDERING STATIONS

951SX

952SX

120-volt, 60Hz, 70 watts per tool. Temperature range of 400° to 800°F, with temperature regulation of ±6°F. Feature solid-state control, ESD construction, and a ceramic PTC element for fast heat up. **Type 951SX** is single station for one-temperature operation. **Type 952SX** is a dual station with two temperature dials which independently control two separate soldering tools. Both stations accept a variety of soldering tips; *order separately on this page.* Comply with MIL-S- 45743E, DOD-STD-2000-1B, WS-6536E and ESD SPEC DOD-STD-1686, DOD-HDBK-263.

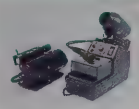
971 SERIES SMT/SOLDER & DESOLDER EQUIPMENT

971



971FX

971HA

Type 971 soldering station offers versatility for delicate and heavy-duty work. Direct tip-heater configuration results in quick heat recovery at the tip. Provides precise temperature control and calibration. Accepts a variety of general-purpose tips. **Type 971FX** fume extractor removes flux fumes from the work place at the soldering tip. A three-stage filtration system pulls fumes into a contained vacuum chamber, activated when the soldering tool is removed from the holder. Collar assembly features an adjustable collection tube that works with most tip lengths and shapes. **Type 971HA** hot air/SMT station is designed for using either hot air or traditional rework techniques. Runs on shop air or nitrogen. Air flow is activated by an automatic switch in the holder. Accepts a wide variety of tips and nozzles to accommodate most component sizes and shapes. Graduated flow regulator monitors air flow in SCFH.

HOT-AIR SOLDERING/REWORK AND SOLDERING/DESOLDERING STATIONS

1036DX

1036

ZD905V

Versatile stations use hot-air or contact tips and feature lightweight, compact handle, precise air control, 400-800°F adjustable range and ESD construction. **Type 1036DX** deluxe SMD workstation is self contained (built-in air source) and comes with **LP250** vacuum pickup tool. Both stations include **ST800** SMD helper tool, tip wrench, tip-bender wrench, medium hot-air tip and spade-type solder tip. Power: 120V, 60Hz. UL listed. Meet DOD-STD-2000-1B, MIL-STD-2000, WS-6536E, DOD-STD-1686, DOD-HDBK-263.

97F7622 Type 1036DX. **Each** **993.47**

Type 1036 Atmoscope®. Self-contained hot-air station for SMD soldering and desoldering. Features separate temperature control and air output control. Vacuum to 22″ of mercury. Power: 120V, 150W, 60Hz. Adjustable temperature range, 400°F-800°F enables easy removal of DIP and flat pack ICs. Max. air pressure, 18 psi. **Type 1032** is similar except uses external shop air and has pressure regulator and pressure indicator on front panel. UL listed. *Order accessories separately on this page.*

87F1867 Type 1036. **Each** **943.51**
95F9889 Type 1032. **Each** **685.79**

Type ZD905V soldering/desoldering station provides temperature-controlled soldering and desoldering in the same space as one station. Available with **type LST10** or **LST11** soldering tools.

96F8231 Type ZD905V. **Each** **746.17**

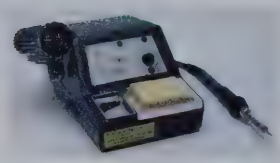
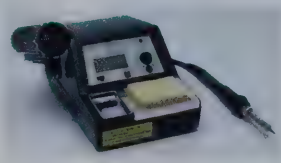
SOLDERING TOOLS AND HARDWARE

60W SOLDERING STATIONS

NEW



XY-136ESD



XY-137ESD

New ergonomic design for prolonged comfort. Ceramic technology provides better heat stability and faster recovery (less than 45s). Spike-free circuitry is employed with a fully grounded tip that gives zero-voltage switching for protection of electrosensitive devices. Tip leakage: <0.4m or 0.5ohms resistance. Temperature range: 400°F to 900°F (200°C to 480°C) ±3°. The lockout feature permits setting and locking the stations at a specific temperature. **Type XY-136** is an analog station, while **type XY-137ESD** is a digital station. The **ESD** types are both static-free stations.

48F2055 Type XY-136. **Each** **136.45**

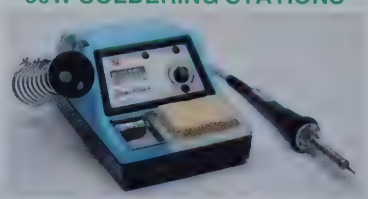
60W SOLDERING STATIONS

UL



XY9-60A

Types XY9-60A and **XY9-60D** soldering station incorporate temperature readouts to allow monitoring for the proper application of heat. Specially insulated nichrome wire heating elements are compressed between 2 layers of stainless steel and located at the end of the barrels for instant heat-up and recovery. Temperature can be adjusted from 150°C to 450°C without changing the tip or heating element. Lockout feature allows supervisors to set and lock stations at specific temperatures. Meet all military specifications regarding electrostatic-sensitive devices. **Type XY9-60A** has an analog read-out. **Type XY9-60D** has a digital read-out. UL listed. Replacement tips are available; *contact your local Newark sales office for details.*

16F8977 Type XY9-60A. **Each** **126.07**
16F8980 Type XY9-60-D. **Each** **178.08**

SOLDER/BRAID PAIR

1 spool of 0.031″ 20 ft. 60/40 rosin core solder and 1 spool of size 3 (0.075″) GC braid. Spools snap together to make one unit.

16F459 Type 12-5001. **Each** **3.16**
(5950) (ne08496)

SOLDERING-DESOLDERING AIDS/DENTAL PROBES

Stainless steel probe kit can be used either as dental tools or as soldering/desoldering aids in SMD assemblies. Noncontaminating, static-free, and will not solder. Needle points and hex handles. Set of three 5½ probes: straight, hooked, and curved.

90F8866 Type 12-2270 Kit. **Each** **10.10**
(5866) (de08802)

AUTO-TEMP 369 HIGH-INSULATION CERAMIC SOLDERING STATION

Offers the ultimate in temperature-controlled hand soldering. A highly insulated ceramic heating element provides rapid heat-up and instant heat recovery. Temperature is adjustable from 250°C to 430°C. Heater insulation exceeds 100MΩ. Input rating: 100-120VAC, 60Hz; 3-wire grounded, 220-240VAC, 50Hz. Zero voltage switching and fully grounded design.

16F8973 Type 369. **Each** **71.43**
(6551) (nec9096)

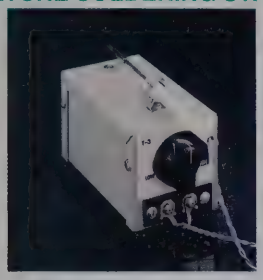
HEAT SINKS

Protect heat-sensitive components while soldering or desoldering. **H3-388** will absorb maximum heat. **9077-1** will fit short leads mounted close to PC board.

95F2280 Type H3-388 Pkg. of 2. **Each** **2.74**
95F2281 Type #9077-1 Heat Sink. **Each** **1.38**
(5832) (de03034)

Assembly Technologies INTERNATIONAL, INC.™ MINIATURE SOLDERING STATION

NEW



Provides the user with a precision soldering system. Unique element design isolates the heat within the soldering tip, protecting components adjacent to the solder joint from excessive heat. Features: output at 6.3VAC, operating temperature range from 150°F to 625°F, 5 nickle-plated tips to use, iron weighs only ½ ounce, and ready to solder in 28 seconds. Kit includes: T-3 120 power unit, T3 02-MS medium spade micro-tip, T3 03PP precision point micro-tip (*for additional tips, contact your local Newark sales office*), and 5′ spool of drywick. Made in the U.S.A.

48F3696 Type T3 N KIT. **Each** **119.57**
(35372) (ne35372)

Assembly Technologies INTERNATIONAL, INC.™ SOLDERING POT

Types 300 and **600** soldering pots have removable dross skimmers. Power: 120VAC/60Hz. 3-wire cord and NEMA plug. **Types 300** and **600** have temperature controls on their sides. **Type 300** temperature range: 325°-850°F; solder capacity: 1 lb. **Type 600** temperature range: 350° - 850°F; solder capacity: 2½ lbs. **Type 675** has remote temperature control with close tolerance (±10°F). Temperature range: 400°-800°F. Solder capacity: 2.75 lbs. **Type 675** meets DOD-2001-B.

ESICO INC. PTH RESISTANCE SOLDERING TOOL

Lightweight tool features instantaneous heat cycle and integral switch to control power cycle. Unique plier action and carbon electrode tips enable user to direct heat only at areas to be soldered/desoldered. Includes 115V power pack transformer and alternative, chrome-alloy tips, which can be shaped to reach tight spots.

50F4767 Type 23803. **Each** **242.91**

Extra pair of carbon tips and wire tips.

48F3864 Type 23802. **Each** **205.36**
(5864) (de08725)

ESICO INC. TEMPERATURE CONTROL UNIT

ESICONTROL provides manual temperature adjustment of soldering iron tip or solder pot, with automatic correction for voltage fluctuations. Ideal for military testing applications. Can be used with any standard soldering pot *that is not thermostatically controlled.* Controls up to 75% of full wattage of the heating element. Permits operation without control at 100% of full wattage. Handles any 120VAC heater load to 840W. Fuse controls have pilot light to indicate cycling.

94F7563 Type EC-6. **Each**..... **95.43**

Assembly Technologies INTERNATIONAL, INC.™ ULTRA-HIGH PERFORMANCE SOLDERING & WIRE-STRIPPING SYSTEM

105A3 105A12

For heat-sensitive components. **Type 105A3** power unit provides controlled, concentrated heat for light/medium work. **Type 105A12** power unit provides medium power with a range of 0-250W, 0.8-2.8V. Powers soldering and wire-stripping handpieces; *both ordered separately below.* Infinitely variable control: 0-100W, 0-3.2V. *Footswitch controller available below.*

SOLDER AND ACCESSORIES

SOLDER

ADVANTAGES OF 5-CORE SOLDER

Flux is peripherally arranged for fast action. Wetting is fast, complete, and uniform, requiring less heat to joint area. Eliminates flux voids. On QLP of Federal Spec QQ-S-571E and applicable IPC/J standards.

5-CORE 60/40 Sn/Pb ALLOYS, ROSIN (RA)

For high-performance electronics.

COPPERSET® THROUGH-HOLE PLATING KIT

Manual soldering system allows plain holes in PCBs to be through-plated, where top soldering is impossible. Contains tools and materials necessary to form rough-plated holes in standard PCBs with a thickness of 0.062″ (1.6). Kit contents: bail bars and material to convert 500 holes in each of 3 sizes, 0.8, 1.0, and 1.2mm; automatic punch with alternative nose-pieces to match the 3 hole sizes; 3 sets of reamers and feeder tubes; anvil base with 5mm and 8mm anvils; 38swg connecting wire; dispensers of solder wire and desoldering wick. **Replacement bail bars are sold in quantities of 500.**

DESOLDERING BRAID AND STATIC DISSIPATIVE PRODUCTS

DESOLDERING BRAID

Soder-Wick®, the world's leading brand of desoldering braid, is the fastest, cleanest and safest braid in the industry. It significantly reduces rework/repair time and minimizes the risk of heat damage to the board. Its geometrically precise weave design allows for maximum capillary action and solder capacity. Soder-Wick® Desoldering Braid optimizes heat transfer through the braid and into the solder joint, resulting in faster wicking action than any other competitive braid. Minimal flux residue on the board speeds up the cleaning process, or eliminates it entirely.
Soder-Wick® Desoldering Braid is available in the most comprehensive variety of widths, lengths and flux types. Application-specific sizes allow for precision solder removal in a flash. Wicking speed and board safety are maximized by matching the size of the braid to the soldering iron tip and the area to be desoldered.

SODER-WICK® BGA

The most effective, economical way to safely and completely remove solder from BGA pads and chips.

- **Sized and Designed Specifically for BGA Pad and Chip Rework/Repair**
- **Entire BGA Pads Cleaned in 3 to 4 Passes**
- **Available in Rosin (80) and No-Clean (60) Fluxes, or Unfluxed (75)**
- **Packaged in ESD-Safe Static Dissipative Bobbins**
- **Meets MIL-F-14256EF Type R**

Stock No.	Type	Width	Length	Each
01F195	80-BGA-5	BGA	5′	3.83
01F196	60-BGA-5	BGA	5′	4.23
48F2109	75-BGA-5	BGA	5′	3.41

SODER-WICK® SMT

The finest widths of braid available, specifically designed for cleaning fine-pitch circuitry, SMT pads and micro-circuits.

- **Fits Spaces No Other Braid Can Reach**
- **Available in Rosin (90) and No-Clean (60) Fluxes**
- **Packaged in ESD-Safe Static Dissipative Bobbins**
- **Meets MIL-F-14256EF Type R**

Stock No.	Type	Width	Length	Each
95F6256	90-00-5	0.022″	5′	3.05

48F2112	60-02-5	0.055″	5′	3.33

SODER-WICK® ROSIN 80 SD

The Fastest, safest rosin flux desoldering braid packaged in static dissipative bobbins.

- **Minimizes the Risk of Damage Associated with Static Electricity**
- **Non-Corrosive Type R Rosin Flux**
- **Leaves No Ionic Contamination on Boards**
- **Meets MIL-F-14256EF Type R.**

SODER-WICK® NO-CLEAN SD

The fastest, cleanest no-clean flux desoldering braid packaged in static dissapative bobbins.

- **Patented Non-Corrosive, Halide Free, Organic No-Clean Flux System**
- **Desolders Up To 40% Faster than Competitive No-Clean Braids and Leaves Boards Cleaner**
- **Meets MIL-F-14256EF, IPC SF-818, and Bellcore TR-NWT-000078**

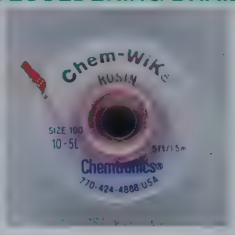
CHEM-WIK® ROSIN AND CHEM-WIK® ROSIN SD DESOLDERING BRAID



As the industry standard desoldering braid for service and repair, Chem-Wik® Desoldering Braid ensures fast and safe desoldering. The ultra-pure, oxygen free copper braid quickly and completely removes solder from circuit boards and components. Its fast wicking action protects components from harmful heat damage.

CHEM-WIK® ROSIN

The fast, safe rosin flux desoldering braid for removing solder from leads and components.

- **Coated with Ultra High Purity Rosin**
- **Non-Corrosive Type R Rosin Flux**
- **Meets DOD-STD-1686B, DOD-HDB-263, MIL-F-14256F, MIL-B-81705C and MIL-STD-2000A**

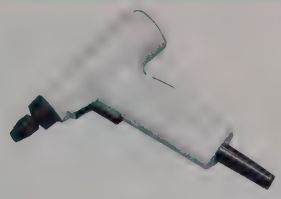
WIRE WRAPPING AND STRIPPING TOOLS

TYPE OK-21 ERGONOMIC WIRE-WRAPPING TOOLS



Type OK-21 electric-powered wire-wrapping tool offers a two-finger extended trigger, longer handle and light weight for improved ergonomics. High-speed 4200 rpm motor and gear drive is ideal for all wire sizes from 18 to 30 AWG. Available with back force to prevent overwrapping and unwrapping. *Order bits and sleeves separately.*

Stock No.	Type	Description	Price
95F3280	OK-21	Tool w/out Back-force	224.91
93F6308	OK-21-BF	Tool w/Back-force	235.88

(5828) (de02408)

BATTERY-POWERED WIRE-WRAPPING TOOLS

Type BW-928 battery-powered unit accepts standard bits and sleeves for 24-30 AWG wire. Feature positive indexing, LEXAN® housing, 8-ounce weight. Reversible for unwrapping by turning batteries over. Available with or without back force to prevent overwrapping. Wrapping speed 3000 rpm. Uses 2 standard "C" rechargeable NiCad batteries; *order separately.* **Type BW-520** industrial duty battery-powered tool accommodates 22-30 AWG wire. Wrapping speed 3000 rpm. Rechargeable NiCad batteries included.

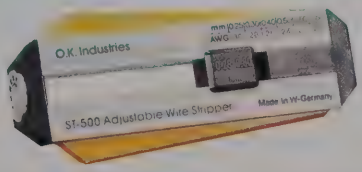
MANUAL WIRE-WRAPPING TOOLS WITH CHUCK-TYPE NOSE

Type G100/R3278 aluminum housing tool with chuck nose enables use of full line of bits and sleeves made for power tools. 22-32 AWG wire sizes. Provides 10 turns maximum. **Type G200/R3278** same except has LEXAN® housing. *Order bits and sleeves separately.*

10F7585 Type G100/R3278. **Each** **141.53**
10F7586 Type G200/R3278. **Each** **111.29**
(5872) (de52069)

ADJUSTABLE PRECISION WIRE STRIPPERS



Feature adjustment dial for six settings. Calibrated wire stop adjustable for desired insulation strip length. Operator squeezes tool and pulls in one motion, allowing 4 hardened steel blades to cleanly cut wire insulation. Pocket-size and lightweight, less than 1 oz. Calibrated strip length is 2". ABS housing. **Type ST-500** strips 20-30 AWG wire; **type ST-550** strips 18-28 AWG wire.

90F1767 Type ST-500. **Each** **59.46**
90F1768 Type ST-550. **Each** **59.46**

TELECOM WIRE WRAP KIT

NEW

A complete field service wire wrap tool kit. Produces wire-wrapped connections merely by squeezing the trigger. Use the ST-100 22 to 24 AWG wire cut-and-strip tool for easy, clean wire stripping with 1 5/16″ to 1 9/16″ adjustable strip-off length; place up to 4 wires in the stripping slot. The hand wrap-unwrap tool (22 to 24 AWG) does the work of 2 tools in one by changing the cap from one end to the other. Kit includes: 22 to 24 AWG bit, 22 to 24 AWG sleeve, and leather tool holster.

48F1705 Type WWK-1. **Each** **291.50**

(7442) (de02885)

7-IN-1 WIRE STRIPPER

Type 45-777 stripper performs seven functions: wire stripping on 6 to 16 AWG solid wire, crimping, bolt cutting, wire gauging, wire looping, conduit reaming, and cuts stranded, solid, Romex, and U.F. wire up to 6 gauge. Locking pawl keeps jaws closed when not in use. Cushioned grips.

50F3154 Type 45-777. **Each** **29.40**
(7437) (de02879)

CRIMP TOOLS

30-433

30-428

Type 30-433 coax strip and crimp tool. Cuts, strips and crimps RG-59 and RG-6 cable/F connectors. Separate stripping holes for inner and outer insulation. **Type 30-429** multi-crimp tool for easy crimping/cutting—even in close quarters. Crimp bare or insulated terminals and wire splices (22 to 10 AWG). **Type 30-428** combo tool for wire stripping/cutting, bolt cutting and crimping. **Type 30-430** 9″ Linemen plier, cuts ASCR crimp die. Knife-to-anvil blade extends cutting life. **Type 30-426** service tool crimps stamped, D-Sub, Double-D, high density, and miniature contacts.

Stock No.	Type	Description	Each
46F3691	30-433	Coax Strip & Crimp Tool	**46.11**

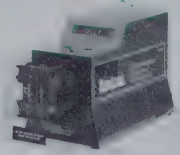
(5692) (de52266)

STRIPMASTER® WIRE STRIPPER

CE NEW



Automatically strips insulation from #30 to #8 AWG for commercial and military stripping specifications. Accurate, adjustable strip length control allows strips from 0.06″ to 1″ (1.5mm-25mm), and can be set for partial strips. Electronic cycle control with LCD display monitors strip settings of blade opening and strip length in metric measurement. Permanent and resettable cycle counter allows for monitoring production lot qualities and total strips performed. Guiding and gripping mechanism minimizes operator dependency. Clear front cover provides for safe operation and retains slugs. Internal automatic trigger provides accurate, repeatable strip lengths. Small footprint, lightweight. Small breakout, ½″ plus strip length, allows stripping of short leads. Specifications: 12VDC required, 60-100 psi (4-7 bar), 2,200 pieces/hour. Dimensions: 5.8H x 4.4W x 12.9″D (147 x 112 x 328 mm), 8 lbs (3.64 kg). CE compliant.

48F1326 Type 45-940. **Each**..... **3084.30**

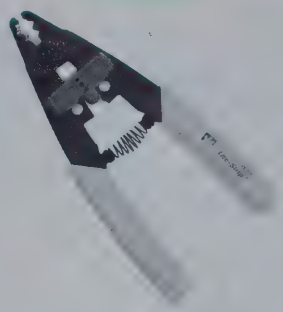
(18633) (ne11025)

LITE-STRIP™ OPTICAL FIBER STRIPPER

NEW



Strips outer cable jacket insulations, tight buffer tube insulations, and mechanically strippable coatings. Built-in blade guides positioning of optical fiber in the proper stripper hole. Plastic grips provide for comfort and handling ease. Fiber capacity of 125µ/250µ and 140µ/250µ.

48F1316 Type 45-350. **Each**..... **113.80**
(33874) (ne33874)

TELE T®-STRIPPER

NEW

Easily cuts and strips flat telephone cable. This multi-function hand-held tool cuts outer insulation without nicking inner conductors. Built-in stripping guide allows user to strip proper lengths for 8-position or 6-position modular plugs. Spring opening returns handles to place after every application. Comfort grip handles make tool applications easier on hands.

48F1317 Type 45-076. **Each**..... **28.70**
(33873) (ne33873)

DATA T®-CUTTER

NEW

Cuts round communication cable and maintains cable geometry for better performance. Cuts multipair cable up to 0.5″ (12.7 mm) and coaxial cable up to RG-9/U. Blades are suitable for soft cables (not ACSR). Steel-reinforced center conductors can be trimmed with bolt-cutting holes. Designed for RG-58 and RG-6 coaxial cable. Comfort grip increases handling ease. Locking latch keeps tool closed in pouch.

48F1307 Type 45-074. **Each**..... **17.20**
(33872) (ne33782)

BATTERY-POWERED CABLE CUTTER

NEW

Faster, more reliable cuts without stress or strain to the user. Able to cut 750 MCM hard-drawn copper cables before needing a recharge. Capable of cutting up to 1,000 MCM copper and aluminum. Compact design fits easily into tight places. Dimensions: 4.5″W x 19.25″H. Hardened steel blades provide consistent cuts and long blade life. Tough ABS 70 housing withstands rugged use. Resists oil and solvents. 3-way switch moves blades to forward, reverse, and neutral positions for partial cuts, adjustments, or backing off cable. Carrying case contains space for an extra battery. Perfectly suited for large jobs and utility applications.

Stock No.	Type	Description	Each

TOOL BAGS, WIRE STRIPPERS AND ACCESSORIES

TOOLS AND PARTS BAGS

35-665

35-655

35-533

Type 35-665 BucketBag™ tool carrier fits perfectly over the rim of a standard 5-gallon bucket. Has 43 pockets, 36 pleated outside pockets and 7 inside pockets. Rugged nylon polyester construction.

52F9078 Type 35-665. **Each** **28.69**

Type 35-655 Divider Pouch™ small parts bag has 6 internally divided pockets, each 5″ in depth. An outside drawstring closes the pouch.

52F9079 Type 35-655. **Each** **16.79**

Type 35-533 Tool Carrier™ natural canvas bag has 18 stitched, outer pockets. 12 pockets are 2⅓W x 5⅞″D, 6 pockets are 4⅔W x 7⅜″D. Velcro® closure.

52F9080 Type 35-533. **Each** **41.31**
(5789) (ne08875)

BAGBUCKET™ TOOL CARRIER AND MECHANIC'S TOOL BAG

35-668

35-535

BagBucket™ is a durable, lightweight tool bag. Free standing, and does not require a bucket to be used. Adjustable carrying handle for hand-held, over-the-shoulder, or on-the-back use. Large inside capacity, and 8 outer pockets provide plenty of room for tools.

48F1320 Type 35-668. **Each** **42.21**

The **mechanic's tool bag** has a large capacity, zippered main storage area. 8 interior pockets keep small tools easy to find. Two 10″ x 4″ exterior, snap-closure pockets hold larger tools or loose items.

48F1323 Type 35-535. **Each** **22.89**
(34670) (ne34670)

HEAVY-DUTY ROUND CABLE AND WIRE CUTTER

NEW

Yellow vinyl grips. High carbon steel construction, drop-forged, hardened, and tempered. 2 rounded cutting surfaces for a wide cutting range. Cutting blade nearest pivot places cable in best position for cutting or stripping. Handles can be turned inside out for easier stripping. For use on solid or stranded wire up to No. 8 AWG or 9mm diameter cable. Strips No. 14 through No. 2 wire. Cuts RG-6, RG-8U, RG-9U, RG-58, RG-59 coaxial cable; multiple conductor cable up to 0.5″ (12.7 mm), 24 AWG 4-pair twisted cable; cutting capacities for soft cables (not ACSR).

48F1327 Type 35-050. **Each** **32.89**
(33871) (ne33871)

LEVER STRIPPERS

Strips parallel cable, ribbon cable, and cable up to 1⅛″ (2.86) diameter with many insulations: rubber, plastics (including PVC and polyethylene), fiberglass, and fabric. Long lever swings 2 knife-type blades, cutting insulation, and removing slug. Round blades will strip down to finest wire provided sufficient insulation thickness. Strips multiple wires of same gauge with one stroke using parallel flat blades. *Order blades separately; contact your local Newark sales office.*

NEW

2211

Erem® ERGONOMIC CUTTERS AND PLIERS

Have less fatigue since gripping pressure is distributed over the full palm area for less effort. Fingers and thumb self-position to optimize user comfort. Feature internal springs and ESD-safe cushion grips.

Type 2212E is a 5″ universal side cutter, semi-flush with an ergonomic handle.
83F4084 Type 2212E. **Each** **53.16**

Type 2222E is a 5″ universal side cutter, full-flush with an ergonomic handle.
83F4085 Type 2222E. **Each** **53.98**

Type 2232E is a 5″ universal side cutter, super full-flush with an ergonomic handle.
83F4086 Type 2232E. **Each** **54.81**

Type 2211 is a 6½″ very fine needle-nose pliers for microelectronics with an ergonomic handle.
83F4087 Type 2211. **Each** **51.62**

Erem® CARBIDE CUTTER AND MICRO STRIPPER

Type 576TX is a 4″ tungsten carbide cutter for wires in medical electronics manufacturing. Cuts wires up to 0.20mm diameter and axially round or flat wires. Features integrated, unbreakable opening springs and soft, comfortable ESD safe grips. **Type 552S** is a unique high-precision stripping tool for fiber optics. Adjusts to wire sizes 30 to 40 AWG, including stranded wires. Strips any type of insulation, fiber optics, Teflon® and Tefzel®, without scratching the cores.

83F4089 Type 576TX Wire Cutter. **Each** **128.62**
83F4090 Type 552S Micro Stripper. **Each** **111.98**
(36277) (ne36277)

Erem® MICRO TOOL KIT FOR FIBER OPTICS

This versatile kit includes: a **type 552S** stripping tool, **type 646** micro bending/holding plier, **type 2ASA** soft, rounded-tip tweezers, **type 32ASA** 2mm tweezers, **type 599F0** Kevlar® silk cutter, **type 510E** outer plastic insulation stripper, **type 512EF0** side cutter for cutting cable insulations, cable, ribbons, fibers, and Kevlar®.

83F4088 Type V200F0. **Each** **495.40**
(28344) (ne28344)

503E 582E 570E

Erem® TIP CUTTERS

Choose by size, form, and cutting style: semi-flush blade for general use, flush blade for accessibility, super full flush for precision cutting of soft wires.

Stock No.	Type	Description	Blade Length	1-4	5-9
96F9439	503E	4¼″ angled head; oblique nipper; full flush	.394″ (10mm)	**109.06**	**104.70**

PRECISION CUTTERS AND PLIERS

DIAGONAL CUTTING PLIERS

MS54 MS549J GA54J

These cutting pliers are constructed of forged alloy steel, precision machining and scientific proportioning. Handles are designed to fit the hand comfortably and to provide maximum leverage. Cleanly machined and aligned jaw grip tightly and securely for easy cutting. Featured in both cushion and puffy grip.

CORDLESS DRIVER KIT

NEW

Ideal for driving and removing all types of fasteners. Includes driver, 3.6V NiCad battery, charger, 1 slotted bit, 2 Phillips bits, and a 99PA adapter for **99® series** bits. **Type XP1B** 3.6V NiCad battery sold separately.

83F4091 Type XP1 Cordless Driver Kit. **Each** . **139.31**
83F4092 Type XP1B 3.6V NiCad Bty. **Each** **31.39**
(28342) (ne28342)

TOOL KIT FOR CORDLESS SCREWDRIVERS

Type 99-PA-50. 12-piece tool kit for use with cordless rechargeable screwdrivers features **99 Series** screwdrivers and nutdrivers. Includes cordless screwdriver adapter and pouch.

TYPE 99-PA-50 KIT CONTAINS:

(1) 3/16″ Stubby Nutdriver
(1) 7/32″ Stubby Nutdriver
(1) 1/4″ Stubby Nutdriver
(1) 9/32″ Stubby Nutdriver
(1) 5/16″ Stubby Nutdriver
(1) 11/32″ Stubby Nutdriver
(1) 3/8″ Stubby Nutdriver
(1) 3/16″ Stubby Slotted Screwdriver
(1) 1/4″ Stubby Slotted Screwdriver
(1) #1 Stubby Phillips Screwdriver
(1) 2 Stubby Phillips Screwdriver
(1) Cordless Screwdriver Adapter

50F1844 Type 99PA50. **Each** **24.0**

Xcelite®

STRIPPERS AND CUTTERS

COAXIAL WIRE STRIPPERS

Strip cable in two or three steps by revolving the closed cassette around the cable. Remove dielectric, braid and outside insulation simultaneously or separately. Note: 3-step models are not recommended for cable with hollow (RG 62) or foam dielectrics; 2-step model should be used instead. **CSK series** full kits come with four V-blocks to handle cable sizes from 0.10-0.30″ (2.54 - 7.62) (RG 178 to RG6). Along with cassette indicated, include hex wrench to adjust cable size and instructions for most applications. **CS series** pre-adjusted models are designed for cables 0.19-0.25″ (4.83 - 6.35) (2-step: RG 58, 59, 62; 3-step: RG 58 and 59 only). Come with hex wrench to adjust to other size cables. *Order replacement cassettes below.*

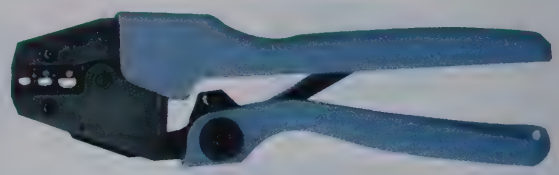
ERGONOMIC CRIMPERS



ECP100

Type EC000 ErgoCrimp® ergonomic crimper features a patented design for greater mechanical gain. The benefit of increased mechanical gain is significantly lower handle force, which results in elevated productivity and fewer work-related injuries, such as carpal tunnel syndrome. **Type ECP000** ErgoCrimp Plus® is the same, with 12-20% greater mechanical gain than **type EC000**. ErgoCrimp® and ErgoCrimp Plus® are available in the following frame/die set combinations:

Stock No.	Type	Description	Each
92F2617	ECP100	ECP000 Frame & D-100 Die Set for 22-100 AWG Red, Blue, Yellow Insulated Terminals	**172.19**
92F2618	EC102	EC000 Frame & D-102 Die Set for RG58, RG59/62 AU BNC/TNC Coaxial Connectors	**157.19**
92F2619	EC108	EC000 Frame & D-108 Die Set for 30-20 AWG Open-Barrel and D-Sub Contacts	**157.19**
92F2620	ECK1T	Crimping Tool Kit Includes EC000-D102/RG58-59, 3CS Coaxial Wirestripper, ESP-4 lamp Cutters, 20 pc. Amphenol Quick-Crimp BNC Connectors, Plastic Case	**323.54**

(5651) (de04094)

BNC TERMINATION KIT

Kit contains **MIC-Series** coax crimping tools, **type 3CS** coaxial wirestripper, and **type ESP-4** cable cutter, all in a plastic case. Plus, 20 pieces Amphenol Quick-Crimp BNC connectors.

Stock No.	Type	Description	Each
46F4191	5859KC	RG 58 and 59 BNC Kit.	**324.33**

(5708) (de52552)

CABLE WIRE STRIPPING TOOL

Type 2CSK-CATV does cutting and stripping in one operation. Ideal for the cable TV installer, homeowner or hobbyist. Prepares RG59 or RG6 CATV coaxial cable for CATV "F" connectors. Replaceable cassette cutter lasts for 1,000 to 2,000 strips. Comes with built-in belt clip and wire strip gauge.

66F9481 Type 2CSK-CATV. **Each** **9.54**
(5757) (ne06225)

COAXIAL CRIMPERS

MAC-8259 crimps BNC/TNC coaxial connectors for both Belden 8281 and RG 59 coaxial cables. Ideal for audio, video and broadcast applications. 50,000 cycle guaranteed life span.

50F1816 Type MAC-8259. **Each** **158.01**
(5710) (de52555)

FLAT CABLE CUTTER

Cuts across all conductors up to 64 positions. Built-in guide for square cuts. Aluminum inlay in anvil eliminates need for anvil replacement. Single-piece solid blade. Length of cut: 3.2″ (81.28). Overall length: 10″ (254.00). Cuts undercarpet electrical cable up to 4 positions.

46F4182 Type 64-FCC. **Each** **138.22**
(5707) (de52551)

MAXI-CRIMPERS

Mechanical crimping tools have straight jaws. Handle spread at gripping points: 4½″. **Type MAC-2210** crimps insulated terminals 22-10 AWG.

Stock No.	Type	Description	Each
46F4190	MAC-2210	Insulated Terminals 22-10 AWG	**119.05**

(5711) (de52556)

ADJUSTABLE WIRE STRIPPERS

100-X, 101-S

103-S

Cushion grips. Cut two strips both solid and stranded wire.

Stock No.	Type	Description	Each
35F246	100-X	Adjustable Screw Stop	**7.94**
35F247	101-S	Spring Handles	**10.14**
35F248	103-S	Cam Stop Adjustable	**12.36**

(5698) (de52386)

HARD WIRE CUTTERS

Types 134CG and **134CGV** are made from hardened steel and are ideal for cutting spring or hardened wire. Shear cutting action for square cuts. Patented hold-down mechanism captures wire on both sides of the cut. Cuts up to 0.062″ music wire and 1/16″ stranded wire.

66F7823 Type 134CG. **Each** **38.74**
(5756) (ne06224)

SOCKET TYPE SCREWDRIVER SETS

Types 99PS-40 and **99PS-40BP** contain one regular handle (99-1), one extension (99-X5) and nine blades: 0.050″, 1⁄16″, 5⁄64″, 3⁄32″, 7⁄64″, 1⁄8″, 9⁄64″, 5⁄32″, 3⁄16″. In clear plastic stand-up case.

34F339 Type 99-PS-40. Standard Allen Hex Socket. **Each** **46.32**
35F208 Type 99-PS-40BP. Ballpoint Allen Hex Socket. **Each** **69.79**

Type PS-89 is a screwdriver set for hex socket screws. Plastic-handle shafts come in sizes 0.028″, 0.035″, 0.050″, 1⁄16″, 5⁄64″, 3⁄32″, 7⁄64″, 1⁄8″. Also includes torque amplifier handle in a clear, hard plastic stand-up case.

35F1432 Type PS-89. **Each** **27.84**

COLOR-CODED NUTDRIVER SETS

Type HS6-18. Ten hollow shaft nutdrivers with color-coded plastic handles and hex openings 3⁄16″, 7⁄32″, 1⁄4″, 9⁄32″, 5⁄16″, 11⁄32″, 3⁄8″, 7⁄16″, 1⁄2″, 9⁄16″. In sturdy, hard plastic case.

34F376 Type HS-6-18. **Each** **63.57**

Type 157. Seven solid shaft nutdrivers with color-coded plastic handles and case-hardened sockets. Sizes: 3⁄16″, 1⁄4″, 5⁄16″, 11⁄32″, 3⁄8″, 7⁄16″, 1⁄2″. In plastic zipper case.

46F2588 Type 157. **Each** **38.90**
(5806) (ne53105a)

SCREWDRIVER & NUTDRIVER SETS

PS-120

Type 127TB. Seven solid shaft nutdrivers with color-coded plastic handles and case-hardened sockets. Sizes: 3⁄16″, 7⁄32″, 1⁄4″, 9⁄32″, 5⁄16″, 11⁄32″, 3⁄8″. In hard plastic, black molded tray.

34F366 Type 127-TB. **Each** **35.31**

Type PS-120 nutdriver set contains 10 color-coded plastic-handle shafts, sizes 3⁄32″, 1⁄8″, 5⁄32″, 3⁄16″, 7⁄32″, 1⁄4″, 9⁄32″, 5⁄16″, 11⁄32″, 3⁄8″. Also contains a torque amplifier handle in a clear, hard plastic stand-up case.

34F336 TypePS-120. **Each** **37.56**
(5807) (ne53105b)

PERSONAL COMPUTER REPAIR KIT

Type 99-SPC. 13-piece kit for making PC repairs features anti-static tools to protect chips from damage due to electrostatic discharge. Fits securely in a roll-up pouch.

TYPE 99-SPC KIT CONTENTS

Description	Type
(1) #0 Phillips	99-820
(1) #1 Phillips	99-821

4-IN-1 SCREWDRIVER

Industrial-grade, highly polished, chrome-plated tube. Square handle design for extra comfort. Tip sizes: #1 Phillips, #2 Phillips, 3/16″ standard, and 1/4″ standard.

10N260 Type 1406. **Each** **5.99**
(19254) (ne11092)

5-PIECE CUSHION SCREWDRIVER SET

NEW

Screwdriver blades are milled from chrome vanadium steel for strength and durability. Blades are securely anchored deep into the handle. Cushion grip handle reduces fatigue. Cushion material covers acetate handles and resists most chemicals and temperatures. Set includes phillips head #2 x 4″, square blade 1/4″ x 4″, round cabinet blade 3/16″ x 6″, round cabinet blade 1/4″ x 6″, standard blade 5/16″ x 6″.

84N2627 Type SPC4593. **Each** **29.99**
(32784) (ne32784)

6-PIECE CERAMIC ADJUSTER SET

Allows correct adjustment of capacity without changing the Q factor even in high-frequency range, low dielectric loss and fine turnability. Will not cause any electromagnetic induction or eddy current loss in high frequency. Excellent heat and electric insulation. Nonmagnetic, nonstatic and nonrusting blades. Suitable for use in clean rooms as blades are contamination-free. Highly resistant to strong acids except hydrofluoric. Total heat resistance up to 1000°C. Extremely low thermal conductivity. Solder and silver cannot adhere to surface. Sizes (tip x blade length): Ø 0.9 x 15mm, 1.3 x 15mm, 1.8 x 15mm, 2.6 x 15mm, PHO x 15mm, PH 1.7 x 15mm.

92N3665 Type 1384. **Each** **64.12**
(19255) (ne11093)

SCREWDRIVERS

8545-0915

Screwdrivers feature large, rounded grip handles. Blades are cross-ground chrome vanadium steel. Meet federal specification GGG-S-121E. **Type 1404** includes all sizes except 1/4″ x 1 1/2″ *Lifetime warranty.*

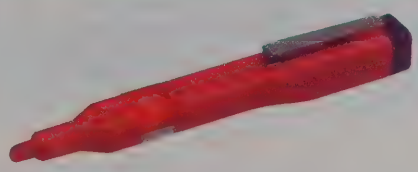
(19256) (ne11093)

CIRCUIT ALERT™ AC VOLTAGE TESTER



Non-contact voltage tester detects AC voltage through a fully insulated probe tip without the risk of contacting live electrical wires. Dual audible (beeping) and visual (flashing) indicators signal the presence of AC voltage. Tests from 50-600VAC. Ideal for locating breaks in wires and voltage at receptacles, switches, and motors. Quickly locates the hot and neutral terminals in any receptacle. Built-in "safe-test" feature indicates tester and batteries are operating properly. UL listed.

92N4750 Type 2557. **Each** **14.98**
(16531) (ne10138)

NUT DRIVER SET

8545-0921

Nut drivers have large, striped easy-grip handle in industry standardized colors. SAE set features sizes: 3⁄16″, 1⁄4″, 5⁄16″, 11⁄32″, 3⁄8″, 7⁄16″, and 1⁄2″. Metric set features sizes: 5, 6, 7, 8, 9, 10, and 11mm. Both sets come in durable vinyl pouch. *Lifetime warranty.*

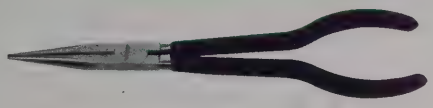
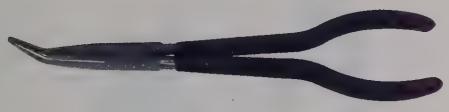
11″ LONG REACH PLIERS

NEW



SPC4613



SPC4614

Forged from quality alloy steel for dependable use. Extended length permits access into small confined areas. Great for automotive and HVAC/R service work. Available in straight, 45° bent nose and as a set. Lifetime warranty.

Stock No.	Type	Description	Each
84N2647	SPC4613	11″ Straight Nose	**19.99**
84N2648	SPC4614	11″ 45° Bent Nose	**19.99**

LOCKING GRIP PLIERS

NEW

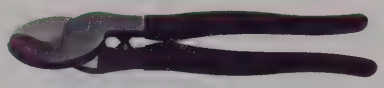
Jaws are crafted from heat treated chrome vanadium steel then nickel plated. Jaw capacity of ¾″, 7″ long. Serrations on upper and lower jaws hold material without slipping. One hand quick-release lever for easy unclamping. Adjusting knurl with lock nut for jaw tightening and loosening makes repetitive use easier. Lifetime warranty.

10N257 Type 1403 **Each** **17.59**

(32773) (ne32773)

CABLE CUTTERS

NEW



Cut cable easily with 9½″ cable cutters. High-leverage design allows for significant cutting capability. Cable gripping, shear-type jaws cut up to 4/0 aluminum (not ACSR), 2/0 soft copper, and 100-pair/24 AWG communication cable. Lifetime warranty.

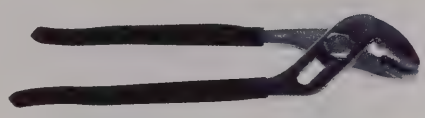
84N2652 Type SPC4618 **Each** **24.99**

(32772) (ne32772)

ADJUSTABLE PLIERS

NEW

8545-0914



1402

Drop forged chrome vanadium steel contruction for maximum strength. Precision machined for smooth, dependable performance. **Types 1402, SPC4588** patented spring load design improves control, comfort, and reduces fatigue. Nickel chrome plating resists rust and corrosion. Textured safe grip handles provide comfort and non-slip performance. Lifetime warranty.

(32776) (ne32776)

MAGNETIC SOCKET INSERTS

High-strength magnet composed of 3 materials, boron, neodymium, and iron. This combination makes a durable, long-lasting magnet. To resist rust and corrosion, each magnet is nickel plated. Specially designed plastic cover allows insert to fit securely into any 6- or 12-point hex socket. Magnet never touches the socket, so it never magnetizes the socket or work area. SAE 9-piece set includes: 3⁄8″, 7⁄16″, 1⁄2″, 9⁄16″, 5⁄8″, 11⁄16″, 3⁄4″, 13⁄16″, 7⁄8″. Metric 10-piece set includes: 10, 11, 12, 13, 14, 15, 16, 17, 18, and 19mm.

Stock No.	Type	Description	Each
84N2624	SPC4590	9-Piece SAE Set	12.99
84N2625	SPC4591	10-Piece Metric Set	12.99

(32783) (ne32783)

CRIMP TOOL

Features cushioned-grip handles, wire cutter, and thin nose for use in confined spaces. Designed for insulated and uninsulated connectors (10-22 AWG).

84N2646 Type SPC4612. **Each** **19.99**
(32781) (ne32781)

ADJUSTABLE WIRE STRIPPER

This wire stripper and cutter is suitable for all commonly used insulated wires. All cutting surfaces are ground to provide smooth shearing action. Adjusting stop on gripping handles permits adjustments for wire sizes.

84N1038 Type 3613. **Each** **3.05**
(32778) (ne32778)

CABLE STRIPPER

Used for both end-or center-stripping of coaxial and power cables from 1⁄4″ through 3⁄4″, O.D. Strips insulation up to 5⁄32″ thick, including PVC, rubber, neoprene, Teflon®, polyethylene, nylon, kapton, fiberglass, fabric, and others.

92N3780 Type 2042. **Each** **27.43**
(32779) (ne32779)

6-PIECE 1⁄4″ SPLINE DRIVE MULTIANGLE RATCHET SET

6 piece 1⁄4″ spline drive multiangle ratchet set performs an infinite number of adjustable configurations at different angles to reach anywhere. Flexible handle allows for 180° rotational positions. Rigid extensions allow maximum torque and extended reach without adding operating depth to the wrench. Precision milled from chrome vanadium steel; nickel chrome plated for protection against corrosion. Easy to clean. Set includes: 1⁄4″ drive reversible ratchet head, 8 1⁄2″ flex handle, 2″ extension, spline drive adapter, and 2 uniquely designed reversible offset joints (2 1⁄4″ and 4″). Lifetime warranty.

84N2653 Type SPC4619. **Each** **79.99**
(32782) (ne32782)

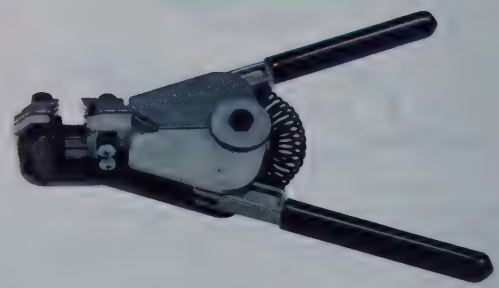
WIRE STRIPPERS

Designed for greater comfort. Features precision form-ground, knife-type blades and easy-to-see painted wire-gauge markings. These strippers also have a versatile plier-type nose and custom-cushioned grips.

Stock No.	Type	Description	Each
92N3777	2039	8-16 AWG Stranded	13.45
92N3781	2043	10-20 AWG Stranded	11.39
92N3776	2038	16-26 AWG Stranded	13.45

(32777) (ne32777)

WIRE STRIPPER



Designed to handle a wide range of stripping requirements. Suited for industrial, commercial, residential, branch circuit wiring, automotive, radio, telephone, and instrumentation applications. Cast of 100% zinc to be corrosion resistant, lightweight, and durable. Sturdy die-cast frame provides long, trouble-free life. One-step stripping action for increased productivity. Spring-action mechanical advantage increases leverage and reduces operator fatigue.

92N3782 Type 2044 **Each** **30.02**

VACUUMS AND TOOLS

STATIC CONTROL VACUUMS

2033

2335

Omega vacuums are statically controlled with conductive construction to prevent shocks to operators and damage to sensitive electronic components. Disposable 0.3-micron filter canister is for use on toner, developer, dirt, dust, mold, pollen, soot, paint pigments, and other dry materials. Water lift: 30″ open and 50″ sealed. **Type 2033** is UL listed, CSA certified; **type 2035** is TUV approved, CE compliant. Junior vacuums are lightweight and compact and are designed to control electrostatic discharge. Feature two 0.3-micron filtration systems: a disposable anti-dump canister filter and a new bag and shell filter combination. Water lift: 10″ open and 14″ sealed. Replacement filters, designed with 0.3-micron concentrated weave for removing small particles, are perfect for use on laser printer toner and sensitive equipment such as disk drives. 3-year warranty.

(19126) (ne11067)

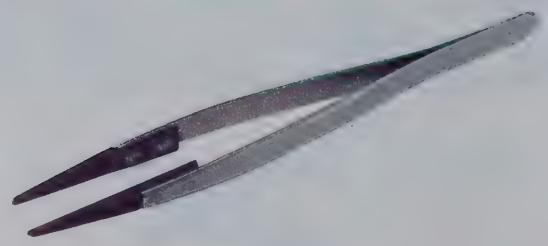
CERAMIC TWEEZERS

Ceramic tweezers are lightweight and feature zirconia ceramic tips attached to an aluminum body. Solder does not adhere to their surface. Six times harder than stainless steel. Free from all metallic contamination, and can be subjected to microwaves for sterilization.

Stock No.	Type	Length	Each
92N3619	1338	5¼″ Body, Tip length 1¼″	118.98
92N3620	1339	5⅜″ Body, Tip length 1⅝″	118.98

(19127) (ne11068)

SOFT TIP TWEEZERS



Antimagnetic, antiacid stainless steel grips, with Carbofib tips. Fully ESD safe, yet nonscratching. Conductive synthetic fiber tips are ideally suited to handle delicate and fragile components when extreme care and ESD safety are an absolute necessity. Every tweezer is manually finished and tested for maximum precision. Temperature resistant up to 520°F (270°C).

Stock No.	Type	Description	Tip	Each
92N3617	1336	5″ (130), Carofib tweezer	Sharp/Fine	46.53

(19128) (ne11069)

PLASTIC STATIC DISSIPATIVE TWEEZERS

1351 1352

1353 1354 1355

Ideal for handling semiconductors, silicone chips and delicate wafers. Static dissipative and conductive tweezers are ideal for use with sensitive components where ESD damage is a concern. Overall length: 4½″/(115). Heat resistant up to 428°F (220°C). Tips do not spread under pressure. Acid-resistant. Nonmagnetic. No contamination. Black. Surface resistivity: 3 to 4.5 x 10^5 OHM/SQ (static), 1.5 to 4.5 x 10^2 OHM/SQ (conductive). Transversal resistivity: 1.5 to 2.5 x 10^5 OHM/SQ (static), 1.5 to 6 x 10^2 OHM/SQ (conductive).

WIRE-BENDING SCREWDRIVERS

NEW

The wire-bending screwdriver offers an easy way to bend, loop, and connect solid wire. A metal stud on grip makes it easy to bend a loop in No. 10, 12, and 14 AWG solid wire (**type 603-3B** bends only 12 and 14 AWG). Features: black oxide Phillips or cabinet-tip, heat-treated and chrome-plated steel blade, a cushion-grip to resist slippage and greater torque with maximum user comfort. Tip-Ident® at top of shaft identifies screwdriver tip and metal stud.

COAXIAL CABLE CUTTER

NEW

Offers precision and capacity for shearing and preparing up to 0.75″ trunk and feeder cable. With one-hand shearing action, cable-gripping jaws quickly score the jacket and insulation, and easily cut through the inner conductor. The blades will cut up to 0.75″ aluminum and copper coaxial cable without compression and frayed ends. Features a forged body with heat-treated and precision-ground steel blades to withstand frequent cutting. The hot-riveted design requires no adjustment while maintaining a smooth, precise operation. Compact 8¼″ (216) and lightweight design. Plastic-coated handles for comfort and gripping power.

48F2506 Type 63028. **Each** 35.22
(35470)

GENERAL PURPOSE TWIN-LEAD TESTER

NEW

Tests voltage in 90-250V range, AC or DC. Neon lamp glows indicating live circuit. The 5″ (127mm) test leads have probes on the ends. Has handy pocket clip.

98F8351 Type 69168-116. **Each**..... 1.35
(35472)

4-IN-1 SCREWDRIVER

NEW

Versatile screwdriver with interchangeable, snap-in blades. Tool supplied with four different tips on two reversible blades that fit snugly into hex-shaped machined shaft. Shaft snaps into full-size handle, so all four tip sizes are contained in a single screwdriver. Overall length with blade installed is 7 ⅞″ (194mm).

98F6083 Type 32460. **Each** **37.76**
(35471) (ne35471)

HAND TOOLS AND KITS

TOOL KITS

70260

70390

Type 70260 47-piece precision kit includes: 7 hollow-shaft nutdrivers, wire stripper/cutter, crimping tool, continuity tester, RF tester, test leads, 32 assorted screwdrivers and pliers, folding hex key set, tapping tool, spring tool. Two pallets fit into black, simulated-leather molded attache case.

34F352 Type 70260. **Each** **677.59**

Type 70390 36-piece professional kit includes: 7 hollow-shaft nutdrivers, 1 full-sized handle with 10″ extension and 20 snap-in blades, slotted and Phillips offset drivers, 2 screw-holding drivers, #0 Phillips driver, 6 pliers, 4″ adjustable wrench, wire stripper/cutter, crimping tool, continuity tester, zippered vinyl case.

65F1111 Type 70390. **Each** **417.50**
(5712) (de52772)

INSULATED TOOL KITS

33527

33526

Heavy-duty tools feature double-layer, 1000V insulation. All have large, impact resistant, bright-orange handles with integral hand guards. Comply with IEC 900 insulate tool standard.

33527 GENERAL-PURPOSE TOOL KIT

Comprehensive, 22-piece insulated assortment includes: 7 cutting pliers, 9 screwdrivers, 2 pump pliers, a wire stripper/cutter, cable cutter, lineman's skinning knife and crimping tool. Rugged, bright-yellow case has 2 pallets, combination lock and 2 key-locked latches.

97F8337 Type 33527. **Each** **1417.62**

33526 BASIC TOOL KIT

Versatile, 8-piece insulated kit contains: 3 cutting pliers, 3 screwdrivers, cable cutter, wire stripper/cutter. Durable, black Cordura® zipper case.

97F8336 Type 33526. **Each** **541.19**

WIRE AND CABLE TOOLS

D'versiBIT® FLEXIBLE SHAFT DRILL BITS

A SERIES B SERIES C SERIES

D'versiBIT® drill bits come in a variety of sizes and 3 different styles: auger bits (**A series**); combination bits with screw points (**B series**); and combination bits (**C series**). **A series** auger wood-type bits with screw points pull themselves through wood and avoid walking or skidding. For drilling soft woods or through thin sections. **B series** combination bits with screw points can be used in many applications. Screw points are for easy starting and pulling through wood. With screw point removed, these bits can be ground to function like a standard combination bit. **C series** combination bits are for drilling in wood and light sheet metal. Designed for installing wire or cable inside existing walls. *For information on the D'versiBIT® placement tool on this page.*

12-PIECE SWISS FILE SETS

33-908/33-909

GROBET-SWISS FILE SETS

12-piece chrome-alloy steel needle file sets. Round handles. Size: 6¼″ length 3″ cut. Sets contain 1 each: Barrette, Crossing, Equalling, Half-Round, Round-Edge, Joint, Knife, Marking, Round, Slitting, Square, Three-Square and Warding, plus case.
93F7798 Type 31.679-0CUT (0 Cut). **Each** ... **103.01**
93F7799 Type 31.680-2CUT (2 Cut). **Each** ... **103.01**

TELL-SWISS ECONOMY FILE SETS

12-piece Tell® needle file sets feature chrome-alloy steel. 5½″ length, 3″ cut. Plastic pouch. Medium or fine cut.
93F6310 Type 33.908 (Medium). **Each** **39.10**
93F6311 Type 33.909 (Fine). **Each** **42.69** (de50996)
(5668)

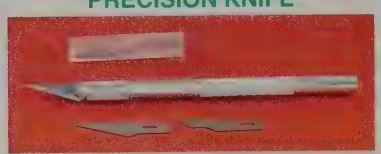
20-PIECE DRILL BIT SET

Miniature carbon steel twist drills, #61 (0.013″) to #80 (0.039″).
44F3036 Type H177. **Each** **30.80** (de50998)
(5669)

DELUXE KNIFE & TOOL SET

Aluminum mitre box, sander, #1, #2 and #5 knives with 20 assorted blades, razor saw, screwdriver, pinpoint stylus.
81F5804 Type H-866. **Each**..... **42.75** (de50999)
(5670)

PRECISION KNIFE



H111

Lightweight knife with 3 blades. Lock grip collet.
34F1286 Type H-111. **Each**..... **5.55**

8 assorted refill blades, nos. 11 & 16.
34F1287 Type H-111A. **Each** **4.62** (de51000)
(5671)

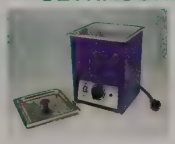
SPECIALTY KNIVES

H-110

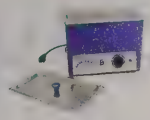
Type H110 mini utility knife. 3½″ long. 3-position double-end blade slides into handle for safe carry. Uses **type H110A** blades.
34F1284 Type H-110. **Each**..... **4.39**

Type H110A mini utility knife blades. Five double-end replacement blades for the **type H110** mini utility knife.
34F1285 Type H-110A. **Each** **3.01** (ne32077)
(32077)

ULTRASONIC CLEANERS



23 586



23 587

- **Stainless Steel Tank**
- **Automatic Shutoff Function**

Hi-frequency sound waves scrub away dirt and grease, reaching into deep recesses. Have 140°F heater and cover. Come with 8 oz. concentrate. 100W cleaning power except **type 23.586** which is 50W. 2-year unlimited warranty.

Stock No.	Type	Capacity	Tank Dimensions	Each
50F7359	23 586	½ gal.	5.5x5.0x4.0″	276.38
50F7360	23 587	¾ gal.	9.5x5.0x4.0″	546.33

(5667) (de50995)

VACUUM PICK-UP TWEEZER SYSTEM

57-650

Type 57-650 handles delicate miniature objects without scratching, breaking or pinching. Vacuum created at tip by placing finger over the control hole. Adjustable vacuum pressure: 1″ to 15″Hg. Air flow: 125 cubic inches/minute. Noiseless operation. Power: 115 VAC. System includes vacuum generator, anodized aluminum cylindrical probe, in-line filter, 4′ length of tubing, 5 stainless steel probe tips. *Order accessory set and replacement filter separately below.* Replacement probe tips are available; *contact your local Newark sales office to order.*
50F7351 Type 57.650 (System). **Each** ..... **102.**
50F7352 Type 57.651 (Filter). **Each**..... **6.5**

ACCESSORY SET FOR TYPE 57-650

Contains 8 neoprene vacuum cups which fit on probe tip to help pick up larger items. Cup diameters 3⁄16 to 5⁄8″ by 16 t
50F7358 Type 57.660. **Each**..... **23.9**
(5665)

PRECISION VIEWING PRODUCTS

H910 Binocular Magnifier. 3-dimensional viewing. Magnification: 2.5X at 11″.
81F5728 Type H910. **Each** **20.42**

Type H999 lighter headband magnifier. Work/directed lights on both sides. 3-lens system produces 4 magnifications: 2.3x, 3.7x, 4.8x. Requires 4 AAA batteries.
83F7130 Type H999 **Each**..... **41.39**
(5672)

NEWARK ACCEPTS MAJOR CREDIT CARDS.
CONTACT YOUR LOCAL NEWARK SALES OFFICE FOR DETAILS.

10-PIECE MINI-SCREWDRIVER SET

NEW

Chrome-plated vanadium steel blades with hardened tips and shafts. Ergonomically designed for rapid rotation and comfort. Set includes 3⁄64″, 1⁄16″, 5⁄64″, 3⁄32″ slotted blades; #000, #00, #0 cross points; T-6, T-7, T-8 Torx drivers. Fitted plastic case. Overall length: 4⅝″.

83F7633 Type 690. **Each** **20.67**
(32384) (ne32384)

SCREWDRIVERS AND SCREW/NUT STARTERS

S607

8081, 8082, 8083

Type S607 7-piece jeweler's screwdriver set. Nickel-plate body with screw chuck, tempered-steel blades: 0.100″, 0.080″, 0.070″, 0.055″, 0.040″, 0.025″, No. 0 cross point blade. Plastic case.

87F1157 Type S-607. **Each** **24.13**

Type 8081 Nut starter for hard-to-reach spaces. Spring-loaded chuck holds 3⁄32″ to 5⁄16″ nut sizes. 5″ knurled aluminum handle.

50F9067 Type 8081. **Each** **7.79**

Type 8082 Slotted screw starter. Spring chuck holds No. 3 to 7⁄16″ screws. 5″ handle.

50F9068 Type 8082. **Each** **8.37**

Type 8083 Cross point screw starter. Same as **type 8082** except fits no. 6 to ¼″ cross point screws.

50F9069 Type 8083. **Each** **7.79**
(5588) (de00604)

PRECISION SCRIBERS

80

83

88CM

Type 80 scriber with 2 hardened ground steel points. Knurled body. 8½″L. **Type 83** pocket scriber with reversible hardened, centerless ground point. ¼″ diameter body. **Type 88CM** tungsten carbide point scriber with magnet. Reversible point. 6″L.

93F9968 Type 80. **Each** **3.50**
34F560 Type 83. **Each** **4.02**
93F9964 Type 83P Replacement Point. **Each** ... **0.87**
93F9965 Type 88CM. **Each** **6.70**
93F9966 Type 88P Replacement Point. **Each** ... **2.81**

AUTOMATIC CENTER PUNCHES

79

87

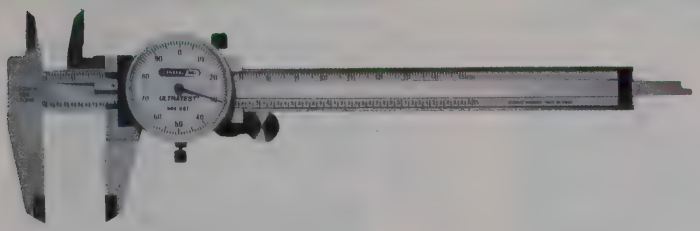
Type 79 automatic center punch. Threaded steel point and shaft. Adjustable tension.

34F565 Type 79. **Each** **23.33**
34F566 Type 79PRepl. Point. **Each** **3.00**

Type 87 pocket automatic center punch. Pencil-thin aluminum body. Alloy steel point. Adjusts for light or heavy markings.

50F9074 Type 87. **Each** **14.15**
50F9075 Type 87P Repl. Point. **Each** **2.87**
(5587) (de00603)

ULTRATEST® 6″ DIAL CALIPER

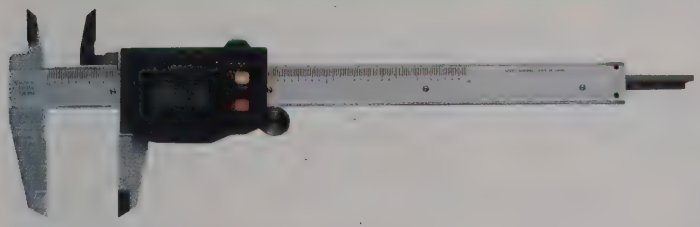


- **Accuracy: 0.001″ (0.025)**
- **Chrome Scale with 1/10 Inch/mm Graduations**
- **High-Quality Stainless Steel Body**

Covered rack protects mechanism from dirt and debris. Case included.

50F9073 Type MG-JDC6. **Each** **163.23**
(5568) (de00277)

ULTRATEST® ELECTRONIC DIGITAL CALIPER

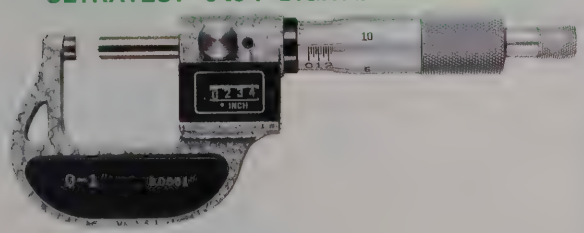


- **Inside, Outside & Depth Measurements**
- **0 to 6″ (0-152.40) Range**
- **True Inch/mm Conversion Without Rezeroing**
- **Accuracy: 0.001″ (0.025)**
- **Hardened Stainless Steel, Satin Chrome Finish**

Floating Zero function checks deviation from reference size--eliminating recalibration. Comes with fitted case and batteries. Compatible with **type MG9214** printer/calculator-*order separately.*

50F9063 Type MG8206. **Each** **384.17**
(5569) (de00278)

ULTRATEST® 0 to 1″ DIGITAL MICROMETER



- **Direct Counter for Quick, Accurate Readings**
- **Spanner Wrench & Fitted Case Included**

Carbide measuring faces microlapped to 0.0003″ flatness; 0.0005″ parallelism. Counter numerals read to 0.001″; sleeve numerals to 0.0001″.

50F9062 Type MG1010C. **Each** **204.92**
(5570) (de00280)

ULTRATEST® PLUNGER DIAL INDICATOR

- **Large 2½″ Diameter Dial**
- **Full 1″ Travel**
- **Continuous Dial Rotates–Set at Any Point**
- **Revolution Accumulator Counter**

Precision indicator offers direct–decimal two way readings left and right, and adjustable limit indicators. Lug mount is standard.

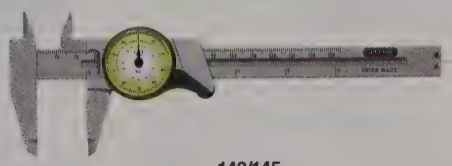
93F9957 Type MG1780. **Each** **75.25**
(5571) (de00283)

ELECTRONIC DIGITAL CALIPER

Type 143 6″ digital caliper with accurate measurements in inches and metric. Swiss precision crafted of fiberglass reinforced super polymid. Direct reading 0.001″/0.1mm. Measures outside, inside, depth, and step.

52F4957 Type 143. **Each** **89.60**
(5804) (ne09218)

DIAL CALIPERS



142/145

Type 142 reinforced plastic, 6″ dial caliper. Color-code dial in 0.01 and 64ths, mm on bar, inside/outside depth/step readings. Conversion table on back. **Type 145** same except measures in 0.001. **Type 144mm** is metric. Capacity: 0 to 150mm by 0.1mm.

87F1159 Type 142. **Each** **35.04**
87F1160 Type 145. **Each** **40.95**

PRECISION TOOL SETS

WIHA® PRECISION SCREWDRIVER SETS

Hardened and plated tool steel blades. Exact fit precision tips. Comfort tapered handle molded to blade. Finger rotation control cup.

Type 26190 7-piece set contains 4 slotted sizes: 1.5, 2.0, 2.5. 3mm. Phillips sizes: #00, #0, #1.
90F7777 Type 26190. **Each** **34.14**

Type 26090 6-piece slotted set contains sizes: 1.5, 2.0, 2.5, 3.0, 3.5, 4.0mm.
90F7776 Type 26090. **Each** **28.92**

Type 26390 7-piece metric hex set contains sizes: 0.71, .89, 1.3, 1.5, 2.0, 2.5, 3.0mm.
90F7778 Type 26390. **Each** **33.82**

Type 26391 8-piece inch hex set contains sizes: 0.028″, 0.035″, 0.050″, 1/16″, 5/64″, 3/32″, 7/64″, 1/8″.
90F7781 Type 26391. **Each** **37.80**

Type 26490 8-piece inch ballpoint hex set contains sizes: 0.050″, 1/16″, 5/64″, 3/32″, 7/64″, 1/8″, 9/64″, 5/32″.
90F7792 Type 26490. **Each** **44.41**

Type 26790 6-piece Torx® driver set contains sizes: T6, T7, T8, T9, T10, T15.
90F7780 Type 26790. **Each** **41.22**

Type 26591 8-piece inch nut drivers contains sizes: 3/32″, 7/64″, 1/8″, 9/64″, 5/32″, 3/16″, 7/32″, 1/4″. All shanks are 60mm long.
90F7791 Type 26591. **Each** **53.40**

Type 26590 8-piece metric nut driver set contains sizes: 2.5, 3.0, 3.5, 4.0, 4.5, 5.0, 5.5, 6.0. All shanks are 60mm long.
90F7779 Type 26590. **Each** **53.86**
(5774) (ne08489)

ERGONOMIC CUSHION-GRIP NUT DRIVER AND SCREWDRIVER SETS

- **Ergonomic Handle Shape**
- **Molded-On Cushion Grips**
- **Chrome-Vanadium-Molybdenum Tool Steel Blades**
- **Added Chrome Finish Protects Tips from Rust**

Type 30294 6-piece screwdriver set contains 4 slotted in sizes 4.0″, 6.5″, 8.0″, and 4.0″ stubby, and Phillips #1 and #2.
83F6424 Type 30294. **Each** **40.15**

Type 36291 6-piece screwdriver set contains 6 Torx® in sizes T6, T7, T8, T9, T10, and T15.
83F6425 Type 36291. **Each** **25.74**

Type 34792 6-piece heavy-duty nut driver set contains sizes 3/16″, 1/4″, 5/16″, 3/8″, 7/16″, 1/2″.
83F6426 Type 34792. **Each** **67.98**

Type 34791 5-piece heavy-duty nut driver set contains sizes 5.0, 6.0, 8.0, 10.0, and 11.0mm.
83F6427 Type 34791. **Each** **52.25**
(29477) (ne29477)

WIHA® PRECISION ANTI-STATIC HANDLE/INTERCHANGEABLE BLADE SETS

26997

Type 26992 10-blade combo set (20 tips) contains slotted sizes: 1.5 & 3.0, 2.0 & 3.5, 2.5 & 4.0mm. Phillips sizes: #000 & 00, #0 & 1. Hex/ballpoint sizes: 1.3, 1.5, 2.0, 2.5, 3.0. Anti-Static adjustable collet type handle in roll-up pouch.
93F6584 Type 26992. **Each** **86.51**

Type 26997 8-blade combo set (16 tips) contains slotted sizes: 1.5 & 3.0, 2.0 & 3.5, 2.5 & 4.0mm. Phillips sizes: #000 & 00, #0 & 1. Torx® sizes: T6 & T8, T7 & T9, T10, T15. Anti-Static adjustable collet type handle in fold-out box.
92F8113 Type 26997. **Each** **60.80**
(5775) (ne08490)

SYSTEM 6 SCREWDRIVER AND NUT DRIVER SETS

- **Ergonomic Handles with Nonslip Grip**
- **Interchangeable Chrome-Vanadium-Molybdenum Tool Steel Blades**
- **Microfinish Nonslip Surface**
- **Blades of Heavy-Duty Hex Material**
- **Narrow Profile Handle for Access and Visibility**

Type 10191 8-piece screwdriver set contains 4 slotted in sizes 3.0″, 4.0″, 6.0″, and 8.0″, and Phillips #0, #1, and #2. With handle.
83F6428 Type 10191. **Each** **37.90**

Type 10391 8-piece screwdriver set contains 7 hex blades in sizes 3/32″, 7/64″, 1/8″, 9/64″, 5/32″, 3/16″, and 7/32″. With handle.
83F6429 Type 10391. **Each** **37.90**

Type 10591 10-piece nut driver set contains sizes 3/16″, 7/32″, 1/4″, 9/32″, 5/16″, 11/32″, 3/8″, 7/16″, and 1/2″. With handle.
83F6430 Type 10591. **Each** **49.01**

Type 10691 5-piece nut driver set contains sizes 4.0, 4.5, 5.0, 6.0, 7.0, 8.0, 9.0, 10.0, and 11.0mm. With handle.
83F6431 Type 10691. **Each** **52.69**
(29478) (ne29478)

PRECISION TOOLS WITH ESD-SAFE HANDLE AND INTERCHANGEABLE BLADES

- **ESD-Safe Precision Handles**
- **Antistatic Storage Pouches**
- **Chrome-Vanadium-Molybdenum Tool Steel Blades**
- **Tips Machined to Exact Fit**
- **Rotating Finger Control Cap**
- **Compact and Lightweight**

Type 28096 9-piece slotted and Phillips head screwdriver set contains handle; 4 slotted tips in sizes 1.5″, 2.0″, 3.0″, 3.5″; and 4 Phillips tips: #000, #00, #0, and #1.
83F6432 Type 28096. **Each** **35.09**

Type 28087 11-piece Torx® driver set contains handle and Torx® tips in sizes: T3, T4, T5, T6, T7, T8, T9, T10, T15, and T20.
83F6433 Type 28087. **Each** **41.80**

Type 28083 13-piece driver set contains handle; metric ball-hex single-ended drivers: 1.3, 1.5, 2.0, 2.5, 3.0, and 4.0mm; slotted blades: 2.0, 3.0, 4.0; and Phillips blades #00, #0, #1.
83F6434 Type 28083. **Each** **40.68**

Type 28084 14-piece driver set contains handle; incl ball-hex single-ended drivers in sizes: 0.50″, 1/16″, 5/6 3/32″, 7/64″, 1/8″, 9/64″, 5/32″; slotted blades in sizes: 2.0″, 3.0″ and 4.0″; and Phillips blades in sizes: #00, #0, #1.
83F6435 Type 28084. **Each** 43.9
(29479) (ne2

WIHA® INSULATED SCREWDRIVER SET

VDE approved. Meets IEC 900 and ASTM F -1505 standards. Individually tested.

Type 32090 4-piece set slotted sizes: 5/64, 3/16. Phillips sizes: #1, #2.
90F7775 Type 32090. **Each** 24.7
(5776)

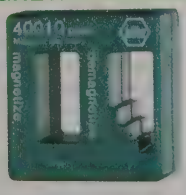
WIHA® PRECISION CHIP LIFTER

Angled fork end for pulling chips. Blade length: 50mm
93F6583 Type 26810. **Each**..... 6.72
(5626) (de0370

WIHA® 1/4″ MAGNETIC BIT HOLDER

1/4″ insulated magnetic hex drive. Chambered handle with six 1″ bits. Snap-lock rotable cap. Slotted: 3/16″, 1/4″, 5/16″ Phillips: #1, #2, #3.
90F7774 Type 38006. **Each** 20.27
(5630)

WIHA® MAGNETIZER/DEMAGNETIZER



Pocket-size magnetizer/demagnetizer. Magnetize steel tools and small parts on the job. Allows easy and precise handling in confined spaces. Collects metal items from inaccessible places.
93F1826 Type 40010. **Each** 10.14
(5762)

VISES, PRESSES AND PC BOARD HOLDERS

PC BOARD WORKSTATION COMBINATIONS

324

333

372

Type 324 combines **type 315** circuit board holder, **type 371** solder station with nib soldering iron sponges, **type 300** base and **312** tray base mount.

75F027 Type 324. **Each** **89.01**

Type 333 board holder has 8-position rotating adjustment and 6 positive lock positions in vertical plane. Offers tilt angle and height adjustment, board rotation. NOTE: Not compatible with other PanaVise® models.

75F028 Type 333. **Each** **75.14**

Type 372 combines **type 300** standard base with **type 315** board holder.

75F021 Type 372. **Each** **54.33** (5810) (de00189)

INTERCHANGEABLE HEADS FOR TYPES 300, 305, AND 380 WORKSTATION BASES

303

366

304

376

315

385 & 391

Type 303 standard head with nylon jaws, satin finish. 2.5″ (63.50) wide jaws open to 2.25″ (57.15). Fits **types 300, 305, 380** bases.

75F019 Type 303. **Each** **28.98**

Type 304 low-profile head same as **type 303** except stem is cast into rear of head to allow close positioning to work surface.

81F1160 Type 304. **Each** **35.83**

Type 315 circuit board holder accommodates boards from 0.125″ (3.18) to 12″ (304.80) wide. Fits **types 300, 305, 380** bases.

75F022 Type 315. **Each** **34.67**

Type 366 wide-opening head opens to 6″ (152.40). Molded, deep-ribbed neoprene jaw pads. Fits **types 300, 305** bases.

50F2655 Type 366. **Each** **35.83**

Type 376 self-centering, extra wide-opening head opens to 9″ (228.60); has reversible jaw pads. Fits **types 300, 305** bases.

75F031 Type 376. **Each** **48.55**

Type 385 micrometer holder with gentle delrin contact pads and ABS plastic knob. Made of die-cast aluminum body. Maximum opening between pads is 0.5″ (12.7), throat depth is 0.95″ (41.7), and post diameter is 0.625″ (16). Compatible with **types 300, 305, 376** bases.

Type 391 combines **type 385** micrometer holder and **type 305** stand.

83F7677 Type 385. **Each** **25.62**

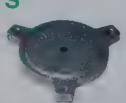
83F7678 Type 391. **Each** **44.63** (5812) (de00191)

WORKSTATION BASE MOUNTS

308

311

312



335

Type 308 cast-iron, weighted base mount weighs 5 lbs. (2.3 kg.). Includes mounting hardware, neoprene pads. Holds **types 300, 305** bases.

75F020 Type 308. **Each** **32.36**

Type 311 bench clamp base mount fits surfaces to 3.5″ (88.90) thick. Includes mounting screws, neoprene pads. Holds **types 300, 305** bases.

90F2064 Type 311. **Each** **45.08**

Type 312 base mount has 6 trays for holding small parts and tools. Includes mounting screws, neoprene pads. Holds **types 300, 305** bases.

75F026 Type 312. **Each** **24.15**

Type 335 magnetic base mount to attach vises to any metal surface. Includes 3 mounting screws to attach to compatible Panavise bases. Can hold up to 5 lbs. and is 0.4″ (10) thick. Not recommended for use around electronic equipment.

48F1706 Type 335. **Each** **20.31** (5814) (de00193)

MULTI-PURPOSE WORKSTATION COMBINATIONS

PV201

301

381

350

309

334

396

302

Type PV201 compact PVjr. workstation turns, rotates and swivels for soldering, drilling, painting, assembly. Die cast zinc base. Thermal plastic alloy jaws open to 2⅞″ (73.025) wide. Overall height: 6¾″ (171.45).

97F8324 Type PV201. **Each** **26.52**

Type 301 combines **type 303** head with **type 300** multi-position base.

75F017 Type 301. **Each** **49.70**

Type 381 combines **type 380** vacuum base with **type 303** head.

75F032 Type 381. **Each** **63.58**

Type 350 multi-purpose work center combines **type 376** wide-opening head, **type 312** tray base mount and **type 300** base.

75F030 Type 350. **Each** **86.70**

Type 309 combines **type 366** wide-opening head, **type 305** low-profile base and **type 308** weighted base mount. Includes reversible jaw pads.

75F024 Type 309. **Each** **80.92**

Type 334 combines **type 376** head, **305** base, and **308** base mount.

75F023 Type 334(PV808). **Each** **92.48**

Type 396 wide-opening vise combines **type 300** base with **type 366** head.

50F2993 Type 396. **Each** **53.17**

Type 302 combines **type 366** and **type 303** standard heads with **300** base.

50F2656 Type TYPE 302. **Each** **83.23** (5809) (de00188)

WORKSTATION BASES

300

305

380

Type 300 base holds **300 series** heads and board holders. Tilts, turns, rotates to position work. Mounting holes provided. 3.75″ H (95.25).

75F016 Type 300. **Each** **24.15**

Type 305 low-profile base same as **type 300**, except 2.5″H (63.50).

44F1306 Type 305. **Each** **24.15**

Type 380 vacuum base attaches to nonporous, smooth surfaces via a lever arm and suction pad. Same features as **type 300** base.

75F018 Type 380. **Each** **36.99** (5811) (de00190)

5-PIECE PRECISION PLIER SET

Type 12-7070 contains 5 precision stainless steel-construction pliers: micro-flat nose for work where blade thickness must be minimal. Snub-nose micro-cutting nippers trim components and soft, copper wire. Micro-round nose pliers snip tiny wires and trim solder connections. Long-nose pliers with razor-sharp blades for trimming film, insulation and plastic chassis boxes. Micro-bent nose style for multiple design, repair and micro-assembly applications. Spring-loaded handles are extra-cushioned for added comfort. Overall length 4″.

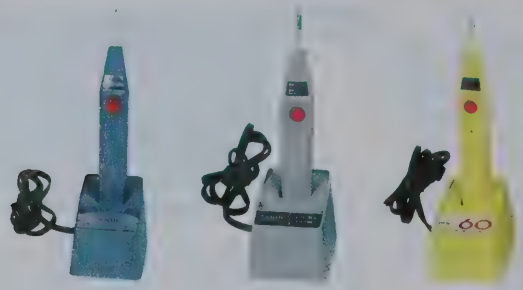
SOLDERING IRONS AND SPECIALTY TOOLS

SOLDERING IRONS AND SPECIALTY TOOLS



7904 7700 7800

All Iso-Tip rechargeable soldering irons offer: isolated tip, ground free, and low-voltage to eliminate electrical leaks and damage. Use Ni-Cad battery pack. Units heat up in 5-10 seconds, have built-in work light, lock-off switch, and tip performance to 25W or constant tip temperature of 900°F.

TYPE 7800 PRO-CHARGE (ISO-TIP 60)

Type 7800 NiCad battery-operated iron recharges in 1 hour. Automatically changes to an energy-saving trickle charging rate when battery becomes full. Also offers built-in worklight and "lock off" switch. Solders up to 125 electronic joints per charge, 20 minutes continuous. Quick recovery rate when set back into stand between uses. Kit contains iron, recharge stand, **type 7833** battery, **types 7577, 7545** snap-in tips.

Stock No.	Type	Description	Each
44F6635	7800/7840	Pro Charge (Iso-Tip 60) Kit	72.39

PEN-VAC AND PEN-VAC JUNIOR VACUUM HANDLING TOOLS

The PenVac replaces tweezers for handling many electronic and mechanical parts. The PenVac can be used on any item with a flat surface. Ideal for handling and manipulating various objects during assembly or placement operations. The ergonomically designed PenVac tool is a low cost alternative to other vacuum handling systems. Weighs less than 21g, and lifts more than 500g. Self-contained vacuum requires no hoses or batteries. PenVac is ESD safe. Two styles to choose from. Quick-change vacuum probes available separately; *contact your local Newark sales office.*

Electronic Terms and Measurements

Resistance

Opposition to current flow. Basic unit is the ohm (Ω).

1 kilohm — kΩ	1,000 or $1x10^3$ ohms
1 Megohm — MΩ	1,000,000 or $1x10^6$ ohms

Voltage

Electromotive force. Basic unit is the volt (V).

1 millivolt — mV	1/1,000 or $1x10^{-3}$ volt
1microvolt — µV	1/1,000,000 or $1x10^{-6}$ volt

Current

Movement of electricity. Basic unit is the ampere (A).

1 milliampere — mA	1/1,000 or $1x10^{-3}$ ampere
1 microampere — µA	1/1,000,000 or $1x10^{-6}$ ampere

Frequency

Number of cycles per second. Basic unit is the hertz (Hz).

1 kilohertz — kHz	1,000 or $1x10^3$ hertz
1 Megahertz — MHz	1,000,000 or $1x10^6$ hertz
1 Gigahertz — GHz	1,000,000,000 or $1x10^9$ hertz

Time

Basic unit is the second (s).

1 millisecond — ms	1/1,000 or $1x10^{-3}$ second
1 microsecond — µs	1/1,000,000 or $1x10^{-6}$ second
1 nanosecond — ns	1/1,000,000,000 or $1x10^{-9}$ second

Temperature Conversion

°C	°F
100	212
80	175
60	140
40	105
35	95
30	85
25	75
20	70
15	60
10	50
5	40
0	32

Conversion Table

Metric to U.S.	U. S. to metric
1 centimeter = 0.39 inch	1 inch = 2.54 centimeters
1 millimeter = 0.039 inch	1 inch = 25.4 millimeters
1 meter = 3.28 feet	1 foot = 0.305 meter
1 gram = 0.035 ounce	1 ounce = 28.35 grams
1 kilogram = 2.2 pounds	1 pound = 454 grams
1 milliliter = 0.034 fl. ounce	1 pound = 0.45 kilogram
1 liter = 0.264 gallon	1 fl. ounce = 29.57 milliliters
	1 gallon = 3.79 liters

Operating Life for Capacitors

Where operating life is given at a certain temperature, for every drop of 10°C life expectancy will double.

If life expectancy is 1,000 hours at 105°C
this would double to 2,000 hours at 95°C
and double again to 4,000 hours at 85°C

Products at Your Door— When You Need Them, The Way You Need Them

Newark Electronics® now offers value-added services. So when your order arrives, you can put it to work without delay.

Products Customized to Your Specifications

- **Custom-Cut Cable –** We cut Belden Infinity® and Olflex® cable to the length you need.
- **Tape-on-Reel –** Looking for surface mount and thru-hole passive components in less-than-reel quantities? We have them.
- **Kitting –** Need parts grouped in kits? We build the kits you need.
- **Bagging and Tagging –** We can bag individual parts and label the bag to your specifications.
- **Assembly –** We perform basic assembly of compatible components.
- **Part Numbers and Special Information –** We can add your bonded inventory and special receiving information about the products in your order to your shipping and packing slip.
- **Bar-Coded Shipments –** Do you use bar coding to track items? We can add bar codes to your products.

We have it today, so you'll have it tomorrow.™

"Year 2000 Readiness Disclosure"

Newark Electronics® Year 2000 Project

The Year 2000 is fast approaching and we, at Newark Electronics®, are actively working on all aspects of the Year 2000 challenge. The Year 2000 issue goes far beyond a mere computer systems problem: It is a question of serving our customers' needs.

We began to address the issue of our computer system Year 2000 compliance in the fall of 1996. At that time, we formed a Year 2000 systems team of dedicated personnel led by our Chief Information Officer. This team has the full support of our CEO and Board of Directors. In 1998, we expanded our effort to include 20 project teams to support each major function of our business and to identify and solve century date risks in our computer systems. The Year 2000 teams are in the process of upgrading our computer systems to be compliant and to continue to provide superior customer service.

We expect to successfully complete our plans before the end of 1999 without any material adverse effect on our customers.

With respect to products purchased from Newark Electronics®, and without limiting the effect of any disclaimer contained in the Newark Electronics® Terms and Conditions of Sale, we will continue to pass through to our customers the warranties extended by product manufacturers. However, as a distributor of products manufactured by other suppliers, we cannot and do not provide any additional warranties, including warranties as to Year 2000 compliance.

Further inquiries on our Year 2000 project may be sent to:

William Coole
Vice President
Newark Electronics®
4801 North Ravenswood Avenue
Chicago, IL 60640
E-mail: bcoole@newark.com

Terms of Sale

CATALOG LISTINGS

Everything listed in this catalog is available, and all specifications and descriptions are current, as of the time of publication. Product listings, specifications, availability, and pricing are subject to change without notice. Where trade literature is provided to customers, it is considered to be for reference only. Exact product specifications can be obtained from suppliers upon request. For the most current information, call 1-800-4-NEWARK (1-800-463-9275).

SPECIAL ORDERS

If an item you want is not in the catalog, we'll do our best to locate it for you. Non-catalog items may be subject to minimum quantities and/or special handling charges. Shipment will be made as quickly as deliveries are received from our suppliers. Special order products are sold on a non-cancellable, non-returnable basis. Prices are subject to change without notice.

TO PLACE AN ORDER

Call your local Newark sales office (see listing on pages A6-A7), or call 1-800-4-NEWARK (1-800-463-9275). Contact us by fax, phone, mail, or Internet e-mail. There is no minimum order amount. However, any order under $25.00 will be subject to a $5.00 service charge.

METHOD OF PAYMENT

We will take your order on an open account, C.O.D., or credit card.

Open Accounts

If your business, institution, or government agency wishes to open an account with us, call your local Newark sales office. Open account status is normally granted to well-rated organizations with three appropriate credit references and a banking history. Terms of payment are net 30 days. Please allow 24 hours to process open account applications. There will be a $20.00 service charge on all returned checks.

C.O.D.s

If your C.O.D. order total is over $1000, you must pay with certified funds (certified check, money order, or cashier's check). Please be aware that most carriers will not accept cash and require payment by check for all C.O.D. orders, regardless of the order total. If you wish to pay cash for your C.O.D. order of $1000 or less, please contact your Newark sales representative to determine whether your shipment is being delivered by a carrier who will accept cash.

Credit Cards

Newark accepts American Express®, Discover® Card, MasterCard®, and VISA®, including all MasterCard®, VISA®, and American Express® purchasing cards.

HANDLING

Newark and carrier handling charges will apply, depending on dimensional weight, size, order amount, and whether the product is a restricted article.

SALES TAX

We are required by law to charge and collect state and local sales tax. Because laws vary from state to state, please remit the correct percentage for your locality. If you wish to avoid state sales tax charges, you must have a state sales tax exemption certificate on file with Newark Electronics®. Sales tax will always be charged unless otherwise indicated. If you are using a restricted sales tax exemption certificate (per purchase order), you must submit a confirming purchase order referencing the state sales tax exemption number for all orders exempt from sales tax.

RETURNS

Returns must be made within 90 days of the original invoice date and must be accompanied by a Return Materials Authorization. Authorization may be obtained by calling your local Newark sales office. Returns without this authorization may not be accepted. Returns may also be subject to a minimum 15% restocking charge.

PRICING

Every effort has been made to be sure the prices in this catalog reflect the latest information available at the time the catalog was published. However, all prices in the catalog are subject to change without notice. For current pricing, contact your local Newark sales office at 1-800-4-NEWARK (1-800-463-9275). Prices in this catalog are in U.S. dollars.

LARGE QUANTITY QUOTATIONS OR BIDS

If you want quantities larger than the maximum amounts shown in the catalog, we will quote on them. Contact your local Newark sales office for current prices and delivery.

(Continued on following page)

Terms of Sale

SHIPMENT DAMAGE

Our merchandise is carefully packed for shipment by our distribution centers, or is prepackaged by our suppliers in compliance with carrier requirements. In the event an item is damaged in shipment, you must submit a claim to the carrier within 15 days of delivery. We advise that you unpack and inspect all merchandise immediately upon receiving it. If damage does not become apparent until the shipment is unpacked, make a request within 72 hours for inspection by the carrier's agent and file with the carrier. Any external evidence of loss or damage must be noted on the freight bill or carrier's receipt and signed by the carrier's agent. Failure to do this will result in the carrier refusing to honor the claim. For your protection, our billings include insurance for damage or loss in transit.

DELIVERY

Items are generally shipped F.O.B. shipping point. You can choose from a variety of shipment methods. For details, contact your local Newark sales office.

SHIPMENT

Same Day Shipment
In most cases, orders received by 5 p.m. CST are shipped out the same day.

48-Hour Delivery
Parcels are normally delivered within 48 hours of shipment.

Newark Now
"Newark Now" service is available for customers within 50 miles of our distribution center located in Chicago, IL, and within 100 miles of our distribution center located in Gaffney, SC. When you place an order for product currently in stock through Newark Now (Monday through Friday between 8 a.m. and 5 p.m. CST), in most cases your order will be delivered to you within 3 hours of order placement. For details, call 1-800-4-NEWARK (1-800-463-9275).

URGENT:

Airborne Express
Airborne Express 1-Day and 2nd-Day air services the 48 contiguous states, Alaska, Hawaii, and Puerto Rico.

Next Flight Out/Same Day Delivery
Available Door-to-Airport or Door-to-Door F.O.B. shipping point.

Air Freight Next-Day Service
All charges are F.O.B. shipping point.

LARGE ITEMS AND SPECIAL HANDLING:

Truck
For heavy shipments, common carrier truck is most economical. Charges are F.O.B. shipping point.

APO AND FPO SHIPMENTS:

For orders being shipped to APO and FPO destinations, call your local Newark sales office (see our sales office listing on pages A6 and A7). For all other export orders, see the international ordering information on page A8.

PRECIOUS METAL SURCHARGE

Because of the volatile price fluctuation of precious metals used in many electronic devices, a surcharge may apply on selected products. Contact your local Newark sales office for current prices.

WARRANTY AND DISCLAIMER

Since the Seller, Newark Electronics®, does not control the use of its products, there are no express warranties that extend beyond the description contained herein. **SELLER DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR ANY PARTICULAR PURPOSE. SINCE SELLER CANNOT CONTROL THE MANNER OF USE OF ITS PRODUCTS AFTER THEIR SALE, SELLER WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INDIRECT DAMAGES**. Since Seller is acting only as a distributor of products manufactured by other companies, Seller expressly limits its liabilities to any guarantees extended by the manufacturer, which guarantees Seller will pass through to the customer. No warranty will apply if its products are in any way altered or modified after delivery by Seller. Seller's products are not recommended or authorized for life support or surgical implant applications, and Buyer assumes all risk and liability in use for such applications. Buyer agrees to indemnify Seller for all damages which may be incurred due to use of Seller's products in life support and surgical implant applications.

BNC.... 156, 157, 160-163, 187, 191-195, 197, 198, 230, 232, 310, 312-315, 340, 1588, 1628
BNC Adapters.... 162, 194, 197, 234, 235, 314, 315, 345, 1555
BNC Binding Posts.... 340
BNC Breakouts.... 1579, 1585
BNC Crimp Tools.... 164
BNC Premise Wiring Tool Kits.... 163, 164
Board Mount (See PC Board)
Breakaway Headers.... 128, 220, 241, 254, 264
Breakout Boxes.... 1324, 1330, 1573
Bus Systems.... 207, 305
Butt Splices.... 1105, 1108, 1109, 1112-1115, 1119, 1122, 1123, 1125, 1127, 1130
C.... 195
Cable.... 140, 153, 188, 192, 202, 207, 301, 311, 328, 374, 375, 505, 1103, 1277, 1300, 1320, 1329, 1352, 1427
Cable Assemblies.... 120-122, 231, 236, 239, 270, 294, 300, 317, 319, 326, 328, 499, 502, 505, 706, 709, 1075, 1300, 1305, 1308, 1311, 1316-1318, 1320, 1321, 1323, 1325, 1327-1329, 1332, 1421, 1427, 1582, 1583, 1585
Cable Clamps.... 139, 142, 145, 181, 251, 258, 280, 300, 477, 1259, 1263-1265, 1391
Cable Entry Seals.... 1513
Cable-to-Board.... 127
Cable-to-Cable.... 126, 200, 277, 284, 285, 293
Cable-to-Panel.... 126, 200, 246, 277, 284, 285, 292, 293, 302, 1097
Card Edge.... 123, 131, 208, 253, 294, 302, 303, 305, 597, 706, 1075, 1079
Card Edge Cable Assemblies.... 121, 706, 1075
CATV Cable.... 196, 1352
Centronics®-Type.... 226, 1320, 1331
Chassis.... 301
Chip Carrier Sockets.... 966, 976, 982, 983
Circuit Board (See PC Board)
Circular.... 141-145, 165-186, 247-249, 278-287, 311, 1511
Circular Backshell Extenders.... 144
Circular Cable Boots.... 144
Circular Cable Clamps.... 142, 145, 181, 251, 280
Circular Coupling Rings.... 144
Circular DIN.... 141, 187, 320, 802
Circular Protective Caps.... 144, 145, 181, 283, 284, 287
Closed End.... 1130
Coaxial.... 135, 154-163, 186-198, 227, 229-237, 277, 283, 301, 308-316, 324, 340, 344, 970, 1298, 1588, 1628
Coaxial Adapters.... 159, 162, 197, 229, 234-236, 309, 314, 315, 345
Coaxial/D-Sub Combination.... 202, 274
Combination (Hybrid).... 202
Communications.... 273, 1272
Compression Lugs.... 1119, 1127
Conduit.... 374, 375
Contacts.... 129, 133, 134, 136, 137, 141-143, 145, 146, 148, 150-153, 182, 186, 202, 204, 222, 244, 250, 251, 267, 268, 274, 275, 277, 280, 283, 289, 298, 299, 304, 616-619, 752, 983
Cord.... 350, 351, 353, 356, 375, 1230, 1248, 1277, 1511
Covers.... 224, 225, 228, 277, 291, 355, 1513
CPC.... 144
Crimp Terminals.... 263-265, 267, 1112-1115, 1120
Crimp Tool Kits.... 163, 164, 227, 237, 278, 282, 1353, 1360, 1628
Crimp Tools.... 129, 133, 134, 136, 137, 141-143, 145, 147, 148, 150-153, 161, 163, 164, 182, 186, 196, 199, 204, 217, 227, 231, 237, 243, 244, 251, 263, 266, 268, 269, 274, 277, 278, 280, 282, 283, 286, 299, 304, 306, 336, 497-499, 1111, 1115, 1117, 1120, 1121, 1123, 1129, 1272, 1349, 1353, 1361, 1617, 1620, 1628, 1636, 1639
Cylindrical (See Circular)

Probe Kits. 343, 1360, 1545, 1554, 1576-1578, 1584, 1644
Probe Receptacles. 970
Probes 17, 343, 539, 618, 1347, 1411, 1535, 1537, 1539, 1540, 1542, 1544, 1545, 1554, 1555, 1563, 1567, 1573, 1574, 1576-1579, 1583, 1584, 1639, 1644
Prods. 343, 1584, 1587, 1588
Resistance Decade Boxes. 769, 792, 1570
Safety Sockets. 341
Short Locators. 1574
Soldering Iron Analyzers. 1602
Sound Meters. 1553, 1568
Spectrum Analyzers 1544, 1545, 1563
Static Control. 957, 959
Static Control Wrist Straps. 954, 957, 959
Telecom/Telephone Testers. 1347
Temperature Probes 801, 1531, 1537, 1561
Temperature Testers. 1409
Test Lead Kits 343, 1537, 1542, 1554, 1568, 1574, 1576, 1578, 1579, 1584
Test Prod Kits. 1584
Test Telephones. 1556
Thermometers 1531, 1537, 1553, 1575
Tone Generators. 1156, 1556
Tone Test Kits. 1360, 1556
Transistor Testers. 1573
Voltage Detectors 1528, 1536, 1561, 1569
Voltage Testers 1091, 1360, 1528, 1561, 1569, 1633, 1639
Wattmeters. 1570
Wire Testers. 1362
Wire Tracers. 1289, 1347, 1569
Thermal Wire Strippers. 1611
Thermistors
Chip. 799
Components. 770
Disc. 799
Epoxy. 770, 799-802
Glass-Encapsulated 770, 799, 801, 802
High-Temperature. 801
Inrush-Current Limiting. 802
Kits/Assortments. 802
Networks. 770
NTC. 761, 770, 799-802
Probes. 799, 801
PTC. 800, 802
R-T Matched. 799
Sensors. 801, 802
Surface Mount. 761, 799, 801, 802
Thermocouple Calibrators. 1409
Thermocouples
Assemblies. 1411, 1412
Bayonet Mount Adapters. 1391
Cable Clamps. 1391
Jacks. 1391, 1411
Metal Transition. 1412
Modules. 1531
Plugs. 1391, 1411
Probes. 1411
Type J. 1391, 1411
Type K. 1411
Wire. 1391, 1411, 1412
Thermometers. 1531, 1537, 1553, 1575
Thermostats. 386, 414, 533, 742
Threadlockers. 111
Thyristor Modules. 927, 934, 935
Thyristor/Diode Modules. 935
Thyristors. 874, 926, 927, 929
Tie Installation Tools 1130, 1255, 1257, 1258, 1261, 1361, 1620
Tie Kits/Assortments 1130, 1258, 1260
Tie Mounts. 1258, 1260, 1262
Ties, Wire & Cable. 1130, 1251-1259, 1261
Time-Delay Relays. 734, 735, 738-741, 744, 1444-1450, 1452, 1466, 1470, 1500
Timers
Accessories 1450, 1452, 1454, 1468, 1469
Analog. . . 1450, 1452-1454, 1468-1470
Delay. . . 1444, 1446, 1448, 1450-1453, 1463, 1466, 1469
Digital. . . 1396, 1450, 1451, 1453-1456, 1459, 1463, 1464, 1466
High-Precision. 1468, 1469
Interval. 1444, 1446, 1452, 1454, 1468-1470
NEMA 4. . . . . 1451, 1454-1456, 1459
Programmable. 1444, 1450, 1451, 1454, 1466, 1468
Recycling. 734, 741, 1466, 1469
Solid-State. 740, 741, 1470
Timing Modules. 740
Tinned Copper Braid 1173, 1249, 1607
Tip Jacks. 318, 339, 340, 342, 485
Tip Plugs. 339, 342, 1555
Tips, Soldering Iron. 1589, 1591, 1596-1598, 1603, 1604, 1607, 1609, 1611, 1650
TNC Adapters. 159, 234, 235

TNC Connectors..... 159, 195, 197, 233-235, 314, 315
TNC Crimp Tools..... 164
Toggle Switches..... 354, 989-991, 997, 1003-1005, 1008-1010, 1022, 1025, 1026, 1028, 1029, 1040-1042, 1044, 1442
Token Ring Media Filters..... 1304
Token Ring Routers..... 1291
Tone Generators..... 1156, 1556
Tool Cleaners, Ultrasonic..... 1611, 1643
Tool Storage Products
Bags/Pouches..... 1619, 1639
Boxes/Chests..... 438, 441, 443, 961, 1639
Cases, Carrying..... 432, 1619, 1654
Tools
Air Guns..... 957
Alignment..... 1601, 1649
Assembly..... 260, 287, 341
BNC Connector Removal..... 232
Burnishers..... 1646
Bushing Insertion..... 1276
Cable Strippers..... 231, 232, 1165, 1353, 1360, 1617-1620, 1636, 1641
Cable Tie Installation..... 1130, 1255, 1257, 1258, 1261, 1361, 1620
Calipers..... 1645, 1651
Capacitor Tuning..... 86
Caulking Guns..... 1656
Chip Lifters..... 1647
Circuit Trace Cutters..... 1644
Compression..... 1121
Connector Installation..... 231, 260, 296
Connector Panel Punches..... 226, 1642
Cordless Driver/Drills..... 1656
Cordless Screwdriver Accessories..... 1627, 1657
Cordless Screwdrivers..... 1627, 1632, 1656
Cordless Soldering Irons..... 1591, 1650
Crimp..... 129, 133, 134, 136, 137, 141-143, 145, 147, 148, 150-153, 161, 163, 164, 182, 186, 196, 199, 204, 217, 227, 231, 237, 243, 244, 251, 263, 266, 268, 269, 274, 277, 278, 280, 282, 283, 286, 299, 304, 306, 336, 497-499, 1111, 1115, 1117, 1120, 1121, 1123, 1129, 1272, 1349, 1353, 1361, 1617, 1620, 1628, 1636, 1639
Crimp Dies..... 199, 217, 237, 251, 1120, 1353
Cutters..... 217, 243, 1121, 1129, 1271, 1360, 1362, 1616-1618, 1620, 1624, 1626, 1628, 1635, 1637, 1639, 1641, 1644, 1651, 1655
Dental Probes..... 1610, 1637
Drill Bits..... 1640-1643, 1657
Drills..... 1650
Driver/Drills..... 1640, 1656
D-Sub Connector Application..... 136, 137, 164, 204, 299
Duct Cutters..... 1271
Duct-Notching..... 1267
Engravers..... 1261, 1619, 1655
Extraction..... 142, 143, 148, 151, 152, 204, 232, 251, 274, 280, 286, 306, 966, 976, 977, 1605, 1646
Extraction/Insertion (See Insertion/Extraction)
Fiber-Optic..... 1624, 1641
Files..... 1623, 1643, 1644, 1651
Fish Tapes..... 1619, 1642
Forceps..... 1623, 1637, 1643
Fuse Pullers..... 519, 1361
Grippers..... 1650
Hammers..... 1622
Heat Gun Accessories..... 1241, 1594, 1621
Heat Guns..... 1241, 1247, 1594, 1610, 1621
Heat Tools, Cordless..... 1621
Heat-Shrink Tubing Installation..... 1241, 1247, 1354
Hex Drivers..... 1646, 1657
Hex Keys..... 1634, 1640, 1646
Hole Saws..... 1642
IC Extraction..... 966, 1605, 1624
IDC Termination..... 260
Insertion..... 136, 141, 150-153, 186, 283, 286, 304, 477, 1276
Insertion/Extraction..... 126, 136, 137, 141, 143, 145, 147, 148, 150-152, 164, 182, 186, 225, 269, 283, 286, 299, 304, 336, 969, 977, 983, 1605, 1646
Installation..... 231, 251, 296, 1130, 1255, 1257, 1258, 1261, 1270, 1276, 1361, 1620
Insulated..... 1116, 1640
Key Punches..... 1642
Kits/Assortments
Burnishers..... 1646
Coaxial Cable Tool..... 1649
Crimp Tool..... 163, 164, 227, 237, 278, 282, 1353, 1360, 1628
Driver/Drills, Cordless..... 1627, 1656
Electronic Service Tool..... 1328, 1629, 1631, 1632, 1639, 1640, 1646, 1649, 1651
Fiber-Optic..... 1624
Files..... 1623, 1643
Hex Drivers..... 1646
Hex Keys..... 1640, 1646
Insertion/Extraction Tool..... 1605, 1646
Insulated Tool..... 1640, 1651
L-Wrenches..... 1646
Nut Drivers..... 1623, 1630, 1634, 1640, 1647
PC Repair Tool..... 1630
Pliers..... 1623, 1639, 1649, 1651
Precision Tool..... 1621, 1646, 1647
Probes..... 343, 1637, 1644
Punches..... 1642
Ratchets..... 1636, 1649
Rotary Tool..... 1655
Screwdrivers..... 1620, 1623, 1627, 1630, 1632-1634, 1639, 1640, 1644, 1647, 1649, 1651, 1656, 1657
Socket Tool..... 341, 1630, 1649, 1651
Soldering Tool..... 1589-1591, 1593-1595, 1600, 1603, 1611
Termination Tool..... 123, 164, 299, 504, 1353, 1620, 1628
Tweezers..... 1590, 1643
Wire Cutters..... 1619, 1628
Knives..... 1619, 1622, 1643
Locking Pliers..... 1622, 1635, 1639
Magnetic Bases..... 1645
Magnetic Bit Holders..... 1647
Magnetizers/Demagnetizers..... 1647
Magnifiers..... 1637, 1643, 1644, 1653
Micrometers..... 1645
Mirrors, Inspection..... 1644
Modular Jack Termination..... 1298
Modular Plug Termination..... 164, 1353
Multipurpose..... 1622
Nibbling..... 1649
Nut Drivers..... 1623, 1627, 1629, 1630, 1634, 1640, 1647
Nut Starters..... 1644
Panel Punches
Circular Hole..... 1642
D-Sub Connector..... 226, 1642, 1651
PC Board Disconnect Tab Insertion..... 477
PC Board Workstation..... 1605, 1648
PGA Extraction..... 977, 1605
PGA Insertion/Extraction..... 977, 1605
Pin Vises..... 1644
PLCC Insertion/Extraction..... 969, 977, 983, 1605
Pliers..... 292, 1622-1624, 1626, 1635, 1637, 1639, 1649, 1651
Plunger Dial Indicators..... 1645
Polarizing Wrenches..... 304, 306
Probes..... 1347, 1536, 1637, 1644
Punch Down..... 1059, 1300, 1347, 1353, 1361, 1362, 1641
Punches..... 226, 1642, 1644
Raceway Cutters..... 1271
Ratchet Offset Screwdrivers..... 1644
Ratchet Tap Wrenches..... 1644
Ratchets..... 1620, 1636
Reamers..... 1644
Relay Socket Punches..... 1642
Rivet Installation..... 1267, 1270
Riveters..... 1267, 1270
Rotary..... 729, 1655
Rotary Tool Bits and Accessories..... 1655
Round Punches..... 1642
Rulers..... 1645
Scissors..... 1622, 1634
Screw Starters..... 1644
Screwdriver Bits..... 1657
Screwdrivers..... 1089, 1620, 1622, 1623, 1627, 1629, 1630, 1632, 1633, 1639, 1640, 1644, 1647, 1649, 1651, 1656, 1657
Scribers..... 1644
Seizers..... 1623
Shears..... 1622, 1623, 1626
Soldering..... 1589-1598, 1600, 1602-1605, 1607-1611, 1613, 1650
Square Punches..... 1642
Step Drill Bits..... 1642, 1657
Tape Measures..... 1623
Telecommunication Wrenches..... 1347
Telephone..... 1347, 1353, 1361, 1362
Terminal Block Cutters..... 1089
Termination..... 123, 133, 134, 136, 164, 182, 260, 292, 296, 299, 504, 1120, 1300, 1312, 1347, 1353, 1361, 1362, 1628
Thermal Wire Strippers..... 1611
Torches..... 1621
Trimmer Adjustment..... 786, 797
Tuning, Capacitor..... 86
Tweezers..... 1555, 1579, 1590, 1600, 1625, 1638, 1643, 1644
Vacuum Handling..... 1650
Vacuum Pick-Up Tweezer System..... 1643
Vises..... 1599, 1643, 1644, 1648
Wire & Cable Cutters..... 217, 243, 1121, 1129, 1360, 1362, 1616-1620, 1624, 1626, 1628, 1637, 1639, 1641, 1644, 1651, 1655
Gauges..... 1645
Strippers..... 231, 232, 1117, 1121, 1129, 1347, 1353, 1360, 1615-1620, 1628, 1636, 1641, 1651
Termination..... 260, 1120, 1300, 1347, 1362
Tie Installation..... 1130, 1255, 1257, 1258, 1261, 1361, 1620
Unwrapping..... 1602, 1615, 1616
Wrapping..... 1275, 1602, 1615, 1616
Wrenches..... 304, 306, 1347, 1623, 1635, 1639, 1644, 1651
Totalizing Counters
Accessories..... 1450, 1463
Count/Time..... 1463, 1467, 1469
Count/Time/RPM..... 1396, 1455-1460, 1463, 1464
Electromechanical..... 1460, 1462
Electronic..... 1460
PC Board..... 1458
Preset..... 1455, 1457, 1464
Ratemeter..... 1394, 1396, 1456, 1457, 1460, 1464
Touch Screens, PLC..... 1380
Tracers
Circuit..... 1557
Wire..... 1289, 1347, 1569
Transceivers
Ethernet..... 495, 504, 1289, 1290
Evaluation Kits..... 495, 579, 901

They're rugged. They're reliable. And they're all inside.

FLUKE®

The fastest way to put a Fluke tool in your hand.

Whether it's crunch time or not, Newark Electronics® has the expertise and Fluke tools you need to get the job done, fast.

Don't be unprepared and don't use a tool you can't trust. Fluke tools are designed to take the abuse and still deliver the reliable results you require, no matter how tough the job.

You'll find a complete line of rugged, reliable Fluke test tools inside this catalog. And you'll find that, at Newark, they are as easy to buy as they are to use.

Are you ready to stake your reputation on your test tools? Demand the best in your test equipment. With Fluke, you're better equipped to troubleshoot whatever challenges come your way.

Call Newark today and see how easy and fast it is to get a Fluke test tool in your hands.

Fluke. *Keeping your world up and running.*

Call a Newark Electronics® representative today at **1-800-4-NEWARK** (1-800-463-9275) and ask about Fluke Electronic Test Tools.
